C. of C. Dues Should Be Paid

MAITLAND CHAMBER OF COMMERCE SEEKS INCREASED MEMBERSHIP

Chamber of Commerce fiscal years generally run with the calendar year and January is the time when dues should be paid and new memberships taken out. The secretary of the Maitland Chamber of Commerce is asking every old member to renew his membership and those who have not been members to come in to the organization at the beginning of this year.

This action is in line with that recently taken by both Orlando and Winter Park. Orlando is undertaking a drive for 4000 members with a membership fee of \$25.00, which will bring in \$100,000.00. Winter Park last week organized to obtain 500 members with a fee of \$15.00 each, a total of \$7,500.00, and Winter Park usually gets what it starts out for.

Maitland has not yet set a goal, but the fees are only \$10.00 for men and \$5.00 for women, so that a hundred members, equally divided, would bring in \$750.00. This would go far toward paying up the bills incurred for pamphlets and the building, both of which belong to the coming year's budget as they were completed only at the end of the past year, and for running expenses during this year. Those intending to join are asked if possible to do so before the annual meeting so that the new officers can start with a clean slate and devote their energies to constructive work, not to raising money to pay up back debts.

The annual meeting of the Chamber will be held at the White Way restaurant Thursday evening, February tenth. It is hoped that there will be a large attendance both of members and of those who are interested in learning of the work of the organization. It will be necessary to make reservations with the secretary for the dinner, which is \$1.00 per plate.

At this meeting officers will be elected for the coming year and plans for the work to be undertaken will be discussed.

SPECIAL MEETINGS CLOSE

Final results of the special meetings at the Presbyterian Church, closed last week, are not yet ready, according to Reverend Mr. Visor, pastor of the church. Mr. Visor is well pleased with the attendance and the spirit shown during the week of the meetings and feels that they have been of great value to the life of the church. Nine people joined the church during the meetings.

The News wishes to apologize for an error in printing last week, when the paper announced that final reports of the success of the meetings were not "favorable," the type setter having substituted "favorable" for "available".

When you think an unkind thing about some one, think several times before you say it.

Think more, earn more, and get more out of life.

To Celebrate Founder's Day

On Friday afternoon the Maitland branch of the Parent-Teacher Association will celebrate Founder's Day. The exercises will be held in the schoolhouse at three o'clock.

This will be the thirtieth birthday of the National Association and is being kept all over the country. A cake with thirty candles will commemorate the anniversary, while the fourth year of the Maitland branch will be celebrated with a cake with four candles.

Women eminent in the work of the association will speak during the afternoon. Mrs. A. B. Lemmon, Mrs. D. O. Hibbard, Mrs. C. F. Batchelder and Mrs. Frederick E. Godfrey, all from Orlando, have promised to be present and make short addresses. Mrs. Godfrey helped to organize the Maitland branch and was present at the first meeting four years ago.

The special song for the occasion, "Tribute," will be sung by Mrs. Arthur B. Rowland.

All members of the association and those who are interested in the school and the children are invited to be present.

R. A. WHEELER LEAVES FOR WEST INDIES

R. A. Wheeler, vice-president of the Maitland Lumber Company, sailed for Havana Sunday on a business trip to the West Indies. Mr. Wheeler will be absent for several months in the interests of the E. D. Flynn Export Company of Mobile, Alabama, one of the largest exporters of yellow pine timber in the south. Before coming to Maitland, Mr. Wheeler had been connected with this concern for a period of more than eight years and the company has been anxious to have him go back into their service. Mr. Wheeler will travel throughout the West Indies during his trip, covering the localities served by the company.

HALDEMAN BUYS HOME

H. D. Haldeman, bookkeeper at the Maitland Lumber Company, has purchased the house just finished by Chas. Hasslinger on South Maitland avenue. Mr. Haldeman has been living in Maitland for the past two years and has occupied H. C. Pearson's home on Vanderpool avenue.

The Hasslinger house is a five room modern bungalow situated in Orange-dale Park. Mr. Hasslinger owns several lots in this subdivision and plans to build more houses in the near future.

P. T. A. COUNTY EXECUTIVE BOARD MEETS

A meeting of the County Executive Board of the P. T. A. met Wednesday in Maitland at the home of Mrs. Harold Peat, County Chairman. Those present were Mrs. Dougherty of Winter Park, Mrs. Gould of Apopka, Mrs. Barbour of Orlo Vista, Mrs. Hazel and Mrs. Hibbard of Orlando. Plans were made for a general rally to be held in Pine Castle on March 23rd.

It was announced that Dr. Winfield Scott Hall will give a free lecture at Memorial High School at eight o'clock on the evening of March fourth.

Winter Park Buys Tract For Park

Announcement was made last week of the purchase by the City of Winter Park of that section of the golf course lying between Park Avenue and Interlachen Avenue, including the country club building, putting green and three greens.

The property was purchased for the low price of \$50,000, provisions of the sale being that it shall never be used for anything but a park, that it shall be known as the "Charles H. Morse Memorial Park" and that a suitable memorial to Mr. Morse shall be erected within a reasonable time.

This tract is a portion of the Morse estate which comprises the two golf courses used by the Winter Park Country Club. The greater part of this estate lying west of the highway will be subdivided by the owners.

The terms of the sale are so easy that it will cost the taxpayers only one-third of a mill over a period of eight years, and the greater part of this will be received in the taxes on the lots which will be sold in the portion of the estate that is to be subdivided.

VALENTINE PARTY

A Valentine party is being given this week Tuesday at the Sanlando Golf Club under the auspices of the Maitland Chamber of Commerce. The card parties which have been given every two weeks have proved so successful that it was decided to give a more ambitious entertainment with both cards and dancing, thus attracting the young people to whom cards would not appeal. An orchestra has been engaged and special refreshments planned. It was expected that there would be at least a hundred people present. The spacious rooms and delightful surroundings at the Sanlando Club go far toward ensuring the success of any party given there, and there is every indication that this will be the best party given by the Chamber of Commerce.

NEW ELECTRIC SIGN AT MAITLAND GARAGE

An electric sign has been placed outside the Maitland Garage advertising Goodyear products. This is a welcome addition as it helps to brighten the highway and indicate to tourists as they pass through at night that they are in the town of Maitland. A few years ago the streets of the town were almost as dark as the country roads, the dim electric lights only serving to emphasize the surrounding darkness, but now the White Way lights, the lighted store windows and an occasional electric sign give notice that the town is awake, not sleeping.

C. OF C. CALLS FOR MAITLAND SONG

Words for a Maitland song are wanted by the Chamber of Commerce. Some have already been submitted but the secretary is anxious that there should be a large number presented to choose from. The words should be set to some familiar tune that can be sung with vigor and enthusiasm.

Maitland Auxiliary Holds Annual Meet

The fifth annual meeting of the Maitland Auxiliary was held at the Library last Thursday afternoon, the president, Miss Caroline Kingsley, presiding. Twenty-five members were present.

The report for the year showed the greatest amount of work done for any year since the organization of the auxiliary, four years ago. A total of three hundred garments was made by the members. During the year several calls for help were responded to. Sheets were made for the orphanage on an emergency call after the loss of laundry in a fire. One hundred new garments were sent to the Red Cross for the relief of hurricane victims, besides a large quantity of second hand clothing which was collected. Fifteen dollars was sent to the Children's Home Society to purchase necessary clothing for children brought in after the hurricane. One local charity was assisted. The society purchased a new portable electric machine, turning in two old Singer machines.

The treasurer's report showed receipts for the year amounting to \$174.00 and disbursements of \$157.00, leaving a balance on hand of \$17.00.

The officers elected for the year 1927 were: Mrs. Wm. Cammack, president; Mrs. G. W. Backus, vice-president; Mrs. S. J. Stiggins, secretary and Mrs. C. D. Horner, treasurer. Mrs. C. J. Woodward and Miss Kittie Vanderpool were appointed as a special committee to purchase material and cut out work for the next meeting.

After the adjournment of the business meeting, the year's work was inspected and tea, sandwiches and cake were served.

An all day meeting will be held on Thursday, Feb. 24, and it is hoped that there will be a large attendance so that there may be a good start toward making next year's work exceed the one just past.

MAITLAND EXHIBIT PLANNED FOR ORLANDO FAIR

An exhibit featuring all varieties of citrus fruit is being prepared for the Orlando fair by the Maitland Chamber of Commerce, under the chairmanship of Forrest B. Stone. Maitland booths have taken prizes the past two years and it is planned to have the biggest and best exhibit this year that has ever been put on.

The booth this year is to present a complete showing of all fruits grown in this locality, especially different varieties of citrus fruits. Anyone who has anything a little unusual or any fruit now ready that is out of season is asked to communicate with the secretary of the Chamber of Commerce, 1314J, or with Mr. Stone. The committee is anxious to have the exhibit as complete as possible and begs the co-operation of everyone to help make it a success.

Mr. and Mrs. T. M. Henkle have returned from New York and are occupying their new home in Aloma.

PARKS AND PARKING

The purchase by the City of Winter park of a beautiful tract of land for a municipal park shows a remarkable foresightedness and enterprise on the part of the city commissioners and citizens of our neighboring city of which we are very proud. Now Winter Park has a park of which she may justly boast and not need to make excuses about her parks being in name only.

True, this part of Orange County is naturally beautiful and if left alone would be almost a park without artificial provision. But just as the coming of the automobile has made our widest roads seem narrow and necessitated the spending of great sums of money for widening city streets so that motorists may have parking space, so will the coming of more people in the years to come make it necessary to provide public parks and recreation areas.

When the lake shores are all privately owned and the woodlands fenced, where will the family go for the afternoon stroll or for the weekly outing? Our station parks and little triangles at the intersection of streets will only be formal beauty spots, and not suitable for any practical use. Now is the time to plan for the future parks and playgrounds; now is the time to start the sometimes slow public mind toward securing properly located and suitable tracts for future public parks.

Some day Orlando will reach out to the boundary of Seminole County and Maitland be a charming suburb of a great central Florida metropolis. Then we will need these park areas. Then too, they will be hard to get—and expensive. Let us think of these things now, and plan accordingly.

WATER PRESSURE STRONG

A test of water pressure in the hydrant at the corner of Maitland avenue and Magnolia Road, the most distant hydrant from the waterworks, was made Tuesday evening when the fire department made a record run to this spot in less than two minutes and obtained a pressure of 120 pounds.

The fire drills held on Tuesday evenings serve both to give training to the department and to test out the hydrants in the different parts of town.

RACE COURSE IN LAKE MAITLAND

Mr. Elmer Johnson is having a half mile course for motor boat racing laid out in Lake Maitland. The course extends from his boat house on the south shore of the bay at the Maitland end of the lake to a point near the north shore off the Kingsley property. The course is being made by Berkeley Blackman of Winter Park and is intended primarily as a practice course.

Miss Anna Treat, Editor,
Maitland News,
Maitland, Fla.

Dear Miss Treat: I have been receiving and reading with a great deal of interest each issue of your interesting little paper, The Maitland News. Each issue has been very commendable, and you should certainly receive the solid support of Maitland and vicinity. I enclose herewith check for \$1.50 to cover my subscription for one year.

Wishing The Maitland News a big success, I am,

Most respectfully,
W. B. JOINER.

The hard part of it is that the people who are looking for trouble aren't the only ones who get it.

Some fellows expect opportunity to make love to them.

GOOD MERCHANDISING

Two men were sitting on a bench discussing Florida. One argued that living prices were still too high in Florida; the other insisted that he could live just as cheaply in this city as in his home city in Ohio. Finally they decided to get down to concrete facts. They agreed to take a local paper and compare the advertisements with the advertisements in the home paper. This they did; in their own language, "it was an eye-opener."

A representative of this paper, anxious to confirm their conclusion, took a hand in the investigation, and when the final figures were made and a general average struck, the percentage was in favor of the local merchant. It was found that in the daily essentials, such as groceries, meats and vegetables; in clothing and shoes, and in most lines of dry goods, Florida was down to rock bottom prices. The greatest surprise was in furniture, where the figures were even more favorable to the local dealer.

This thing will be discovered by any careful investigator: That Florida has wide awake merchants; they know how to buy and they know how to sell. They are stocked up heavily and they are making low prices to move the goods. They make a small profit on individual sales but the large turnover takes care of that situation. The one item in which there was found room for complaint was fuel; it was thought that the price charged for wood was greatly out of proportion to other household essentials. And this is true, even though the city is surrounded by wood and most of that offered in the market is from waste timber of the forests.

There has been a lot of park bench discussion of Florida that reached wrong conclusions because of failure to investigate. Fewer wrong impressions would go out were people to pursue the course of these two men before knocking Florida. A lot of people spoil their vacation by letting their imagination run away with them. Once they begin to investigate they find that not only is the sunshine good to them, but that the local business men are trying their best to serve and to please them. The stores of this city certainly have made price inducements this season that will compare with any city anywhere.—Reporter Star.

BEAUTIFICATION NOTES

"Have you ever stopped to admire the beauty of an humble little cottage

by the side of the road, of very unpretentious design and construction?

Did you notice how natural the setting—how it seemed to just grow among the trees, shrubs, palms, vines and flowers—how cool looking and inviting the carpet of green, well kept grass?

A house that does not have a setting of living, growing things to tie it to the surrounding landscape is just a HOUSE. It is not a complete HOME.

Plan your grounds as you do your house, for beauty, comfort and permanence. It pays a handsome profit as an improvement to your real estate and makes the world a better place to live in, for you and those around you."

February is the month to plant Calendulas, Carnations, China Pinks, Hollyhocks, Larkspurs, Nasturtiums, Pansies and Snap Dragons, Fruit Trees and Rose Bushes.

—Beautification Committee.

LIBRARY NOTES

The total circulation of books for January was 301, adults 201 and juveniles 100.

A file of the Atlantic Monthly was given the Library by Miss Elizabeth Treat and one of the American City was placed in the Library by the Maitland Town Planning and Zoning Commission.

Story hour is held every Saturday afternoon at two o'clock and all children are invited to attend.

"The Yard for the Improvement of Domestic Habitations"

ORANGE COUNTY EXHIBIT AT TAMPA FAIR

Approximately \$15,000,000.00 worth of produce will be raised in Orange County during the season of 1926-1927, according to statements made by representatives of the Orange County Chamber of Commerce in attendance at the South Florida Fair and who are in charge of the Orange County exhibit in Snow Hall. Orange County is one of the premier orange, grapefruit and tangerine growing counties of the state and added to this the truck farming interests are among the best in the entire country.

Orange County's exhibit is attracting widespread interest because of its unusual features. The agricultural, industrial, civic and scenic values of the state are portrayed through a series of five paintings so arranged that one merges with the other in a manner that tells the story instantly and completely. Small displays of the principal products of the country are artistically arranged, while a pictorial review of the county is continuously appearing on a screen arranged in a panel of the wall of the exhibit.

Orange County's prosperity is signified throughout the exhibit. Each display of fruits and vegetables is accompanied with a brief description of the annual value of the particular crop. Literature from many of the 22 communities of Orange County is there and available for all who are interested in any phase of the county's activities.

The New England Society of Orlando invites all visitors from the New England states to meet with them at the City Hall on the second and fourth Thursdays of the month, at 7:30 p. m. when they can enjoy meeting their friends from home and a fine entertainment and refreshments are furnished on each occasion. At the next meeting to be held Thursday evening, February 10, plans will be discussed for decorating cars and a float for entry in the States Parade. Further information may be obtained from F. J. Fotch, 222 S. Orange Ave., Orlando.

Food for Thought

In citrus growing, the cost of plowing, cultivating, spraying, pruning, and incidentals are not subject to much variation from year to year, when computed on a per acre basis. The average cost per box, however, varies greatly with the size of the crop. A large crop means a cheap crop per box; a small crop shows a high cost of production per box. If you double the cost and the work done in any of the above cultural operations, you will not greatly increase your crop per acre, nor will you decrease your cost per box. Fertilizer is the only factor, on well drained groves, which will greatly increase your crop and materially reduce your cost of production per box. It costs practically no more for labor to apply fertilizer heavily; other costs per acre remain about the same when the fertilizer is increased. Under heavy fertilization, the big difference shows up in the low cost per box, and the big volume of business done at a maximum profit per box.
