More Business Buildings Necessary

If Sanford is to grow as rapidly as it can grow, more commercial houses, more office buildings and more downtown store rooms must be provided. We are making quite a record in the construction of residences but in erecting business buildings we have been negligent.

The man who wishes to open an office or a store in this city is up against an almost hopeless task. Every available location in the business district seems to be in use and even ways picturesque, but some times the upstairs offices that are unoccupied are few.

Not a day passes but what people come to Sanford for the nomination fight will be between purpose of entering the business life of the community, but Secretary Hoover and Vice-presiwhen they find it is almost impossble to get available space dent Dawes. He says the "two term for an office, or a store, these people are forced to move on tradition established by Washingand go to some other town. And Sanford loses.

The business district must be expanded and developed. The new arcade building with its forty-five stores will greatly help in furnishing needed space but one such building is wrong in two ways. There isn't any not enough to meet the demand. It would be a fine piece of question of a two term tradition. community building for some men with vision to commerce the construction of more stores and more office buildings.
