

## GI Hunts For Korean Red Agents

GI Hunts For Korean Red Agents

Inspection scenes like this are staged everywhere in South Korea by heavily armed GIs and Korean soldiers as borders of innocent appearing civilians cross U. S. lines. Every civilian and his bundle represents a potential Red Fifth Columnist and death to an American soldier, hence the most careful search is imperative. (International Soundphoto)

## Truman Vetoes Price Control, Use Of A-Bomb

President Declares All Out Mobilization Is Not Necessary At Present

WASHINGTON, July 27—(AP)—President Truman said today he sees no necessity now for wage price and manpower controls.

He told a news conference that if they come, they will come together as part of all-out mobilization.

He hopes we will not have to have all-out mobilization, he added.

Mr. Truman's comments came in response to questions about the proposal from Bernard M. Baruch for an immediate "ceiling on everything."

Baruch gave his views to Congress yesterday. The lawmakers themselves appeared divided on his proposal with most members apparently against any all-out mobilization right now. There were others, however, who called for full-scale economic mobilization with consumer rationing and wage-price controls.

President Truman also told his news conference:

1. He is not now considering use of the atomic bomb in the Korean war.
2. Steps are in the making to deal with any traitors or saboteurs in the present emergency. Those steps will not infringe on the bill of rights, he added.
3. The State and Defense Departments are working on proposals for increased military aid to European Allies. He said these proposals will be presented to Congress before it adjourns.
4. He did not want to make any comment now on peace prospects, but that it would be better to wait for a few more developments. A reporter had recalled that only a couple of months ago the President had said the outlook for peace was better than it had been at any time since 1945. The newsmen asked if the President still felt that way.
5. On the question of wage and price controls, Mr. Truman said he thought his economic message to Congress had covered that. He said then he would not hesitate to ask for them if he thought they were needed.
6. A reporter said there were rumors around Washington that price and rationing steps were already in the making and were to be set in force by Labor Day.
7. The President said that was news to him.
8. Another reporter wanted to know whether, if prices are rationed back, they would be rolled back to the June 25 level as Baruch proposed.
9. Mr. Truman said he would cross that bridge when he came to it, but he would not say whether he would support the Attorney General, Joseph P. Kamp, or the Attorney General, Tom C. Clark, if they proposed such controls, for quick passage of the controls, as proposed by President Truman, he said.

## Churchill Says No Alarm Felt U. S. Could Bomb Reds From Britain

Appeal For Secret Session Is Defeated By 296 To 295

LONDON, July 27—(AP)—Winston Churchill declared today that it would be better to wait for a few more developments. A reporter had recalled that only a couple of months ago the President had said the outlook for peace was better than it had been at any time since 1945. The newsmen asked if the President still felt that way.

## Dr. Ruprecht Insists Situation No Worse Than 15 Years Ago

Their is no basis for alarm concerning intrusion of salt into the local artesian well water supply, as analysis of the well water shows that the salt content at present is the same as 15 years ago. Dr. R. W. Ruprecht, director of the Central Florida Experiment Station, declared today.

## 4-H Girls To Leave For Camp McQuarrie

Shortly after noon Monday, 4-H girls of 16 to 15 years of age will leave in a bus for Camp McQuarrie in the Ocala National Forest, Miss Lila Woodard, county home demonstration agent, announced this morning.

## Vote Fraud Charged In Oklahoma Primary

OKLAHOMA CITY, July 27—(AP)—The Democratic governor's nomination was stolen from him and says he will demand today a complete recount be made.

# Korean Communists Mass Men And Armor For Knockout Blow At American Defense Center

## U. S. Patrols Show Red Column Back; Holes Plugged On Approach To Pusan

TOKYO, Friday, July 28—(AP)—North Korean troops and armor massed by night Thursday for an attempted knockout blow in the center of American defense lines.

General MacArthur's headquarters in a release early today said there was a lull along the whole battlefield, but that enemy pressure continued in such a way as to indicate the Communists were regrouping and massing for a new assault.

MacArthur returned to Tokyo Thursday from a visit inspection tour of the Korean waterfront. He was confident of ultimate victory but foresaw a long and difficult struggle ahead.

Headquarters said "aggressive patrols" in the southwest sector—had pushed back a Korean Red column two miles to the vicinity of Habong, 70 miles northwest of Pusan.

Two other holes were plugged on the approach to Pusan—major American supply port. Other patrols moved into the highway town of Hanyang 78 miles northwest of Pusan and made contact with an enemy regiment in Namwon, about 22 miles southwest of Hanyang, headquarters said.

Identity of the patrols was not made known, but it was in this area yesterday that relatively small numbers of fresh American troops were reported in action.

The situation in the center of the line appeared menacing even though headquarters reported no major or decisive action. "I took place in the preceding 24 hours," a government spokesman said.

From the front Associated Press Correspondent William B. Moore reported three large Communist columns were concentrating east of Yongdong in front of the U. S. First Cavalry.

A spokesman at General MacArthur's headquarters in Tokyo said two of the Reds three best divisions—the Second and Third—were massed in that sector.

From a forward post with the (Continued On Page Four)

Korean War

(Continued from Page One) First Cavalry, Moore reported American artillery has opened a thundering bombardment of Communist infantry concentrations. The Air Force sent swarms of jets and Mustangs over the area spewing rockets into Red lines and pouring fire into the advancing troops. Fifteen miles northeast of Yong-dong, Maroon, the 24th regimental combat team, the only Negro combat unit identified in the Korean campaign, beat off a Communist attack into yesterday. The combat team, attached to the U.S. 25th Division, is in the defense line that swings north-eastward of Yongdong. To the east in the 200 mile battlefront are South Koreans attacked the Reds. At Hamchang they drove forward seven miles aided by American planes. On the east coast they advanced on Yon-gdok with land artillery and naval guns supporting them. Between the planes and South Koreans using bazookas, six enemy tanks were knocked out in the hot action, which may be the prelude to what appears to be the biggest battle of the Korean war. A curtain of U.S. artillery fire met the attacking Reds, who aimed their attack at vital supply lines on the road to Pusan, U.S. supply port on the southeast coast 90 miles from Yongdong. There had been no report from the Hadong area in Red held southwest Korea, where fresh U.S. troops were described as ready to retake the city once it stops burning. Planes set it afire yesterday. A Communist radio broadcast from Pyongyang, capital of North Korea, claimed a U.S. warship was sunk off Yosu, in southern Korea, by coastal batteries. The radio said the Reds captured Yosu and Sun-chon on the south coast inflicting more casualties on the defenders of the two cities. At a conference with his top generals in Korea, General MacArthur, the United Nations commander, discussed the looming battle situation. "That we will have new heartaches and new setbacks is inherent in the situation," he said, "but I was never more confident of victory—ultimate victory—in my life than I am now."

Three North Korean columns, backed by Red manpower, re-appeared in two divisions, pushed toward the new defense positions taken by the U.S. First Cavalry Division near Yongdong. That city is a key point on the highway and rail line running to the front from the main allied supply port of Pusan, 95 air miles southeast. American artillery hurled murderous fire at the advancing Reds. U.S. shooting star jets and Mustang fighters raked the columns with rockets and machineguns. With the battle setting the central front afire again, MacArthur made his second flying visit of the war to Korea. As on the first—June 29—he was accompanied by key officers. He conferred with Lt. Gen. Walter H. Walker, commander of the U.S. Eighth Army, and other top men directing the action in Korea. Except for the fresh Red eruption on the central front, North Korean pushes were stalled or blunted along the 200-mile front. This area protects the United Nations beachhead that has been whittled down to a perimeter of 50 to 90 miles outward from Pusan on the peninsula's southeast.

Beautiful blonde Lanna Turner is co-starred with handsome Robert Taylor in a two-day showing, tonight and Friday of "Johnny Fingers" at Movieland Drive-In Theater.

Robert Ryan and Claudette Colbert receive some startling information in this scene from RKO's "The Secret Fury," showing Thursday and Friday on the Ritz screen.

American Friends Of Britain Welcome Her Korean Assistance

By J. M. ROBERTS, JR. American friends of Britain will welcome her decision to send troops to Korea for her sake as well as for the added strength. Britain's stock on the American market has not been doing too well in recent months. Despite a fundamental faith in her dependability and a sympathetic understanding of her national interests cross those of the United States and the other allies at some points, many Americans feel that they have given enough to warrant greater sacrifices on the part of others, too.

Britain, with an eye on her commercial interests jumped to give diplomatic recognition to the Red regime in Peking when the U.S. preferred to wait and exact a price in the form of guarantees of international rights. Whitehall gives some indication now of wishing it had not been so precipitate, but the trouble has been caused. Many Americans get this same feeling of precipitancy when Britain pulled out of Greece and pushed America in, although that, like the shift of much of her occupation burden in Germany to American shoulders, also signified a surrender of British rights and powers.

American reliance on Britain is an ally has not been strengthened either, by her war office team of Shinwell and Strachey. Only this week the Washington Post editorialized regarding Shinwell: "We suspect the entire free world has been shocked by the strained neutrality of Emanuel Shinwell, British minister of defense, in the fight against aggression in Korea. These familiar with his political orientation will not be surprised by this gross failure. Allies ought to have realized when he named Shinwell minister of defense and Strachey secretary of war that in case of any threat in

power another day of free-for-all fighting—mostly along the front. U.S. and Australian fighters and American light bombers shot up tanks, trucks and troop concentrations. They were joined by American and British carrier-based planes which ranged the central front for the first time. U.S. B-29 superfortress bombers struck at North Korean supply lines and communications behind the front.

An Air Force spokesman at Eighth Army headquarters reported six Red tanks and 75 trucks destroyed and 10 tanks and 97 trucks damaged in Wednesday operations. A later Far East Air Force summary issued early Thursday afternoon but based on incomplete reports listed 10 tanks and 97 trucks damaged. FEAF headquarters said the B-29s concentrated on pontoon bridges built by the Reds to replace knocked-out spans and blasted rail yards at Chosun, 44 miles northwest of Seoul, and at Suwon, 26 miles south of the North Korean capital of Pyongyang.

RED WARSHIP STOCKPILING, San Francisco, July 27—(AP) British sources said they had learned that the Red Navy was stockpiling warships in the Far East.

Macon Peaches Lose Again To Savannah

By ASSOCIATED PRESS The Macon Peaches picked the worst possible time to slump and lose one-run games. For the fourth straight time last night the South Atlantic League leading Peaches lost, and three of those defeats have been by the closest margin possible. The two most recent defeats were to second place Savannah. The Peaches lead, although robust, is down to 10 and a half games after Savannah's 3-2 victory in Macon. The defeat string is the longest of the season. Herb Whitcomb pitched a seven-hitter for the Indians. Macon let Savannah have two unearned runs and Macon collected one unearned for itself. Stan Karpinski lost his sixth game after winning 17. Columbus whipped Jacksonville 10-0 with one of the best pitching jobs of the year. The Tara got only two infield hits off Pete Bryant. The victory was No. 13 for Bryant and gave the Cardinals their second shutout in three nights. Rip Repulski hit a 400-foot homer and Jim Dickey got four hits.

A Pledge to the American People by The Great Atlantic & Pacific Tea Company.

- We will resist all unwarranted price rises with all our might.
We will make every effort to hold our inventories at the lowest point consistent with good service to our customers, because hoarding, whether by wholesalers, retailers or consumers, will cause higher prices.
We will continue to maintain the lowest profit rate generally prevailing in the entire retail industry. Our net profit now is less than one cent on each dollar of sales.
We will continue to strive for more efficient distribution.
We will fight waste of food, or time, or money all along the line so as to narrow the spread between wholesale and retail prices.
We will devote all our energies to giving you the most good food for your money every day of the week.
We will strive always to do what is honest, fair, sincere and in the best interest of our country and our customers.

As most of you know, this company and the low cost, low profit policies that built it are under attack. We are defending ourselves against a quit brought by the anti-trust lawyers to put A&P, out of business. But the greater conflict in which our country is now engaged takes precedence over all else. Today, with our boys fighting in Korea, we believe that all citizens and all businesses, big and little, should devote themselves wholeheartedly to the public interest. We promise the American people that we will cooperate unhesitatingly with our national government in the present crisis. We promise you that we will continue to do everything in our power to get more buying power in your food dollar and more good food on your dinner table.

Signature of John A. Harford, President of The Great Atlantic & Pacific Tea Company.

### Nation's Economy Greatly Affected By Korean Crisis

NEW YORK, (AP)—Business and industry headed toward a war footing this week. Affects of the Korean hostilities spread rapidly to every nook and corner of the nation's economy.

Plants closed since World War II were revived. Men idle for months were called back to jobs. More vacations were cancelled. "Men Wanted" signs were dusted off.

Industrialists burned the midnight oil to plan for whatever needs the nation may need. They told President Truman the huge productive capacity of their plants was at his beck and call.

And while plans for even greater output were in the making, the whirling wheels of industry turned at a near record peacetime pace.

Industrial production was on a formidable footing with any week of the year and employment was close to it not at a new peacetime high.

The big news of the week in business was its probable call to arms. But a serious threat to price stability brought on by hoarding shared the spotlight.

President Truman, civic leaders and ordinary business men pleaded with monotonous frequency for the consumer to abstain from overbuying.

Newspapers devoted columns to the enormous quantities of food and other goods available in the United States.

Radio stations gave over one-minute program breaks to anti-hoarding messages from business leaders.

But nothing stayed the swift trip of the consumer to the grocery and department store. There were indications at the week-end, however, that sugar buying was easing off a bit and that fewer people were rushing to fill freezers with meat.

In the second week of the Korean War the nation's stores did 24 per cent more business than a year ago. Business leaders say buying was on the increase before hostilities broke out and has accelerated since.

Women shoppers doubled their normal nylon hosiery purchases. Housewives sought larger than normal quantities of sugar and canned goods. Orders for automobiles and television sets increased. And prices, which had been rising rapidly even before the Korean hostilities, shot upward as purchasing expanded. Automobile tires and gasoline cost more. Food was more expensive. Worn fabric price increases added \$2 or more to next spring's suit.

There were continuous warnings that excessive buying could lead to higher prices. President Truman said flatly he would seek controls on prices and he would ask rationing if necessary.

The President's warning was contained in his message to Congress asking for \$10,000,000,000 for the Korean war and as a safeguard against aggression elsewhere.

The message spelled the end of "business as usual" at least for the duration of the Korean hostilities.

It was a 1000-to-1 shot that prices would go higher both for the individual and the company he buys goods.

The Senate-House economic committee was all for an immediate multi-billion dollar across the board" boost in federal taxes. But this committee is only advisory. Other Congressional groups will write the check.

However, most legislators agreed the tax increases will have to be substantial.

The nation's business men and industrialists wasted little time in speculating.

Overnight General Motors' Cadillac division began negotiating with the Army on mass production on tanks.

The Buffalo plant of American Car and Foundry Company, idle since World War II, was being revived to produce restricted items for the Atomic Energy Commission.

The Reynolds Metals Company, a large producer of war-essential products, pledged its support to the president and rescinded increases on aluminum pipes it announced only the day before.

Such basic industries as steel, automobiles and television and radio said they were ready to turn out whatever the government needed.

They said they were running full then the Korean war hit. And because of the high production rate, they added, conversion would be quick.

The steel industry was back to 99.4 per cent of rated capacity this week after a holiday lull that ran over into the previous week.

Automobile production was down a bit. It was feeling the effects of a long sustained record high production and a short strike at the plants of part suppliers.

Television and radio, which would be called upon to produce electronic devices for the armed forces, was rolling along at top capacity.

Freight carloadings were well above the previous week—789,868 to 863,878. Power, soft coal and crude oil production remained at high levels.

About every category was way above the figures of a year ago.

The New York Stock Exchange gained strength too and had its best week in more than 10 years.

The market was strong every day, except Monday and by the week end the market value of all stocks listed had increased by a little over \$2,700,000,000.

The Hawaii Islands were formed by a volcanic eruption in the 18th century.

### Korea Is Difficult Country To Know And So Are Korean People

By HAL ROYLE  
U. S. EIGHTH ARMY HEADQUARTERS, KOREA.—(AP)—You judge a strange place by your nose, your sense of taste—and how the people in it treat you.

Korea is an old and cynical country now torn by a fresh cruelty, but a cruelty it is used to. It is like Sicily in this respect. In the past 4,000 years it has been trampled often by foreign conquerors.

Like Sicily, too, it has a distinctive odor and it raises wondrous vegetables. Unlike Sicily, it has much rainfall and its chief crop is rice.

An Iowa farmer might sympathize with the Korean peasants' problems of climate, but he might be shocked that they use human night soil to fertilize their fields.

From the air at this season Korea looks fresh and fair—a country much like eastern Ohio, or perhaps the Ozarks. The valleys appear beautifully kept, and the mountains are green.

When you land, however, you find a region overpopulated and overtilled, hied by an ancient poverty and suffering from lack of sanitation.

There are railroads and power lines to show the stamp of the western world. Yet the children bathe nude in muddy rivers filled with liver flukes.

Other children and adults too

bathe in squalor, heathen village huts—at the roadside. What came from the land goes back to the land that is the rugged economy of timeless destitution.

Something of this kind of life can be found in some remote parts of America, too, but it is not typical of America. It is typical of Korea, where people have been downgraded by centuries of oppression and ignorance.

What do they think of Americans? Well, in this town there is a big banner reading: "Welcome to United Nations and United States troops in Korea." But there is no cheering such as greeted American troops in France, Belgium and Holland when they came to drive an invader from those lands.

Perhaps this lack of enthusiasm is an Oriental trait, perhaps it is not. Perhaps it is a central attitude of doubt as to the motives of any foreigners, and again perhaps it is not.

I have not been here long enough to pretend to know, but I do know a kind of makes an American uneasy. I haven't seen this kind of indifference since Americans fought through Arab North Africa.

It is an American trait, I suppose, to expect people to be more glad to see us than we have a right to expect. No one enjoys having his home just a pinpoint in

a battlefield.

There is, however, one difference between the Arabs and the Koreans: the South Koreans voluntarily raised an army that is fighting, stubbornly and well, beside Americans in defense of their homeland.

"PRETZEL" ON WHEELS  
CHICAGO—(AP)—Four times a day Glenn Sunbury squeezes his six-foot, two-inch frame into an automobile that is only 26 inches high and 48 inches long. He does his "human pretzel" stuff at the Chicago Fair. The tiny vehicle has a sign painted on it: "Squint Car."

### Burma Sitting On A Limb In Case Of Third World War

RANGOON.—(AP)—The Burmese will find themselves on a limb should Korea develop into a third world war.

They would like to be neutral as long as they can, but fear that neutrality will not be tolerated, first of all by Red China. And they believe if they sided with the Communists, even morally, they will feel the weight of Allied might.

While the Burmese government is silent on the Korean issue, old-time politicians are consulting the country to sit on the fence until it can join the winning side. But the government, aware that no one sitting will be tolerated by either combatant of the future, is discussing little emergency plans. Another world conflict breaks.

A well-informed source said British support of positive American and United Nations action in Korea distressed the Burmese government. Burmese policy apparently is to follow closely an India's footsteps, but this time there must be hesitation because Burma must watch out for her own throat.

This is how the Burmese are making their calculation should there be war, according to the source.

A declaration of neutrality will automatically convert Burma into a battlefield for strategic bases. Allied bombing would flatten a countryside largely recovering from the last war and two years of internal strife.

Burma became a battlefield anyway whichever side establishes bases here will be challenged by the other.

The Burmese army is equipped with weapons mostly of British manufacture. If Burma votes for the Red, the British will stop supplies of arms and ammunition. Pretty soon the Burmese will have the arms but no ammunition.

Rightly or wrongly the Burmese believe the Anglo-Americans, with a Burma hostile to them, will encourage the Korean rebel group and arm them to fight the Burmese, if they go Red. This would relieve Britain of trying down unsuccessfully forces in this country.

The Burmese must expect their case to be filled economically. All her markets are within the Anglo-American bloc.

The source said that Burma, with Red China practically on her back door step, cannot afford to antagonize Peking at this particular time. He said the government knows it cannot stop the Red's military if they choose to walk in because Burma has a relatively small army.

Moreover, he Chinese Communists already have a potentially strong fifth column inside the country. These are the Red Flag (Tsofoklet) Communists led by Thakin Soe and the White Flag (Stalinist) group by Thakin Than Tun.

### Jip Dies, A Victim Of Special Privilege

USE OF SARK, July 27.—(AP)—Jip, a nine-year-old Irish terrier, has been shot to death by court order—just because she was a lady dog.

It took Jip's blood to fulfill the letter of a centuries-old law which said that only the Seigneur of Sark, husband of the island's feudal ruler, the Dame of Sark, may keep a female dog on the island.

Jip had been three years, having come with Ernest Ford and his wife when they moved here from London to set up a bicycle shop.

The Ranks held Jip in considerable affection and she used to go to air raid shelters with them when German bombers hit London during the war.

Rand paid his dog tax, without saying anything about the dog's sex, but last week the authorities learned the grim truth and laid down the law: Get rid of the dog or kill her.

Rand complied with the law last night and buried Jip among the rose bushes in his garden.

Said the Seigneur of Sark, W. R. Hathaway, when asked if Jip had been killed: "I haven't the faintest idea. It hasn't anything to do with me."

### PRIEST KILLED

CINCINNATI, July 27.—(AP)—The Cincinnati Times-Star said today it has learned the Rev. H. G. Felhoelter, a Cincinnati Franciscan priest, was the Catholic chaplain shot to death by North Koreans on the Kum River front July 19.

The priest was attending American wounded soldiers at the time, the paper said. Thirty wounded Americans were shot to death in their litter the same time.

Dispatches several days ago related the priest won a coin toss with a Baptist chaplain to see which would stay with the wounded after the Americans gave up their positions.

The paper said Father Felhoelter's family lives in Louisville, Ky.

The Great Rift Valley extends from northern Syria almost to the southern tip of Africa, enclosing the Red Sea and the lakes of East Africa among other bodies of water.

Long dormant volcanoes are likely to produce the worst eruptions, says the National Geographic Society, because they have accumulated a bigger "stopper" of rock and ash.

The Shinkobwa uranium deposit in the Belgian Congo was discovered in 1928.

Rural Common Sense  
By SPUDS JOHNSON

"If it's good farming practice for his county, the farmer is about 10 to 1 that the good farmer is following it. And it is paying him off in return."

"That is the opening statement in a story about a good Florida farmer carried by one of the well known Southern farm journals a couple of years ago. That emphasizes one of the marks of a good farmer—the following farming practices that are known to be good in this area."

"He's the kind of farmer who keeps his fence rows clean, his implements under shelter, his soil becoming more fertile, his animals fat and his tenants satisfied," the article continues. Doesn't that statement alone pretty well sum up the marks of a good farmer? Can't you picture the kind of farmer who does the things described there? And it's certainly a contrast with the man who lets his fences run down, is forever having to chase the hogs or cows out of his neighbor's field and doesn't ever put his implements under shelter or out of the way, lets his land and animals both become poorer as the years go by."

"Diversification is the keynote on his farm," according to the article. Just another mark of a good farmer, for diversification not only helps to keep the land fertile and productive, it helps to insure an income for the family. The particular farmer's yields were around 50 per cent higher than the state average. He plans to have crops reaching harvest stage at successive times, when labor can be used to best advantage."

"He grows improved crops, plants better kinds of grasses for pasture, steadily improves the quality of his livestock, keeps his equipment in good order and doesn't ever designs to fit his own needs."

"With all these marks of a good farmer showing all over his place, it's small wonder that the farm journal wanted to carry a story about him."

Hints To Horsewives  
By Anna Mae Sikes

**PURE PROGRESS**  
Fruit purees, especially those preserved by freezing, are coming into the importance they have long deserved, according to D. G. Sorber of the U. S. Department of Agriculture's Western Regional Laboratory, Albany, California. Mr. Sorber believes these smooth, "bleved" fruit products will be used more and more in ice cream, sherbets, and other frozen desserts; also in sundae toppings, beverages and confessions—to the benefit of fruit growers, packers, food manufacturers and consumers. They may eventually be packed in small containers for retail sale along with other frozen foods. For several years farm families have been interested in home-freezing their own fruits in this form.

The United States is a great fruit-growing and fruit-consuming country. The demand for ready-prepared products with the full natural flavor of fresh fruit is increasing. Frozen fruit purees are tailor-made for this demand. Their advantage to the fruit grower is not only that they offer another outlet for his crops, but that they take more of his fruit than any other product except juice because off-cuts and shapes may be used, as well as fully ripe fruit of finest flavor but too mellow for shipping fresh or canning.

Already nearly a dozen different frozen fruit purees are being produced commercially—apricot, banana, boysenberry, lemon, orange, tangerine, nectarine, peach, plum, raspberry, and strawberry. Many other fruits have made excellent purees in laboratory tests, including blackberries, cantaloupe, peaches, guavas and mangoes.

Commercially purees have proved successful in several lines. Frozen orange and lemon puree, developed by scientists of the Bureau of Agricultural and Industrial Chemistry in Southern California, became popular with sherbet-makers as soon as these purees went into commercial production.

Now being manufactured and distributed in several western states for sundae toppings are fruit purees, thickened slightly with citrus pectin and sugar and canned with sliced or whole fruit.

Velva Fruit, the frozen combination of fruit puree, sugar, gelatin and water, which was manufactured and distributed in the South during the war after its development by the Western Laboratory, may stage a comeback with appreciable fruit prices.

**INDIGO IS POPULAR**  
ORLANDO, Fla.—The popularity of Haly Indigo as a cover crop for citrus groves and as a pasture grass is on the upswing in Orange County, says County Agent F. E. Eastman. This season 12,000 acres were planted to this legume in this county, as compared with 3,500 acres in 1949.

**WAKE UP BUSINESS**  
By Advertising in The Newspaper

Try and Stop Me  
By BENNETT CERF

WHEN Sir Thomas Lipton died in 1931, he had never imbibed alcohol, smoked, gambled, nor married. Maybe that's why he was able to leave four million dollars to the poor of Glasgow in his will. Competitors say, however, it was because he was the smartest, slickest exhibitionist who ever entered the tea business. Sir Thomas' yachts (he financed five successive Shamrocks) never once captured the international cup, but they won for his tea products about a hundred million dollars' worth of free publicity.

Will Rogers said, "Sir Thomas is probably the world's worst yacht builder but absolutely the world's most cheerful loser." Sir Thomas could afford to bet. According to Sir Thomas' biographer, Alec Waugh, his publicity was summed up in this one paragraph: "A man may have many friends, but he will find none so steadfast, so constant, so ready to respond to his wants, so capable of pushing him ahead, as a little leather-covered book with the name of a bank on its cover."

**MERRY-GO-ROUND**  
ST. JOSEPH, Mo., July 27—(AP)—Four young persons, out for a park were given for a real ride on a merry-go-round by the law before they were picked up last night for questioning about a worthless check and a stolen pig.

Louis Jacobs, evidence officer for the prosecutor, saw the four he was seeking riding the merry-go-round at a park. He was afraid if he tried to arrest all four by himself some of them might get away. He told Wayne McGlocklin, the operator, to speed up the merry-go-round and keep it going until he was ordered to stop.

The volcano Mauna Loa remains as an escape vent for the volcanic activity that formed the Hawaii Islands.

## Congress May Give Truman Broad Powers

WASHINGTON, July 31—(AP)—President Truman today is sending up a message asking \$4,000,000,000 additional for military aid to anti-Communist nations. Chairman Cannon (R-Mo.) of the House appropriations committee said there was "unanimous agreement" among Democratic and Republican leaders to expedite action on the request.

WASHINGTON, July 31—(AP)—The Senate slipped down today an attempt by Senator Ken (R-Mo.) to cut \$718,691,473 from Marshall Plan funds for the 12 months ending next July 1. Ken proposed \$1,550,000,000 of economic aid for Western Europe instead of the \$2,668,691,473 recommended by the Senate Appropriations committee. He argued, "It is not in the interest of the boys in the Korean fighting front to give away vast quantities of critical materials."

WASHINGTON, July 31—(AP)—Administration leaders in Congress, finding no firm White House opposition, were swinging today to the idea of giving President Truman standby price-wage-rationing powers as well as the milder economic controls he has asked.

One Democratic leader, asking not to be quoted by name, told reporters a price-wage-rationing amendment probably will be offered to the Administration bill on the House floor. The House is to take up the measure tomorrow.

Under the proposal, Mr. Truman would have power to put on price and wage ceilings and begin rationing at any time he felt they were needed.

Some Administration men felt that unless standby powers were given the President, Congress might vote a wage-price "freeze" as proposed by Rep. Kunkel (R-Pa.).

Senator Maybank (D-SC) said (Continued on Page Three)

## State Democratic Party Announces Platform Group

SARASOTA, July 31—(AP)—A new State Democratic organization was announced today with a platform committee named for the first time.

Three women were named to committee chairmanships, establishing another precedent. An executive committee was formed to meet periodically.

State Chairman E.B. Donnell of West Palm Beach and Secretary J. Ervin Walden, Sarasota, jointly announced the new state setup.

Tate Powell, Jr., of MacClenny is chairman of the platform committee. Its duty will be to work "to establish general principles for which the Democratic Party of Florida and its candidates will stand."

## Production Of A-Bombs Reported Stepped Up In Last Six Months

WASHINGTON, July 31—(AP)—The Atomic Energy Commission said today that since January it has produced a record amount of the explosive which goes into A-bombs.

It also disclosed that it is studying the possibility of making an atomic poison weapon.

In a semi-annual report to Congress, the atomic agency told of a stepped-up program during the first six months of this year, involving "all forms of atomic weapons, including the hydrogen bomb." And it hinted that this may have resulted in greater production of atomic bombs by saying that during the six month period "the rate of current operations" on the atomic atomic project had "accelerated."

In the same period, the commission said, production of uranium-235 and plutonium—the explosive ingredients used in making atomic bombs—hit "the highest rate in the history of the project." The same materials also are used in experimenting with atomic power for industrial plants and ships.

The commission carefully refrained from saying outright what its rate of A-bomb production was during the six months "Atomic weapons and research" (Continued on Page Two)

## Motions Filed For Revocation Of Bridges' Bail

SAN FRANCISCO, July 31—(AP)—The Government filed motions today to revoke the \$25,000 bail upon which Harry Bridges was convicted last spring.

The motions will be argued Wednesday before Federal Judge George B. Harris who presided at the long perjury trial in which Bridges was convicted last spring.

Bridges, president of the CIO Longshoremen's union, was convicted of lying in his 1945 citizenship hearing by denying he was a Communist. He has since expressed opposition when some of his union locals proposed resolutions endorsing the United States and United Nations stand in the Korea war.

The motions for revocation of bail were drawn by E. Joseph Donohue, special prosecutor for the U. S. Attorney General who prosecuted the perjury trial.

Donohue said the motions were filed because Bridges, a native of Australia, "poses a threat to the security of the United States."

In Washington Attorney General McGrath announced that Donohue went before the U. S. District Court at San Francisco shortly before 1 P. M. (EST) to ask that the bail be revoked and that Bridges be placed in the custody of the United States of America.

The bail was granted last April to the longshoremen's chief to appeal his conviction for perjury, based on a denial of any Communist connections then he obtained in American citizenship in 1948.

The San Francisco federal court ordered his citizenship papers cancelled.

The Justice Department in announcing its move to put Bridges behind bars while the appeal is pending said:

"The motion is made on the grounds that since the defendant was at large on bail he has pursued and will continue to pursue a course of conduct and activities dangerous and detrimental to the public welfare and inimical to the safety and national security of the United States of America."

## Belgian King Said Offering To Quit Post

BRUSSELS, July 31—(AP)—The major parties in Belgium agreed tonight to accept King Leopold's offer to step aside in favor of his son, Prince Baudouin. The agreement was revealed by Liberal representative Here Lefevre after hours of consultations by delegations from the anti-Leopold Socialists, the Liberals, and the pro-King Christian Socialists.

BRUSSELS, Belgium, July 31—(AP)—King Leopold offered today to delegate temporarily his royal authority to his son Crown Prince Baudouin.

The premier said the King made the offer on condition the opposition Socialists withdraw their political and economic demands and make them later through parliamentary channels.

This announcement came after both Davidsaart and Socialist leader Max Huset had conferred with Leopold this morning at Laeken palace.

The King's decision was disclosed as the crisis over his return from exile ten days ago threatened to plunge the nation into civil war.

The Vanguard of an army of anti-Leopoldists was reported already marching on Brussels. Three anti-Leopoldists were killed by gunfire last night in Liege. This climaxed a wave of violence and strikes which had paralyzed the nation economy.

The pro-Leopold government admitted that it was conceding (Continued on Page Two)

## Sanford Has Gain In Buying Power Over Last Year

NEW YORK, July 31—(Special)—Despite a national drop of 57 per cent in the cost of living in buying power, Sanford actually went ahead of its prior record by an additional 87 available to the average family after personal taxes. This is brought out in a new, copyrighted survey of buying power, covering all parts of the country, prepared by Sales Management.

The residents of Sanford had total earnings, after taxes, of \$15,544,000 in 1949. This was a gain over the prior year when income came to \$13,589,000.

Dividing the income by the 4,500 families in the city yields a per family income of \$3,454, as against the \$3,297 in 1948. In the same period the average income per family for the nation at large dropped 1.3 percent.

These are arithmetical averages. It is noted and are substantially higher than the "median" figures to be provided by the new census.

Most of this money found its way into Sanford stores, where purchases for the year totaled \$12,172,000.

The survey reveals that the pick-up in business recorded by Sanford during the second half of last year led the average loss in buying income to the 57 per cent. Retail sales per family dropped \$141, attributed to lower prices and to the dwindling backlog of wartime supplies.

## Negro Is Arrested In Auto Accident

A 50 year old Negro farm hand who backed his 1938 Chevrolet Sedan directly into the path of an approaching semi-trailer truck and who survived the resulting crash with but minor injuries, was arrested this morning by Sheriff P. A. Mero and deputies, and was jailed on charges of driving while drunk, driving without a license and violating the highway right of way law.

# U.S. Reinforcements Arrive To Bolster Shrinking Line; China Reds Want To Mediate

## London Reports Communist China Would End War Through Mediation By Asia

LONDON, July 31—(AP)—An official source said today Communist China is seeking a way to end the Korean war through mediation by Asians.

The source for this information has British Commonwealth connections, but cannot be identified further. He said the Chinese views were conveyed a few days ago to the Indian ambassador to Red China, K. M. Panikkar. The British representative in Peking has given London a full report. It is not known whether India has replied.

This developed on the eve of Soviet Russia's return to the United Nations Security Council, and may be a straw in the wind as to the stand Russia may adopt there. It was believed Russia may present the idea and insist Korea is an Asian problem.

The informant said the Chinese Reds had pictured themselves to India as not wanting to become involved in the Korean conflict, on the ground they need a long period of peace to build up China. These were the available details of the Peking proposal.

There would be a quick cease-fire and negotiations. The Reds would try for a final settlement with the idea of reuniting Korea and pacifying it. Premier Chou En Lai was said to have named Jiling, Pakistan and Burma as possible mediators. Communist China, with Russian backing, would be another. American forces would pull out, under Chou's plan.

## Reports Made At Rotary On District Meeting In April

Reports were made on the district conference in Tampa and the district assembly in Lakeland by April by President Orville Toulton and Dr. E.W. Ruppel at today's luncheon of the Rotary Club.

Mr. Toulton said there were more than 800 delegates present at the Tampa meeting where they were entertained at the Latin club in Ebor City and were addressed by Norman Foster who spoke on the General Election on Nov. 7.

Dr. Ruppel said that the Fellowship Dinner of the Rotary assembly at the Lakeland Yacht (Continued on Page Six)

## Registration Books To Open Tomorrow

The Registration Books for Seminole County will be open in the office of the supervisor located in the basement in the rear of the Court House beginning tomorrow and will remain open through Saturday, Oct. 7 for the purpose of registering those who wish to vote in the General Election on Nov. 7.

All those who re-registered in January, February or March of this year will not be required to register again, Laurine A. Messenger, Supervisor of Registration explained. This registration period is only for those who failed to re-register during the months mentioned above.

"However," stated Mrs. Messenger, "all persons who have had any change of address, or change in name, either by marriage or law, or have bought or sold property since the first registration period, are required by law to re-register in person in the office during the time the books are open and have the change properly recorded upon the registration books."

## GIANN FIRE

Firemen, for the second day in succession, were today called to combat a grass fire near the Williams Lumber Yard on south Sanford Avenue. The call was received this afternoon at 2:30 o'clock.

KIWANIS SPEAKER  
A.B. Peterson, former co-ordinator of the Seminole County Deacons Council, and who is active in the set up of the new County Deacons group, will tell Kiwanians Wednesday of plans for coping with possible emergencies including bombing and sabotage in case of war.

## Fresh U. S. Division Arrives In Korea Ready For The Fight Ahead

SOMEWHERE IN KOREA, July 31—(AP)—The tank-equipped U. S. Second Division landed at a southern Korean port today, fresh and ready for the fight against North Korean Communist invaders. The new troops were the first to arrive in Korea direct from the United States.

They included men from Texas, California, Georgia, New York, Indiana, Oklahoma, Vermont, Illinois and other states, a representative American Army division. There was a sprinkling of World War II veterans.

Their job to bolster the ground troops who have been slugging it out against a persistent and powerful enemy in a battle for time. The leader at a moment called critical by American officials.

The second division's arrival is said to lift the morale of the troops in the area, coming from fresh North Korean blows. Commanders had the same feeling as they watched the eager troops pour ashore at the busy port.

The World War II veterans among the new arrivals' background entry into battle calmly but not with the cockiness of some of the youngsters who have yet to face the realities of war.

The unloading was continuous throughout the night, with tanks and artillery coming ashore under bright searchlights and the glow of a pale yellow moon.

The newcomers, dressed in combat fatigues, were not impressed with the little they have seen of Korea. The troops were impressed but not dejected at the sight of American battle casualties being (Continued on Page Two)

## Dulles Says Chinese Red Policies Hurt Chance For Admission To UN

SAN FRANCISCO, July 31—(AP)—John Foster Dulles said today that the Chinese Communists have undermined their claim to membership in the United Nations by preaching violence and backing the Korean invasion.

Speaking on the eve of Russia's return to the Security Council for a possible revival of the China dispute, the State Department adviser said the United States favors a settlement of the China-U. N. question.

## Communists Drive To Pusan With Force Of 200,000 Troops

WASHINGTON, July 31—(AP)—The Air Force announced today that it is sending additional B29 Superfortresses to the Far East. The announcement did not designate the units nor the air bases from which they will be sent. Planes from two B-29 groups were dispatched to the Far East from U.S. bases July 3.

TOKYO, Tuesday, Aug. 1—(AP)—Troops of the U. S. Second Infantry Division under Maj. General Laurence B. Keiser landed with tanks in Korea Monday and sped forward to help brace shrinking Allied lines.

The landing place was identified only as a big, busy port in South Korea. (This could only be Pusan, but security considerations prevented naming it.)

General MacArthur's headquarters said the North Korean Reds in force were shifting their pressure from the central sector to the west and southwest.

The Communists captured Chinju, 50 miles west of Pusan, vital U. S. base. Associated Press correspondent Hal Boyle reported from outside Chinju that the Americans withdrew from the coastal anchor to new positions less than 50 miles from Pusan.

Arriving direct from the United States, many of the new troops headed out in trucks to plug holes punched by North Korean Reds along a rectangular front before Pusan, on the southeast coast.

Up to 200,000 men were reported in the big Red surge against the shrinking defense area.

In the central front new pressure was put on Kumsong. But a U. S. First Cavalry spokesman there said the city "will be held at all costs."

He said the troops had been (Continued on Page Two)

## Secretary Tobin Hits Modification Of Social Security

NEW YORK, July 31—(AP)—Secretary of Labor Maurice Tobin said today that passage of the Knowland amendment to the Social Security bill would threaten "thousands of workers" with denial of unemployment insurance.

In a speech prepared for the 54th annual New York State Convention of the American Federation of Labor, Tobin said:

"The Knowland becomes law, thousands of workers throughout the country will be defenseless against a denial of unemployment insurance benefits for refusing to take a job at substantial wages, or for refusing to sign a yellow dog contract."

The amendment, sponsored by Senator Knowland (R-Calif.), has been approved by the Senate. It becomes a key point of dispute when the Social Security measure went before a House-Senate Conference Committee. The Committee takes up the bill again tomorrow.

Under the amendment, the Secretary of Labor would be prevented from withholding federal jobless insurance funds from states which fail to conform with federal standards, until after a ruling by the state's highest court, and until after the state had 90 days to conform.

Tobin told delegates representing (Continued on Page Two)
