Truman Raps Tax Bureau Fund Slash

Cut Seen As Costing U. S. $400,000,000 Treasury And Post Office Bill Signed

WASHINGTON, July 1, (AP)—President Truman today signed the $12,402,485,671 Treasury-Post Office Appropriations Bill but criticized what he termed the "gross inadequacy" of funds provided for tax collection.

"The administration of the taxing statutes should never be influenced by political considerations," Mr. Truman said in a statement, adding:

"People of all political faiths are called upon to support their government through the payment of taxes and are entitled to adequate administrative controls to insure that the dishonest do not shift their share to the honest."

The total for the two departments is about $883,000,000 less than Mr. Truman asked for operations in the fiscal year beginning today. But he objected specifically to a $20,000,000 cut which he said was made in funds for the Treasury's Internal Revenue Bureau.

Mr. Truman did not elaborate on the reference to "political considerations."

In his statement announcing signing of the bill, the President said the reduction in Internal Revenue Bureau funds will mean laying off 4,000 to 5,000 employes "and will result in a direct loss of revenue of not less than $400,000,000 in the fiscal year 1948." He continued:

"There is at the present time, with present personnel, a backlog of 30,000 'leads' on tax evasions awaiting investigation."

"It will take years to restore the damage done by the failure of the Congress to support the current efforts of our tax collection agency."

Mr. Truman said the vast ma-

Shortage Of Fuel Depends On "Ifs"

WASHINGTON, July 1, (AP)—Max W. Ball said today the chances of avoiding widespread fuel shortages next winter depend upon a half dozen "ifs"—including no strikes in the steel, rail, coal and refinery industries.

Ball, who is director of the Interior Department's oil and gas division, appeared before the House Commerce Committee which is investigating the general petroleum situation.

Outlining the fuel situation ahead, Ball told the committee:

"If there are no further refinery strikes, if there is no prolonged coal strike, if the shipping strikes don't tie up too many tankers, if we get tank car construction, if there are no steel strikes and rail strikes, if, above all, there is no severe winter, then we'll get by with only spot shortages."

But, he added, "if too many of these factors go bad, then we'll have widespread shortages."

Britain Negotiating For Food Agreements

LONDON, July 1, (AP)—Food Minister John Strachey disclosed today that Great Britain is negotiating with Hungary and Yugoslavia, as well as with Russia, for large quantities of food and has hopes of making agreements that will "fit in well" with U. S. Secretary of State Marshall's aid-Europe proposals.

"It is the essence of the scheme put forward on the initiative of Mr. Marshall that Europe should help itself as a prelude to any assistance," Strachey told the House of Commons in a reply to conservatives who accused him of lack of foresight and urged that government bulk buying be abandoned.

Spouting Well Near Orlando Is Capped

ORLANDO, Fla., July 1, (AP)—Orlando's "Old Faithful" spouting well, an attraction at nearby Fairvilla since it was drilled in 1907 has been capped.

The well which shot a 300-foot stream of water into the air every 20 minutes when water levels were proper, bowed to modern sanitation yesterday.

The Orlando Utilities Commission ordered the old drainage well capped to conserve water supply and prevent possible contamination of the five lakes it drains.

70 Per Cent Payroll Increase Since 1941 Reported By City

By WILLARD CONNOLLY

A 70 percent increase in the number of city employees since 1941 is reported by City Manager H. N. Sayer. In June, 1941, there were 62 employees. Today 106 are on the city payroll.

This increase has been necessary for several reasons, one of which is the increase in population during this period. In 1940 the population was 10,217, and in 1945 was 12,479. Since 1941 the City has installed 566 new water services. This, Mr. Sayer pointed out, represents 566 more families or business places that the City has to render service to.

Another reason is the fact that the City has had to decrease the number of working hours per week for almost all employees in order to keep the employees satisfied and to hold them in the service of the City because of the standard reduction and short four week in all other types of business and governmental agencies, said Mr. Sayer.

In 1941, all foremen, truck drivers and laborers worked 10 hours per day, six days a week, and some even seven days. The City has had to reduce this to an eight hour day schedule, and to five and a half days a week. Policemen worked 12 hours a day in 1941 and now are on an eight hour shift, six days a week, which necessitates the employment of a man for an additional shift. The force has increased from eight to 17.

Firemen worked on a 48 hour on and 24 off schedule in 1941. Now they work 24 hours on and 24 hours off, which also requires additional men for one shift, Mr. Sayer pointed out. This force has been increased from six to 13.

Since 1941 new services added have required additional employees such as the civil service system, rodent control project, engineering department, zoning the City, meat inspection and the taking over of the operation of the municipal airport during the past year, he stated.

In order to meet the demands of the public for better service the following equipment has been added: three more trash and garbage trucks, motor patrol grader for improving dirt streets, additional mower for mowing weeds on parkways and corners and painting street signs and traffic lines. All of these, said Mr. Sayer, required the employment of additional personnel.

In addition to the 70 percent

Thousands Flee As Levees Break Along Mississippi

Flood Waters Continue To Rise Following Heavy Night Rains

ST. LOUIS, July 1, (AP)—New levee breaks along a 90-mile stretch of the Mississippi River forced evacuation of additional thousands today as the rampaging river, already at a 103-year peak, continued to rise from heavy overnight rains.

The town of Dupo, Ill., (pop. 2,600) eight miles south of here, was abandoned when the rising floodwaters breached a secondary levee on the Illinois Central Railroad tracks about a mile behind the first levee which was abandoned during the night.

The waters also bypassed the Missouri Pacific Railroad embankment which saved Dupo in the last big flood of 1944.

The 600 residents of nearby East Carondelet and 800 in the surrounding area also were evacuated.

Eighty miles to the south the river broke the Degognia-Fountain Bluff levee in two spots driving approximately 600 persons from the villages of Gorham and Neunert, Ill.

As a result of this break, floodwaters pouring down an inland valley threatened to isolate the town of Grand Tower, Ill., (pop 1043).

Mayor Jesse Grammer estimated about one third of Grand Tower was in danger of being flooded but said he expected residents in the higher part of the town would be able to care for those forced from their homes.

The Mississippi reached a 40.1 foot stage here at 10:00 A. M. with the Weather Bureau predicting a crest of 40.5 this afternoon. The high water marks compare with a 39.14 reading recorded in the 1944 flood which had been the highest since the 41.39 stage reached here in 1844.

Army engineers reported the new breaks probably would inundate 27,800 acres before the communities of Grand Tower, Gorham and Neunert and 2,600 acres around Dupo and might overspread the big switching yards of the Missouri Pacific Railroad at Dupo.

An earlier break today in the vicinity of Nameoki and Venice, Ill., juust south of St. Louis, threatened to spread over 5,000 acres, but the towns were not endangered. Livestock and equipment already had been removed from the newly hit areas.

Thousands of volunteers who had been working on the big Degognia-Fountain Bluff levee south of Chester, Ill., previously had abandoned hope of saving the barrier and were transferred downstream.

Staff Sergeant Dies In Airplane Crash

SHREVEPORT, La., July 1 (AP)—The Barksdale Field public relations office said today that a red flight in a B-17 was killed staff sergeant on an unauthorized early today when the plane crashed three miles south of Sibley, La.

The name of the man was withheld pending notifications of relatives. The public relations office said however the body found in the plane had been identified as that of the non-commissioned officer who was crew chief of the crashed plane.

First reports said four other men were missing but the public relations office said this was discounted by a check of B-17 personnel at the field.

U. S. Navy Has Busy Far East Schedule

TOKYO, July 1, (AP)—The U. S. Navy has just about demilitarized what's left of the Japanese fleet but it still has work to do in these waters.

Vice Admiral Robert M. Griffin, who commands United States Naval forces in the Far East, said today there still will be Japanese shipping to watch, and anti-smuggling patrols will have to be maintained along with a hydrographic office and air-sea rescue work.

The show of force in the presence of U. S. warships is not discounted, either. Griffin intends to call a halt to minesweeping operations. The Naval commander believes most of the mines not destroyed are now ineffective.

Gwynne Reel Wins Scholarship Award

Gwynne Reel, son of Mr. and Mrs. Watson Reel of 2012 Palmetto Avenue, has been awarded a scholarship at John Hopkins University, Baltimore, Md., it was announced today by Herman E. Morris, principal of Seminole High School, upon the basis of whose recommendations the young graduate of the high school was given this high honor.

The scholarship award was given on a basis of knowledge of science, personality and perseverance, said Mr. Morris. At the close of the high school term, Gwynne Reel received the Bausch and Lomb scholarship award for the highest grade in the school in the three major sciences. He expects to major at John Hopkins in chemical research.

Clay Hits Shortage Of Labor In Germany

STUTTGART, Germany, July 1, (AP)—Gen. Lucius D. Clay told minister presidents in the U. S. occupation zone today that a shortage of labor "is becoming a major problem in the rehabilitation of Germany's economy."

The American military governor charged that many Germans were getting extra food rations as heavy laborers "without actually doing the work" and suggested this might account for the manpower shortage. He said the population of the U. S. zone is 3,000,000 more than before the war, while its indstrial output is but half as great.

Clay said a record 484,000 tons of bread grain were imported into Germany last month by the U. S. and Great Britain and that $18,000,000 worth of fats were purchased to bolster the slim German rations.

L. R. Brookings, 53 Died Sunday P. M.

L. R. Bookings, 53, died of a heart attack at his home in Altamonte Springs Sunday evening. Mr. Brookings was a native of Pekin, Ill., and had made his home in Florida for 15 years. At the time of his death he was city clerk and agent for the Railway Express Company.

He is survived by the widow and three brothers in Pekin, Ill. Funeral services will be announced by Marvin-Pittman Funeral Home of Winter Park and interment will be in Pekin.

France Stops Collapse Of Paris Meeting

Formation Of Special Information Group Of Volunteer Countries Is Suggested

By JOSEPH E. DYNAN

PARIS, July 1, (AP)—French informants said today France's Foreign Minister, Georges Bidault, had delayed, at least temporarily, the collapse of the three-power conference considering American aid for Europe by offering a new proposal.

The Russian, British and French foreign ministers will meet again tomorrow afternoon, these sources said.

Today's session, the fourth held by the ministers, lasted for only an hour and a half. Before the ministers convened today there had been speculation that this might be their last meeting, since Soviet Foreign Minister V. M. Molotov virtually has vetoed the proposal for European aid advanced by U. S. Secretary of State Marshall.

However, Bidault kept the conference alive, the French said, by suggesting establishment of a special information group composed of those European countries which wished to affiliate with such a body. The organization would not intervene in the internal affairs of any of these countries, and no action would be taken which any country could consider a violation of its sovereignty.

The committee would be called on to report before Sept. 1, 1947 on Europe's balance sheet of needs and assets. Marshall had suggested in a June 5 speech at Harvard University that the United States would consider what aid it could extend to Europe if the European nations themselves agreed on an overall plan concerning what they lacked and what they could supply themselves.

Under Bidault's plan information for the "committee of cooperation" would be given voluntarily by the countries that volunteered to join the group.

Occupation commanders in Germany, the informants said, would furnish the balance sheet for that country, but every fact involved in Germany's report would have to be subject to the decisions of the council of foreign ministers and the control council.

Subcommittees of the cooperation committee would be formed

Japs Want Economic Aid, No Territories

TOKYO, July 1, (AP)—Japan wants "moral and economic assistance" but no territories from a peace conference to be held "as early as possible," Premier Tetsu Katayama told the nation's lawmakers today.

In his first administrative speech to the Diet (parliament), the new Socialist premier sternly declared the country's economy is facing "fearful crisis" and food prospects for the next four months "call for the gravest anxiety."

However, he said if Japan can surmount its economic crisis, "we should be able to join the community of nations with the benevolent assistance of the allied powers . . ."

"What we desire . . . are not territories. Instead, I would like to request the moral and economic assistance of the allied powers by demonstrating the fervent desire for stabilization of national life, reconstruction of industry and permanent world peace."

Business Leaders Meet With The President

CALLING UPON PRESIDENT TRUMAN at the White House, a group of leaders in the newspaper, radio, motion picture, book and periodical fields, asked him to support freedom of expression for all information media. Pictured (l. to r.) are (first row): Judge Justin Miller, president of the National Association of Broadcasters; President Truman and Melville Minton, American Book Publishers Council. Second row: Donald F. Nelson, Society of Independent Motion Picture Producers; William Chenery, National Book Publishers Association, and Harry F. West, American Book Publishers Association. Third row: Col. J. Hale Steinman and David Howe, American Newspaper Publishers Association. Fourth row: Paul Miller; A. D. Willard, Jr., National Association of Broadcasters, and Col. Kenneth Clark, Motion Picture Association of America. (International)

State Releases $31,322,831 For School Expenses

Pay, Transportation Okayed But Building Fund Withheld

TALLAHASSEE, Fla., July 1 (AP)—The Budget Commission today approved a $31,322,831 budget for school teachers salaries and transportation costs, but held in reserve the entire $5,056,899 fund for construction.

The school fund, even with the $2,000,000 withheld until Florida's total financial picture becomes clearer, is more than $12,000,000 above the State's record contribution for school expenses in the past year.

Money for the big school program represented more than a third of the $75,000,000 released by the Cabinet Budget Commission today as it reviewed agency and institution financial schedules for the new fiscal year which opened at midnight. A total of $10,746,000 in agency and institution appropriations were withheld as a reserve.

The board's actions today

Missing 2-Year Old Found On Mountain

LASSEN NATIONAL PARK, Calif., July 1 (AP)—Shivering in the 25-degree mountain cold, but otherwise unharmed, two and a half year old Greta Gale was found early today on the boulder-strewn sides of Mt. Harkness after a 48-hour search.

She was found just 12 hours after her grandfather, former Congressman John H. Tolan of Oakland, died of a heart attack induced by the shock of her disappearance Sunday from the Tolan summer home in this Plumas county mountain area.

Greta was found by Francis W. Keeler, 42, a state lion hunter of French Gulch, about 8:00 A. M. less than a mile from the cabin.

She was rushed to Westwood Hospital by her tearful parents, Mr. and Mrs. William Gale, Jr., for examination and treatment for hunger and exposure after two nights and a day in the mountain wilderness.

Self-Described "Maquis" Leader Gives Interview

PARIS, July 1 (AP)—A self-described leader of the "Black Maquis" said today in a clandestine interview that 25,000 armed men were ready to lead "a march on Paris at the approximate moment" to establish an anti-Communist government.

Existence of the "Black Maquis" was disclosed yesterday by the interior ministry, which announced that it had arrested leaders of the movement for plotting to overthrow the Republic and establish a "military dictatorship."

In today's interview the self-described "Black Maquis" boasted:

"For every one of us they arrest there are two to take his place."

The anonymous source talked with a reporter for five minutes on a busy corner of the Champs Elysees before disappearing down a side street.

He claimed that arrests were continuing and that "the son of an important government official" had been taken into custody this morning.

The plotters, he said, had "no direct organizational continuity" with the old secret committee of revolutionary action (CSAR), also known as the "Cagoulards" or "Hooded Ones," who were arrested on charges of plotting to overthrow the pre-war popular front government.

The self-described leader said his organization was "passionately anti-German" and was drawn "in large part from members of the resistance" during the Nazi occupation.

"Our sole object," he insisted, "is to prevent the possibility of a Communist menace to French democracy. To democracy has made many mistakes, but it is up to the French people to decide their government."

The man conceded that "some members of the organization may have been members of the CSAR at one time" but would not say whether he was one of them.

The informant would not specify where his alleged organization had its arms but said "an important center" was "the Breton Maquis, the same elements who aided your American troops to advance from Normandy." He added: "They have kept their arms."

Pardon Refused For Owner Of Dog Pack

TALLAHASSEE, Fla., July 1, (AP)—The Cabinet Pardon Board, acting on a parole commission recommendation, today declined to pardon Joe Munn, whose pit bulldogs killed a woman in Miami two years ago.

Munn was sentenced to five years imprisonment for manslaughter but has not started serving the term. Governor Caldwell said the pardon board has determined "as a matter of policy" not to judge "innocence or guilt."

He said that was the prerogative of the parole commission which turned in a report stating no further evidence had been uncovered and the judgment of the trial court should stand.

SOFTBALL TONIGHT

Mather's softball team is slated to meet the Woodmen entry in a City Softball League game tonight. Last night Robson's and Ganas Refrigeration Service team split a twin bill. Robson and Cornell were battery mates for the sporting goods team, while Dyess and Swofford worked for Ganas' team.

AFL Chief Urges Defeat Of Labor Law Supporters

16,000 Workers Idle In Layoffs Because Of Lack Of Coal

INDIANAPOLIS, July 1, (AP)—William Green, president of the American Federation of Labor, today urged Labor union members to defeat at the polls congressmen who supported the Taft-Hartley Labor Bill and indicated Labor might take a holiday on next election day.

Speaking at the national convention of the American Flint Glass Workers Union (AFL), Green said:

"The humblest worker in the land can go to the ballot box and vote and his vote will count as much as that of the wealthiest man in the nation. We've got the voters in the industrial states of the nation. We must vote as one man.

"Perhaps, if we can arrange it, we will call for a holiday on election day. We can take a holiday if they don't give us one." A burst of applause greeted this statement.

The AFL president said he had been urged to call a nation-wide strike in protest of the new labor law, but he said "this would hurt us more than it would help us."

Meanwhile, over the nation,

June Building Permits Estimated At $61,120

Building permits issued by Grady Duncan, City building inspector, during the month of June had an estimated value of $61,120 according to City records. This amount is four times the value of permits issued in June, 1946, which totalled $14,825 in estimated value.

Projects in building during the month included a $11,000 permit to the U. S. Department of Agriculture to make additions to the Experiment Station on Celery Avenue and $13,000 for erection of a concrete block restaurant at the corner of Park Avenue and Twenty-fifth Street.

Recent permits issued were: to Donald R. Jones to erect a six room concrete block home at Rose Court and Sanford Avenue at an estimated cost of $10,000, and a permit to William and Alice Tyre to erect a one story concrete block six room dwelling in the Wynwood subdivision on Mellonville Avenue at a cost of $10,000.

Over 3,000 Laid Off By Southern Railway

WASHINGTON, July 1 (AP)—The Southern Railway System reported today it has laid off "between 3,000 and 3,500 workers because of the bituminous coal miners' vacation.

A Southern official told a reporter additional workers may be laid off "if the coal supply continues to drop" before the miners' holiday ends July 8.

He said the current lay-off orders followed a "curtailment of coal hauling" and affects train and engine servicemen, mechanical and maintenance of way workers and others "throughout the railway's system."

Marshall Hits Red Attacks On U.S. Aid

4 Requirements For Protecting Use Of Relief Plan In Europe Are Listed

WASHINGTON, July 1, (AP)—Secretary of State Marshall today denounced as "malicious distortion" the charges, which have emanated from Russian sources, that the United States has "imperialist aims" in offering assistance to foreign nations.

Marshall told the Women's National Press Club in a luncheon address that "historical records clearly show that no people have ever acted more generously and more unselfishly than the American people in tendering assistance to alleviate distress and suffering."

At the same time, Marshall declared that the United States would make "demands" regarding the use of its contributions to world recovery. He laid down a list of four requirements for safeguarding the employment of American aid abroad.

Speaking at the club's ceremonies incident to the inauguration of Ruth Cowan of the Associated American people "emphatically demand" that their assistance to foreign countries should:

1. Be "efficiently used for the purpose for which it was intended."

2. Not "be expended to serve selfish economic or political interests."

3. Specifically be used "to assist in economic rehabilitation.

4. Serve "a great purpose in restoring hope and confidence among the peoples concerned that the world will know peace and security in the future."

Marshall did not refer directly to the Soviet Union by name or

(Continued on Page Eight)

Improvements Made At County Schools

Re-roofing and other major improvements are underway at the South Side Primary School, and are expected to be completed before the opening of school, Supt. T. W. Lawton announced this morning.

At the next meeting of the Board of Public Instruction, bids will be received to paint the metal roof of the Hopper Academy for colored students, he revealed.

Other school building improvements include the painting of the West Side Primary School, the roof included. Bids will be received by the Board next week for the re-roofing a large portion of the Lyman Shop building which is to be converted into a school cafeteria.

The floors of all schools are being scrubbed with an electric scrubbing machine, and are being sealed and finished, said Mr. Lawton.

County Records Are Approved By Auditor

Accounts and records of the clerk of the Circuit Court in Seminole County, O. P. Herndon, were reported in excellent condition by John F. Bergert, assistant state auditor, who recently made an audit of the Clerk's department for the State.

Reports and remittances were current and accurate, Mr. Bergert revealed. Income and expenses of the office were correctly reported. All tax certificates were properly accounted for.

Tax redemption reports and remittances were current and accurate, it was reported. Excess income has been remitted promptly. Fees charged by the Clerk appear proper and expenses reasonable for the operation of the office. Cash resources were judged as adequate to cover all liabilities.

The office will be closed on Friday, the Fourth of July, also on Saturday, Mr. Herndon said.

Sixty Are Killed In Italian Explosion

ROME, July 1 (AP)—The Italian News Agency Ansa reported that 60 person were believed killed today when ammunition exploded being unloaded from a transport ship at Porto Stefano northwest of Rome. The port is near Civiti Vecchia.

Ansa said the transport was the Italian ship Panigaglia and that it had brough the ammunition from an Italian island south of the western extremity of Sicily, which had been fortified heavily during the war.

The dead were crewmen and civilian workers.

Dick Aiken Leaves For New York To Appear In Radio Talent Show July 4

By WILLARD CONNOLLY

Dick Aiken, after singing a solo at the First Presbyterian Church Sunday morning, hurried to Orlando to catch a train and he photographed as he left for New York to compete on the Arthur Godfrey Talent show. He will be heard over the Columbia Broadcasting System on the 8:30 o'clock program Friday evening.

Accompanying him was his "Talent Scout," D. L. Smith of the Orlando Police Reserve and Mrs. Smith. The Police Reserve staged the contest at the Orlando Auditorium on Mar. 21 which gave Mr. Aiken the free trip to New York. However, since he was unable, due to his produce business, to go to New York immediately, Radio Station WDBO arranged for a recording of his voice to be sent to the sponsors with the result that he was chosen for the program.

The Godfrey show is broadcast from Columbia's Broadway Playhouse No. 4. Mr. Aiken's headquarters will be at the Commodore Hotel. Among the Sanford visitors now in New York who have written that they plan to attend the program are Mrs. Tom Bolt, Mrs. Anne McNeill and Mrs. W. R. Reitz.

Friday evening Mr. Aiken was heard with Dorothy Parks and Walter Kimble as accompanists over Station WDBO. He sang "One Alone" and "I Heard a Forest Playing." When asked by announcer Tom Sawyer how he felt about being on the Godfrey program he replied, "I'm kind of walking on bubbles."

U. S. Winding Up Business Part Of World War II

By CLARKE BEACH

WASHINGTON — Winding up a $330,000,000,000 operation like the United States' share in World War II is big business in itself, even when only the tag ends of the job remain to be done.

Uncle Sam, who has been selling things like mad for the past year or two, still is one of the world's largest real estate dealers.

The War Assets Administration has about $9,000,000,000 worth of real and personal property left in the United States. About 90 percent of our wartime holdings abroad have been disposed of, most of them to the governments of countries in which the property was situated. Our major foreign properties now are in Germany and Japan, where our occupation forces still have use for them.

Sales Continue

The property still owned in this country is about one-half real estate and one-half personal property. Officials expect to sell nearly all the personal property by next January. Some of the real estate will be sold or leased by then, but it is believed that much of it will still be left on the government's hands.

Army and Navy Munitions Board officials say that about 100 war plants will be held by the government permanently and that about 150 other war plants are now for sale or lease under a recapture arrangement by which the government will be able to get them back in case of emergency.

Of the 100 plants to be kept, about 40 are held by the War Department. They are to be leased to private industry in whole or in part. Deals already have been concluded for 10 of them. The Navy is holding about 44 plants. About 12 of these have been leased, and the Navy Department is considering leasing the remainder.

Lend-Lease Problems

The lend-lease phase of the war operation, which involved about $50,000,000,000, is being cleared up in relatively minor, million-dollar lots. When lend-lease was terminated we arranged for many of the governments concerned to receive the goods contracted for and extended them long term credit. Some of these orders have yet to be filled.

All major countries except Russia have agreed on settlements of their lend-lease accounts. The terms agreed on in nearly all cases provided that the U. S. absorb the cost of military items and that the countries concerned pay for the civilian goods still on hand and usable. Russia recently informed this government that she was ready to discuss terms.

Straightening out the vast legal tangle created by the lend-lease patent interchange agreements, however, is expected to provide work for many years for lawyers and engineers in both Britain and the United States.

Each nation was permitted to use each other's patents without restriction while lend-lease lasted, with the understanding that claims of patent owners would be met after the war.

Patent Questions

British patent holders under the agreement have until June 30, 1949, to file their claims. Americans can file their claims against the British indefinitely. One lend-lease expert estimates it will take 15 to 20 years to sort out the thousands of patented processes that went into the making of war materials.

There is still a little war-born construction to be completed. The Federal Works Agency expects to have seven projects still in the building stage at the end of June. It has completed nearly 100 in the past year.

This work, carried on by the Bureau of Community Facilities, was known as the Lanham Act program. Under it the federal government put up almost $500,000,000 to pay in whole or in part for the construction of schools, hospitals, sewers and other facilities in communities which received a sudden large influx of military personnel and war workers.

MEMBERS OF THE National Labor Relations Board, which must administer most of the new Taft-Hartley labor law, are shown leaving the White House after they conferred for more than an hour with President Truman. They told the chief executive that the N.L.R.B. will need more funds to do the job. Shown are (l. to r.): James J. Reynolds, Jr.; Paul Herzog, chairman, and John M. Houston. (International Soundphoto)

Rehabilitation Of Amputees Is 90 Per Cent Success

MARE ISLAND, Calif., July 1 (AP)—It pays to rebuild war-damaged veterans to make partmen whole again.

The Navy has figures to prove it, based on 2,000 amputees who have passed through its rehabilitation centers at the Mare Island Navy Yard here for veterans who lost arms and legs in combat.

"We have found that 90 percent of the men trained to use artificial arms and legs are employed and have made a readjustment to civilian life," said Comdr. Thomas J. Canty of Milwaukee, Wis., officer in charge of the amputee center.

"About 5 percent are having difficulties and require further hospital treatment. The remaining 5 percent are failures, men who simply have given up."

Canty said that each failure would represent a lifetime cost to the government of $70,000 to $100,000.

"So it has proved worthwhile to the taxpayer," he said, "to spend the few thousand dollars necessary to rehabilitate the average amputee and restore him to a productive place in civilian life.

"Aside from the financial aspect, of course, this training gives him back his life, his self-respect. And our boys are doing well in every walk of life."

A former Marine major who lost a leg in combat is running an air line in Southern California. A legless Marine sergeant is studying agriculture in a Texas college. A Marine private who lost a leg above the knee is a bulldozer operator. They are typical of the amputee school graduates who are making good.

Because civilian manufacturers were unable to supply them with the quality of artifical arms and legs they felt were necessary, Navy officers set up their own factory here. Now it is the largest in the country.

"The artificial limb business in America really was begun by amputee veterans after the Civil War," said Comdr Canty. "And since then only minor improvements were made."

By substituting aluminum for steel and plastics for wood, the Navy has managed to build a more flexible artificial leg and cut the weight from 12 to 14 pounds down to five to seven pounds. The lighter leg is less tiring and can be worn for hours longer. A late model now being experimented with even is strapless, suction holds it to the leg stump.

"Through mass production we have cut the cost of making an artificial leg to $73.18, said Canty. "In small commercial shops it would cost $250 to $300."

The new legs emit no embarrassing creaks, and are well-balanced. The old model artificial foot made of wood with a split toe has been replaced by one that has a wooden base, felt toe and sponge rubber sole, to reduce jarring.

The improvement in artificial hands has been even more noteworthy, thanks to an ingenious new device by an inventive sailor who permits, pulley-controlled fingers to grip and flex like a human hand. The metal fingers are covered by a glovelike plastic which the eye can hardly tell from flesh.

"We even put hair on the back of the plastic hand to make it look more lifelike," said Canty.

Each artificial leg and arm is individually tailored to the patient by the surgeon and limb fitter. The whole staff is particularly proud of one veteran who had lost both legs below the knee in combat. He quickly learned to dance as well as walk on his two new legs.

"Then," said Canty proudly, "he went out and won a jitterbug contest."

Eatonville A.M.E. Church Has Session

A one day session was held at the A. M. E. Church in Eatonville on June 25 with Elder Smithe presiding. Those participating included Rev. Oats and his wife of St. James and Rev. Ticen of the Allen Chapel both in Sanford and Rev. White and his congregation from Ward Chapel in Winter Park.

Hazel Brown of the Allen Chapel was crowned queen of the district in a king and queen contest conducted by the missionary society to raise funds. Each church in the Sanford district was represented in the contest and the winner, who is secretary of the Sunday School and president of Usher Board No. 2, collected funds in the amount of $50.

Work Continuing

Where projects were under construction at the war's end and where the war-created need still continued, the government is continuing the work to completion.

The Federal government's pay roll has dropped considerably. There are now 2,286,202 employes under civil service, compared to 3,571,691 in April, 1945.

In Washington, to relieve congestion during the war, a decentralization program transferred many federal offices into the field. The government now wants them to "recentralize." Congress has been asked for funds to bring the boys home, and the matter is being considered in connection with the Independent Offices Appropriation Bill.

MINERS WHO WALKED OUT of a mine at Muse, Pa., in protest of passage of the Taft-Hartley labor bill, line up along a broken fence to watch a sandlot ball game while the mine remains idle. The walkouts began shortly after the controversial labor measure became law and some 10,000 miners went on strike in Alabama, 9,000 in Pennsylvania, 3,000 in West Virginia and Ohio, and 1,000 in Virginia. (International Soundphoto)

Australian slang, among the world's most colorful, includes "bonzer" for swell; "tucker" for grub; "furphy" for baseless rumor and "pozzie" for place.

Australian slang favors words ending in "o." Thus: "mucko" for sailor, "rabbo" for rabbit, "reffo" for refuge and "susso" for sustenance.

The Luth, or Leathery Turtle, is a marine animal inhabiting tropical seas; it reaches a length of eight feet and weighs as much as a ton.

Recent reductions in the number of U. S. tenant farms have resulted from absorption of many small farms into large operations and from the purchase of farms by former tenants who have prospered.

El Greco, Spanish painter who died in 1614, was named Domenico Theotocopuli, was born in Crete and studied under the Italian painter Titian.

Employees Of Civil Service Weighing Job Advantages

WASHINGTON — The myth of job security among so-called "permanent civil service employes" has been exploded.

Arthur S. Flemming, Civil Service Commissioner, estimates that 52,000 persons with permanent civil service appointments will have been discharged during the 12 months ending June 30.

The commission is striving to find new government jobs for them as openings occur, but persons with special skills cannot be interchanged among all federal jobs. Chances are, says Flemming, no new government positions will be found for a large proportion of them.

Many Job Casualties

With Congress and the administration racing to squeeze the federal payroll, the total has been decreased from 3,700,000 on VJ Day to an estimated 2,100,000 at the end of this June. Among those being let out are 468,000 persons with temporary war service appointments. Of these positions, 203,000 have been refilled by employes with permanent civil service status.

The Civil Service Commission can terminate temporary appointments, and it is using this authority vigorously to induce government agencies to replace such employes with permanent federal workers wherever possible. Yet it has been unable to avoid tens of thousands of job casualties.

The government folk who are getting the ax, or who see their old office-mates cut off, are doing a lot of thinking about the whole issue of government versus private employment. Here are some pertinent facts on the subject:

Changes Slow

Turnover in government is normally small, even during a change of administrations. (In President Cleveland's first administration, 1885-'89, the turnover was 80 percent, which was considered relatively mild. The Civil Service Act of 1883, passed to eliminate the "spoils system," at first protected only 12 percent, but Cleveland left another 8 percent.) In 1937, a typical peacetime year, the government increased its number of employes by 4 percent and decreased it by 3.8 percent.

There never has been any guarantee of permanent employment. Heads of agencies can fire civil service employes as long as they do it in the legal manner and have a good reason for it, such as a necessary reduction in force or inefficiency on the part of the worker. Between July 1946 and March 1947 Flemming says 20,200 government employes were discharged for cause.

Promotions do not come automatically. If the employe's annual efficiency rating is "good," however, he is entitled to a raise of one step within his grade.

Government employes' salaries range from $1,080 a year to $10,000. The average has been estimated at about $2,651. In July 1946 government employes got their first pay raise in seventeen years—20 percent in the lower one in July 1946 amounting to about 14 percent in most instances.

Work Conditions

A 40-hour week is standard for nearly all government workers, with extra pay or time off for overtime.

They get 26 days' leave each year, but this isn't all vacation. Any time they are tardy or want time off for personal business or emergencies, the time is deducted from annual leave. They have in addition 1½ days a month for sick leave.

When a government employe is fired, he gets no severance pay. Not being covered by social security, he gets no unemployment compensation. Although he does not participate in the social security pension system, he benefits from a government retirement plan, for which he contributes 5 percent of his salary.

Estimated Advantages

Miss Frances Perkins, former secretary of Labor and now a member of the Civil Service Commission, told me she believes government workers in the lower salary brackets are better off than they would be in private industry.

Clerks, typists, messengers, etc., get better wages, she said, and enjoy greater advantages in working conditions, rights and privileges.

But many government workers who make $5,000 or more, she added, probably could get better salaries outside the government. Few could look forward to a non-civil service appointment having much more than the top civil service salary of $10,000.

"But I have known a great many of these people," she remarked, "who stay in the government because the satisfaction of public service means so much more to them than being just a money grubber. The dignity and prestige of government service is a great compensation."

Russian Remedy For Cancer Is Reported By Medical Society

By HOWARD W. BLAKES-LEE
Associated Press Science Editor

NEW YORK, July 1, (AP)—The American Review of Soviet Medicine, published by the American-Soviet Medical Society of New York, reports today that the new Russian cancer remedy, KR, is dissolving the malignant growths on about half of the patients thus far treated.

Whether these people may be expected to remain cancer-free is not predicted, but one of the patients now has remained well for two-and-a-half years.

Today's report is the latest in a series describing better preparations of KR, greater dosages and more apparent effectiveness.

The report is written by MME. N. G. Klyueva, wife of G. Roskin, who discovered the remedy. The name is the initials of husband and wife.

KR is a chemical extract from the bodies of South American trypanosomes, spindle-shaped parasites that get into human blood and cause Chagas disease. Bedbugs are the carriers.

Mme. Klyueva states that the KR is harmless to humans but that it causes fever, which is higher and higher as the dose is increased. But with purer preparations of KR it has been possible, she adds, to increase the dose up to 500 times the first one given a human being. Whether the cancer disappears she says depends both on how fast it is being dissolved and how fast the growth of healthy tissue (fibrosis) occurs to replace the cancer.

Plans Made In Bavaria To Coax U. S. Tourists

AP Newsfeatures

MUNICH — Machinery has been set up to coax touring Americans to Bavaria, land of castles, snow-capped mountains and lush fields.

German and American officials are neatly set to launch the experiment, intended to sell the delights of Bavaria for the dollars the German nation eventually must have to regain a position in world trade.

Just how much these tours direct from the U.S. to Bavaria will cost has not yet been worked out.

From Paris, the tourists will travel by train to Frankfurt for a two-day stay. Buses will take the visitors to Rothenburg, an ancient walled city that has been damaged so little it isn't noticeable and retains a medieval character.

The fourth day of the stay in Germany will be spent in picturesque villages surrounding Rothenburg. On the fifth day the groups will go to Nuernberg, seat of war crimes trials, and thence to Munich where they can see the remains of Hitler's shrines—the ruined "brown house," the site of the Ehrentempel where early Nazi street fighters died in brawls.

The end of the first week will be spent in Oberammergau, where the Passion Play is tentatively scheduled for a repetition in 1950. From there the tourists will go to Heidelberg and enroute visit several castles built by the late King Ludwig of Bavaria. Trains will take them from Heidelberg through Ludwigshafen to Paris.

The visitors will travel in groups of 25. It is planned to bring in the first group about July 1. If Americans show enough interest, tours will continue through the summer to the end of September.

HOLDING her daughter, Lee, Mrs. Maxine Jennings Saltonstall is shown in Reno, Nev., where she has set up residence to obtain a divorce from Philip Leverett Saltonstall, first cousin of the U. S. Senator from Massachusetts. Mrs. Saltonstall said that she wants Lee, when grown up, "to believe that her daddy is one of the finest men in the world." (International)

Grapes are high in minerals and vitamins and a quarter-pound bunch of white seedless grapes has fewer calories than a thin butter cookie or a big chocolate cream.

If you open your vacation house and find it reeking with mildew, you can use a new colorless liquid, diluted with water, on fabrics or surfaces that would not be injured by soap and water.

To mend cracks in china dishes boil milk in a stain-resistant utensil, such as porcelain enamel. Place damaged cups, dishes, or saucers gently in the boiled milk. Allow china to remain in the solution a few minutes and the crack should be completely mended.

The traffic death rate in U. S. cities is highest between the hours of 3 and 4 a.m. if the proportion to the number of travel miles is considered.

The 1946 crop of commercial apples, more than 121 million bushels, was slightly more than the 1935-1944 average.

Ten Rules Given To Keep Dwelling Mosquito Proof

AP Newsfeatures

NEW BRUNSWICK, N. J. — If you want to keep your home "mosquito-proof" this summer, don't overfeed the fish in your garden pond.

Experts at the New Jersey Agricultural Experiment Station say that hungry fish eat mosquito larvae, but fish full of packaged food allow larvae to grow.

The entomologists have issued these 10 commandments for mosquito control:

1. Eliminate all standing water.
2. Cover rainbarrels with mosquito-proof screens.
3. Seal cesspools.
4. Drain clogged roof gutters and flat roofs.
5. Cut up or remove old tires.
6. Tilt wheelbarrows and pails so they can't hold water.
7. Oil sewer inlets, cisterns and excavations weekly.
8. Change water in treadles, fountains and bird baths twice weekly.
9. Empty or crush cans and other receptacles.
10. Be sure that screens fit tightly; that doors open out, and that screen mesh is 16 to the inch, or finer.

Mesh sizes of screens are important. Some sizes are popular, notably 12x12 and 14x14 mesh, have been proved ineffective. Commercial Standard CS158-47 of the National Bureau of Standards recognizes only 16x16, 18x14 and 18x18 mesh, whether galvanized steel, commercial bronze and copper.

Of these, 16x16 and 18x14 are equal in efficiency in most sections. However, greatest protection is given by 18x18 mesh, with 18 strands per inch in each direction. This is recommended for areas where there are many small insects.

And mosquito control men suggest you consider the chimney. It's a favorite skeeter highway and should be guarded with fine-mesh metal screening.

Molded fruit salads are perfect accompaniments to simple summer fare.

Some polished diamonds are so tiny that it takes 1,000 to make one carat.

BIBLE VERSE FOR TODAY

WE ARE USUALLY ALONE WHEN WE ARE IN DEEPEST TROUBLE AT SUCH A TIME SYMPATHY AND LOVE ARE GREATLY VALUED. YOU MAY NEED SYMPATHY YOURSELF SOME TIME: And they came to a place which was named Gethsemane.—Mark 14:32.

BRIDAL PARTY

(From Poetry)

The bridal autos bullied their
way through traffic
With rough good nature and with
streamers flowing.
Everyone turned to stare (including Envy)
At the loud horns blowing.
And from the autos came a blab
of voices—
I heard the sound of unborn
generations
Hurry to greet the uncreated Future
And all its revelations.

LOUIS GINSBERG.

REVELATION

(From The Yale Review)

Westward the moon goes down
And leaves the world
As it was in the beginning;
No edge, or solid ground
Or space of sky, but only spinning
Shadow and revolving sound.

The timid animals
Of marsh and forest
Nudge each other and lie near,
With eyes open to the wind;
Owls drift in from the outlying air
And fold their wings.

Now do the trees take shape;
And vaporous dark
Rolls from the rising hill,
Bladed bulrushes break
The ground-fog of the valley in
revel
Shores of a lake.

And then the faded night
Follows the moon.
Each bird or beast
Staring toward the white,
Long fire of the horizon in the East
Feels a new Earth incline, and take
the light.

MARION LINEAWEAVER.

Then there was the complaint we received from an irate mother who said her little daughter cried all night because the Herald's comics weren't printed on that "pretty pink paper."

Weather forecasting in Florida just now has been reduced to an exact science which anyone can master. All you have to do is predict "continued warm, increasing cloudiness, and afternoon thundershowers."

Sanford is having quite a building boom, despite high prices and shortages. This should help cure some of the pessimistic mouthings of the city's smart-alecks who parade up and down the streets proclaiming that "nothing good ever happens to Sanford."

The United Nations is having great difficulty in trying to figure out how large an armed force is needed to keep the peace of the world. With things so quiet and serene in the Balkans, the Near East, the Far East, in Central Europe, in France and North Africa, only to mention a few spots, we gain the impression that all we need is a couple of Boy Scouts and maybe one policeman to make the people on this planet behave.

Despite the newsprint shortage, we continue to receive lengthy articles and "free" publicity, which could be condensed in very few words and would be much more effective and present a clearer picture of the subject. We are reminded of a letter which the great Voltaire sent a friend one time. The famous French writer began by saying "I am too burned to brief," indicating, unless you have already guessed, that brevity in writing is often difficult to attain and is frequently the mark of genius.

The Parking Problem

Parking troubles might soon be ended if it were not for the neighborhood business man. This was the conclusion of Robert Moses, New York City park commissioner, after investigation of the New Orleans traffic situation. He remarked:

"Hotel men, merchants, real estate and theatre interests in the congested district want all the profits and none of the penalties of congestion. They want more people and less crowds, more cars and less traffic, more control and less regulation, firm administration, but nothing irksome that will drive business out of town. It's a swell stunt if you can do it."

Local officials, of course, hear the clamor of business men who cry that street parking bans would ruin them. But the zoning committee of one city suburb believes that it has found an answer.

Its proposed new zoning code prohibits all street parking in business sections. Instead, merchants are to provide off-the-street parking facilities in specified amounts. A store, for instance, must maintain one car space for each 250 feet of floor area in the store itself; theatres, churches, and other assembly centers must maintain one parking space for every six seats within the building. Furthermore, all loading and unloading will have to be carried on away from the street.

That's one possible solution. But many built-up cities will find it hard to provide the vacant space for parking. Perhaps the only real solution would be a parking-dictator—and then nobody would like the results.

Reward for Marriage

Argentines are engaging in a good deal of impassioned argument wherever they gather, these days. It seems that a bill has just been introduced in their Congress which would provide a bonus of $375 for each government employee who marries. There is one strict stipulation, however. If no children have arrived after two years of marriage, half of the bonus must be returned to the government.

The Congressman who is sponsoring the bill believes that it would provide an incentive toward improvement of government service, which he thinks needs improving. He thinks people would be more interested in taking such employment if marriage were encouraged, financially speaking. As may be imagined, the proposal has caused a loud outcry from other citizens, who consider themselves every bit as valuable to the country.

It would be hard to find a subject which would arouse more controversy. The explosion which would result if such a bombshell were thrown into our own legislative halls can be imagined. And just when the ranks of government employes are beginning to thin out, too!

Real Life Thriller

The recent attack upon Mary Roberts Rinehart, famous mystery story writer and novelist, by her chef, reads like something out of one of her own thrillers. The chef, Blas Reyes, Filipino, had been with her for many years. Suddenly, after a period of drinking, he rushed into the room where she was, firing an old revolver.

The bullets failed to explode. Whereupon he produced knives, later traced to her own kitchen, and leaped forward to slash her. Only the quick action of other servants averted a tragedy. He was overpowered, subdued and handed over to police, who jailed him. The next day he committed suicide in jail.

No one seems to know just why, after years of relatively peaceful service, he turned on her so viciously. Mrs. Rinehart herself had only one contributory bit to offer. It seems that, on the day before, he had resigned from her employ, as he did periodically. This time, instead of talking him out of it, she accepted the resignation.

Perhaps some day, readers of a future Rinehart mystery will find the episode embodied therein. And again, maybe they won't. Mrs. Rinehart may prefer not to relive, even in typescript, those few dangerous minutes.

French Plot Is Seen As Reaction Against Leftists

By J. M. ROBERTS, SR.
AP Foreign Affairs Analyst

Although French officials have uncovered what they call a "very widespread" Rightist plot against the government, first indications are that it was more of a reaction against the Leftists than a substantial threat to democratic institutions.

The memory of France's post-war revulsion against the Vichyites, resulting in wholesale convictions after trials which frequently challenged western ideas of fairness, is too recent for that. A serious division among the people has been increasingly apparent, but the real danger has been from Leftist, not Rightist, totalitarianism.

As political extremists of all shades goad one another toward counter-action, however, the difficulty encountered by the French government in international affairs is correspondingly increased.

Probably the most unfortunate aspect of the Black Maquis affair will be to give the Communists a new issue around which to reform their badly battered lines.

A year ago the Communists seemed almost ready to take over France. Then, by adhering to French national interests, they weakened themselves to the point where they could be ousted from the government. Although credited with control of French labor unions, the Communists have not displayed great confidence in their ability to use them as a weapon against the government, and have not thrown their full weight behind strikes which appeared to be right down their alley.

Then Molotov came to Paris, among a people acutely anxious for the very type of help promised by the Marshall proposal. His disregard for French interests at Moscow was still in mind. So was Communist interference with the Paris government's efforts to prepare the empire against serious colonial disaffection.

The three-power conference was hardly open when Molotov sank his ax deeply into the idea that Western Europe might hope for any economic cooperation with the Russian-controlled areas which normally produced food surpluses.

The French Communists, however, against their will, had been forced to drop their anti-American campaign out of respect for the popularity attained by the Marshall proposal. In one of those skin-the-cat procedures for which International Communism is famous, they had come up with their arms extending West.

It is reasonable to assume that, five minutes after Molotov's stand in the conference became known, French Communism reached its low point since the war.

Now the Communists can start a campaign against the "Fascist, Vichite, militaristic enemies of democracy" and, perhaps, regain a little face.

HAMBONE'S MEDITATIONS

By Alley

EUROPEAN TRIPS

WASHINGTON, July 1, (AP).—Americans planning trips to Europe got an official warning today to book their return passage date definitely before leaving this country, or run a heavy risk of getting stranded. In a report to the Commerce Department, the U. S. embassy in London said that "an increasing number" of persons who sailed with "open date" return trip steamship tickets "find it difficult to arrange a definite return sailing.

Poultry Industry Stressed As Egg Prices Advance

JACKSONVILLE, Fla., July 1 (Special)—"The trend of egg prices on the Dade County State Farmers Market in recent weeks has lent emphasis to the importance of giving attention to poultry flocks in the next few months," said William L. Wilson, Director of Florida State Markets, today. "Prices advanced again this last week by two cents per dozen on top quality eggs, duplicating the performance of the preceding week.

"Recently I urged that farmers and home owners maintain their flocks at as nearly a normal level as possible this Summer, indications pointing very strongly to the probability that prices would hold to good levels for some time to come. The subsequent increase in prices at Dade City is of course contrary to normal Seasonal tendencies. Prices usually move downward, rather than upward, at this time of the year.

Market manager James T. Johnson's report shows the Dade City Market received 4,073 dozen eggs last week, for which prices ranged as follows: Extra large eggs, 59 cents per dozen; 57 cents medium, 52 cents; small, 41 cents. The Market also handled 1,697 and a half pounds of poultry, for which prices were: Fryers, 33 cents per pound, heavy hens, 26 cents per pound; leghorn hens, 20 cents per pound; roosters, 16 cents per pound.

"Recent activity on State-operated livestock markets, as well as reports from other sources, appear to support the belief I expressed some weeks ago as to the possibilities for profit from poultry. I feel more strongly than ever, that persons who are in position to keep a small poultry flock, as well as those who operate on a larger scale should do well in these next few months. Of course you can lose money on poultry—plenty of it. But I believe there are hundreds, probably thousands of families with sufficient experience and with adequate facilities to keep small flocks. These families would benefit through supplying their own requirements of poultry and eggs and might have a substantial surplus to sell.

"A recent announcement from this office relative to the opening of a short course in various crafts at the Holly Hill State Market, has aroused considerable interest, and a good enrollment is indicated for the opening session, July 1. Miss Viva Cook, Market manager, and other experts will have charge of the instruction work, which will cover palmetto braiding and other such crafts, shell work, and ceramics. These courses appeal both to residents and visitors who are interested in such work—either because of its fascinating character, or as a means of producing articles for gifts, or sale. Our Holly Hill and Titusville Markets have done much to foster interest in craft work and the latter market handles the procuring, preparation and sale of palmetto fronds, for braiding, and other essential raw materials.

The theorbo was a large double-necked bass lute used in 16th and 17th century orchestras as a general bass.

Social And Personal Activities

Social Calender

TUESDAY

The Daughters of Wesley Class of the First Methodist Church will hold their business and social meeting at 8:00 P. M. at the home of Mrs. C. P. Herndon, 605 Magnolia Avenue. Mrs. Herndon's group will be the hostesses.

The Friendship League of the Congregational Church will meet at the Parish House at 8:00 P. M.

A practice meeting for installation of officers of the Seminola Rebekah Lodge No. 43 will be held at the hall at 7:30 P. M.

THURSDAY

The T. E. L. class of the First Baptist Church will meet at the church annex at 7:30 P. M. for a covered dish supper.

PARTY POSTPONED

The weekly party at the Seminole Country Club has been postponed from tomorrow night until July 9 according to Charles Potter, club manager. On that date a buffet supper for members and guests will be served. Games will be enjoyed following the supper.

Hints To Housewives

Weekly from Home Demonstration Specialist, Tallahassee

COMBATTING MILDEW

The summer rainy season in Florida usually brings mildews and molds in the home, causing anxiety to housekeepers. Specialists of the State Home Demonstration Office of the Agricultural Extension Service say the homemaker can take several steps to prevent mildew and can remove mildew stains.

They suggest keeping closets and dresser drawers—any place where mildew is likely to grow—as clean, dry and well aired as possible. An electric light left burning in a closet will help dry out the atmosphere there. In a small space an open jar of chloride of lime will absorb maisture. It becomes liquid as it takes up moisture, however, and must be changed frequently.

Many homemakers start up their heating systems for a few hours occasionally during the rainy season to keep the interior of the house dry.

Miss Mary Keown, state home demonstration agent, says the homemaker can discourage mildew on floors and woodwork in the house by wiping them with a damp cloth dipped in water and a little kerosene.

When mildew is discovered on towels and sheets, Miss Keown suggests giving them a good washing immediately with soap and water, followed by a thorough sunning. If this doesn't remove the stains she says the affected places can be covered with lemon juice and salt and hung in the sun.

Miss Keown points to USDA textile specialists' recommendations for white fabrics in a solution of sodium perborate—four tablespoons in each pint of soapy water — if mold has become well established before it is discovered. Directions say let the linens soak for as long as a half hour and then hang in a sunny, airy place.

Old mildew stains on white cotton, linen or rayon materials may be bleached out with javelle water, but this material is unsafe for use on other fabrics. This chlorine solution is strong stuff and should not be left on the materials for more than one minute at a time.

To remove the javelle water she suggests soaking the material in a solution of one or two teaspoons of vinegar in a pint of water, to which has been added a half teaspoon of sodium thiosulfate if this is available.

Duck or canvas curtains can be mildew-proofed with soap and cadmium chloride, which can be obtained at most drugstores, according to the State Home Demonstration agent. Soak the materials for 20 minutes in enough hot soapy water to cover. Immediately immerse the wet fabric in a solution of cadmium chloride—1 and a half ounces of crystals for each in this solution for 15 minutes, gallon of water. Heat the fabric wring out without rinsing and hang on a rope (not metal) line to dry. The treatment is not recommended for clothing.

She cautions that cadmium chloride is poisonous if taken internally and the crystals should be kept away from children and pets.

No great civilization has been created or maintained without a good fertile soil to support it.

RURAL COMMON SENSE
By SPUD JOHNSON

FARM WITH LAND FOR PASTURE SHOULD NOT BE WITHOUT MILK COW

One of the first things that most folks connect with a farm and farm life is a cow, and many think that a farm to be a farm must have a cow.

Well, they may not be so far wrong at that, generally speaking, for certainty a farm with available land for good pasture should have a good milk cow or two for the home milk supply. Yet, there are a surprisingly large number of farms that do not have milk cows — farms that could very easily support milk cows, too.

Farm families who do not have milk cows buy fresh or canned milk or they do without milk, and surveys have shown that families who do not have milk regularly are not uncommon.

This does not mean that there are not a great number of Florida farm families who have good milk cows, for much progress has been made in this direction during the past few years, but it does mean that farmers who do not have milk cows may well make arrangements to obtain them for the good of their families.

The great value of milk as a food, especially for growing children, has been publicized so much during recent years that it hardly seems necessary to mention it again, but evidently there are some families who do not realize its importance in the diet or who have simply neglected to assure provision of this fine food for their good health.

Every farm with land suitable for good pasture should have a family milk cow. This is the only conclusion to which one can come when he learns of the difference in health between families who have good milk cows and those who do not.

One of the finest things 4-H club work in Florida has done in recent years has been the dairy project program which has resulted in a notable increase in the number of family cows. Club members, by raising cows from calves, have been responsible for this increase or have been indirectly responsible in that farmers have followed their example.

Anna Loretta Smith Weds Edgar Rawls

Mr. and Mrs. E. C. Smith announced today the marriage of their daughter, Anna Loretta, to Edgar C. Rawls, Jr., son of Mr. and Mrs. Edgar C. Rawls of Dundee, Fla. on June 28 at 8:00 o'clock.

Preceding the ceremony Mr. and Mrs. Smith entertained with a buffet supper at their home on West First Street. The ceremony was performed at the home of Judge R. W. Ware.

The bride wore for her wedding a black and white sheer print with white accessories and a shoulder corsage of white asters. Attending the couple were Mr. and Mrs. Curtis Hughes, sister and brother-in-law of the bride.

Following the wedding a reception was held at the Smith home. The rooms were decorated with pastel gladioluses and asters. The dining table was covered with a white linen cloth and centered with an arrangement of the gladioluses and fern. At one end of the table was a crystal punch bowl and at the other was the wedding cake.

The couple is at present taking a short wedding trip and will return to Sanford in a short time.

Mrs. Rawls has spent most of her life in Sanford and attended Seminole High School. Mr. Rawls spent two years with the Navy during the recent war and is now associated with the Stine Machine Shop.

Out-of-town guests for the wedding included Mr. and Mrs. W. W. Coleman and children of Lake Wales, Mrs. W. C. Driggers of DeLand and Mr. and Mrs. Leon Hall of Miami.

BIRTH ANNOUNCEMENT

Mr. and Mrs. W. E. McTeer announced today the birth of a son, Don Lamar, on June 28 at the Fernald-Laughton Memorial Hospital. Mrs. McTeer will be remembered as the former Geraldine Hinchliffe.

ATTRACTIVE Mrs. Frederic Murphy, 24, blonde San Francisco socialite and mother of twins has, according to police, jumped from the Golden Gate Bridge into San Francisco Bay. The body was identified by her husband, member of a pioneer California family. *(International)*

Personals

Mr. and Mrs. David Smith have returned from a two weeks vacation at Daytona Beach.

Hugh Whelchel, James Ridge and H. C. Hetzel have returned after spending some time in North Carolina.

Friends of Mrs. George Thurston will regret to learn that she is ill and confined to the Fernald-Laughton Memorial Hospital.

Mr. and Mrs. A. H. Beckwith, Sr. have left for South Carolina to spend about a month visiting friends and relatives.

Mrs. J. C. Aycocke had as her guests recently, Mr. and Mrs. J. N. Aycocke, Mrs. C. L. McCrone and sons, Tommy and Ronnie.

Mrs. R. J. Hickson, Jr. and son, Robert Sterling, left today for Virginia to spend about a month with her parents, Mr. and Mrs. S. L. Furness.

Friends of Mrs. E. H. Cullum will be interested to learn that she is improving from a recent illness but is still confined to her home on West Fifth Street.

Mr. and Mrs. H. M. Leighley and son, Harry, Jr., of Atlanta, are visiting Mr. and Mrs. Roy Williams at their home in Mayfair for several days.

Dee McLellan, Louise Lundquist, Judy Jones, Betty Rose Hoolehan, Ruth Hodges and Mrs. J. R. Hoolehan left today to spend about a week at Daytona Beach.

Mr. and Mrs. L. M. Leinhart and granddaughter, Mary Lou Dossey of Savannah, returned to Jacksonville on Tuesday after a visit in Sanford.

Mrs. H. G. Drake and children, Marteen and Henry, of Gastonia, N. C. are the guests of Mrs. Turner's parents, Mr. and Mrs. R. W. Turner.

Mrs. R. W. Turner returned recently from a visit to Niagara Falls and Washington, D. C. Mrs. Turner was accompanied on her trip by Mrs. M. E. Higgins of Palatka.

Friends of F. E. Roumillat, III, will be interested to learn that he recently stood the State Board of Pharmacy examination and is now a registered pharmacist. He is associated with his father, F. E. Roumillat, and B. W. Anderson in Roumillat and Andersons Drug Store. Mr. Roumillat graduated from the University of Florida in the early part of June and is residing with his wife and children, Cynthia and Francis, at 510 East Fourteenth Street.

The cover of a new 48 page booklet just issued by the Florida State Advertising Commission, and now being mailed to those who reply to the state's national advertising campaign. The booklet is completely illustrated with 107 full-color photographs showing the state's recreational, industrial, agricultural, home building and business advantages.

Margaret Colby Wed To Warren Odham

Of interest to many friends in Sanford is the announcement of the marriage of Margaret Colby, daughter of Mrs. James Colby, to Warren Lorenzo Odham, of Miami, son of Mrs. H. B. Odham, Sr. of Sanford. The wedding took place on June 21 in Miami at the Little River Baptist Church. The ceremony was performed by Rev. Tratton at 3:00 o'clock.

The bride chose to wear for her wedding a tailored white suit with white hat and accessories. She wore a corsage of sweetheart roses.

Her maid of honor and only attendant was Miss Alice Currie of Miami and Alvin Odham of Sanford served his brother as best man.

Following the wedding a reception was held at the home of Mr. and Mrs. J. W. Wilson after which the couple left for a short wedding trip at Daytona Beach. They have returned to Miami to make their home.

Those from Sanford attending the wedding were Mrs. H. B. Odham, Sr., Miss Minnie Ruth Odham, Miss Kitty Odham, Alvin Odham and H. B. Odham, Jr.

ONE OF THE MANY INJURED and killed in the explosion of the big tanker *Markay* in Los Angeles Harbor, off Wilmington, Cal., Gerald O'Donnell, New York, is given emergency treatment. O'Donnell reported that he, and several companions saw a small blaze starting on the butane-loaded ship and started to run when the explosion came. *(International)*

Corduroy Classic...

Here's a Bobbie Brooks one piece beauty . . . fashioned of Merrimack's SHEERCORD, a superb quality pinwhale corduroy! It's in the new flattering length . . . and the gold buckle on the separate belt sets off your tiny waist so nicely. Spirited Fall colors in sizes 7 to 15. **12.95**

VEL* cuts dishwashing time in half!

AMAZING NEW SUDS MADE BY COLGATE-PALMOLIVE-PEET BEATS SOAP IN WASHING SPEED AND MILDNESS

● Probably every housewife has wished for "something better than soap" . . . Colgate-Palmolive-Peet made this wish come true with Vel.

Vel leaves no soap scum or streaky film to polish away from dishes and glassware. Just a quick rinse and they dry sparkling clean without time-wasting wiping! Vel gives instant, rich suds even in hardest water. Cuts grease faster, more completely than soap . . . Leaves no dishpan ring to scrub out. Vel cleans dishes cleaner than soap and saves up to half your dishwashing time!

MILDER TO HANDS! Vel is not a soap but an entirely new and different suds that is completely neutral . . . milder than soap.

STOCKINGS STAY LOVELIER, SHEERER-LOOKING!

Vel keeps stockings sheerer-looking and lovelier longer than soap can. So you wear stockings longer when you wash them with Vel! No soap scum to stick to and coarsen stocking threads when you use Vel. No soap-fading!

EASIER THAN SOAP ON FINEST WASHABLES!

New woolens stay softer, fluffier because Vel gives rich suds at safe, cool temperatures. No soap-matting or soap-harshness! The makers of famous North Star Blankets recommend Vel for washing! Vel is easier on delicate washable colors than finest soap flakes!

*VEL is the trade-mark of the Colgate-Palmolive-Peet Company.

Feds Face Pirates Here Tonight; Cop Two Yesterday

Locals Trim Leesburg In Twin Bill 5 To 4 And 4 To 2; Tomat Will Hurl Tonight

LEESBURG, July 1 (Special) —After the Sanford Celery Feds twin victory over the Leesburg Pirates here at the Venetian Gardens Ball Park, breaking the year long jinx held by the Buccs, an unusually large crowd of Sanford fans are expected to be on hand tonight for the return engagement in the Municipal Park in Sanford.

Lefty Johnny Tomat is slated to ascend the hill for the Murphymen in the single contest against the Leesburg aggregation in the Celery City tonight.

Last night the Feds and the Pirates battled for nine frames in the opening tilt, which was scheduled to be seven innings duration, before the Feds jammed a single marker across the plate to win the twilight affair by a 5 to 4 margin.

In the nightcap the Feds banged away at Joe Maseda for a 4 to 2 decision.

Tomorrow night the Feds entertain the Orlando Senators at the Municipal Park.

TO RIDE HONEYMOON

INGLEWOOD, July 1 (AP)—Eddie Arcaro has been signed to ride Harry M. Warner's stout filly, Honeymoon, in the $50,000 Hollywood Handicap at Hollywood Park July 4, Warner's W. L. Lyons announced that Arcaro will fly out from New York for the event.

COMMENTS from the SIDELINES

By ARTHUR BECKWITH, JR.

HERE 'N THERE

Baseball publicity is extremely doleful this year. The National League has the Green Book, the American League has the Red Book. The Canadian-American League presents the Orange Book and the Pacific Coast League the Blue Book. If that isn't drawing color out enough, the American Association has the Sketch Book—with a red, white and blue cover. The class B New England League lays claims as one of the most productive fields for baseball talent. From 1946 team rosters 46 players advanced to leagues of higher classification.

As of June 10, Jimmy Acosta playing with Waterbury in the new Class B Colonial League, was leading the minor leagues in hitting with a .479 figure. Last year's ace mauler of the minors, Earl Brownlee of Owensboro in the Class D Kitty League, stood second with .461. Deadlocked for third were Phil Hearn of Auburn in the Class D Pony League and Charles (Nick) Starasta with Centralia in the Illinois State League, both with .455 marks . . . Brown improved his average to .448 the night he was presented the Louisville Slugger Trophy, June 17, for winning the batting crown last year. Besides hiking his average, he was also the recipient of a 1947 Oldsmobile sedan, and an all-expense trip by air for him and his wife to the 1947 World Series among approximately 10 other gifts given to him by June Dannhorn fans . . . In the long ball hitting branch, as of June 10, Howard Moss of the Balti-more International League, had 21 home runs, highest in this division. Phil Ajofa of Reno, Nev., in the Class C Sunset League, stood second with 18. Moss was off and running with eight circuit clouts in Baltimore's first 12 games . . . Al Rosen of Oklahoma City in the Texas League started the season with double speed. His first six hits were doubles and 11 of his first 22 went for two bases. Through June 10, he had 29 of the two-bly variety to pace the minor leagues in this respect . . . New Orleans drew 13,280 to one of their games against Nashville in May. It's the largest crowd for Marsh Gras-land since 1939. Oklahoma City of the Texas League also attracted its largest crowd (8,000) since 1939 when 7,886 attended an early season game . . . In the Class B Pied Piper Spring, Tex., of the Class D Longhorn League roamed through with 150 runs on 196 hits in their first 16 games of the season. Included in their list of wins was a 34-14 extra points . . . Just for the victory. Five touchdowns and four extra points. Home attendance have been chalked up at Richmond, Va., in the Class B Piedmont League with 6,079 at a single game and a single season mark was established for Violets in the Class B Western International loop when 5,859 turned out.

PIRATES

Jack Baumgarner, the Leesburg righthander who leads the Florida State League in pitching with 13 wins and four defeats, has been sidelined for at least seven weeks because with infected hands, the Pirate business office recently announced.

The Leesburg ace's trouble all started with a sore arm which was traced to a bad tooth. The tooth was pulled, but Bummy suffered adversely from penicillin shots, it was reported. Both of his hands swelled. He is now wearing bandages.

Baumgarner's bad break started a series of ill events for the Buccs. The once fast traveling Pirates also have lost third baseman Earl Campbell who was discharged for bad conduct, as reported by the Leesburg front office.

The Leesburg officials announced recently that Doug Johnson, a dangerous hitter jumped the club and manager Good has been laid up with an infected hand.

Tomatoes are an excellent source of vitamin C.

NOTICE

PAINTING BIDS

The Board of Public Instruction will receive sealed bids on painting the roof of Hopper Academy, Sanford Colored elementary school on Pine Avenue, at eleven o'clock on Thursday morning, July 10th, at the Court House, Sanford. For specifications call on Architect Elton J. Moughton, in the Sanford Atlantic National Bank building.

AP Newsfeatures

ABOARD THE U.S.S. LEYTE—Baseball, given a chance, might do more to bring countries together than diplomatic relations.

So thinks the Rev. Merle S. Rizzo of the Westfield, N. J., Presbyterian church, chaplain and athletic director on the U.S.S. Leyte, aircraft carrier. A good demonstration of this was given recently when four units of the U. S. Navy's Mediterranean task force—including the Leyte—sailed in tandem for a five-day goodwill visit.

Sports events studded the program and more than 500 men from the warships participated in 20 events. Considering that most of them were out of training and up against some of Turkey's best talent, they did well. Language, even if at times it was not a means of communication—was no barrier.

Against a Turkish team of boxers, boys from the Leyte lost two matches, drew one and won one. The Turks won tennis matches, five to one, and swept table tennis four straight.

But the Americans took a basketball game, 39 to 34, from a Turkish team at noted Robert College, coached by an American, David Hasbrouck of LaCrosse, Wis. The Turks were the national champs. An American softball team from the U.S.S. Bristol, a destroyer, beat a Turkish team 5 to 3, also at Robert College.

The Turks gave two boxing exhibitions and the Americans four. But most interesting for the Americans was an exhibition of greased wrestling by the Turks, and for the Turks an exhibition of American baseball.

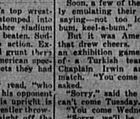
Sixteen of Turkey's top wrestlers, well-greased, stomped into the ring of Fenerbahce stadium as snare drums were beaten. Suddenly they went into action. Except for an occasional grunt there was no sheering. American spectators read the booklets they had received.

"A wrestler," they read, "who succeeds in throwing his opponent so that his stomach is upright is declared winner. A wrestler throwing over himself straight off the ground is defeated." A wrestler picking up his opponent and carrying him three strides wins. The losers kiss the hands of the winners and the winners take the losers in their arms and salute them. It is considered shameful for the crowd to applaud the winners."

But at the American boxing exhibition there was applause.

A Turkish spectator, turning to one of the athletic visitors, asked what was the meaning of "keel-a-bun."

"That," he was told diplomatically, "is an American expression



TO SELL 'EM, TELL 'EM— With An Ad

Palatka Rises From Cellar With Twin Victories Over I's

The Palatka Azaleas took both ends of a twin bill from the Daytona Beach Islanders in the Azalea Bowl last night to climb a game and one half ahead of the isle.

The A's opened the opener by a 5-0 shutout, pin and edged the reserve clinic by a 9-8 in the nightcap.

The Palatka Gem-Men pulled two games closer to the league leading St. Augustine Saints by sinking the Anchor City aggregation by 12 to 5 and 2 to 0 behind Lee Bile's twin attraction in St. Augustine. Big George Fullmer limited the Saints to three singles in the final tilt.

Orlando chalked up a victory in the first game of a scheduled twin bill between the Senators and the DeLand Red Hats by a 4 to 3, but the Steinselemen turned the tables and trimmed the Bevilmen 5 to 2 in the finale.

Wimbledon Tourney Continues With Americans In Chase

WIMBLEDON, England, July 1 (AP)—It was the United States vs. the British Empire today as the fair sex moved out of the wings and into the spotlight in a battle for semi-finals berths in the Women's Singles of the Wimbledon Tennis Championships.

Four top-seeded United States entries, Margaret Osborne of San Francisco, Louise Brough, Beverly Hills, Calif., Doris Hart, Miami, Fla., and Mrs. Patricia Canning Todd, Hidden Valley, Calif., were favorites to survive today's matches.

If the transatlantic powerhouse succeeds in winning every match, it will equal a history. Four Americans monopolized the semifinals in 1946, the Misses Brough and Osborne, Dorothy Bundy and Pauline Betz.

The men's semifinals will be played tomorrow, with the young Californians, Bob Falkenburg and Tom Brown, battling in one bracket and Jack Kramer, the tourney favorite, playing the last non-American, Australia's Dinny Pails, in the other half.

YESTERDAY'S STARS

Pee Wee Reese, Dodgers, slammed his ninth home run of the year and added two singles to drive in four runs and pace the Dodgers to a 7-4 victory over the Phillies.

Ewell Blackwell, Reds, after yielding four runs in the first inning on three walks, two hits and a two-run error by Eddie Miller the lanky righthander allowed only two more hits the rest of the way to defeat the Cubs 6-4 for his 13th victory and his 11th straight.

ROBINSON CLEARED

CLEVELAND, July 1. (AP)—A coroner's verdict today cleared all principals involved in the June 30 title match between Welterweight Champion Ray (Sugar) Robinson and Jimmy Doyle of any responsibility for the challenger's death. Coroner R. E. Gerber told reporters today that Doyle's death was "accidental," and that Robinson was "absolutely blameless."

of encouragement."

Boos, a few of the Turks, politely emulating their visitors, were saying—not too loudly—"keel-a-bun, keel-a-bun."

But it was American baseball that drew cheers. At the end of an exhibition game the manager of a Turkish team approached Chaplain Irwin and sought a match. "You come Tuesday?" he asked.

"Sorry," said the chaplain, "we can't come Tuesday."

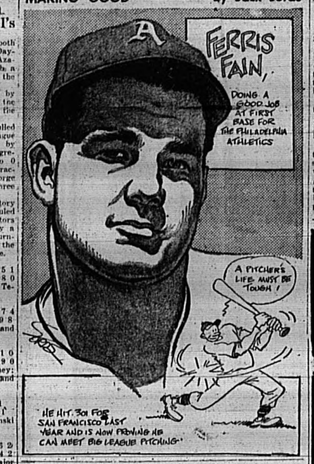
"You come Wednesday?"

"Sorry, we'll be gone Wednesday."

"You come Thursday?"

But, said Chaplain Irwin, who since the warships left Istanbul May 2 has been appointed athletic director for the entire Mediterranean fleet, "it was good fun."

MAKING GOOD — By Jack Sords



Sale Of Stamps Aids Cayman Isle Budget

By ROBERT S. WALTERS

AP Newsfeatures

GRAND CAYMAN — Postage stamps showing a schooner under sail, sea turtles on a beach and other aspects of Caribbean life help to balance the governmental budget of this island dependency of Jamaica.

Sales of Cayman Islands stamps to collectors and regular users of the mails are expected this year to bring in 11,000 pounds (about $44,000) or nearly half the revenue required by the island government. Collectors' purchases alone will yield approximately $40,000, according to official estimates.

The pictorial stamps of this 17-mile-long island and its sister islands, Cayman Brac and Little Cayman, have been popular among collectors for some time. Anniversary and other special issues have added to Cayman postal revenues.

In 1935, for example, when a stamp was issued to mark the 25th year of King George V's reign, its sale realized about $35,000. The 1937 coronation issue brought in $27,000 and last year's Victory issue yielded $28,000.

Cayman stamps have been a boon to private collectors in the islands as well as to the government of the dependency.

Mack To Be Honored By Meriden Club

MERIDEN, Conn., July 1. (AP)—Sixty-three years ago Connie Mack broke into organized baseball with the Meriden club in the old Connecticut League. Today the 84-year-old "Mr. Baseball" returns here for a day named in his honor.

Between 1884, when he shook the dust of Meriden off his gaunt frame, and now, Mack has won just about every honor there is in baseball.

Mack and his latest edition of the Philadelphia A's, currently a sensation in the American League, will be feted from the time they arrive, 3:45 P. M. (EST), until they leave after a night exhibition baseball game with a local semi-pro club.

Mack, the dean of big league baseball managers, will be officially welcomed at the Meriden railroad station by a delegation headed by Connecticut's Governor, James L. McConaughy, and Baseball Commissioner Albert B. (Happy) Chandler.

A parade and banquet will precede the game which is expected to attract some 10,000 fans, among them Meriden's Jack Barry, shortstop of the A's famed 100-000 infield during Mack's pennant winning days of 1910-1914, and big Ed Walsh, Chicago White Sox pitching ace shortly after the turn of the century, who resides here.

Also planning to renew friendships with Connie are D. W. Murray, 70, and Charles McGrath, 78. Murray was bat boy and McGrath ticket on Meriden's club when Mack became a baseball pro.

Physicists To Build High Energy Machines

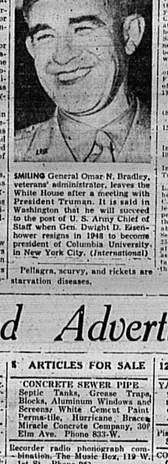
CHICAGO, July 1. (AP)—Dr. Edward Teller, a pioneer in the development of the atomic bomb, said today that American physicists were planning a "great building program" of high energy machines in their search for a greater understanding of energy and matter.

One machine "considered" for the Brookhaven National Laboratory in Long Island, N. Y., he said, was a giant synchro-cyclotron capable of endowing particles with energies 10 times as great as any obtained by the cyclotron or synhrotron.

In an article in the bulletin of the atomic scientists, he predicted experiments in the regions of higher energies would lead to "important and unexpected results" in the understanding of nature.

In all of the new machines, energies 100 to 1000 times as great as those contained in fragments of usual nuclear reactions are obtained by speeding particles up over or through an accelerating field.

Scientists have found a new Preparing for larger airliners in the future, Shannon Airport in Ireland is installing fuel tanks with one-half million gasoline capacity.



SMILING General Omar N. Bradley, veterans' administrator, leaves the White House after a meeting with President Truman. It is said in Washington that he will succeed to the post of U. S. Army Chief of Staff when Gen. Dwight D. Eisenhower resigns in 1948 to become president of Columbia University in New York City. (International)

Cemetery Proves Big Attraction To Tourist Industry

GLENDALE, Calif., July 1 (AP)— One of the liveliest spots in Southern California is a cemetery where you can buy life insurance and more weddings are held there than any other place in America.

Only Hollywood itself ranks higher as a tourist attraction in this area than Forest Lawn Memorial Park, whose 300 statuary-studded acres draws 1,500,000 visitors annually.

It is one of Glendale's biggest industries with a staff of 800 employes, and is a $55,000,000 monument to 67-year-old Dr. Hubert Eaton, a mining engineer who took over the management 30 years ago. Known now somewhat matronizingly as "The Builder," Eaton is a super-salesman with artistic impulses.

Right at the start in 1917 he looked over the 50-acre cemetery and decided that it, like every other burial ground he had seen, was depressing and ugly. He set out to create a cemetery "beautiful and restful — a bright lovely garden where happiness is recalled and sorrow forgotten."

In three decades he has managed to make death about as pleasant as possible and enlarged the cemetery to 12 times its original size. Some Forest Lawn innovations:

(1) A heart-shaped cemetery for children known as "babyland."

(2) Bronze grave markers level with the grass instead of traditional monuments.

(3) A pastel-colored mortuary chamber for funerals called "the slumber room."

(4) Two hundred statues which make up the biggest collection of large marble statuary in America.

(5) Fifty stained glass windows including a copy of "The Last Supper," viewed by from 250,000 to 500,000 visitors annually.

(6) A bronze-doored "Garden of Life" which opens only to gold keys given to survivors of the dead interred there.

(7) A memorial court of honor which Eaton would like to make into "the Westminister Abbey of America." Distinguished Americans are interred here without cost. Present inhabitants: Gutzon Borglum, the sculptor, and Carrie Jacobs Bond, composer.

(8) A seven-level, earthquake-resistant mausoleum containing enough concrete to build a 60-story skyscraper.

Forest Lawn is a marbel index to the film industry, a kind of "who was who" of the entertainment world. Here lie Will Rogers, Marie Dressler, Flo Ziegfeld, John Gilbert, Edna May Oliver, Lon Chaney, Russ Columbo, Tom Mix, Wallace Reid, Charles Ray, Ruth Roland, Chic Sale, Ben Turpin—and scores of others.

Jean Harlow is there in platinum silence behind a marble slab that says "Our Baby" and bears the lipstick from her mother's kiss. Carole Lombard still gets two fresh flowers each day, and her nearest neighbor is her mother. The crypt on her other side is empty.

Buried there also are the designer of the Golden Gate Bridge, the man who invented push-back theater seats, the author of "The Wizard of Oz," a doctor who delivered 7,000 babies, a pathologist who performed 30,000 autopsies and the man who introduced table tennis into America.

The cemetery has 106,000 interments and 16,000 weddings, 220 in June alone. It's permanent tenants before the present boom period began outnumbered the living population of Glendale.

"We'll be out of space in another 20 years," said a representative, "and we're planning to establish another Forest Lawn, patterned after this one but one and a half times as big, overlooking San Fernando Valley."

Forest Lawn has a flower shop, three churches, an advertising manager and two publicity men. You can be christened, married cremated or buried here. You can also go there to pray, buy a life insurance policy or listen to an art lecture. One minister was ordained in the cemetery.

The advertising slogan of Forest Lawn:

"Everything in one place."

Dade's Racing Dates Tentatively Fixed

MIAMI Fla., July 1 (AP)— Tropical Park race track today amended its application for racing dates in the last 40 days of the 120-day season at Miami.

The track previously had asked for the first 40 days. The change smoothed out a conflict with Gulfstream Park and made these dates for the three horse tracks have virtually certain although yet to be announced by the State Racing Commission:

Gulfstream Park, Dec. 1 to Jan. 18.

Hialeah Park, Jan. 19 to Mar. 2.

Tropical Park, Mar 3 to Apr. 18.

Temperature for fresh meat stored in the refrigerator more than one day should be below 45°F.

Tea or coffee stains on china cups may be removed by rubbing with a damp cloth dipped in soda.

City Payroll

(Continued from Page One)

employes increase since 1941, the great increase in wage and salary scale for all employees is the main increase in operating costs of the City over 1941, he revealed.

He pointed out increases as follows: In 1941 the standard wage scale for common labor was 15 cents and hour; $1.50 for a 10 hour day or $9.00 a week. Semi-skilled labor got $1.75 for a 10 hour day or $10.50 a week. Common labor now costs the City 55 cents an hour; eight hours a day for five and a half days totals $24 75 a week. Semi-skilled workers on the same schedule get 60 cents an hour, or $27.00 a week.

Personnel in the street, sewer and bridge departments, including garbage and trash disposal increased during the six year period from 17 to 34.

Firemen made $80 to $93 a month in 1941 and today, $164 to $176. Policemen, working 12 hours a day got $80 to $100 a month, in 1941, and now on eight hour a-day schedules get $164 to $176. Truck drivers in 1941 got $13.50 to $15.00 a week for a six 10 hour day week; today they get $35.50 a week for five and and a half eight hour days.

Other salary increases during the period are: $18 to $37.50 a week for street sweepers; $13.50 to $35.50 for cemetery caretakers; $100 to $175 a month for operators at the water plant. The City also, said Mr. Sayer, has had to increase the salaries and wages of all other employees and department heads in accordance with the foregoing percentage.

Another factor in the increased cost of City operation pointed out by Mr. Sayer is the great increase in cost of materials and supplies. Police and fire uniforms costing $30 to $32 each during the period increased in price to $66 to $70 each.

Street and sewer materials have increased from 30 to 50 percent; building materials have gone up as much as 70 percent; the price of motor vehicles has gone up $300 to $500 each. There has been as much as 100 percent increase in the price of small tools such as lawn mowers, hoes, rakes, street brooms, axes, etc.

In the municipal water plant the fuel oil fod diesel engines has been increased from four and a half to eight and a half cents a gallon. Water meters cost 25 percent more. Water pipe and fittings are up 40 to 75 percent.

In addition to the great increase in labor and material costs, all of the City's sewers, streets, public buildings and most of the equipment have had more than five years of additional service and wear, and the maintenance and upkeep is much greater than it was in 1941.

Almost all of the City's streets, sanitary and storm sewers were constructed over 20 years ago, Mr. Sayer pointed out, and they have depreciated more during the past five years than all the other years since construction. This has caused the upkeep and maintenance to be more than five times greater than it was in 1941, just for essential repairs and replacements.

An analysis of the General Operating Budget for the fiscal year 1946-47, he said, in the amount of $281,150, will show that this figure includes capital improvements in the cum of $21,000. This includes public restrooms, tourist information booth, a new fire truck, and purchase of the USO building. These items, he suggested, should not be considered as an operating expense for just one fiscal year.

To clean diamonds, soak them in three parts of very hot water and one part ammonia. The ammonia dissolves the dried soap and grease on rings.

School Funds

(Continued from Page One)

brought total releases of funds for the fiscal year to the neighborhood of $108,000,000, with reserves of $16,700,000 withheld. Only a few budgets remain to be approved.

The school construction fund, authorized under the new public school law, was held in reserve at the suggestion of Governor Caldwell.

"I think we should meet the instructional and transportation items in full," Caldwell said, "but hold the construction funds in reserve for the present."

State School Supt. Colin English said the new law provides for a revision of the budget needs for each county next December.

The State will make its first distribution to the counties July 15 and counties are expected to begin paying teachers on a 12-months basis with the beginning of the Fall terms in September.

In addition to the State contribution of $1,322,831, the Department of Education has estimated that the counties will have to raise a minimum of $11,265,604 for schools.

The Budget Commission held nearly every administrative department rigidly to a reserve of 10 percent, but made several exceptions in the case of institutions.

The board turned down a request of Attorney General Tom Watson that his budget be approved at the $156,00 appropriated by the legislature, and whacked out the 10 percent reserve. Watson, as a member of the board, had opposed the reserve policy but other members said it would not hurt him any worse than it would them. He was not present at today's meeting.

Other budget approvals included:

State Welfare Board for old age assistance, aid to blind and aid to dependent children and administration of welfare program, $36,801,293 in State and federal funds was released and $4,386,230 in State money was reserved.

State Forest Service, released $1,014,493, mainly federal and private funds, and reserved $36,506 State money.

Florida Park Service, released $210,747 and reserved $21,300.

Florida Industrial School for Girls, released $107,600 and reserved $4,512.

Florida State University, released $3,012,737 and reserved $17,762.

Florida School for Deaf and Blind, released $423,755 and reserved $94,285.

Florida A. and M. College for negroes, released $1,313,999 and served $288,115.

State Plant Board, released $337,270 and reserved $148,340.

Red Attacks

(Continued from Page One)

to the fact that in the Big Three conference at Paris Foreign Minister Molotov is reported to have taken a position in flat opposition to Marshall's proposals for European recovery.

The Russians have repeatedly charged however that the United States is trying to exploit a dollar imperialism and establish domination over countries it aids. The Soviets also have sought otherwise to discredit American motives.

Marshall said:

"There could be no more fantastic misrepresentation, no more malicious distortion of the truth than the frequent propaganda assertions of implications that the United States has imperialist aims or that American aid has been offered in order to fasten upon the recipients some form of political and economic domination."

He then recalled that the United States demobilized "the greatest concentration of military power that the world has ever seen" and left only small garrisons in occupied enemy countries.

The Secretary said that no conditions were attached to the withdrawal and he declared that since the end of the war "American goods in the amount of some 82,000,000 tons, valued at over $9,000,000,000, have flowed into Europe from this country."

Board Reports Plane Crash At Bainbridge Caused By Tail Unit

WASHINGTON, July 1 (AP)— The Civil Aeronautics Board said today its investigation indicates "some unit or assembly" in the tail failed in flight of the Eastern Airlines plane which crashed near Bainbridge, Md., May 30, carrying 53 persons to death.

The board's preliminary report said, however, "the inference is that nothing fell from the aircraft until just before it crashed."

There were widespread reports originally that part of the tail had fallen from the plane while it was in flight, or during its descent.

The report said the extensive CAB investigation found tail portions of the aircraft in a comparatively small area about 300 yards from the crash site.

It added that the position "precludes the possibility of their having fallen from the plane at any appreciable altitude."

The Bainbridge crash was the costliest in the nation's commercial flying history. It occurred as the aircraft carrying 49 passengers and a crew of 4 went into a dive out of straight and level flight in clear weather while enroute from New York to Miami.

The CAB said its investigation is being pursued. A second public hearing will be held after completion of a technical study of the plane's parts. The first hearing was held at Bainbridge June 16.

Tax Bureau Cut

(Continued from Page One)

jority of taxpayers are "scrupulously honest" about tax matters but that taxpayer morale will remain high "only if the odds remain strong that the would-be tax evader will be detected and punished."

"It is a fallacy," he added, "to assume that the reduction can be absorbed without weakening the enforcement activities of the bureau, because it is not possible to decrease materially the now inadequate number of employees necessary for the routine tasks of tax collection."

President Truman signed legislation making the United States a member of the International Refugee Organization, saying the IRO will give the world "new reason to believe that no problem is too difficult" for solution by cooperating nations.

Mr. Truman said he was "happy to accept membership" on behalf of this country as he signed the measure at a White House ceremony. The agency will operate through the United Nation.

Besides providing for United States participation in the IRO, the legislation authorizes a $73,500,000 contribution toward the care of Europe's 900,000 displaced persons in the next 12 months.

The House Armed Services Committee approved a bill authorizing $255,000,000 in Naval construction work on shore bases, and recommended appropriations of $127,800,000 for the work in the new fiscal year.

The projects include a $34,520,000 guided missile test center at Point Mugu, Calif., and a $27,850,000 aeronautical turbine laboratory at Trenton, N. J.

Paris Meeting

(Continued from Page One)

for food and agriculture, power, transport, capital goods, equipment and the steel industry.

Before Bidault's compromise was offered, British Foreign Secretary Ernest Bevin and Bidault were reported ready to proceed in continental economic planning without the Soviet Union if the conference does end in failure.

Chief Urges

(Continued from Page One)

more than 16,000 workers were idle in lay-offs attributed to lack of coal, including more than 14,000 steel-workers and about 2,000 railroad crews normally busy on coal shipments.

Production at the Farrell plant of the Sharon Steel Corp. will come to a halt tomorrow evening when a seventh blast furnace is banked and finishing mills complete work on hand.

Six open hearths, which continued operations after the first cutback last Thursday as a result of dwindling coke supplies in the coal mine shutdown, were closed last night. Officials said no estimate was available on the number of workers affected.

In New York Rep. Fred Hartley (R-NJ), chairman of the House Labor Committee, said today he was prepared to act swiftly if the Taft-Hartley law "is not administered honestly and to the fullest extent possible" in the event of a coal stoppage.

"In the event the section of the law which deals with public safety and public health is flouted," Hartley said, "I plan to have the committee report the section of the original bill which deals with monopolistic practices."

Hartley arrived here at noon to speak tonight before the annual convention of the National Association of Personnel Directors and said he would discuss the coal situation in his address.

The biggest diamond ever found was only a few feet from the surface of the mine and the superintendent pried it loose with the toe of his boot.

Cost Of Setting Speed Records Found Worthwhile

By JAMES J. STREBIG

WASHINGTON — The cost of setting world speed records is high, but the winner feels well repaid by the prestige he receives and the lessons he learns.

There is no plaque or trophy, not even a "little brown jug" — just a line in the book of international flying records. But governments spend heavily to get their names on such a line, chiefly because prestige pays off in the development of aviation industry and trade.

The United States waited 24 years to bring the record home. The effort, made successfully on June 19 with a modified P-80 Shooting Star, must have cost no less than $1,000,000.

Plane Maker Shares Cost

Lockheed Aircraft Corp., designer and builder of the P-80, shared the cost of preparing the plane which boosted the world mark to 623.8 miles an hour, however. The company is understood to have paid for half of the job of modifying the plane.

The record setting effort took at least a year, partly because of a landing mishap, partly because of a wait for suitable weather, and partly because of difficulty in redesigning the air inlets for the jet engine. Incidentally a new engine was designed and virtually hand made for the job.

Now that the record has been brought from England, which took it a couple of months after V-J day (the pre-war mark was held by Germany), it is probably just a question of time until some one else takes it away.

Some of the Rewards

Why all this struggle for laurels which may be lost next year?

Here are some of the by-products of victory, which translate into practical, every day flying economics and military supremacy:

1. Faster flight means more economy in operations. World speed record runs must be made under the most exact conditions, and therefore the flight is a certified performance of engine and plane. Lessons proved in their design can be applied to commercial flight. For example, the new Douglas DC-6 cruises at twice the speed of the DC-3, and ton-mile operating costs are only half as much.

2. Speed means superiority in military flying, and that increases a flier's prospects for survival. It gives the fighter an edge in combat, and, just as in transports, it increases efficiency of bomber operations.

3. Speed runs with their carefully controlled measurements are a highly refined phase of flight testing. As such, they contribute specific data on mechanics, structure, instruments, control and the human factors.

Wind Tunnels Come First

But why not make those tests in a wind tunnel?

They are made in wind tunnels many times before the plane flies. Every conceivable situation in flight is presented in the tunnel tests, but sad experience has shown that such synthetic flying does not give the final answer. No matter how hard the engineers try, there always are problems that hide until the plane gets into the air.

Proving in flight that a plane can outspeed any other aircraft in the world is evidence of a nation's design ability. That, in turn, is reflected in the interest of other countries in purchasing planes.

The United States has not shown any intention of selling jet fighters to foreign buyers, but England has supplied them to a number of countries, which undoubtedly were influenced by the acknowledged speed superiority of its jet planes.

In the case of the recent speed run, the benefit may be traced more directly than usual because Lockheed may be able to convince the Army Air Forces that the racing design should be developed into a reconnaissance plane. The modified P-80 is considerably faster than a standard model.

While the contestants for the record are national governments, the keepers of the book are private individuals working through the International Aeronautics Federation, the world body of sporting aviation, which in this country is represented by the National Aeronautic Association.

BANK OFFICIAL Henry J. MacTavish (above), 45, of Stamford, Conn., claimed self-defense in the fist fight at a party in Rye, N. Y., which allegedly resulted in the death of Vincent L. Banker of Rye. MacTavish appeared at the inquest held in the Rye police headquarters. No charge has been placed against MacTavish. (International)

NEW MONEY FOR YOUR OLD THINGS

Your Discarded Furniture, Pianos, Radio, Bicycle, Tools, Ice Box, can be sold with

A WANT AD IN THE NEWSPAPER

ANNOUNCEMENT

On behalf of my late husband, D. W. Short, and myself, I wish to thank our good friends and customers of almost 20 years—first, as a grocery store—later, as a Night Club, and during three years leased to "Duke."

Then through the hard gloomy war years, and again for nearly two years when it was leased to "Frank" as the Hi-Hat Club.

Now, I have sold to Mr. S. K. Dennison, the new proprietor, so, come out and meet him and again be able to DINE and DANCE and RELAX in that "At Home" feeling.

Thanking you all again,

MRS. D. W. SHORT

LUCKY STRIKE presents THE MAN WHO KNOWS—

THE TOBACCO WAREHOUSEMAN!

"IN 25 YEARS I've seen a good many tobacco crops sold at auction. And season after season, I've seen the makers of Lucky Strike buy tobacco that's really fine... good, ripe tobacco . . . tobacco you just can't beat for smoking quality."

Frank A. Brown

F. A. BROWN, INDEPENDENT TOBACCO WAREHOUSEMAN of Statesville, North Carolina (20 YEARS A LUCKY STRIKE SMOKER)

JOHN KAUFER

FINE TOBACCO is what counts in a cigarette

FRANK BROWN IS RIGHT! . . . And like him, scores of other experts...who really *know* tobacco . . . have seen the makers of Lucky Strike buy "tobacco that's really fine."

After all, that's what you want in a cigarette... the honest, deep-down enjoyment of fine tobacco.

So remember...

L.S./M.F.T.

LUCKY STRIKE MEANS FINE TOBACCO

So Round, So Firm, So Fully Packed—So Free and Easy on the Draw

In Unity There Is Strength—
To Protect the Peace of the World;
To Promote the Progress of America;
To Produce Prosperity for Sanford.

Treasury Reveals Budget Surplus Of Nearly $754,000,000

Last Excess In Seventeen Years Has Been Used To Reduce National Debt

WASHINGTON, July 2, (AP)—Secretary of the Treasury Snyder announced today the government finished the 1947 fiscal year Monday with a budget surplus of almost $754,000,000.

That was approximately $500,000,000 less than President Truman had estimated on April 19 and $401,000,000 below the record high set under President Coolidge exactly 20 years ago.

But it was the first surplus in 17 years and it broke up a string of deficits that began under Herbert Hoover and had continued under President Franklin D. Roosevelt and Truman.

Snyder told a news conference that the surplus—which represents the amount that government income exceeded spending over the past 12 months—already has been applied on the national debt.

With that amount included, debt retirement over the fiscal year totaled $11,522,000,000, Snyder said.

The debt stood at $258,376,000,000 on June 30. That was $21,388,000,000 below the all-time peak reached 16 months ago.

The exact amount of the surplus was $753,787,660.28. For the previous year, the government had had a deficit of $20,676,000,000. This meant an improvement of more than $21,000,000,000 for last year compared with the pre-

Fourth Of July Holiday Will Be Observed In City

Most stores and business establishments will close Friday for the Fourth of July holiday. Banks, the Post Office, City and County offices will also close. The office of the County Clerk and Tax Collector, and possibly other departments will be closed also on Saturday. The office of City Manager H. N. Sayer will be closed both Friday and Saturday. Garbage and trash collections will be made Saturday.

No edition of The Herald will be printed on Friday in order that employees may have the holiday. Drug stores will have holiday schedules, some remaining open and others observing a half day holiday by closing in the afternoons.

No official celebration of the holiday is planned here. Many residents are expected to attend the barbecue and vents to take place at Oviedo under spoonsorship of Oviedo Memorial Post of the American Legion.

The Sanford Public Library will be closed both Friday and Saturday, according to Mrs. Ellen J. Moughton, librarian.

June Attendance High At Recreation Ground

Attendance at the Grammar School grounds totalling more than 2,000, was today reported for the month of June for the City youth recreation program, according to Herman Brumley, director.

Mr. Brumley had high praise for the "wonderful job" that he said Mrs. Nancy Brock was doing in the supervision of games such as, badminton, volley ball, etc. and declared that a better person could not have been picked for the job.

He also praised the work that Miss Barbara Dampier, Stetson student, is doing in instruction at tennis. Rain has interfered with softball and baseball games, but play was resumed yesterday.

Swimming parties are being held every Thursday afternoon at Crystal Lake Park in Lake Mary, and dressing rooms will be completed soon, he predicted.

Pepper Seeks Equal Wages For Women

WASHINGTON, July 2 (AP)—Senators Pepper (D.-Fla.) and Morse (D.-Ore.) introduced a bill today to require equal pay for equal work for women in industry.

"Fair-minded Americans have long deplored the existence of wage differences based on sex in American industry," the senators said in a joint statement.

May Trial Nears End As Lawyers Finish Arguments

Prosecutor Says Conviction Would Be Aid To Democracy

WASHINGTON, July 2, (AP)—The prosecution in the May-Garsson war fraud trial today challenged defense contentions that a guilty verdict would have international repercussions and argued, instead, that it would be a "healthy" thing for democracy.

"Let's clean up our dirty linen in our back yard," Prosecutor William A. Paisley urged the jury in pleading for the conviction of ex-Congressman Andrew J. May and munitions makers Murray and Henry Garsson.

May, wartime chairman of the House Military Committee, is accused of taking more than $50,000 in bribes from the Garssons for favors on war contracts.

Defense attorney Charles J. Margiotti asserted a conviction of such wartime top figures would be seized upon by U. S. "enemies" abroad as "an argument against democracy." Striking at that contention, Paisley said in a closing statement as the case neared the jury:

"I'm not afraid of any international repercussions.

"Whose afraid of the truth? It has been corrupting our system and if we have a situation like it in this country, let's cut it out. The patient will live. It will make the patient healthy."

Paisley attacked the trial testimony of May and Henry Garsson as "unbelievable" and said all three defendants should be convicted in order to "protect the people of the United States against the corruption of their wartime chairman of the House Military Committee."

"Let the chips fall where they may," Paisley said, adding:

"You and I know that all this corruption was going on while men were giving their lives in battle."

Justice Henry A. Schweinhaut announced he expected the case to go to the jury late today. He said he would instruct the jury that in order to convict the Garssons they must also return a guilty verdict against May.

Postal Rates Fixed On Permanent Basis

Postal rates, including three cent letter rates and other rates in effect which hitherto have been renewed on a yearly basis, will continue thereafter on a permanent basis, according to information received by Postmaster Joel S. Field from the Inspector General.

Continuation of these rates was approved by Congress on June 30 in accordance with House Joint Resolution, 805.

The Sanford Post Office will be closed all day Friday, July 4th, Mr. Field announced. There will be no window service and no carrier delivery, either city or rural. Mail will be received and dispatched as usual on holidays. The Post Office will be open all day Thursday and closed as usual at noon on Saturday.

CIO Steelworkers Hold Policy Meeting

PITTSBURGH, July 2 (AP)—Top officials of the CIO's United Steel Workers Union met behind closed doors today to outline their policy under the Taft-Hartley labor laws.

Legal aspects were outline by Lee Pressman, CIO general counsel, but no report on developments was immediately available. International Secretary-Treasurer David J. McDonald presided in the absence of President Philip Murray, reported ill at home with a cold.

RED SPIT

NEW YORK, July 2, (AP)—Earl Browder, the 56-year-old former chairman of the Communist Party in the United States, paid a $2 fine today for spitting on the tracks at an elevated transit station.

He pleaded guilty in Bronx magistrates court. Julius Jarecki, a city transit policeman, said he saw Browder in the act.

Labor Department, Security Agency Funds Okayed By Senate

WASHINGTON, July 2, (AP)—The Senate passed and sent to the White House today a bill appropriating $1,675,158,630 for the Labor Department and the Federal Security Agency for the 1948 fiscal year which began July 1.

Senate passage came on adoption by voice vote of a compromise version which the House passed shortly before. The measure is the second of 12 major money bills adopted for the new fiscal year.

The total of the bill is approximately $105,455,000 under President Truman's budget estimates and $10,000,000 less than the House orginally had voted.

The measure had been in deadlock in conference between the Senate and House over a House stipulation that no funds be appropriated for the Conciliation Service, the effect of which called for ousting of Director Edgar L. Warren and some of his top aides.

Warren resigned yesterday and the Conciliation Service was dropped from the bill in the compromise version. Under the new Taft-Hartley labor union control bill the agency will go out of existence anyway after Aug. 21.

WASHINGTON, July 2, (AP)—Republican leaders scheduled a conference today (2:30 P. M. EST) to map a legislative program for the closing days of the session. It may include another try at tax reduction.

But they probably will postpone until next year final action on universal military training, federal aid to education and a long-range housing program.

The big question before them was that should they try to bypass the vetoed $4,000,000,000 tax

(Continued on Page Two)

Lawton Talks To Kiwanians About Education, Peace

United Nations Organization Is Compared To University

Education and its relation to future world peace was the topic of a talk to Kiwanians today at the Tourist Center by Supt. T. W. Lawton. He was introduced by Henry McLaulin.

Three songs by the Kiwanis quartette which includes Edwin Shinholser, Dr. H. W. Rucker, Martin Stinecipher and, Roger Harris drew hearty applause, especially the encore, "Ain't Goin' to Study War No More."

Education is complete living, declared Supt. Lawton, who pointed out that this process begins in kindergarten and continues through schools to adult training.

He compared the United Nations Organization to a great university for training of individuals. Marshall, Bevin and Bidault are getting good grades as pupils, he declared, but Molotov is not getting very high marks. The latter, he pointed out, stresses what cannot be done, and he has got to find what can be done.

UNESCO, said Mr. Lawton, is also one of the greatest educational institutions ever established, and is trying to guide education in various schools and colleges throughout the world. This cannot be done by force, it must be voluntary, he declared. Russia would be willing to join if everybody else would think like they do, he asserted.

Election of Gen. Dwight Eisen-

Buick Sedan Found Balanced On Seawall

What happened to the driver of the black 1940 Buick sedan which was found early this morning perched astride the Lake Monroe seawall near the Dew Drop Inn is yet unknown, according to State Highway Patrolman L. C. Bender who was notified of the accident at 1:15 A. M.

The automobile, which is registered in the name of G. A. Niblack of Sanford, rested on its axles on the sea wall with two wheels over the water. It was pointed toward Sanford. At daylight, the car was taken to the Speedy Sales and Service Company by the Ratliff wrecker, said Patrolman Bender. He revealed that the owner had not been located at 3:00 o'clock this afternoon.

Sub-Chaser Readies For Trip On July 10

SC-679, the sub chaser which since last July has been located here for Naval Reserve training purposes is being readied for a trip to Jacksonville and then to Key West, according to crew members under command of Lieut. F. G. West.

The ship is expected to sail about July 10. At Key West it will be overhauled, the bottom scraped and re-caulked and the two 500 hp General Motors Diesel engines, and two auxiliary engines will be overhauled.

RUSSELL ESTATE SOLD

Roy C. Howard, who recently sold his home and acreage near Silver Lake, has returned from Daytona Beach and has purchased the John Russell home on East First Street from Mrs. Olive A. Marshall. Revenue stamps on the document indicated the sale price was $20,000.

Convicts Seize Capital City On Philippine Island

Order Restored After Rebel Leader Dies In Fierce Gun Fight

MANILA, July 2, (AP)—Thirty-two heavily armed escaped convicts last night seized control of Calapan, capital of Mindoro Island, but military police reinforcements restored order late today after a bitter gun fight in which the rebel leader was killed.

Governor Conrado Morente of Mindoro telegraphed Malacanan Palace that 10 of the jail breakers had been captured. 19 still were at large and three were killed.

Morente, along with Calapan's mayor, Filomeno Sumaco, the city police chief and Congressman Raul Leuterio, were disarmed by the escapees but were not held

(Continued on Page Eight)

Canadian Report Reveals Alleged Newsprint Combine

OTTAWA, July 2, (AP)—Justice Minister J. L. Ilsley told the Canadian House of Commons last night that the Combines Investigation Commissioner had made a "confidential" report to the government on an alleged "combine" in newsprint manufacture but that "no proceedings have been taken."

Ilsley made no reply when he was asked "where we go from here" by Stanely Knowles of the Socialist Cooperative Commonwealth Federation Party, who had raised the issue in a study of justice department estimates. He did say he had referred to the commissioner representations on the supposed combine.

Knowles said he had communications from labor organizations "suggesting that there was some combine in the manufacture of newsprint which was contrary to the Combines Investigation Act" and also documents from "the newsprint people themselves" indicating that upon the ending of wartime controls they instituted their own supply control.

Knowles declared that despite "good production" of newsprint in Canada, the Vancouver Sun and a Winnipeg Publisher were having newsprint supply difficulties.

"It appears to me," he added, "that a pretty high percentage of our newsprint is exported to the United States."

Religious Union Said Foundation Of Peace

ATLANTA, July 2, (AP)—The Rev. John Buchman Walthour, new dean of the Cathedral of St. Philip, today called for union of all the world's religious denominations as a basis for permanent peace.

Dean Walthour, chaplain of the United States Military Academy at West Point for the past six years, said in an interview that he recognized such a union was "idealistic" and could not come "until a great many denominations, including my own, experience a death to selfishness and a resurrection to an unselfish living of the real Christian religion."

NO RYDER MATCHES

HOYLAKE, England, July 1, (AP) — Professional golfers team matches between Britain and the United States for the Ryder Cup will not be held this year, R.C.T. Roe, secretary of the British PGA, disclosed today.

News Program Called Vital By Marshall

Congress Is Urged To Okay Funds To Expand Foreign Information Activities

WASHINGTON, July 2, (AP)—Secretary of State Marshall urged senators today to approve in this session of Congress legislation to expand a foreign information program which he termed "vital to the success of our foreign policy."

Marshall told a Senate foreign relations subcommittee that unless the Senate acts on legislation authorizing suth a program, the State Department will face "serious handicaps" abroad.

Rep. Mundt (R-SD), author of the House-passed measure now before the committee, also urged speedy action. He told the senators that "Russians and others are spreading malicious lies about us every day."

Republican leaders have indicated they may pigeonhole the Mundt bill until next January and rely on a $13,470,000 appropriation passed by the Senate to carry on the cultural program, including the shortwave radio "Voice of America" broadcasts.

Marshall told the committee that the Senate-approved appropriations figure is too small, representing only about one-half of the money that President Truman originally requested.

"This sum will certainly not enable the department to carry on the information activities at a level which our embassies abroad consider to be essential," the Secretary said in a prepared state-

(Continued on Page Eight)

Dry County Clubs Restrain Vocelle On Liquor Permits

TALLAHASSEE, July 2, (AP)—Six more dry county clubs today obtained circuit court orders temporarily stopping Beverage Director James T. Vocelle from cancelling their permits to serve liquor to members and guests.

All of the clubs which entered their injunction suits in Leon county circuit court today are in Polk county. Two other dry county clubs—one in Polk and one in Leon—previously had obtained temporary restraining orders.

Circuit Judge W. May Walker issued the restraining orders for the Lakeland Yacht and Country Club, the Mountain Lake Corporation of Lake Wales, the Winter Haven Golf Club and the American Legion posts at Lakeland, Mulberry and Winter Haven.

He set no date for hearings on motions to make the injunctions permanent.

Vocelle issued orders to cancel all dry county club licenses after the Supreme Court ruled unconstitutional a 1935 law which permitted such organizations to obtain special permits to serve liquor even though general liquor sales were banned in the county.

A new test in the Supreme Court could result in a different decision since the court split 4 to 3 on the original case and circuit Judge George Holt of Miami, who wrote the majority decision, is no longer sitting with the Supreme Court.

Judge Holt sat with the Supreme Court for a month under the court's policy of calling in circuit judges for short terms to fill the temporary vacancy existing while Justice H. L. Sebring is in Germany conducting war crimes trials.

Batten Takes Shot At "Peeping Tom"

Residents in the San Lanta Apartments on nearby East Fourteenth Street and nearby neighborhood were alarmed late last evening at the sound of gun fire which they reported to police.

Investigation revealed the fact that one of the residents had seen a man, believed to be white, peeping in windows of an apartment. Irvin E. Batten, electrical contractor and resident in the apartment building was notified. He secured a shot gun that he uses for hunting quail and yelled to the intruder to stop, and as he failed to do so, let go with a couple of rounds of buckshot.

The last seen of the intruder he was fleeing down an alley toward Celery Avenue. He may have been hit, according to Mr. Batten.

Paris Meeting Ends As Molotov Rejects Marshall Aid Plan

Clayton Says U.S. Has No Plans If Paris Meet Fails

Britain Is Geared To Slash Drastically Overseas Buying

GENEVA, July 2, (AP)—U. S. Undersecretary of State William L. Clayton said today that "so far as I know the United States is taking no steps" if the three-power conference in Paris breaks up without agreement of the Marshall Aid-for-Europe plan.

Clayton, who conferred with top British officials on the Marshall plan in London before coming here, told a news conference that his government was "waiting for Europe to take action" on the American proposals.

Asked whether he thought the United Nations Economic Commission for Europe, which meets here July 5, should be used to implement the Marshall plan, Clayton said:

"That is for Europe to decide. Dispatch is highly important. It would seem to me that the commission should be selected by Europe, but the selection should not be exclusive, so that if it appeared progress was not being made other means could be substituted."

Clayton said the Marshall plan could be carried out, even if some states in Europe chose to remain outside. He said he hoped Russia would participate in the World Trade Conference proposed for Havana this fall.

Meanwhile, in London, a high government source said Britain was ready to slash "really drastically" her entire overseas buying program if the Marshall program falls through.

The United States as Britain's principal supplier would be affected more seriously than any

(Continued on Page Eight)

Truman Plans Three Day Trip To Virginia

WASHINGTON, July 2, (AP)—President Truman has decided to extend his Independence Day visit to Charlottesville, Va., to a three-night stay beginning tomorrow night, the White House announced today. He will return to Washington Sunday instead of Saturday.

The President will leave here by automobile at 1:00 P. M. (EST) tomorrow and will stay the three nights at the home of Stanley Woodward, chief of the State Department's protocol division, about a mile from Charlottesville.

Mr. Truman will speak at 12:30 P. M. (EST) Friday from a specially constructed platform on the west portico of Thomas Jefferson's home "Monticello."

The President also will attend a luncheon Friday at the Colonnade Club of the University of Virginia at Charlottesville.

Ross said 46 news, radio, and cameramen will accompany the President—the largest delegation of its kind ever to travel with Mr. Truman.

Women's Corps Urged By Army, Navy Chiefs

WASHINGTON, July 2 (AP)—Gen. Dwight D. Eisenhower and Fleet Admiral Chester W. Nimitz urged Congress today to authorize permanently the services of women in the regular and reserve Army and Navy.

The Army and Navy chiefs praised before the Senate Armed Services Committee the parts played in World War II by the WACS and WAVES, auxiliary women's corps of the two service branches.

Provision for existence of the WACS and WAVES will expire under present law six months after the war is declared officially over. There are now 9,100 WACS and 2,500 WAVES in active service.

WATERWAY BLOCKED

WASHINGTON, July 2, (AP)—The House turned down today a proposed $3,000,000 appropriation to begin immediate construction of the Apalachicola-Flint-Chattahoochee waterway in Alabama, Florida and Georgia. The vote was 106 against and 32 for the appropriation.

Red Prestige Seen As Harmed By Paris Meet

Intervention Between Europe And Recovery Hits Communism

By J. M. ROBERTS, JR.
AP Foreign Affairs Analyst

From the standpoint of those who see sincere international cooperation for the general welfare as the only real hope of peace, the Paris conference is a failure. But it is a success from the standpoint of an Anglo-American policy based on practical hope of early achievement.

Russia's policy has been held up to the light. For her own private purposes, for the hope of continuing and expanding her hegemony over small nations, she has blocked the chances of many of them for participation in a plan which might have meant their economic salvation. Unable to help them, in fact, actually draining them and patently worried about their already higher standards on the morale of her own subdued peoples, she refuses to let them help themselves.

Poland wants to participate. Hungary wants to participate. Rumania and Bulgaria are so subdued that they cannot express themselves. Yugoslavia's dictator, of course, is heart and soul with the Muscovites and we can't hear the people.

Czechoslovakia's cabinet jumped to commission on the subject is practically in revolt against the Russian policy, openly advocating cooperation with the West. Prague already is having trouble with a Slovak separatist movement, just the type of thing which might give the Communists an excuse for "moving in." Should the cab-

(Continued on Page Two)

Eva Braum Rumored To Be In North Italy

BOLZANO, Italy, July 2 (AP)—Allied officials today were investigating recurrent rumors that Eva Braun, Adolph Hitler's mistress, had appeared on various occasions recently in the Alto Adige area of northern Italy.

(In Rome, Allied press officers denied several days ago that there was any truth to the reports but said they would investigate.)

Reports circulating here today said a woman resembling Eva Braun and speaking with a German accent went to a savings bank at Fondo, in the Trento district, last week to cash a 50,000 lire (about $155) check. She was reported to have displayed papers issued at Innsbruck and inscribed with the name "Eva Braun."

CIO Makes Peace Move In Ford Strike

DETROIT, July 2 (AP)—The CIO United Auto Workers today sought the role of peacemaker in the six-weeks strike of 3,800 unionized foremen at the Ford Motor Co.

The UAW-CIO International Executive Board skirted a request from the striking Foremen's Association of America (Ind.) that its 85,000 Ford production workers respect picket lines at three local plants.

Instead, the board directed Vice President Richard T. Leonard to seek an audience with the Ford management "in an effort to resolve the controversy."

Legion Plans Outing At Oviedo July 4th

A big Fouth of July celebration program is planned to take place near the swimming pool at Oviedo Friday. It is directed by the Oviedo Memorial Post of the American Legion, which has recently been conducting a drive to reopen the pool.

The program includes an afternoon ball game, a barbecue, a string band program and swimming contests. Events are scheduled to start at 9:00 A. M. and a large crowd, including many Sanford residents is expected, according to Legionnaires.

Britain-France Are Warned Proposals Would Lead To Division Of Europe

By JOSEPH E. DYNAN

PARIS, July 2, (AP)—Soviet Foreign Minister V. M. Molotov turned down today British-French proposal for European recovery under the Marshall program, and apparently ended the conference of the three foreign ministers on the subject of American aid to Europe.

Molotov said the British-French proposals "would lead to bad results" and warned both Western nations that their action would lead to a division of Europe.

A high Soviet official said this session was the end of the conference which found Russia in complete disagreement with Britain and France.

The French government immediately announced that France and Britain would pursue a study of the Marshall aid-to-Europe program along with any countries which wish to join them.

Molotov left the meeting about five minutes before British Foreign Secretary Ernest Bevin, French Foreign Minister Georges Bidault accompanied him to the door of the foreign ministry, shook hands, and went back upstairs to confer with Bevin.

Flood Threat In St. Louis Area Is Diminishing

ST. LOUIS, July 2 (AP)—The muddy Mississippi River appeared to have reached its crest here today after smashing four main levees yesterday and routing thousands of persons from their homes in nearly Illinois communities.

The river remained stationary at 40.3, a 10.3-inch high, and Harry E. Wahlgren, U. S. meteorologist said it was expected to start falling before dark.

While the worst of the flood appeared past for the St. Louis area, the situation southward as far as Cairo, Ill., remained critical.

A levee break in Jackson County, Ill., 100 miles south of here, flooded the town of Grand Tower and several unincorporated areas.

Walter Whitehead, county disaster chairman for the Red Cross, estimated 320 families fled from their homes in Grand Tower and the surrounding area and said up to 40,000 acres of crops had been lost in the county.

Grand Tower had been virtually isolated yesterday by an upstream levee break which sent floodwaters pouring down an inland valley and closed all but one road leading into the town of 1,000 people.

Fall Speaking Tour Considered By Wallace

NEW YORK, July 2, (AP)—Henry A. Wallace is considering plans, as yet tentative, for another speaking tour which would begin this Fall in New England and possibly would include engagements in, Indiana, Pennsylvania, Kentucky and Ohio among others, a spokesman for the New Republic magazine said today.

The spokesman for the magazine of which Wallace is editor, said that "No definite schedule has been arranged and won't be for weeks, but Mr. Wallace is considering another tour in which he would continue to express his ideas for peace and on how to keep the Democratic Party liberal." The spokesman added that Mr. Wallace hopes to cover areas and municipalities which he did not visit on his recent nationwide speaking tour.

DRIVERS' LICENSES

Tests for obtaining drivers' licenses may be obtained under direction of the State Highway Patrol at the office of W. E. Watson, justice of the peace, in the Court House, Tuesday afternoons from 2:00 to 5:00 o'clock, and Friday morning from 9:00 o'clock until noon.
