Nixon's Huge Budget Request Written In A Deep Red Ink

By STERLING F. GREEN
Associated Press Writer
WASHINGTON (AP) — President Nixon handed Congress today a \$243.3 billion budget for fiscal 1973 written in deep red ink. He announced two huge deficits—\$38.8 billion this fiscal year and \$33.3 billion next—and said they will help speed up the nation's economic recovery.

His budget message asked neither for further tax cuts to stimulate the slack economy nor for tax increases to meet the climbing costs of government, although his deficits are the two largest since World War II.

"Deficit spending at this time, like temporary wage and price controls, is strong but necessary medicine," Nixon said. Yet his message slapped repeatedly at the Democratic-controlled Congress for spending more than he had asked.

Revenues will rise "as the new prosperity takes hold," Nixon promised. This trend makes possible the smaller deficit for fiscal 1973, starting next July 1, he said, and "brings us strongly forward to ward our goal of a balanced budget in a time of full employment."

In asking \$74.5 billion for defense, Nixon scheduled the first sizable increase in new weapons system spending in years, even while "we move to zero draft calls."

He asked \$1.91 billion for space, a bit more than this year but aimed at less lofty exploration goals.

And the President unveiled, as a basic turn in national strategy, a government-splashed drive to speed technological progress, to cut costs, increase productivity and restore competitive leadership to American industry.

'Vietnam Draining Economy'

By HILL SCOTT
New York Mayor John Lindsay, 50-year-old former Republican-now-Democrat, visited Sanford Saturday afternoon on his campaign swing to seek votes to win him the state's Democratic presidential nomination on March 14.

The slim, tall, handsome mayor arrived at The Sanford Herald from DeLand shortly after 2 p.m. and spent almost 30 minutes with The Herald's editorial staff members before heading to the Sanford Plaza shopping center to shake hands with voters eager to meet the man, who might some day be their President.

Accompanied by an entourage of newspaper reporters and campaign workers, Mayor Lindsay seated himself behind the desk usually occupied by Stafford Derby, Herald editorial writer, and after placing a call to Miami, relaxed to answer the inevitable questions from Herald staffers.

"I have no interest in running for the vice presidency" (as had been rumored) was Lindsay's reply to the first query. He indicated the reason for his candidacy is to "change the direction of the country and stop the polarization of the races."

Major issue facing the country is the uncertainty of the voters over jobs, economics and the Vietnam War, Lindsay opined. He stated the war is associated with the economy and is draining "my city by \$5 billion a year" to support it.

On a Florida issue, Lindsay said the space shuttle is not a high priority at this time due to the war. "I can use every man now being displaced by the cut-back in the space program in New York's ecology program," was the mayor's solution for finding jobs for engineers and technicians.

Lindsay said he favored the space program but not as long as the country is committed to high military expenditures.

The New Yorker said he was going after all voters in his campaign.

On question of a running mate, should he receive the Democratic nomination, Lindsay said, "The people should have a choice in selecting the vice president."

Hitting at another Democrat, George Wallace, also seeking the party's top spot and rumored to be especially strong in Florida, Lindsay called him a human threat to the country and added "... everything I have fought for is the opposite of Wallace."

On the pocketbook issue, the mayor said rich people and oil interests are "getting off without paying taxes." He said the remedy is tax reform which will plug the loopholes that allow the rich to prosper without paying taxes.

After leaving The Herald, Lindsay was deluged by shoppers and spectators at the Sanford Plaza.

Mostly young girls and women swarmed around the delirious mayor, who signed a multitude of autographs while answering questions between signatures.

Orlando Critically Wounded

"NOW IF I WERE EDITOR . . ."
Actually, New York Mayor John Lindsay had other things on his mind Saturday when he visited The Herald's newsroom . . . talking about his plans and ambitions for the Democratic Presidential berth. (Related photo on Page 2).

Lindsay Dark Horse In Presidential Race?

By FRED VAN FELT
ORLANDO — Anyone meeting John Lindsay in person very soon will realize he should not be written off this early in the race for the Democratic Party's nomination for president. His political opponents scoff at him for changing parties; many top news columnists and commentators predict he will make no dent in the forthcoming party primary here in Florida . . . or in any other state.

But the man has a magnetism . . . some may want to use the now common word of charisma. In less than a minute of conversation he gives one "the feeling of a longtime acquaintance."

On ship, if not friendship, he launches right into a conversation as though it had been broken off only hours or minutes before.

This reporter had the privilege of watching the Mayor of New York City "perform" at a small gathering of news people Saturday night, long after the day's campaigning had stopped, here at the Sheraton Motor Inn.

It was not a news conference as such . . . it was a press party. The advanced guard had said Lindsay would arrive at 9 p.m. At 9:30 he was explained he was tied up at a Jaycee dinner. At 10 we were told he would "be here in a few minutes." He did arrive at 10:30 . . . seems he was made to wait while the Jaycees waded through a long list of awards.

Lindsay's entourage numbered about as many as the press people present . . . at the most, 15 reporters and their spouses. The Lindsay workers made it a point of "pairing off" with the news people . . . and Lindsay moved quickly and quietly from one group to another, talking a few minutes and moving on.

Everyone looked up to him . . . simply because he was the tallest person in the room. Slim, fifty-ish, some gray, tall and handsome. He should garner most of the distaff vote, if he gets the party nomination.

Lindsay did no politicking as such, and strangely no reporter was heard to ask political questions. Lindsay was a one-man Chamber of Commerce for his city of New York. He talked about the new underground construction, tunnels from here (Continued on Page 2 Col. 1)

Karate Expert

Yamamoto, head man of the school of Yoshukan Karate, and his wife, who are touring the United States from Japan, will be in Sanford Tuesday, together with Mike Foster, of Orlando, top man in Yoshukan in this country.

Yamamoto holds the eighth-degree black belt and Foster the sixth-degree black belt. They will stage a demonstration of Karate for students of Fred Kelley's School of Yoshukan and their relatives at 7 p.m. This is Yamamoto's second visit to Sanford. He was here last year to stage a demonstration for Kelley's Karate students at Sanford Naval Academy. Kelley is holder of the third-degree black belt.

Casselberry Offers New Bid For Utility

By MARILYN GORDON
CASSELBERRY — Negotiations were resumed between the City of Casselberry and CASSUCO (City of Casselberry and South Seminole Utilities Company) for the purchase of the water and sewer systems. City Attorney Kenneth McDonough spoke for the city in tendering an offer to purchase for \$2 million at a bond period of 30 years at six per cent per year.

The city asked that it be allowed to pay only interest for the first five years. The offer was contingent on several conditions, including a need for additional property adjacent to tract between Howell Park water plant site and SR 436, 200 feet along Melody Lane adjacent to main water plant, two remote well sites 600,000 feet from existing wells at Melody Lane and Howell Park, five acres west of the sewage treatment plant and 20 acres north-west for spreading of effluent.

Council Chairman Edith Durr explained that it is the desire of the city to serve all who would fall within city limits and that price stockholders would receive the same rates and services all citizens would be entitled to but should expect no special rate.

Mandell, major stockholder, pointed out that no property is available at the Howell Park Plant and that the rest does not belong to CASSUCO. It was estimated it would cost between \$100,000 and \$150,000 to acquire the additional land desired by the city.

The city also wants expansion control, design review and approval between now and the time that title would pass. CASSUCO is in the process of expanding the water system to 12 million gallons capacity.

Lowndes emphasized that the major stockholders would like same assurance that their needs would be met by the utilities in the future with regards to developing property now within the city.

Attorney for CASSUCO, John Lowndes, speaking for Lester

Highway Session Becomes Political

By JOHN SPOLSKI
"I am delighted to announce that the U.S. Department of Transportation — through our Urban Mass Transportation Administration — has approved a technical studies grant of over \$100,000 that will have a significant effect upon future transportation here in the Orlando area."

These were the opening remarks of U.S. Secretary of Transportation John A. Volpe as he spoke at a special press conference at Walt Disney World this past Saturday.

The grant, which involves \$116,000 in federal funds, is to the East Central Florida Regional Planning Council.

Volpe's announced purpose in making this revelation was "clocked" with a sprinkling of "politics." Also sharing the speakers platform was U.S. Sen. Edward Gurney, who, after the first part of the program was seeded, turned their attention to answering questions from the press relative to the present administration.

"Would he take an active part in Mr. Nixon's campaign?" was the initial inquiry, to which a very definite Volpe response was, "You betcha."

The key issues on which voters would be motivated to cast their ballot were centered around the economy and a decline in the employment rolls, according to Volpe.

When pursued on whether the administration is eliminating the Vietnam War from "motivation," Volpe deferred by stating, "If the electorate takes into consideration that when Mr. Nixon took office we had 400,000 men there and since that time over 300,000 have been returned stateside, the voters definitely would vote in favor of the job which the President has done in this area."

Volpe was apprised of the tremendous impact which Auto-Train has had on the Central Florida area, specifically Sanford, to which he responded that "this is something which Amtrak should have done a long time ago."

Also attending this meeting were Florida's Secretary of Transportation Edward Mueller, and the executive director of the East Central Florida Regional Planning Council, Jack Glitting — both of whom said that they would be in Sanford the latter part of February when the Greater Sanford Chamber of Commerce will host a meeting designed to complete the repaving of SR46 to U.S. 441 at Mt. Dora.

Connect the Dots

There's a huge packet of 150 letters in the mails today . . . addressed to Minister Huan Thuy, Delegation of the Democratic Republic of Vietnam, Paris, France . . . And it's from our "buddies" at the Orlando Naval Training Center, as they continue their quest to actively "FREE" the American POWs.

"We're proud to be playing a very small part in their efforts."

HAPPY BIRTHDAY . . . and what a day it's going to be, too! Maggie Zaskary, a patient at the Lakeview Nursing Center, is going to celebrate her 100th birthday this Friday from 2 to 4 p.m., with the invitation mat out for her many friends in this area. And thanks to Jane Miller for calling it to our attention . . .

About tonight's Sanford City Commission Meeting . . . hope that they hold fast to their proposed assessment of \$400 for each individual unit which would be built in Sanford. Of this amount, \$200 would go for water pollution controls and the other \$200 into asphalt improvements.

It's the only logical way which is apparent to play "catch-up" on improving present conditions. It has been projected that there'll be another 6,000 units or approximately 20,000 persons, who'll be moving into Sanford within the next 10 years.

With the present 10 mills cap imposed, how else can the tax base be strengthened, other than by making the newcomers help to "foot the bill"?

Appreciate the note from Representative Bill Fuford, outlining some of the bills which he hopes to introduce at this session.

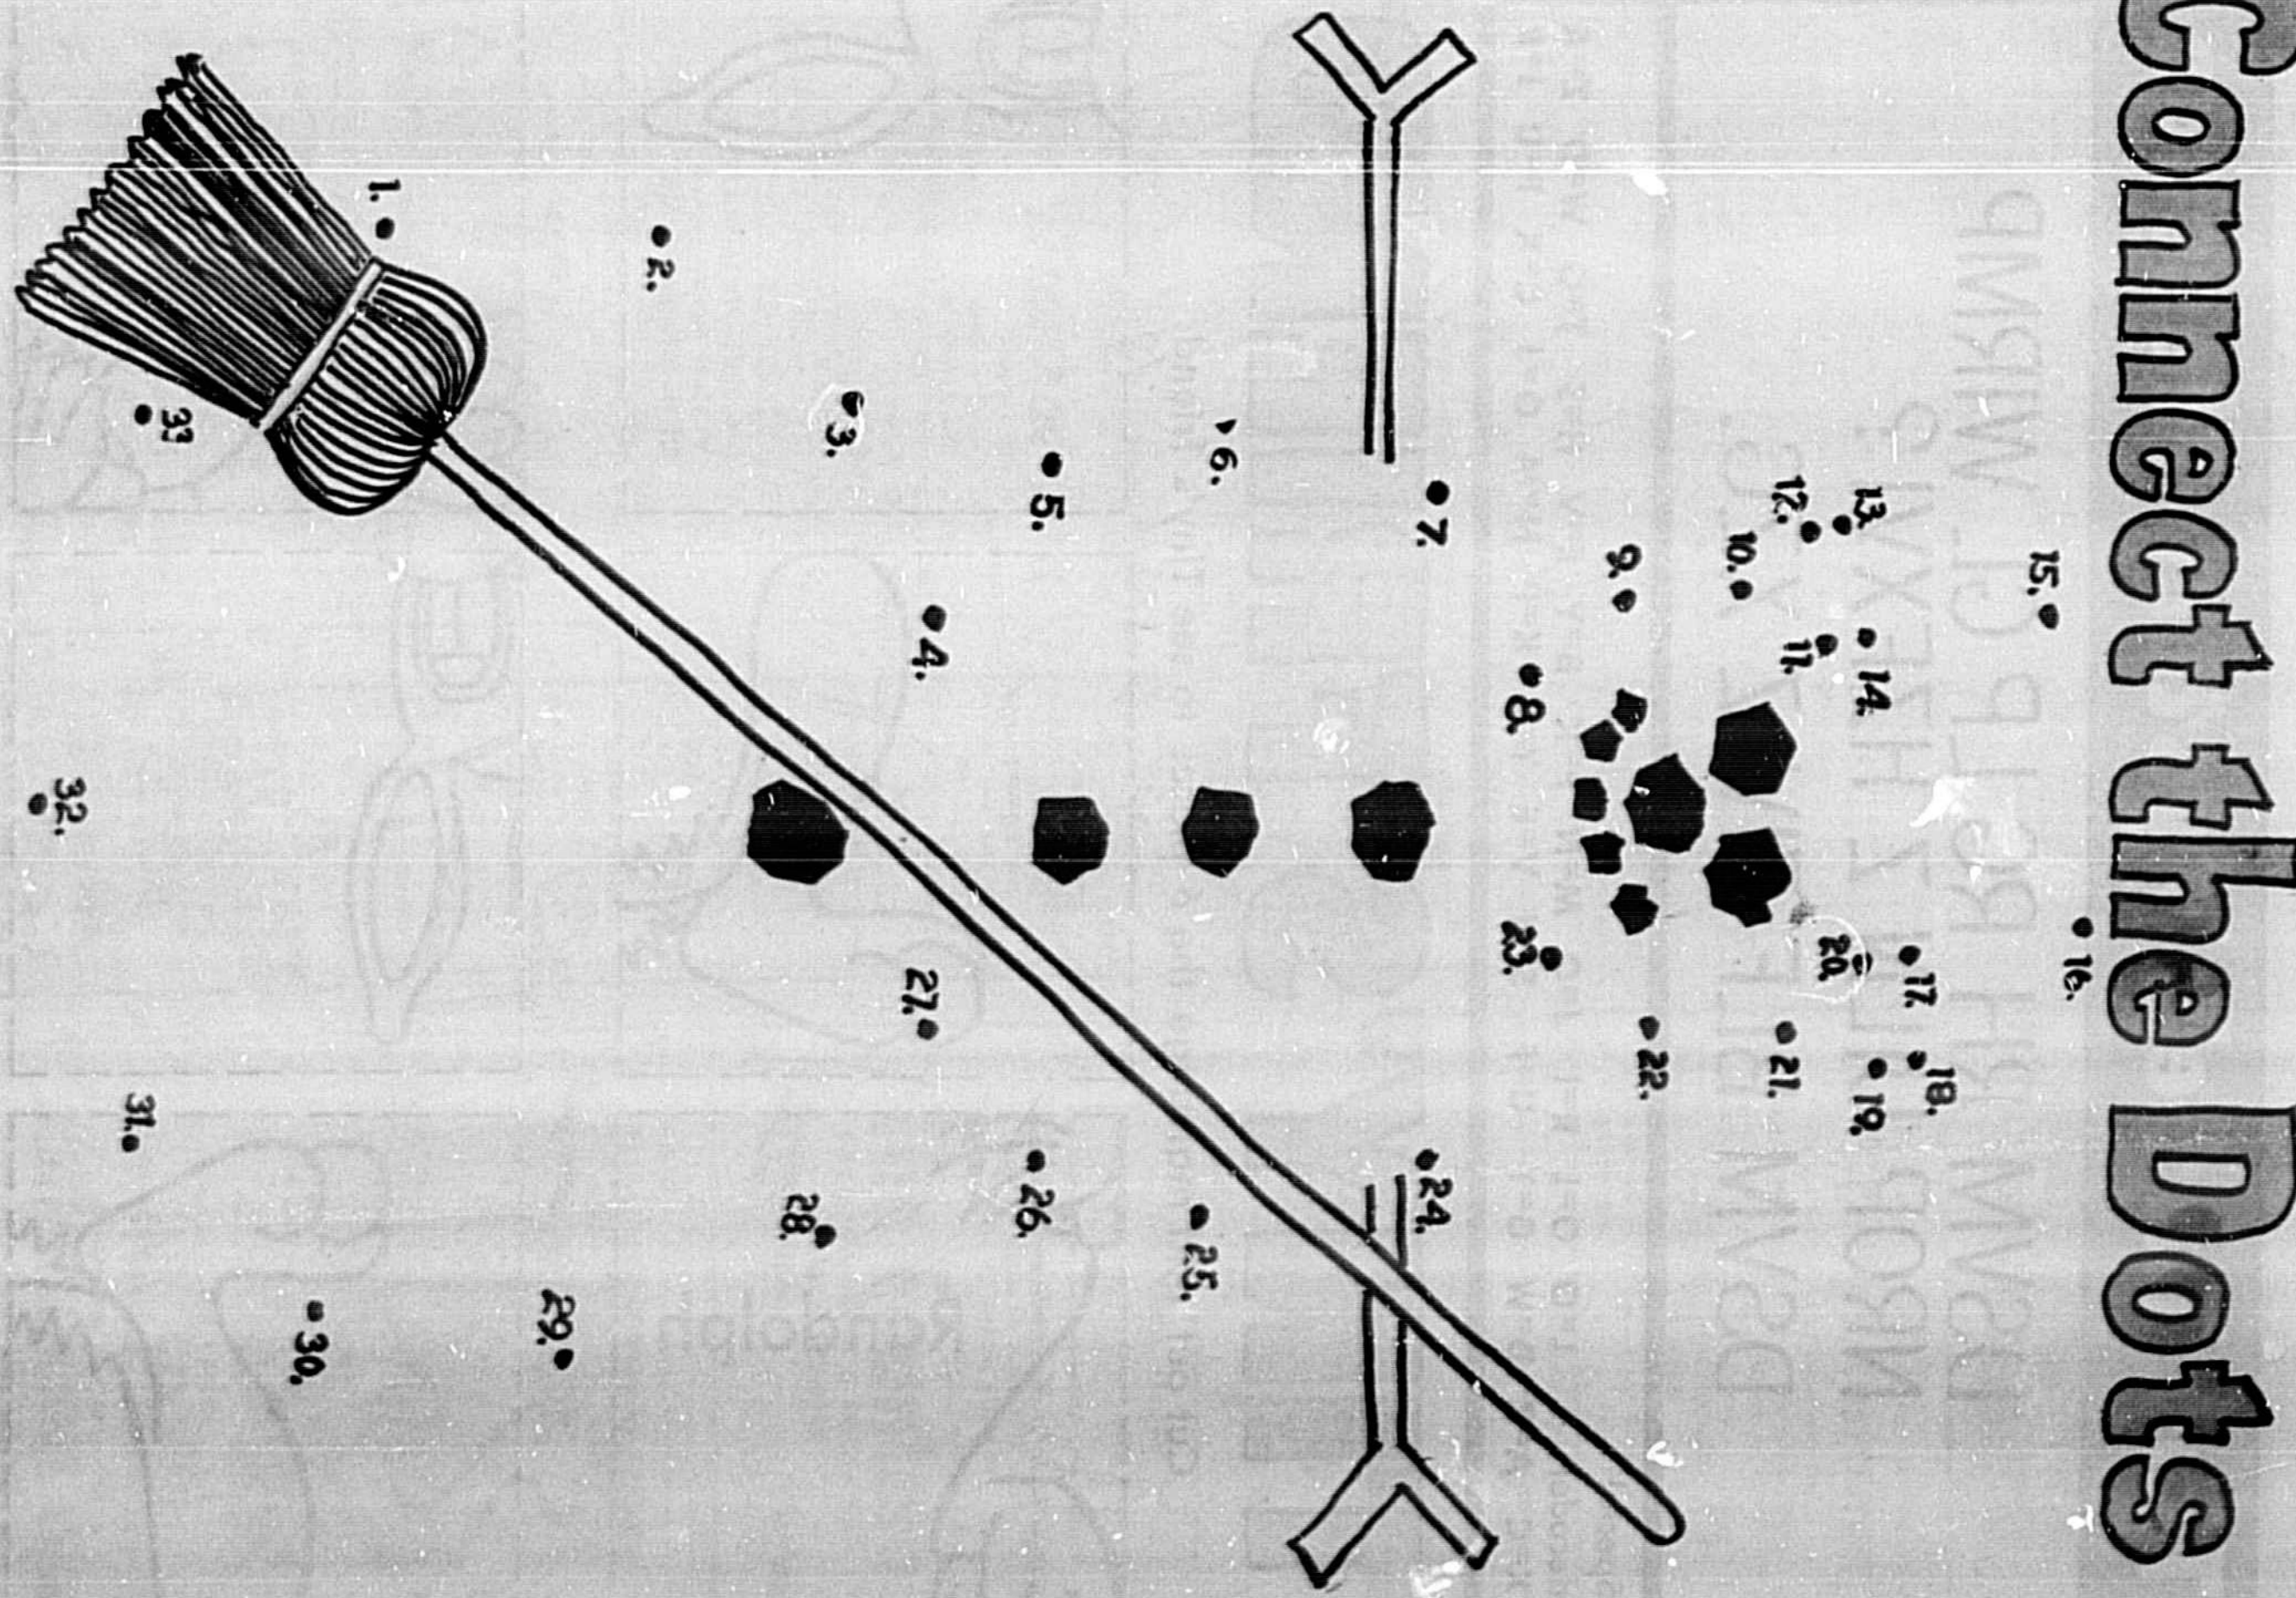

An especially interested in "regulation of airboats", and "limitation of the number of bills a legislator may introduce."

Attahoy, Bill!

LOST . . . one female Chihuahua from its residence at 208 Palmetto Avenue in Sanford. (Maybe we ought to look for a "friendly" male Chihuahua, eh?)

BULLETIN

WASHINGTON (AP)—President Nixon urged Congress today to "step up the Treasury" by imposing a rigid ceiling to keep the federal spending within the \$164.3 billion requested in his new red-ink budget.

Howard Hughes' Name Used In Fraud Scheme

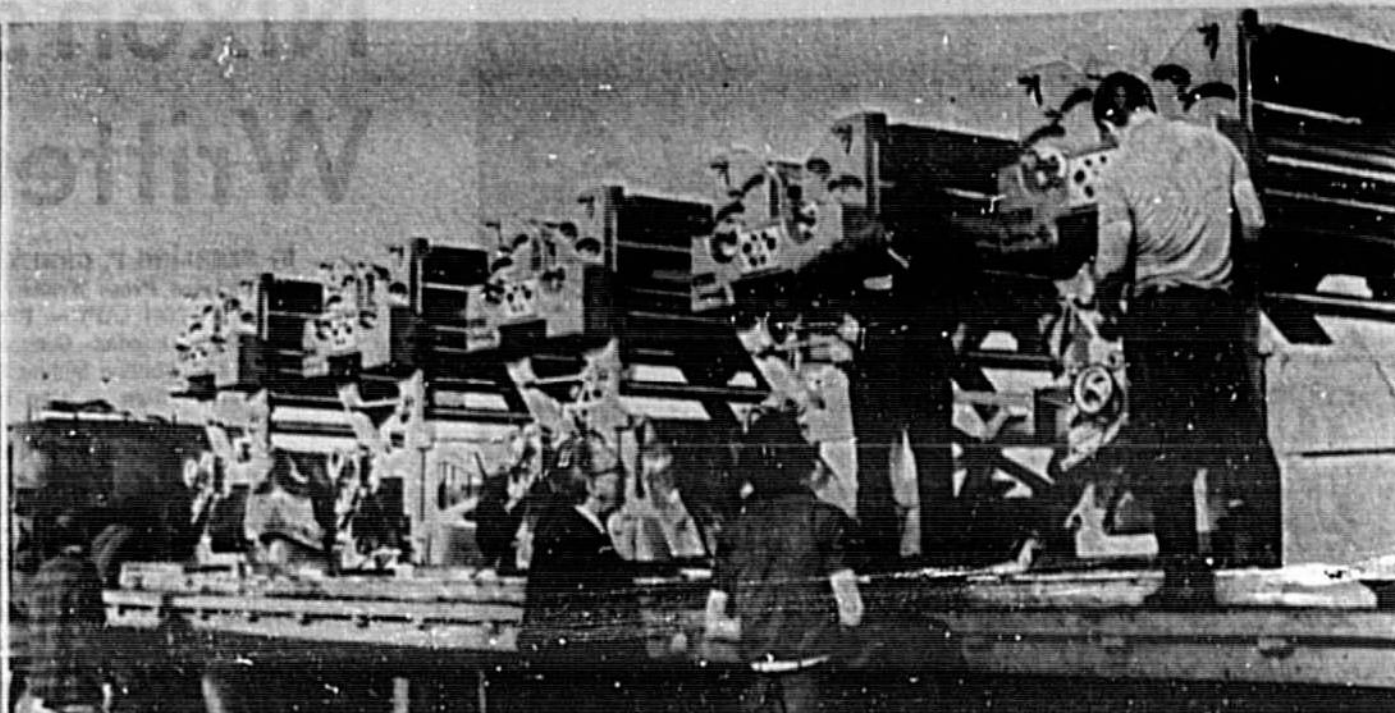

ZURICH, Switzerland (AP) — Police throughout Europe are looking for a dark-haired woman who cashed \$650,000 worth of checks which the McGraw-Hill Book Co. paid for a purported autobiography of industrialist Howard Hughes.

Swiss authorities confirmed that an international warrant was issued for the woman, about 31 years of age, who collected the money from the Swiss Credit Bank in Zurich.

The Swiss officials did not identify the woman. But Time magazine said the name of the woman to the bank as Helga R. Hughes. The McGraw-Hill checks were made out to H.R. Hughes.

The warrant was issued after McGraw-Hill filed a criminal complaint alleging fraud last Thursday with the Zurich district attorney.

The woman was described as dark-haired, with a lean face, about 5 feet 3 inches tall, wear-

IT'S HERE' was the word flashed through The Sanford Herald plant early this morning. "It" will be introduced to The Herald's readers and the general public in grand style on or about Feb. 28. That much time will be required to set "it" up for operation.

U. S. Planes Hit Batteries Red Ack-Ack Is Blasted

By RICHARD PYLE Associated Press Writer
SAIGON (AP) — U.S. jets attacked five North Vietnamese antiaircraft batteries in the demilitarized zone and North Vietnam Saturday and Sunday, knocking out two of them and damaging another, the U.S. Command announced.

American warplanes also dodged five antiaircraft missile attacks fired at them over Laos Sunday, the command said, but no planes were damaged in the weekend air flurry.

Fr. Berrigan, Others Antiwar Trial Opens

By LEE LINDER Associated Press Writer
HARRISBURG, Pa. (AP) — The Rev. Philip Berrigan and six codefendants go on trial today on an antiwar conspiracy charge which includes an accusation that they plotted to kidnap presidential adviser Henry A. Kissinger.

Berrigan urged his followers to use the trial as a vehicle to revive the antiwar movement.

"Instead of over concern for us, hey, about using the trial as an occasion for giving rebirth to the movement!" Berrigan said in a written statement read by one of his attorneys to 300 supporters holding a peace service outside the Dauphin County prison Sunday night.

The priest is confined at the prison and will be the only one of the defendants to remain in custody during the trial. He is serving a sentence for destruction of draft board records.

Two other priests, a nun, a Pakistani scholar, and a former priest and former nun now married to each other go on trial with Berrigan. He was named by the government as the mastermind of the alleged scheme that also included blowing up heating tunnels to federal buildings in Washington and vandalizing draft board offices across the nation.

An eighth defendant, a convicted draft file destroyer, will be tried separately. The judge severed him from the current case when he insisted on acting as his own lawyer.

A panel of 125 prospective jurors has been summoned to the courtroom of U.S. District Court Judge R. Dixon Herman.

THE QUESTION: Is that grin for The Sanford Herald's photographer, Bill Vincent Jr., because she is having her picture taken... or is it because Presidential hopeful John Lindsay is patting her on the head? Lindsay is with the group at Sanford Plaza Saturday afternoon?

Lindsay Dark Horse In Presidential Race?

* Continued From Page 1

substantial war chest to finance his campaign. He has to have, judging from the number of persons in his working party here in Florida alone. He has made television's "Archie Bunker" flip his lid... there were long hairs, some with mustaches, some with beards, with names like Levy; Miami's Japanese-American state Senator Edmund J. Gong, and a very personable black chap named Bob Carroll, who when he heard we were from Sanford, said, "Oh, yes, the politician." Asked how he knew that, Carroll said he is a native of Bartow and a graduate of Florida A. & M., and now on Lindsay's NYC working staff.

Lindsay seems to be working the same type of campaign as the fellow contenders yet there is a difference. As he put it, "I'm not a politician, I want a politician when I want to be a politician. I asked my wife if, 'What are you doing in this madhouse?' I want a politician when I ran for mayor of New York City seven years ago. I'm not a politician now. But, believe me, I love it. I enjoy every minute of it."

This reporter believes Lindsay will be in the fore in the final count of the party primary March 14. He may not win the primary but he definitely will be among the top contenders at the party convention in Miami Beach.

He might be the dark horse of the race. Very few persons had heard of Wendell Willkie until after he had captured the Republican presidential nomination in 1940 at the party convention in Philadelphia. Mr. Lindsay may just well pull a similar surprise.

Patrolman Saves Life Of Worker

By PHIL PASTORET

LONGWOOD — Prompt action of Patrolman Earl Corbett is credited with saving the life of David Pollard, 21, of 860 Jessup Street.

While working at American Wood Products Pollard's arm was torn off at the shoulder after it was caught by a conveyor belt. His hair had to be cut to free him from the belt.

Corbett administered first aid and used a tank of oxygen in getting the victim, who also suffered a brain concussion.

He is in serious condition in the intensive care unit at Florida Hospital.

FUNNY BUSINESS

DIMOROUS, BEP LICE TO PRESENT YOU WITH THE GAME BALL.

BOB THE MAN WHO CALLED THE EXTRA POINT WHAT? HE GOT IT! 120% NERVELESS LESS THAN A PERCENTAGE OF THE GAME!

THREE OVIEDO GIRLS received a rude awakening Sunday morning when a 46-year-old Maitland man, Eurus C. Cambell, ran off a curve on SR 426 in Oviedo and traveled several hundred feet before coming to rest in the bedroom of the residence of Oscar Davis. Three of the Davis children, 15-year-old Elizabeth, 13-year-old Jeannette and one-and-a-half-year-old Dianna, were in the bedroom at the time and were hospitalized along with the driver and his 10-year-old son. None of the injuries were serious. Oviedo Police Chief Ken Triplett who investigated the incident estimated damages to the house at \$4,000 and termed the 1964 Ford a total loss. Patrolman James Pliocenas charged Cambell with failure to use due care. Constable Chester Boyd (with the tape) assisted in the investigation. (Larry Neely Photo)

Reigning Royalty Attend Danish King's Funeral

By OLE DUUS Associated Press Writer
COPENHAGEN (AP) — Representatives of all of Europe's reigning houses assembled in the streets of Copenhagen today to follow the body of King Frederik IX to the Roskilde Cathedral, Denmark's 800-year-old royal sepulcher west of the capital.

Four kings, five queens and more than a dozen princes and princesses joined hundreds of thousands of Danes in a local parade through the streets of the capital city on Friday afternoon. She was a native of Lightsville, Ohio, and came here five years ago from Cuyahoga Falls, Ohio. She was a Lutheran.

Survivors include two sons, John F. Senterling, Sanford, and Wilbur L. Senterling, Akron, Ohio; three grandchildren, and three great grandchildren.

Grankow Funeral Home will send body to Cuyahoga Falls for services and burial.

Dick Crenshaw Learns That Councilman's Working Hours Long

By DONNA ESTES

An 18-hour day is not unusual for Longwood's new councilman, Dick Crenshaw. In fact, since taking office earlier this month, it has become the rule rather than the exception to be occupied with city business at least three evenings each week not only at official meetings, but also sessions with city employees, department heads, the police department, and fire department volunteers.

Then there are his responsibilities as president of the South Seminole Jaycees. At that particular time the pressure is on preparing for the annual distinguished awards banquet to be held in Sanford with Gov. Reubin Askew as special guest. There is also planning for the activities to raise funds for the emergency rescue vehicle the Jaycees have pledged to purchase for the Altamonte Springs fire department.

Of course, if a novice city councilman is interested in learning the intricacies of elected office and different ideas on how to solve municipal problems and if he is conscientious and takes his responsibilities seriously, as Dick does, there are also Council meetings in neighboring cities to attend.

To learn the scope of difficulties encountered by the police department in enforcing the city's ordinances and protecting its citizens, a new councilman, like Dick, feels called upon to ride the roads occasionally with officers on duty to see things first-hand.

There are spare time activities taken care of after a full day's work each day at the Naval Training Device Center in Orlando.

Dick remembers quite clearly the summer day, a really hot one, when it is believed he contracted polio. He and his family

BUSY conducting business as usual by telephone for the South Seminole Jaycees is its president, Dick Crenshaw, at his home on Longlake Avenue in Longwood. Crenshaw, who is also a councilman in the city, holds his daughter, Dawn, on his lap while he uses the telephone. (Donna Estes Photo)

DEBARY — Wednesday 8 p.m., curtain time heralds the premiere of "Don't Drink the Water," the second production of the DeBary Players' current season. The hilarious farce written by Woody Allen, also can be viewed on Thursday and Friday in the community center.

The play, a Broadway hit, centers around the adventures or mis-adventures of a typical American tourist family — father, a caterer by trade, his wife and daughter, who seek sanctuary in the American Embassy behind the "Iron Curtain" — just two steps ahead of the local police who suspect them of spying and picture taking.

As the plot thickens, in the absence of the ambassador the embassy is left in the hands of his bungling son, the group carelessly and frantically plot their escape. However, throughout this state of confusion, the ambassador's son and the caterer's daughter still find time to fall in love.

Cast members include, Paul Florence, Sally and Mark Thout, David Aiken, Scott Burgard, George Napoli, Dale Miller, Clifford R. Bird, Phil Whitebeck, Ed Drumb, Abby Waits, Meredith Caskin, Chris Woods and Eric Hall.

The behind-the-scenes workers are Florence Thout, production manager; Russ Appleyard and Don Neyer, sound; Ruth Moore, Robbins, programs; Genevieve Richardson, make-up; Barbara McNeil, stage manager. Also, John Hall and Dan Neyer, prompters and posters; Eleanor Robbins, programs; Genevieve Richardson, make-up; Barbara McNeil, stage manager. Greater Sanford On The Move—Get Aboard!

Tomorrow morning the Greater Sanford Chamber of Commerce kicks off a three-day membership drive which is traditional but as modern as the Auto-Train in its nature.

After decades of planting the seed this action-oriented group of the leading business men in our area are hard at the harvesting.

There are two circumstances which give special importance to the 1972 membership campaign. One is the climate of fantastic growth in being and in sight which has vitalized the business air.

The other is the hard fact that now is the time when the business community must do more than give verbal approval to the aims and accomplishments of the chamber. They must show it in financial support.

Garlic Oil Vs. DDT

Garlic has always been a helpful herb, except, of course, when we eat too much of it before an important business meeting or a big date.

Garlic's greatest services to mankind may come in the future, however. Two Indian biologists have discovered that garlic oil kills the larvae of certain mosquitoes, flies and agricultural pests.

So the little bulb, a cousin of the lily, may provide an answer to those who insist that disease and famine will spread across Asia and Latin America if the use of DDT and other poisons is banned or limited.

Political Notebook: "Have Not" Nations Just That!
By BRUCE BLOSSAT
WASHINGTON (NEA) — We're going to have a lot of romantic stuff this year about helping the world's disadvantaged nations to "close the gap" with the affluent, industrialized countries.

BERRY'S WORLD
of world exports has dropped 33 per cent to 19, mostly because of the sharp decline in prices of the raw materials which have been their economic mainstay.

Don Oakley Says: War As Democrat Issue Sours
By DON OAKLEY
Both major Democratic presidential candidates, and most of the minor ones as well, have jumped early and hard on the Vietnam war as a campaign issue.

War As Democrat Issue Sours
Hubert Humphrey says the war has been over by this time had he been president during the past four years. Sen. Edmund Muskie asserts the same thing. Even the official noncandidate, Sen. Edward Kennedy, claims that President Nixon is jeopardizing lives by refusing to pull the last troops out from under the Saigon government until after the election.

Edward Kennedy, claims that President Nixon is jeopardizing lives by refusing to pull the last troops out from under the Saigon government until after the election.

Firm Planning Plant At Port

By BILL SCOTT
A manufacturing plant employing 150 people making precast concrete objects is expected to locate at the Port of Sanford. This was disclosed at Saturday's Seminole County Port Authority (SCOPA) meeting by James Ryan, port administrator.

By BILL SCOTT
The port administrator said he received a "tip" on the new industry from County Commissioner Al Davis. On a motion by Sidney Vihlen Jr., SCOPA member, the board moved to instruct Ryan to proceed with the negotiations.

HHH 'Likes' Askew As Running Mate

By THE ASSOCIATED PRESS
Sen. Hubert Humphrey, jockeying with four other Democratic candidates Sunday for the attention of Florida voters, said he "would be honored" to have Gov. Reubin Askew as his vice presidential running mate.

By THE ASSOCIATED PRESS
Humphrey also accused the Nixon administration of displaying "a callous disregard for the needs of average Americans."

SJC Hands Baby Dolphins First Cage Loss, 133-116

By GARY TAYLOR
Herald Sports Editor

The Seminole Junior College Raiders aren't used to being the season high point man for the SJC, but they were JACKSONVILLE. At least that's what the Jacksonville University Baby Dolphins are saying. The Jacksonville squad brought a 13-6 record to Sanford, but the Raiders extended their winning streak to 15 straight as they posted a 133-116 win.

It was the highest offensive effort of the season for the Raiders who earlier scored 133 points in their only loss. That was in the second game of the season against North Florida.

The Raiders jumped to an early 19 point lead as the Dolphins got off to a cold start from the floor. Nine straight points, including over three postulating calls against 6-foot-7 Shawn Lettwick, allowed the local Raiders to open up a 34 point margin. 38-14. Minutes later the margin was expanded to 35 points, 46-11, but the Baby Dolphins came alive and scored 11 consecutive points as the Raiders couldn't seem to do anything right.

SJC settled down in the closing minutes of the first half and carried a convincing 26 point lead into the dressing room.

The second half was played the way the entire game was expected to be. The JV team outplayed the Raiders 66-46 with both teams being forced to go to the bench in the high-scoring game.

The top four players for the Dolphins had three fouls each at the end of the first half. Another JV player had two fouls. Don Patton and Larry Kearse had three fouls each for the Raiders as the two teams went to the dressing rooms.

Jacksonville had a good night at the charity stripe as they hit connected on 26 of 42 foul shots. There were 60 personal fouls called in the game.

Bob Hurst hit 19 points in the first half and came back to score 26 in the second half as he completed 25 points for the night. Don Patton went to the dressing room leading the Raiders with 22 points, but ended the game with 21 after a slow second half. Bill Corso, on the other hand, bounced back from a five-point first half for 27 for the night. Willie Frank, the season high point man for the SJC, also finished in double-figures with 21 points.

Ricky Coleman and Henry Williams, the two talented guards that had been averaging 26 points per game for the Dolphins, scored 23 and 25 points, respectively. Jimmy Clark hit for 25 and Lettwick, the tallest man on the court, finished with 12.

The Raiders, who have not been higher than fourth in the state poll this season, are now ranked 11th, despite a 162 record. Their record is the best in the state among JuCo squads.

The Raiders travel to Lakeland tonight to take on the Florida Southern Junior varsity in a 6 p.m. contest. Wednesday night they're back home for an important division contest with Central Florida, Central Florida surprised local JuCo followers last week when they followed a 72-71 come-from-behind win over Lake City. The Raiders are currently 2-6 in Division II.

Friday night the Raiders are scheduled for a return match with the Baby Dolphins of Jacksonville University. The tilt is slated for an 8 p.m. tipoff at the campus gym.

Not only was it the third win in league play for the Greyhounds but more important was the fact that it gave them two straight Metro wins. And their first league victory achieved on their opponent's hardwood.

Unlike their win of Tuesday over the Greasers which the Hounds were sparked by one of their bench players, the local Greasers got plenty of support from their starting crew especially senior ace Steve Nelson and rapidly improving sophomore Randy Wright.

Actually it was the point production of Wright that spelled defeat to the Greasers who saw their season record fall to 9-11.

On setting his high game in Metro play Wright earned six of his shots from the field but more important converted nine of 11 chances from the charity line.

The Hounds assumed a four point lead at the end of the first period when they outscored the host team 20-16. It was just the reverse in the second period and the halftime score found both teams with 26 markers.

Leaving the gym somewhere other than the Colonial gym the two teams continued to play the run and shoot style of ball.

And the Hounds got the better of it in the third period by scoring 21 points to trail again. They were never to trail again. They were able to extend their lead throughout the final period and came home with a surprising victory.

The scoring leader for the Greyhounds was the reliable Nelson who drilled in nine of his attempts from the floor and all five of his free throw chances.

The 23 point equal the output of Nelson in the Greyhound 61-51 win over the same Colonial team a week ago.

Also contributing heavily to the performance of the Greyhounds were starter Jerry Carter and reserve Bruce Rose. Carter hit for ten points while Rose earned nine important markers.

The effectiveness of the Greyhounds at the charity line proved to be the difference in the end. The Hounds converted 26 of 34 while the losing Greasers could make only 20 of 22.

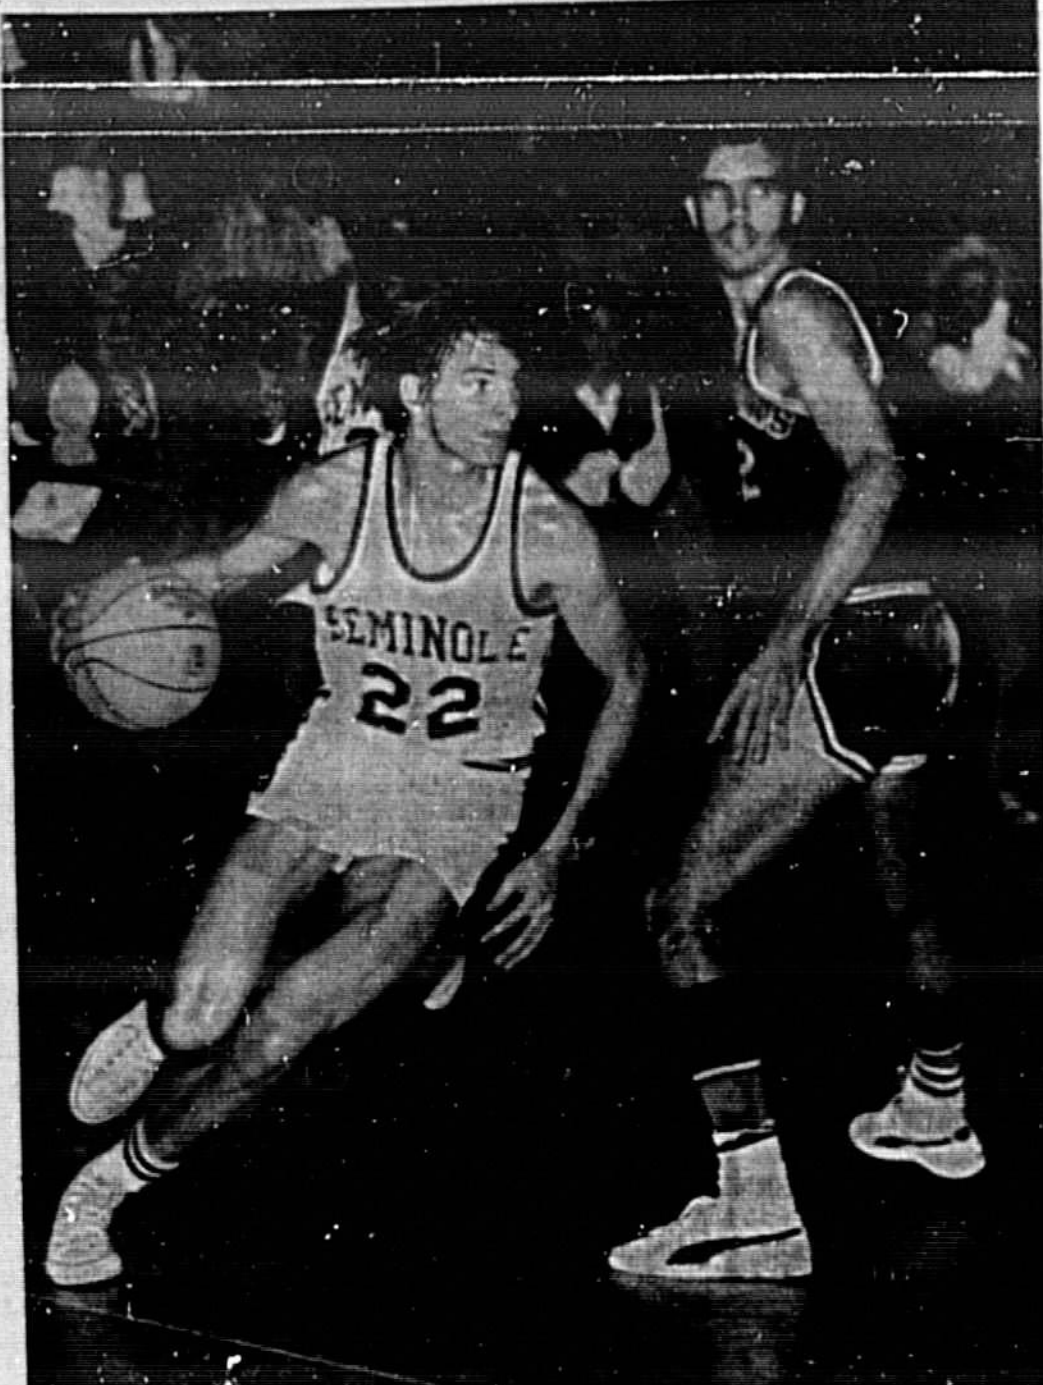

For the losers it was Kent Larsen leading the way with 23 markers. Actually it was Larsen who helped make the game as close as it was. In the moving fast Tuesday the 6-3 ace fouled out early and scored but four points. John Elton had 16 and Artie Downs 14 for the losing squad.

Appearing in double-figures for the Saints were Austin with 15 points on five field goals and five of 10 free throws and Jerry Padem with 12 points on six of 10 field goals. Knight and Fiedler contributed nine and eight points, respectively, to the Trinity cause.

Fouls and poor free throw shooting on the part of the Saints tightened the contest up. It was no match from the field with Trinity making 24 field goals compared to Howey's 15. Trinity took 20 shots and 20 of them to narrow the gap. The Saints made only 11 of 25 charity shots.

The Saints also posted a win in the junior varsity contest by leading the Howey junior varsity 59-39.

Tuesday the Saints will host the Mountaineer quint in the Millersville gym.

BILL CORSO (22) was all over the court in the second half for the Seminole Junior College Raiders as they defeated Jacksonville University's freshmen team 133-116 Friday night. Corso scored 22 points in the second half to give him 27 for the night before fouling out in the closing minutes of the game. (Don Vincent Photo)

Fouls and poor free throw shooting on the part of the Saints tightened the contest up. It was no match from the field with Trinity making 24 field goals compared to Howey's 15. Trinity took 20 shots and 20 of them to narrow the gap. The Saints made only 11 of 25 charity shots.

The Saints also posted a win in the junior varsity contest by leading the Howey junior varsity 59-39.

Tuesday the Saints will host the Mountaineer quint in the Millersville gym.

Hampered By Fouls, Seminoles Lose Tilt

LAKELAND — There were only six fouls called in the first half but the Fighting Seminoles Friday night when they met the Lakeland Dreadnaughts, but three were against Ricky Grant and the other three against Frank Sloan. With these two starters fouled out at the end of the first half, the Seminoles were handicapped in the second half, losing 77-77. Their record is now 12-1 on the season.

The Seminoles were trailed in the first period. Lakeland scored the last four points of the frame to pull within three, 16-4. Sloan was the big man in the initial period as he scored six points.

Four quick baskets to open the second period gave the home team 12 consecutive points as they took over the lead, 24-18. They maintained the lead throughout the period until Greg Mitchell hit a bucket with one second on the clock that gave the Seminoles a 23-25 halftime lead.

The Dreadnaughts tied the score two times early in the third period, but the Seminoles pulled back ahead each time. With 2:41 Herman Taylor hit a basket that put the home team in the lead, 55-52. Bill Sanford went back in from a 4 and a bucket by Mitchell in the closing seconds gave them a 56-54 margin that put the home team in the lead for the final period.

Wasting no time, the Dreadnaughts scored their first seven points in the final period and were never to trail again. They were able to extend their lead throughout the final period and came home with a surprising victory.

The scoring leader for the Dreadnaughts was the reliable Nelson who drilled in nine of his attempts from the floor and all five of his free throw chances.

The 23 point equal the output of Nelson in the Greyhound 61-51 win over the same Colonial team a week ago.

Also contributing heavily to the performance of the Greyhounds were starter Jerry Carter and reserve Bruce Rose. Carter hit for ten points while Rose earned nine important markers.

Trinity Prep Saints Post Victory

By LARRY NEELY
Herald Sports Writer

The Trinity Prep Saints are winners for sure in their first interscholastic cage effort. They secured their sixth win against five losses in the current season by downing the hapless Howey Academy cagers 20-30 Friday night.

It didn't appear to be a good night for the Saints at first. The Howey quint blitzed the Saints in the opening frame to gain a five point lead. The tide came off the Saint basket in the second period as they trailed the Howey lead by two points to 24-21.

The Saints got things moving in the third period and mounted the winning Howey hardcourt crew by outscoring them 20-7 to take command of the contest.

The Saints nearly lost all in the final frame as three of their starters, Mike Austin, Bob Fiquette and Ed Knight, fouled out of the contest. Trinity started off the Howey cage which was hampered when their two leading scorers, Lee Mayhew and Jim Nussbaum, fouled out.

Fouls and poor free throw shooting on the part of the Saints tightened the contest up. It was no match from the field with Trinity making 24 field goals compared to Howey's 15. Trinity took 20 shots and 20 of them to narrow the gap. The Saints made only 11 of 25 charity shots.

The Saints also posted a win in the junior varsity contest by leading the Howey junior varsity 59-39.

Tuesday the Saints will host the Mountaineer quint in the Millersville gym.

Basketbrawl!

IT'S A NONCONTACT sport but there has been more than a little contact on the basketball courts so far this season. In an NBA game between Milwaukee and Detroit, above, the Bucks' Bob Danridge, left, and the Pistons' Terry Disinger tangled, much to the consternation of referee Len Wirtz. Meanwhile, back in the college ranks, where character-building and not profiting is supposed to be the main objective, a scuffle broke out during a game between South Carolina and Maryland. Maryland's Jim Chones and Carolina's Danny Traylor are restrained. In the foreground, Dick Mousa, upper left, is kept out of the main event.

By BOB ORRELL

"LET'S GO FISHING" tried a combination fishing and camping trip to the Florida Keys last week in order to bring to our readers some first hand information on the fishing in that area.

The whole thing started a few weeks ago when our good friend and occasional fishing buddy, Harry Titshaw of Lake Mary, turned from our first afternoon's fishing. They proved to be interesting and congenial. The reputation of our "rate Parks has spread far and wide. It is a Sunday night phone call to this writer inviting him for a few days trip to the keys received instant acceptance.

Monday morning found the two of us sorting and stowing tackle, lanterns, things needed for a comfortable four or five day trip. Time slipped away as it has a habit of doing and we didn't hit the road until early afternoon.

We had decided to stop at John Pennekamp State Park on Key Largo the first night, but with the late start, darkness overtook us before we reached Miami. A service station stop and a phone call to some relatives in the big city assured us of a place to park the camper and boat for the night. After finding the house, maneuvering the truck and boat trailer into the yard and visiting a while, we turned in for our first sleep in the camper-parked on the lawn of a brother-in-law's house!

A short stop in Homestead for groceries in the next day and we soon arrived at the Park. We discovered that a South East wind, 15 to 20-foot night-seas, boat was not making trips out to the reef, which convinced us that our 14-foot Orlando Clipper was not up to it either. Plans for getting in some group fishing on the reef or trolling for kingfish and Spanish mackerel went out the window.

Fishermen do not give up easily... If there is water around, they are going to wet a line. We found the channel running to the Gulf side, under the U.S. 1 bridge, and into Blackwater Sound for some inland trout fishing. The trout obstinately refused every plug we presented to them. But Harry finally hooked one after about two hours. Yours truly went into one of about two hours, a small school of Ladyfish gave us a few minutes of fast action, but as we headed back for camp the only edible fish still belonged to Harry, who grudgingly agreed to share with me. I'll do the cooking!

Half the fun of camping is meeting your neighbors in the camp grounds of the state. This trip was no exception. A new family had turned from our first afternoon's fishing. They proved to be interesting and congenial. The reputation of our "rate Parks has spread far and wide. It is a Sunday night phone call to this writer inviting him for a few days trip to the keys received instant acceptance.

They proved to be interesting and congenial. The reputation of our "rate Parks has spread far and wide. It is a Sunday night phone call to this writer inviting him for a few days trip to the keys received instant acceptance.

Monday morning found the two of us sorting and stowing tackle, lanterns, things needed for a comfortable four or five day trip. Time slipped away as it has a habit of doing and we didn't hit the road until early afternoon.

We had decided to stop at John Pennekamp State Park on Key Largo the first night, but with the late start, darkness overtook us before we reached Miami. A service station stop and a phone call to some relatives in the big city assured us of a place to park the camper and boat for the night. After finding the house, maneuvering the truck and boat trailer into the yard and visiting a while, we turned in for our first sleep in the camper-parked on the lawn of a brother-in-law's house!

A short stop in Homestead for groceries in the next day and we soon arrived at the Park. We discovered that a South East wind, 15 to 20-foot night-seas, boat was not making trips out to the reef, which convinced us that our 14-foot Orlando Clipper was not up to it either. Plans for getting in some group fishing on the reef or trolling for kingfish and Spanish mackerel went out the window.

Fishermen do not give up easily... If there is water around, they are going to wet a line. We found the channel running to the Gulf side, under the U.S. 1 bridge, and into Blackwater Sound for some inland trout fishing. The trout obstinately refused every plug we presented to them. But Harry finally hooked one after about two hours. Yours truly went into one of about two hours, a small school of Ladyfish gave us a few minutes of fast action, but as we headed back for camp the only edible fish still belonged to Harry, who grudgingly agreed to share with me. I'll do the cooking!

Half the fun of camping is meeting your neighbors in the camp grounds of the state. This trip was no exception. A new family had turned from our first afternoon's fishing. They proved to be interesting and congenial. The reputation of our "rate Parks has spread far and wide. It is a Sunday night phone call to this writer inviting him for a few days trip to the keys received instant acceptance.

Still Undeclared In OBC Action Oviedo Lions Win Two In Weekend Play

When you have a trio of them that can score in double figures and rebound, you have a combination that is hard to beat. Such was the case for Oviedo mentor Dave Miller over the weekend as the combination of 6-foot-7 Ed Whipper, 6-foot-6 David Tossie and 6-foot-5 Rick Holloway paraded the Lions to their fifth Orange Belt Conference with an eighth and ninth wins of the season against only five losses.

In Friday night's OBC battle the Lions poured on the offensive and defensive to hold off New Smyrna Beach to five points in the opening frame and six points in the third period while scoring 18 points or better in each of the four quarters to triumph by the Barracudas 83-45. The Lions had a little starting trouble against Melbourne Saturday night, but the Oviedo quint managed to pull things together to avenge a 53-50 season opening contest won by the Bulldogs as the Lions dominated Melbourne 60-48 on the Cape Coast team's floor.

Van Dusen, 35, of 115 Grove Lane in Sanford was the driver with his wife, Nancy, 36, daughter, Ann Marie, 15, and sons, Phillip M., 16, and Paul, six-years-old the passengers. Ann Marie suffered head and facial lacerations. The driver of the other vehicle, Hugh Champion of Bessmer, Ala., was charged with failure to yield to oncoming traffic while making a left turn. Investigating Trooper M. E. (Ernie) Leggett reported \$2,500 damage to Champion's 1972 Chevrolet and \$2,000 damage to this car. Leggett was assisted by Trooper D. S. (Dun) Lawrence and the sheriff's department.

Drainage Problem Resolved

NORTH ORLANDO—Village Council has approved by straw vote, a two- to three-acre holding pond which is deemed to be a resolution of the drainage problem in the Meadowlark subdivision.

Councilman Charles Rowell broke the tie vote on the matter, although at first he was understood the motion and the vote went the other way.

Noland Reed, projects director for Florida Land Company, said Council is being urged to open drainage ditches initially proposed by the developers, Jordan-Alaxatos Enterprises. Reed admitted that these were unfeasible, and that every effort was being made to conform to the village policy. However, he said, the cost to pipe the entire drainage area is prohibitive.

Reed then cited the alternative measure of providing an excavated holding pond, which would be created in a natural trough. Reed said the Florida Land engineer, said the holding pond concept had received the approval of City Engineer B. C. Conklin, who termed it a "satisfactory engineering concept."

Councilman H. W. E. Freeman queried the proximity of homes, schools and type of buffer. Mike Alaxatos assured Council all the pond would have the necessary protection, but Kelly was adamant that he is concerned about whether the lake bottom contained muck.

Freeman was in favor of tabling the matter until the village could get a more detailed opinion from Conklin, saying he is not against the pond per se, but wanted more information upon the location of homes, etc.

Freeman continued that the developers were asking Council to make a "political decision" if it wants a two-acre pond in the area. "It makes no difference whether a child drowns in a drainage ditch or a pond," Freeman maintained. He continued that Council should consider the proximity of homes, schools and type of buffer.

Construction Fee On City's Agenda

By BILL SCOTT
Sanford City Commissioners are expected to play host to a number of area developers at tonight's 8 p.m. public hearing to consider subdivision amendments requiring developers to provide underground wiring, street lights, concrete light poles and establishing a water pollution control fee and capital improvement fee.

Commission is mulling charging developers a total \$400 for water pollution and capital improvement fees for each house to be constructed inside the city limits.

These costs would be necessary to allow the city to provide services to areas heavily annexed and continue a city-wide capital improvement program such as the construction of the new police-security complex, now underway.

Strong opposition to the \$400 total charges are expected to be voiced by developers before any action is taken at tonight's session.

Regarding the proposed security complex, a presentation is scheduled tonight by Guttman, Dragash and Mats, architectural firm designing the police complex.

Schematics for the project also are expected to be discussed by the Commission.

Robert Petre, attorney for two Sanford men opposing annexation by the city, also has opportunity to protest being taken into Sanford.

Yesterday's asparagus, tomatoes, leftover fish and Tommy's old sneakers. Tomorrow: clean landfill.

For a world seeking to handle its huge volumes of garbage without harming the environment, imagination is creating new solutions. With the help of electricity.

One example is the growing pile of clean, odor-free material pictured below. This is the end product after 1700 tons of garbage a week are processed at the Solid Waste Reduction Center in Pompano, Florida.

Electrically powered conveyors bring the waste to a huge pulverizer—also electrically powered. Metals are sorted out for recycling, cardboard and paper are pulled out for shipment to paper mills. And what comes out of the pulverizer is a shredded, dry material that has no detectable odor and cannot support fires or insect and rodent life. Another electrical conveyor carries it out, as shown below. And what once was offensive garbage will become useful landfill, restoring the soil and benefiting the environment.

Just as electricity brings you the convenience of home garbage disposal and a cleaner kitchen, it's helping with the job of cleaning up the world outside.

Electricity: part of the solution. **FPL**

Coed-Picket Dies In Truck Mishap

BELLE GLADE (AP) — An 18-year-old college girl who was helping striking Talisman Sugar Corporation workers man a picket line near here was struck and killed today by a company truck, a union spokesman said. The victim was identified as Nan Freeman, a freshman at New College in Sarasota, Fla.

Judy Petersen, an attorney for Cesar Chavez' United Farm Workers Organization Committee (UFWOC), said Miss Freeman, of Wakefield, Mass., was thrown under the wheels of a Talisman truck which brushed against three pickets standing at the entrance to the sugar mill.

"It was an accident, but it was an accident that was bound to happen," said Miss Petersen. "Any intelligent human being in charge of that operation should have known it was going to happen."

A spokesman for Glades General Hospital here confirmed that Miss Freeman was dead on arrival at the hospital. The Florida Highway Patrol confirmed it is investigating the incident.

A spokesman for the sugar company was not available for comment.

Miss Petersen said the victim and another coed from New College were helping a striking worker distribute information to arriving truck drivers when the accident occurred.

The UFWOC spokesman said the three pickets were talking to a driver who had stopped his truck at the entrance when another truck approached.

The first truck was waved ahead so the second vehicle would not block traffic on U.S. 27 in front of the sugar mill.

"Suddenly they realized that the first truck was not going to clear the guard rail," Miss Petersen said. "The boy threw one girl clear but as he turned to get Nan, she was caught by the truck and thrown under the wheels."

She said Miss Freeman had joined the picket line only for the day.

Let's talk about why we WOULD and on the other hand, WOULDNT cast a vote for the personable Mr. Lindsay.

Good points first... even after "cooling our heels" for more than an hour and "burning inside" cause we hurried back from an earlier interview at Disney World, it wasn't more than two or three minutes after meeting Lindsay that I had forgotten all about my problem... and was sympathetic to his.

What a personality... and he's good looking... the kind that a guy admires and doesn't get "up tight" when his wife talks about that "good looking" Lindsay, etc.

Another plus... he doesn't try to answer your question with a reply that would assure him your vote. I mean, if he doesn't agree with you, he says so... and then gives his reasoning for same.

LIABILITIES... if he can't do a creditable job with the world's biggest city, then how can he expect us to believe that he'd do any better (worse?) trying to cope with the national problems?

On the Cape's Space Industry... he said, "It's too high on the priority list... I could hire all of those engineers tomorrow and put them to work on ecology in New York City."

How long has this Cape lay-off been in progress... two or three years? Why then didn't he "hire" all of those engineers for NYC? Seems to me if the problem were that simple to solve, then it should have been cleared by now!

And on drugs... Lindsay's position that "marijuana should be removed from a misdemeanor charge, but to continue the fight on the hard stuff."

Sorry, there is no way I could accept that theory.

Especially when New York City has over 200,000 hard-core users and is identified as the "worst" drug city in the United States... then how can Mayor Lindsay place himself in a position of crusader in the cure of the national drug problem?

Seems to me you've got to clean up your own backyard before you offer advice to your neighbor...

State Engineers Investigating Pollution Suspect Faces Charge

By JANE CASSELLBERY
An investigation into several complaints that massive amounts of oil and detergents were being dumped into a drainage canal which flows into Lake Monroe resulted in legal action being taken against at least one of the offenders by the State Department of Pollution Control.

At the request of Sidney Vihlen Jr., county commissioner, Alex Senkevich and E. L. Davenport, regional engineer and engineer, respectively, with the state department, traced the source of the pollution of the Farmers' Market and goes west, dumping into Mills Creek, which flows for a half mile before dumping into Lake Monroe.

Excessive amounts of oil, debris, and detergents were found in the water. S. M. Richards Jr., city of Sanford utilities director, was called to verify the sources of storm drainage in the area that outfall into the canal to make sure pollution was not coming from other sources east of Francis Avenue.

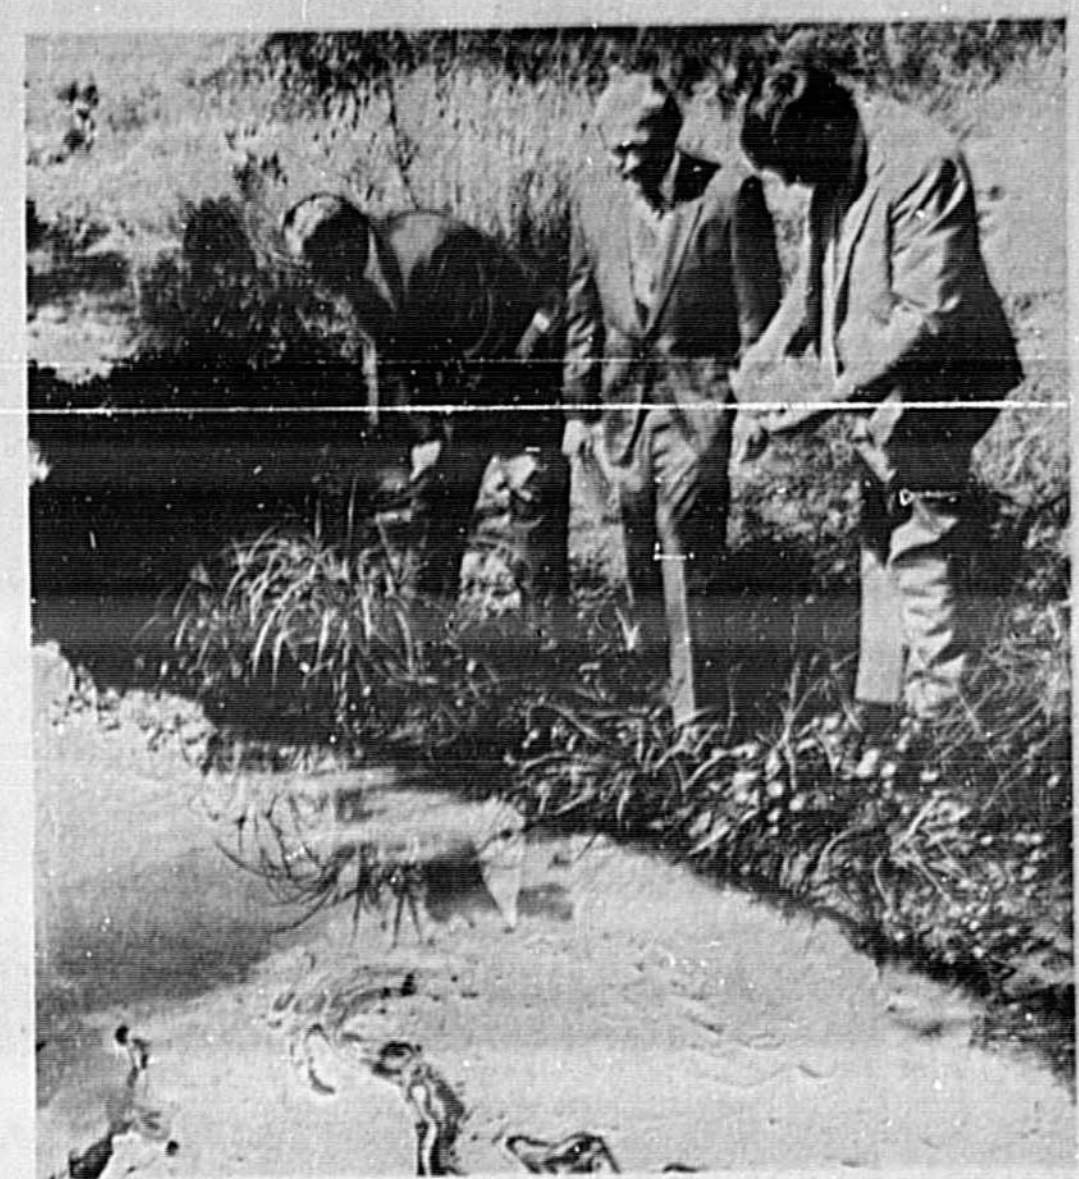

Source of the pollution was determined to be Village Rest Truck Terminal at 1500 French Avenue, operated by "Red" Jones, and Driver's Texaco Service Station, operated by Leonard Davis, at 1450 French Avenue.

Various oils and lubricants and detergents were found being washed by the truck terminal into a hand dug ditch over the bank of the canal. According to Vihlen and Davenport, Jones showed little interest in correcting the situation. Senkevich is turning the case over to the legal department for prosecution under the clean water regulations.

Abatement fines can run \$5,000 a day, Davenport stated.

Driver's Texaco was found to have a truck wash drain and underground piping system that corralled all soapy wash water into the canal. It was determined a minor source of the problem. It developed that Driver as lessor has no liability or responsibility as the Texaco Oil Company leases the station property from the state. Senkevich will require Texaco to install a holding tank for the wash water outfall.

Theft Suspects Plead Innocent To Charges

By MARION BETHEA
Three of the defendants charged in a county-wide theft ring, whose arraignments have been continued for appointment of counsel, entered not guilty pleas to all charges this morning before Circuit Judge Dominick Salfi.

Robert Morris has been appointed to defend Richard Goodall, charged on 15 counts. The UFVOC was represented by William Hutchison at arraignments, due to Morris being in Orange County Circuit court. Roger Berry has been appointed to defend Kenneth Forster, charged in 15 counts. He is, was absent and the defendant was represented by Vernon Mize.

Judge Salfi noted that trial date has not been set in any of the pending cases due to the complexity of defendants and charges.

The third defendant, Aubrey Taylor, was absent initially and the court became concerned since Taylor is in custody. His appointed counsel, William Kirk Jr., told the court that Taylor was "in jail at 9 p.m." Monday.

Later the defendant was brought into court.

Another interesting item in the court was appearance of Sammie Johnson, charged with carrying a concealed firearm and failure to appear at arraignments.

Johnson told the court he had an attorney but did not recall his name. Arraignment was deferred to later in the docket so that Johnson could refresh his memory. However, after arraignments and the jail cases had been concluded, Johnson still did not remember.

Judge Salfi asked if the defendant saw his attorney in the courtroom and Johnson yawned and stretched and said he didn't know. Judge Salfi contended that he could not fashion how the defendant could make arrangements with the attorney if he did not know his name and, as Johnson stated, did not give him any money.

Judge Salfi continued the arraignment until next Tuesday and requested Assistant Public Defender Gerald Rutherford to ascertain if the defendant needed assistance. Rutherford will report his findings to the court.

Anti-Pollution Action Requested By County

By ANN RILEY
WINTER SPRINGS—County Commission Chairman Greg Drummond said today that the Commission will be requesting the Southern State Utilities Company, which serves residents of this unincorporated development, to correct any adverse conditions that may have occurred as a result of recent water pollution problems.

Residents had expressed concern about possible damage to appliances, such as hot water heaters, air conditioners and all washers, filters and strainers cleaned.

In addition to a request to take corrective measures at the Winter Springs facility, Southern State was requested to inspect its other plants in the unincorporated areas of Seminole County to insure there is no repetition.

As previously reported, Southern States took steps last week to flush the line and isolate the source of pollution. Residents were told that the water again was bacteriologically safe for drinking. Results of samples taken at random will be known Thursday. The company is still working to correct the problem.

Arthur Deane, manager of the Southern State Orlando office, said today, "We will do whatever possible to rectify any situation. We would like to maintain our good relationship with the people and the county."

Nixon On TV Tonite

WASHINGTON (AP)—Amid growing indications President Nixon is preparing to offer a date for total withdrawal of all U.S. troops in exchange for release of American prisoners of war, the White House announced the chief executive will make a nationally televised and radio broadcast foreign policy statement tonight. (Earlier story on page 3.)

Presidential press secretary Ronald Ziegler said Nixon will deliver the statement from his oval office at 8:30 p.m. Ziegler refused to say what specific area of foreign policy would be covered.

New Building Fee Pondered By City

By BILL SCOTT
Sanford City Commission Monday night placed a moratorium on issuing certifications of occupancy for any construction started after yesterday with a new building permit.

New construction can start and proceed as before and it is believed that the Commission will have completed its deliberations and actions toward instituting a \$450 fee for sewers, water and off-site drainage before the need of occupancy certificates coming from new construction.

The Commission, meeting at a public hearing with area developers, including J. Bralby Odham, William W. Austin, Donald Howe and others, instructed W. C. Hutchison, city attorney, to draw an ordinance assessing \$200 capital improvement fee and \$250 pollution fee to be payable with the issuance of occupancy certificates but later rescinded that action on advice of Hutchison, who indicated the motion as passed should be changed or be subject to legal attack.

On a motion by Gordon Meyer, the Commission moved to instruct City Manager W. E. Knowles and Engineer Mack Lazebny to come up with costs figures on city providing sewer, water and drainage, instead of capital improvements and water pollution, names formerly given to the \$450 fee.

Commission also instructed Hutchison to draft an ordinance based on the costs to be provided by Knowles and Lazebny. Mayor Lee P. Moore, who cast the lone vote against the \$450 fee said another Commission workshop session would be needed after the figures are ready in two weeks.

Hutchison advised that an ordinance prepared by him would be read twice before passage, thereby giving developers a second chance to be heard.

A. A. McClanahan requested letters be sent to the developers advising them when the matter again would be taken up.

Thanks...

Wish we could say more, but this is the quickest way to express our sincere appreciation to everyone that made our Grand Opening at Economy Toyota of Sanford a complete success...

A special thank you goes to the following for their contribution to this affair. Rev. G. Blair McGarvey, John Krider of Sanford Chamber of Commerce, County Commissioner Sidney Vihlen Jr., and City Commissioners Gordon Meyer, Julian Stenstrom and John Morris. If you missed the opening please stop by and say hello anytime.
