COUNTER MOVE MADE WELLES BY LIBERALS

Machado's Own Party Offers Proposition Calling For Retirement Of President

HAVANA, Aug. 11.—(A.P.)—Members of the executive committee of President Machado's own liberal party said today the government had submitted to United States Ambassador Sumner Welles a counter proposal by which the president would surrender his office to General Alberto Herrera, present secretary of war.

The popular and conservative parties already have demanded that the president step down and now his own political organization has come forward with a plan accomplishing the same object.

The action of the liberals in part reversed their decision yesterday when they held Welles guilty of "inter-meddling" and his mediation activities prejudicial to the sovereignty of Cuba.

By this plan the present state secretary, Orestes Ferrero, would resign and General Herrera would be appointed by Machado in his place. Thereafter Machado would ask congress for a leave of absence, thus opening the way for Ferrero to succeed to the presidency in conformity with the Cuban constitution.

The counter proposal of the Machado government came at the time when the general strike which has held Cuba in its grip for days was fast approaching a full-fledged revolutionary movement.

In Havana this morning a street car filled with pickets was bombed, injuring seven, one perhaps fatally. At many points in the interior public feeling is at the boiling point and burning revolutionary activity is spreading almost inevitably unless the revolutionary problem is solved immediately.

Between three and five hundred armed and mounted men are reported to have assembled near Clara. For the time being they remain peaceful.

HAYDEN, Aug. 11.—(A.P.)—Outline of the state department's program for a new order in Cuba became known today as President Roosevelt waited for an early (Continued On Page Five)

Mrs. Roosevelt Is Seeking Advice On N R A Wage Codes

WASHINGTON, Aug. 11.—(A.P.)—Mrs. Franklin D. Roosevelt is bent on informing herself of exactly what is happening with regard to equal minimum wage for women and men in N. R. A. codes of competition.

The president's wife said she appeared to the jurist that Florida law authorizing the use of bonds in payment of taxes would "impair the obligations contained in the city's bonded indebtedness and would violate section 10 article 1 of the federal constitution."

The suit was brought by five holders of some twenty and a half million dollars' worth of St. Petersburg bonds. They are Kenneth M. Keefe, of New York state; Fred P. Hayward, of Boston; Fred W. Hubbe, of Des Moines; Henry Hart, Detroit; and John S. Harris, of Cincinnati.

The plaintiffs alleged that Florida's bond bill 1069 under which St. Petersburg could have accepted bonds for taxes was unconstitutional because it was a local bill but no notice of intention to introduce it in the recent legislative sessions, was given as required by law.

The plaintiffs asked for a three judge court to hear their application for an interdictory injunction—a federal district judge, a federal supreme court judge and a member of the federal circuit court of appeal.

Judge Ritter's order provided for a hearing Aug. 14 in Jacksonville, on the application for the interdictory decree.

President Packs Up As Vacation Ends

HYDE PARK, N. Y., Aug. 11.—(A.P.)—President Roosevelt packed his bags at the summer White House preparing to return to Washington tonight after two weeks here during which he kept close contact with the Cuban situation and the workings of the recovery drive. He is determined to bring political and economic peace to Cuba and expected an early showdown. He issued an order directing all government contracts cancelled if the contractor failed to comply with the recovery code.

DIXIE'S BUILDING CONTRACTS FOR MONTH REPORTED

Figures For July In
16 Southern States
Reach 23 Millions

BALTIMORE, Aug. 11.—(A.P.)—Contracts awarded for building, engineering and construction projects in the sixteen Southern States during July amounted to \$23,158,000. The Manufacturers' Record announced yesterday.

The July figures compare with a total for the five weeks a preceding month of \$29,144,000, but The Record said the July figures in fact sustained activity in the South despite a falling off in awards for public buildings due to delays in starting new projects under the Federal Public Works program.

Dwelling construction accounted for \$1,932,000 of the awards as compared with \$2,067,000 in June and \$1,283,000 in May. For the first time in many months specifically building increased, indicating a growing demand for new homes.

Various mills let contracts last month for additional housing facilities for operatives shortly to be placed on their payrolls as a result of the adoption of the two shift 40-hour week by the textile industry.

A notable increase in contracts for church buildings was recorded in July, awards aggregating \$565,000 compared to \$115,000 for projects of this character in June.

Awards for industrial and engineering work in July totaled \$9,470,000 with a wide variety of enterprises making up the total. Textile mill expansion resulted in a great share of the awards. The T. B. Chatillon Corporation of Rome, Ga., initiated \$2,800,000 (Continued On Page Five)

Use Of Bonds For Tax Payments Gets Setback In Court

TAMPA, Aug. 11.—(A.P.)—The city of St. Petersburg was restrained from accepting anything except cash for 1933 city taxes in an order from Federal District Judge Halsted L. Ritter, in Miami, filed in federal district court here yesterday.

Judge Ritter's order said "Florida law authorizing the use of bonds in payment of taxes would 'impair the obligations contained in the city's bonded indebtedness and would violate section 10 article 1 of the federal constitution.'"

The suit was brought by five holders of some twenty and a half million dollars' worth of St. Petersburg bonds. They are Kenneth M. Keefe, of New York state; Fred P. Hayward, of Boston; Fred W. Hubbe, of Des Moines; Henry Hart, Detroit; and John S. Harris, of Cincinnati.

The plaintiffs alleged that Florida's bond bill 1069 under which St. Petersburg could have accepted bonds for taxes was unconstitutional because it was a local bill but no notice of intention to introduce it in the recent legislative sessions, was given as required by law.

The plaintiffs asked for a three judge court to hear their application for an interdictory injunction—a federal district judge, a federal supreme court judge and a member of the federal circuit court of appeal.

Judge Ritter's order provided for a hearing Aug. 14 in Jacksonville, on the application for the interdictory decree.

RECORD SMALL GRAIN CROP IS SEEN FOR U.S.

Drought Damage Done In Middle-West Is Cited As Reason For Slight Production

WASHINGTON, Aug. 11.—(A.P.)—One of the smallest crops of grain harvested in the United States in this century was forecast yesterday by the crop reporting board of the department of agriculture, which attributed the condition to drought damage through the Middle West.

His report, based on Aug. 1 conditions, indicated the second smallest corn crop since 1893, the smallest wheat crop since 1893 and no net crop of about one-half of that last year.

The indicated production of corn was placed at 2,373,919,000 bushels, compared with 2,876,000,000 last year. The crop this year was dated on Aug. 1 as 65.5 percent of normal.

The wheat crop of all types was estimated at 199,871,000 bushels, more than 100,000,000 less than the amount of wheat normally required in this country for food, feed and seed.

This compares with a crop last year of 726,000,000 bushels.

Winter wheat production was listed at 340,365,000 bushels and all spring wheat production at 159,516,000 bushels.

The barrel forecast for the crop at 668,744,000 bushels, compared with 1,238,000,000 last year, and an average production from 1926 to 1930 of 1,100,000,000 annually.

Forecasts of production of barley, flaxseed, hay, beans and potatoes all were below the usual low forecast of July 1, and the condition of pastures on Aug. 1 was rated as the lowest for that date on record.

It is estimated that total production was expected to be about 10 percent below average in recent years and that the upward trend in oranges and grapefruit has partially offset the rather poor prospects for apples, peaches, grapes, pears and prunes. The potato crop may be the smallest since 1910.

Bernard E. Ward Former Resident Here, Death Victim

Bernard Evans Ward, well-known portrait painter of Cleveland, Ohio, and St. Augustine, Fla., former resident of Daytona Beach and Sanford, passed away at 2:30 o'clock on Aug. 2 at the home of his granddaughter, Mrs. E. J. Ward, in Akron, Ohio. Death came following a two-week illness, although Mr. Ward had been in failing health for the past several months.

Mr. Ward was born in England on May 18, 1856 and came to this country in the year 1913. He was a member of the Southern Art League and of the Florida Federation of Artists and was also a member of the St. Augustine Art Club. He was an exhibitor at the Royal Academy of Art, London, England, and was well-known throughout the country for his outstanding portrait work.

He maintained a studio in Franklin, Pa. for many years, giving up his studio there a year ago last summer. He has painted the portraits of many of the country's most prominent people and has done some excellent mural work.

Mr. Ward had spent some time in Florida, being a resident of Daytona Beach for eight years and also spending four years in Sanford. He went to St. Augustine over a year ago with his daughter, who was transferred there to the office of the Florida Power and Light Company, and made his home with her. His distinguished and gallant manner, typical of the "old world school" and his charming personality was for him a wide circle of friends, particularly in the art circles.

He is survived by one son, R. B. Ward, of Cleveland, Ohio; a daughter, Mrs. Annie M. Hoyle, of St. Augustine; five grandchildren and one great-grandchild.

Funeral services were held Saturday, Aug. 5, at the Kinke's Funeral Parlors in Lakewood, Ohio, a suburb of Cleveland.

General Johnson Calls On Consumers To Patronize Only Stores Having Eagle

BALTIMORE, Aug. 11.—(A.P.)—An appeal to the nation to "buy now" in stores toward which the NRA's blue eagle beckons was made last night by Hugh S. Johnson, the recovery administrator.

In a vigorous address punctuated with arresting phrases, the agriculture economic chief struck out at the "doubting Thomases" and the "wreckers of the things-alone school of economic thought."

He called directly upon the consumers to start at once patronizing those firms which are fulfilling the program of raising wages and spreading employment to increase purchasing power and demand that the plan which he is directing be a "buyout."

"It is nothing of the sort," he said, "it is a white list if you like. Nobody is prevented from buying the insignia of those who are aiding re-employment. Adequate means are provided to protect those who are doing all they can but who cannot go the whole distance."

"In those circumstances it would be cowardly and unfair for the NRA to omit to point out to the people that they can only keep the re-employment program going by supporting those who support it. Let us be frank and sensible."

Turning again to his promise to employers that buying would be stimulated to take care of the increased wages which they are asked to pay, Johnson said "the public must buy now."

"It must buy under the blue eagle and must buy to the full of its reasonable and prudent ability," he added, "it cannot be otherwise. To support increased wages there must be increased business. To get increased business there must be increased buying. Increased wages depend on increased buying and we can't have one without the other and two make four. The point about buying under the blue eagle is just as certain and just as simple (Continued On Page Five)

U. S. POSITION ON LATIN AMERICAN RELATIONS IS HIT

Scrapping Of Monroe Doctrine Is Urged By Senator Pittman

NEW YORK, Aug. 11.—(A.P.)—Scrapping of the Monroe doctrine in the interest of amity between the United States and Latin American nations was advocated yesterday by Senator Pittman, of Nevada, chairman of the Senate foreign relations committee and a delegate to the world economic conference.

"It is the Latin American people who are sincere in our economic policy that we will not interfere, we should make a declaration that there is no longer necessity for the Monroe doctrine," said Pittman on his arrival from London.

"We should say that the Monroe doctrine is an outdoor policy. The purpose of the doctrine was to prevent certain European countries from extending their power to Latin America. At present the danger of European powers attempting to extend their governments to Latin America is negligible."

Renunciation of the doctrine, the senator said, would assure Latin American nations that the United States found no further obligation to interfere in their domestic affairs.

Senator Pittman expressed his disapproval of the Monroe doctrine as prepared to hasten to Washington to study the Cuban situation.

Although declining to suggest any particular course of procedure, he said there were two alternatives for the United States. "First," he said, "there is the use of denouncing the policy declared in the Platt Amendment, which permits this government to intervene to protect its own interests."

The Advisory Committee of the local N. R. A. Campaign Army will hold a meeting at the C. C. Hall this afternoon at 6:00 o'clock, with Mayor V. A. Speer presiding. Matters of interest are to be aired, it was learned today from General Frank Evans, head of the Army, who stated that the problem of unemployment will be given considerable thought and discussion.

CORN CROP FORECAST

WASHINGTON, Aug. 11.—(A.P.)—The crop reporting board of the department of agriculture yesterday forecast the second smallest production of wheat and oats since 1901, and the lowest in 35 years.

HEADS YOUNG JUDEANS

ATLANTA, Aug. 11.—(A.P.)—Leon Goldberg of New Orleans was elected president of the Southern Young Judaea Association, Mobile was chosen as the convention city for 1934 and the mid-year convocation in December will be held in Birmingham.

PAYROLLS ARE INCREASED BY OVER \$500.00

Thirty-Seven Persons Given Employment, Reports From 125 Business Men Show

Thirty-seven residents of this city were given whole or part-time employment here last week, and as a result the weekly payroll released by 50 local business men was increased by more than \$500, it was learned from an authoritative source today.

Twenty of these persons are now on full-time employment in various business or industrial houses, while 17 are assured of at least part-time employment for the present.

The information was obtained from the more than 125 questionnaires which were circulated in Sanford on Monday and Tuesday last week. The N. R. A. program had been in effect through last Saturday night, through unemployable residents of the community.

Highlight of all of this information, however, is the fact that it represents not a single one of this city's larger employers of labor. In every case the report covers a business which employs ordinarily from three to 25 or 30 clerks or workmen.

It is said that every large employer of labor in this county has signified an intention of aiding the President's Agreement. However, because they have not had time to adjust their personnel to new hours and new wages, these employers were unable to report an increase in payroll or personnel as of last Saturday.

Nor does it cover the payroll increase which was brought about last week when four of the 50 concerns reported an increase in the hourly rate of pay, but did not employ more men.

One employer reports that because he has had to add three additional employees, his weekly payroll was boosted \$53.34. That figure represents the largest increase in payrolls reported by any one of the 125 employers.

Another firm, adding five full-time employees, reported that its payroll for last week was \$50 more than the week before.

Still another firm took on a full-time employee, apparently on a \$32.50 per week salary, since the firm reported an increase in its payroll of that much.

It was understood today that members of the local N. R. A. Campaign Army will continue their canvass of stores, and other places where labor is employed. Every effort will be made to secure complete data from every employer in Sanford so that this city will be able to report a sizeable increase in its weekly payrolls and a sizeable decrease in its list of unemployed.

Conference Series Begun In Federal Fight Upon Crime

WASHINGTON, Aug. 11.—(A.P.)—Signaling the start of a new phase of the government's anti-crime campaign, high federal officials recently started a series of conferences at the call of Raymond Moley to seek ways of unifying federal and state activities.

Meanwhile, department of justice agents who recently have aided in solving four kidnaping cases were assigned to hunt down the subjects of Charles F. Hisebel, wealthy Oklahoma City oil man.

Moley, an assistant secretary of state appointed by President Roosevelt to investigate the crime situation, started his new duties by conferring at the Justice department with Attorney General Cummings, William Stanley, first assistant attorney general, and Joseph B. Keenan, special assistant in charge of anti-racketeering efforts.

Keenan declined to go into details concerning the Urshel inquiry, saying that might interfere with the investigation.

Upside-Down Flying Record Surpassed

LOS ANGELES, Aug. 11.—(A.P.)—A Yankee boy who practiced the stunt in an old kitchen chair, has believed Lieutenant Tito Falconi, Italian air officer, of the upside down flying record. Mr. Burcham yesterday flew head downward for one hour and 46 minutes from San Diego to Los Angeles. He broke the record by 39 minutes. Falconi announced he would attempt to regain the honors today taking up sufficient fuel for four hours. "The first five minutes were the hardest," said Burcham upon landing.

Code Violators Are Given Warning By General Johnson

KARL LEHMANN IS HOME AFTER ATTENDING FAIR

C. Of C. Secretary Is
Enthusiastic Over
Florida's Exhibit

Rolling over with enthusiasm and interesting impressions of the World's Fair at Chicago, Karl Lehmann, secretary of the Seminole County Chamber of Commerce who has been loaned to the Florida Commission in various capacities for the past several months, returned from that city last night with Mrs. Lehmann, ready to again assume his local duties.

"The Fair is magnificent, beyond description," were among his first words, although he quickly added, "And our exhibits are the talk of the town."

"So well are Florida's various exhibits scattered about the grounds," he said, "that the visitor moves along only a short distance before he comes across something Florida, either the Florida Tropical Home, the sponge fisherman's boat, the Seminole Indian Village, the main exhibit, the orange grove, and finally, radio programs and announcements that are broadcast all over the Fair grounds through huge loudspeakers."

The weather is fine, crowds are enormous, business in Chicago is booming, notables are everywhere, and events tumble after them, notes with such rapidity that the visitor comes away breathless with the immensity of the project and all of its background, he said.

For the past three weeks, it has been Mr. Lehmann's task to be in and around the main exhibit helping spread the gospel of Florida, to arrange for radio and club civic programs, and to in general advance the cause of Florida at every opportunity.

Every day, he said, dozens of Floridians, many of them personal friends, called at the Florida exhibit, always to express surprise and satisfaction over the display. "Persons who had openly declared themselves as opposed to Florida participation at the Fair," he said, "have come forward to admit they never dreamed our exhibit would be as fine and have such remarkable pulling power."

At the request of The Herald, Mr. Lehmann will prepare a concise summary of the things which all prospective Fair visitors should see during their stay. This summary will be in an early issue of The Herald.

Newspaper Code Is Not Entirely O. K. With Hugh Johnson

WASHINGTON, Aug. 11.—(A.P.)—Hugh Johnson said today there were "proposals, which are unsatisfactory" in the proposed code of hours and wages submitted by the American Newspaper Publishers Association.

Johnson declined at a press conference to intimate what exact he considered objectionable, but it is said that publishers' representatives are due at his office today to talk over the program.

It has been intimated in sources close to Johnson that he feels there are too many restrictions in the newspaper code and he objects to the failure to specify shorter hours for reporters and copy editors.

He said only those newspapers signing the blanket code are entitled to display the "Blue Eagle" until the special newspaper code is approved by the recovery administration.

Short-Lived Tornado Does Heavy Damage

LEWES, Del., Aug. 11.—(A.P.)—A short-lived tornado swept in from the sea early today, leveled every tent in the Delaware national guard camp near Bothany Beach, unroofed buildings, injured many of the 800 guardsmen, three seriously, and did heavy damage.

Failure To Comply To Mean "Economic Death", Says Chief Of Recovery Drive

WASHINGTON, Aug. 11.—(A.P.)—A flat prediction that a case of revocation of the "Blue Eagle," emblematic of compliance with N. R. A., will arise and that it will mean "economic death" to the offender was made today by Hugh Johnson.

At a press conference Johnson promised that violators of the modified presidential re-employment agreements would be disciplined if it is found they are not complying with the pledge to raise wages and increase employment by shortening working hours.

He added, however, he intended to let the situation rest for a brief period in the hands of local committees.

Questioned concerning the status of intra-state selling and similar businesses, Johnson said while they might not be within the regulatory power of recovery act the "blue eagle" would reach them.

The question of the constitutionality of the National Recovery Act was injected formally yesterday for the first time into the campaign of Hugh S. Johnson to blanket the country with blue eagle insignias.

With every available official of the N. R. A. concentrated on the single objective of bringing (Continued On Page Three)

City Has Right To Try Violators Of Bolita Ordinance

Circuit Court Judge Millard E. Smith this morning upheld the City of Sanford in its contention that it has a right to try violators of the bolita and lottery ticket ordinance in the local Police Court.

The decision immediately affects several cases against negroes who had been arrested some days ago and charged with violation of the lottery ticket ordinance. These negroes are scheduled to be tried before Judge J. A. B. Wilkinson next Monday afternoon.

Attorneys for the negroes had prevented trial earlier this month by having secured a writ of prohibition and a writ of mandamus from Judge Smith on the grounds that the ordinance was unconstitutional.

They argued that the City charter did not give the City Commissioners authority to pass such an ordinance, and that all violators of such an ordinance should be transferred to the Circuit Court and tried there as having committed a felony.

Judge S. A. H. Wilkinson this afternoon stated that the City charter did not give the City Commissioners authority to pass such an ordinance, and that all violators of such an ordinance should be transferred to the Circuit Court and tried there as having committed a felony.

In effect, Ordinance No. 40 states that "in the trial of a case, if the evidence develops that the party being tried is guilty of a felony, the case shall be transferred to the county unless it is in violation of some City ordinance."

Sale Of Scrap Iron Prohibited By China

NANKING, Aug. 11.—(A.P.)—The Chinese national government prohibited today the sale of scrap iron and other metals. Military authorities stated that foreign agents have been purchasing such metals anywhere possible in China and shipping them in Japan for the manufacture of armaments.

HOOPER HAS BIRTHDAY

STANFORD UNIVERSITY, Calif., Aug. 11.—(A.P.)—Former President Herbert Hoover, 50 years old yesterday, left his home on the campus for a three to four day motor trip in the California Sierras, including possible celebrations.

STANFORD UNIVERSITY

STANFORD UNIVERSITY, Calif., Aug. 11.—(A.P.)—Former President Herbert Hoover, 50 years old yesterday, left his home on the campus for a three to four day motor trip in the California Sierras, including possible celebrations.

BEAUTIFYING OF CITY HAS MADE MUCH PROGRESS

Many Palms Set Out As Result Of Garden Club Activity

The extent to which the Sanford Garden Club has gone and will continue to go in a beautification program which is now in process of completion in Sanford is seen in Superintendent of Parks James Moughton's report on the activities of his department for the month of July.

During July, he reports, the Garden Club donated 175 cocco plumosa palms toward the City beautification program. Forty-three of these palms were set out

CUBAN AFFAIRS CONTINUE TO BE CRITICAL

(Continued From Page 1) department as backing the mediation efforts of Ambassador Welles.

It was interpreted further as meaning that mediation rather than military intervention would be followed in seeking to solve the grave island problem.

Officials here declined immediate comment as to whether President Machado's state of war degree meant that he definitely had declined to accept Welles' proposal, or whether he still might agree to it after the strike-paralyzed economic situation had been unraveled.

Shortly after word of the war on Hood Avenue, 35 on Palmetto Avenue, and 32 on Sanford Avenue between Commercial Street and the lakefront. Thirty-five of them were set out on San Juan Avenue between the lakefront boulevard and Union Avenue, and 30 of them were set out on Lee Avenue between First Street and Union Avenue.

The Club also donated 45 Australian oaks which have been set out on Park Avenue between 23rd Street and Geneva Avenue. Three Parkinsonias also were donated and set out in the triangle park at the intersection of Geneva Avenue and Park Avenue, while two Parkinsonias and four red hibiscus plants were set out at the entrance to Dreamwood.

During July the City set out on the lakefront boulevard between Sanford and San Juan Avenues, 72 palmettoes in clusters of three, and nine large palmettoes on the boulevard in front of the Mayfair Hotel.

In order to make room for some of these palmettoes, 14 Washingtonia palms, were removed. Eight of them were reset in the Zoo Park, and six were transferred to vacancies in the first planting of palms on the boulevard.

During August, the beautification work will consist of plantings of sevenias, plumbago and phyllanthus in the Zoo Park; plantings of four large cocco plumosa palms, eight jasmium and the re-arranging of the present sevenias on the Municipal Pier; planting of plumbago, phyllanthus and crotons, as well as three small sized cocco plumosa near the City Hall.

Three large palmettoes will be planted in Central Park, as well as sevenias and other foliage plants around the base of the monument.

Six Australian oaks and six oleanders, and one jasmium will be planted in the parkway of the City owned property on West First Street between Mill Creek and Poplar Avenue.

Concluding his report, Mr. Moughton states that with the exception of the palmettoes, sevenias and jasmium, which were furnished by the City, all of the other plants were donated by the Garden Clubs.

In connection with this beautification program, and on behalf of the Garden Clubs, Mrs. W. E. Watson, club president stated that "As long as our funds hold within safety lines, we will help gladly."

In the small park running through the center of Lily Court, the combined Garden Clubs will set out, in staggered formation, 25 cocco plumosa and one Australian pine as a token of their appreciation of the work done by Mrs. Watson since she became president of the Clubs.

RUBBER, STEEL WORKERS JOIN LABOR UNIONS

Traditional OpenShop Industries Are Feeling Concerted Drive

CLEVELAND, Aug. 16.—(AP)—Two of the nation's basic industries, rubber and steel, which have maintained a traditional open shop policy in years past, are beginning to feel organized labor's spear head attack under the N. R. A. banner.

From Akron, center of the rubber industry, Hull issued the following statement: "I should emphasize again my personal interest in the situation which has developed in Cuba and assure you that I am following, hour by hour, all of the reports as they are received."

"At Ambassador Cintas' request, the President has received him at Hyde Park this afternoon and has, without a doubt, expressed our deep concern at the turn of events in Havana and throughout Cuba."

"The state department is in close touch with Havana and is confident that Ambassador Welles, acting as a friendly and impartial mediator, is doing his utmost in co-operation with all Cuban elements to aid in bringing about a peaceful solution. I need not repeat that I have every confidence in Mr. Welles."

A short while before it was made known on high authority that both the Spanish ambassador and the British minister in Havana had complained to Welles concerning treatment of their nationals and damage to foreign property.

A message received here said three Spanish citizens had been killed in the past three days and that the Spanish ambassador had reported 60 of his fellow citizens in Havana alone had been imprisoned.

The British minister was reported to have complained of property damage, principally in the interior of the island.

S. O. Shihholzer Makes Speech On Recovery Act

(Continued from page 1) eral plan which President Roosevelt promised during his campaign.

"He went into office with certain definite pledges," he said, "and there is no doubt in my mind but that he will carry his program and his pledges out to a finality. He will not allow them to be flouted."

"We must be confident," he continued. "All around us are evidences which indicate that President Roosevelt is genuinely interested in lifting the people to a new standard of living, to a better plane of existence than any in the past. Everything is mapped out ahead, and it will go through."

Mr. Shihholzer stated that "We are not doing the subject justice by looking toward its ultimate conclusion and end on the basis of what has gone before us in American life and business. I predict that we shall have easier money, more business, and infinitely better markets to appeal to when this plan nears its end."

Pointing to a rich harvest which has been reaped this season by Georgia and Carolina peach growers, Mr. Shihholzer said "There we have a reflection of better times already. The peach deal which in the past years has been a miserable failure this year was a decided success. The peaches sold well, farmers were able to pay off their obligations, and today scores of them find themselves with money in their hands for the first time in years. The effects of the 'New Deal' showed up earlier than was expected, and if the same conditions prevail in our favor, we are entirely justified in seeing better celery prices, not so far distant."

Mr. Shihholzer pointed to a definite appropriation of \$3,300,000 which is at the President's disposal for work projects, "a sum which in itself forms a nucleus for a revival of business."

"If people will only put their shoulders to the wheel," he said, "you couldn't stop this program."

ARMADA WILL HOP TO NEW PORT NEAR ROME

ROME, Aug. 16.—(AP)—General Italo Balbo advised the air min-

istry today of his plans whereby the trans-Atlantic seaplane squadron will fly 1300 miles from Lisbon, Portugal, where it arrived yesterday, to Oita, Rome's new port, Saturday without stopping. Plans are being made here for a reception and celebration.

He added he believed the power given the milk board to set different rates in different sections would constitute discrimination in violation of the equal rights clause of the constitution. He also brought out that the law gives the board power to fix prices in a given area after conferring with the producers there, but does not give the consumers, "who foot the bill" a voice in the proceedings.

H. E. Carter and Robert Potts, assistant attorney generals, who argued the case for the milk board, contended the Florida law followed that of New York which has been upheld in the higher courts.

This was answered by Zach H. Douglas, attorney for S. D. McDonald, and his son, S. D. Jr., local dairymen, attacking the law, that an actual emergency existed in New York in the form of strikes and a milk shortage at the time the law there was passed. After a short hearing, Judge Long agreed with Douglas that no such emergency existed in Florida during the recent session of the Legislature. The retail price of milk in the Gainesville area, comprising five miles in each direction from the Alachua county courthouse, was sold by the milk board's order at 13 cents a quart. Immediately after the order of Judge Long, several dairies dropped their price to eight cents.

Price Fixing By Milk Dealers Is Given Setback

Husband Pleased After Wife Lost BULKY FAT

"I've lost exactly 21 lbs. with 3 jars of Kruschen and am so happy to get rid of that bulky fat. My husband is very pleased with me. My skin is clearer and I feel so much better since I'm not so heavy on my feet. Friends say I look much better." Mrs. Norma Spishler, Birmingham, Ala.

To get rid of double chins, bulging hips, ugly rolls of fat on waist and upper arms SAFELY and without discomfort—at the same time build up glorious health and acquire a clear skin, bright eyes, energy and vivaciousness—to look younger and feel it—take a half teaspoonful of Kruschen Salts in a glass of hot water every morning before breakfast.

One jar lasts 4 weeks and costs but a trifle at Touchton's Sanford Drug Co. or any drugstore throughout the world over. Make sure you get Kruschen because it's SAFE. Money back if not satisfied.—Adv

BIBLE VERSE FOR TODAY

ALL ARE INVITED:—Come ye and let us go up to the mountain of the Lord, to the house of the God of Jacob; and he will teach us of his ways, and we will walk in his paths.—Isaiah 2:3.

Yes, an employee, even if he is a third cousin, is an employee!

Some employers seem to be taking the President's Agreement with a grain of code-line.

Visitors to the World's Fair this summer are receiving a wonderful treat. It will never be the same old world again.

Gosh! Suppose this recovery campaign should be a flop! What would that woman do who named her first born offspring Nira?

From Tokyo comes the news that American chewing gum has gained a foothold in Japan. That has frequently been a sad experience in this country.—Springfield Union.

An old-time opera artist says that when she can sing no longer, she will go and croon in the desert. She has the right idea about crooning.—Rochester Democrat and Chronicle.

The Illinois beer commission rules that the pretzel is not essentially a food. Its idea is, probably, that a pretzel is a continuous gastronomic detour.—Philadelphia Inquirer.

By the way, when is Attorney General Cummings going to put some of these buzzards in jail who have been hoarding gold? He made the rest of us even give up what we had in our teeth. Why doesn't he make the others turn over what they have in their socks?

The various political factions in Cuba all joined together in a suggestion to President Machado that he take an extended leave of absence after appointing a new secretary of state. It was like saying to the President, "Here's your hat, what's your hurry?" But the funny thing about it was that Machado turned it down.

The railroads are having a awful time trying to solve their problem. They can't reduce expenses without increasing unemployment, and they can't reduce unemployment without increasing expenses. If the meantime about all they can do is keep on borrowing from the government so that they can continue to operate at a loss.

Prof. Fisher, of Yale, who has been holding economic classes at Hyde Park lately, is the daddy of the managed currency philosophy. He has an idea that by increasing or decreasing the supply of currency in circulation, you can raise or lower prices at will. Such theories work beautifully in class rooms where you can put the students on probation if they don't believe, but they will hardly work out in the wide open spaces where pigs and men are selfish. If the price of hams is attractive, you can't put a hog on probation if he increases the size of her litter in order to capitalize on a good market.

An operator of a one-man shop having no employees complains that no information has been given as to what he is supposed to do. Well, having no employees, the proprietor may pay them as little as he likes and work them as many hours as he wishes. He must also agree not to reduce their weekly compensation, and none of them can be under sixteen years of age. Aside from this, he can do as he pleases in many hours in the week, or a day, or even a week, if it pleases him, and he can sign the President's Agreement if he likes.

The XYZ Of The NRA

The first phase of the NRA's attack on the depression is practically complete and from every indication here available it has succeeded beyond the fondest hope of the administration or its most optimistic supporters. The little Blue Eagle is literally flying from every perch throughout the land and scarcely a store front from Main Street to Fifth Avenue remains undecorated by the emblem of the NRA.

The second phase of the campaign is now about to begin. It will be divided mainly into two parts. One will be to uncover those who are not complying with the President's Agreement or their special codes. The other will be to induce the consuming public to trade only at those places which are complying. This will be the most difficult phase of the entire campaign. This will be the test which will prove whether the NRA will succeed or fail.

The mere pasting of Blue Eagles on store fronts and automobile windshields will not accomplish the purpose for which this drive was instituted. It will not put people back to work or increase the actual purchasing power of the country. Only the most honest and wholehearted compliance with the terms of the Agreement will do that. Men have actually got to be re-employed. Men have actually got to be paid higher wages if the plan is to succeed.

Everyone seems to have a fairly accurate understanding of the basic principles underlying this campaign to revive business. It is simply that if Employee Bill is paid two dollars a week more than he has been getting, he will have more to spend with Employer Jim, and if Employer Jim gets two dollars' worth of additional business, he will have two dollars more to pay to Employee Sam. And if all employers raise wages proportionately at the same time, and all employees spend their increased wages buying the various things they need, business will pick up for everyone and no one will be hurt.

But here is where a rather common element of human nature known as selfishness creeps in. If Employer Jim, even though displaying the emblem, fails to comply with the Agreement and does not actually increase his payroll costs, while all other employers are raising wages and hiring additional men, he not only will benefit from the additional business which will be available but he will still be operating on the old cost basis. He will profit both from increased business and lower costs.

Now the Industrial Recovery Act, under which the President's Agreement was issued, amply provides for just such contingencies. Paragraph (f) of Section 3 declares that when the President has prescribed a code of fair competition any violation is a misdemeanor punishable by a fine of "not more than \$500 for each offense, and each day such violation continues shall be deemed a separate offense". While Paragraph (b) of Section 4 which provides for the licensing of industry and the padlocking of business enterprises which do not conform to the codes, sets a fine of \$500 and a prison sentence of six months for violations.

If, however, violations of the Agreement or codes are numerous and widespread, it will be manifestly impossible for the federal government to enforce such regulations. General Johnson has practically admitted this limitation of governmental powers when he said that the enforcement of the codes would be left largely to the individual industries and public opinion as represented by the local committees, adding, however, that he might pick special cases of flagrant violations and make an example of them.

By and large it will devolve upon the local committees to investigate complaints against employers not conforming with the President's Agreement, and, wherever violations are found, to take definite action against them. It is expected that the local committees will inform the consuming public as to which business houses are doing their part in the drive to relieve unemployment, and that the public will trade only at those stores which are known to deserve their Blue Eagles.

The unknown quantity of this campaign is the uncertainty as to whether the local committees will assume the responsibility of instituting a virtual boycott against a local employer, and whether the consuming public will trade at stores where prices are higher in order to do their part in a movement to raise wages and increase employment when they could go right across the street and buy the same thing for less money simply because the wages there have not been increased.

The Rhumba Down In Cuba

The course of the United States in the affairs of Cuba, which have reached a critical condition, quite conceivably lies in three directions: we can continue through mediation efforts and diplomatic channels to seek conciliation or at least satisfactory adjustments between opposing factions; we can withdraw entirely from the picture until matters either right themselves or become so deplorable that armed intervention is absolutely necessary; or we can intervene now, with the idea, ironically enough, that the "early bird catches the worm."

Since we have already injected ourselves into the troubled scene, it seems the better part of wisdom either to continue along present channels or actually to take control of civil affairs under the terms of the Platt Amendment. To retreat from our present position would be to give the impression of having started something we couldn't finish.

Any consideration of armed intervention should be viewed in the light of the many disadvantages such a course would have and whether or not the good done would be offset by the expense and the damage to our relations with Latin America at a time when the Administration is seeking new trade agreements and attempting to establish better understanding between the two continents.

There is always a certain amount of glamor attached to any display of military force and the picture of several U. S. battleships steaming into Havana harbor, the disembarking of nattily attired marines, and troops of regulars marching up the Prado might be an appealing one to many good citizens.

This perhaps is a pleasant sight so long as one doesn't stop to count the costs. Of course, we would expect but very few lives to be lost, but it would require many scarce dollars to finance such an undertaking and the loss of unseen millions from the diminution of trade with Latin America, a fact which would be inevitable because of the suspicion which the southern countries always view the intentions of the United States, might well amount to a staggering figure.

Whatever course the United States pursues, it is practically a certainty that no permanent peace can come to the Pearl of the Antilles unless and until there is economic stability. This means a market for its sugar, the backbone of Cuba's wealth, and this in turn means lowered tariff barriers by other countries, especially the United States. It is safe to say that no president and no regime will be acceptable to the mass of Cuban people so long as they are hungry.

SANFORD, TWENTY YEARS AGO

J. C. Roberts, of Green Cove Springs, an experienced man in the office of the clerk of the circuit court, has taken a position with E. A. Douglass in the clerk's office of Seminole County. Mr. Roberts will bring his family to Sanford in the near future and become a resident here.

The many friends of Capt. Marks are glad to see his smiling countenance at his office again after a two weeks' absence with an abscess. There is so much real estate moving now that the Captain was obliged to get down to his office before he was entirely recovered but expects Richard to be himself again in a few days.

NEWSPAPER PUBLISHERS' CODE

WASHINGTON, Aug. 11.—After the daily newspaper publishers had submitted their code to the N. R. A. the American Newspaper Publishers' Association, through Howard Davis, president, issued the following statement concerning the code: "A code on behalf of newspaper publishers, in full sympathy with the purposes of the national industrial recovery act, adjusting wages and hours of employment, has been submitted to the N. R. A."

"This code is the result of deliberations consuming more than three weeks by a committee of twenty-five publishers, representing the American Newspaper Publishers' Association, the Southern Newspaper Publishers' Association, the Inland Press Association, the New England Press Association and other organizations of publishers of daily newspapers. It was the unanimous opinion of the full committee that no sound ground for objection could be offered to the code as prepared."

Federal Men Seek Missing Link In Urschel Kidnaping

ST. PAUL, Minn., Aug. 11.—Federal operatives yesterday sought to forge the missing link in the Urschel kidnaping case in the heat of persistent questioning of three men held here. From their explanations of how they came to possess \$1,500 in marked money paid for the release of Charles Urschel, Werner Hamel, head of the Bureau of Investigation here, expects to learn the millionaire Oklahoma oil man's kidnapers.

The story of one, Charles Volk, head of a Minneapolis transfer company, has set agents hunting two strangers. Hamel denied the "strangers" were Verne Miller, South Dakota bank robber suspect, and Harvey Bailey, alias Tom Brennan, escaped convict. Sam Kronick, head of a barber supply and cosmetic business, and William Nelson, unemployed, both of Minneapolis, also are held.

Economist Tells Rail Commission Of Better Times

TALLAHASSEE, Aug. 11.—(AP)—Dr. David Friday, Washington economist, told the state railroad commission yesterday that "We are coming out of the depression." He testified as a business expert in behalf of the Peninsular Telephone Company, which is opposing an application by the City of St. Petersburg for lower telephone rates there.

Dr. Friday said the increasing commodity prices indicated the economic depression as passing. The average increase, he said since March 4 has been 18 per cent, although farm commodities have increased as much as 47 per cent and food prices 24 per cent. "The advancing price of raw materials and commodities," he said, "is the first indication that business is coming out of a slump. This is the natural indication of business revival."

CHEVROLET leads the field by the widest margin in its history. People have come to expect Chevrolet to lead the world in motorcars. But this year Chevrolet has done even more than that. According to the latest available figures, Chevrolet shows the most increase in sales in all the cars of the low-price field combined. When a car looks down by itself, that, there can't be any argument about it. It must be an all-around better buy. And that's exactly what Chevrolet offers you. Fisher bodies, with the new ventilating system and the strongest and quietest body construction of the day—solid steel over a sturdy laminated frame. A valve-in-head six-cylinder, unspooling 100-horsepower engine. Chevrolet is the most efficient engine in the low-price field. This Chevrolet's Syncro-Mesh with Silent Second, the Starliner, Standard Five Wheeling, and Oldsmobile, long, pointed, rounded spring-ride improvements that we have given to Chevrolet. And Chevrolet gives you the low price. Don't guess—buy from the leader. Get a car that has been proved sound and dependable by more owners than any other automobile you can buy. CHEVROLET MOTOR CO., DETROIT, MICH. Agents: L. & S. Fish, 210 N. 1st St., Sanford, Fla. See our Chevrolet dealer for more details.

Personals

H. F. Calhoun left yesterday for Jacksonville to spend the week-end.

Allie Horne has as her guest for several days, Miss Ada Belle Carter, of DeLand.

R. O. Chase will leave tomorrow for Asheville, N. C. to join Mrs. Chase at their summer home.

Mr. and Mrs. R. W. Turner, Miss Marjorie Turner, and H. G. Drake, of Atlanta, spent Thursday at Daytona Beach.

Mrs. Paul Reeves and daughter, of Daytona Beach, are spending today and tomorrow here with Miss Edith Walker, Langley Apartments.

Mrs. D. U. Wilder arrived today from Jacksonville to spend the week-end with her mother, Mrs. John T. Brady, Palm Beach Avenue.

Mrs. S. E. Johnson has arrived from Black Mountain, N. C. to spend some time here with her daughter, Conita Johnson, Central Apartments.

Mr. and Mrs. T. C. Hunter and Mrs. J. M. Westberry left today for Chicago where they will spend three weeks at the Century of Progress.

Friends of Mrs. L. T. Shepherd will regret to learn that she is confined to her home, 818 Park Avenue, because of injuries received in an automobile accident last Saturday.

Bill Preston called from Tampa last night on the S. S. Endicott for Galveston, and Beaumont, Texas and Louisiana and Hull England. He plans to be away about three months.

Mr. and Mrs. P. Bayard Smith, Miss Marjorie Smith, and Lewis Smith have returned from Washington, D. C. and points in Tennessee and Virginia where they spent three weeks.

Mrs. Raymond Butler and three children and Miss Christine Laker, of Miami, left today for Americus, Ga. after spending a few days here with Mr. and Mrs. Volie Williams, Golden Lake.

Miss Zeta Davison is planning to leave Monday for Canoe, Ky. to resume her teaching after spending the summer season here with her uncle and aunt, Mr. and Mrs. J. D. Davison, Twin Lakes.

CARD OF THANKS
We wish to thank our friends for their many kindnesses and floral offerings extended during the recent illness and death of our mother, Mrs. Lacey Thompson.
Mr. and Mrs. E. L. Jones

Miss Elmira Howard To Wed H. J. Bisbee

Attracting the interest of a host of friends here and in other parts of the state is the announcement made today by Mr. and Mrs. R. Adna Howard of the engagement and approaching marriage of their daughter, Miss Elmira Leona Howard, to Hamilton Joseph Bisbee, son of Mrs. Alma Bisbee, of Sarasota. The marriage will take place here in the early fall.

Miss Howard was born in Michigan but has lived here the greater part of her life. She was graduated from Sanford High School and later attended Queens College at Charlotte, N. C. where she received a B. S. degree. She taught mathematics at Seminole High School a few years and later went to Sarasota where she taught in high school. She is a member of the Kappa Delta social sorority. Mr. Bisbee lived in Jacksonville from early childhood but has been in Sarasota for the past six years. He attended the Carolina Military Naval Academy and later studied at the University of Florida. He is connected with the Sarasota Builders Supply Co. of Sarasota.

Masterpiece Ballet In Film At Milane

A ballet entitled "Dance of the Maidens", one of the most spectacular dance sequences ever filmed in Hollywood, will provide a high point of interest in "I Loved You Wednesday", playing tonight at the Milane Theater. Conceived and staged by Sammy Lee, the Fox dance director calls this ballet the masterpiece of his career—and he has put on more than 150 dancing shows for the "Follies", "Vasilis" and many other famous Broadway productions.

Elissa Landi, who shares starring honors in the picture with Warner Baxter, has the role of prima ballerina, and dances the featured role of the ballet. June Ylasek, Fox junior star, also is featured in the ballet number. In addition to Baxter and Miss Landi, Victor Jory, Miriam Jordan and Laura Hopps Crews are featured prominently in the cast of "I Loved You Wednesday."

SOCIETY TO MEET

Mrs. F. M. Marler will be leader of the regular meeting of the Christian Endeavor Society of the First Christian Church to be held Sunday evening at the church and has chosen as her topic, "Poems and Poets." Each member has been requested to bring a copy of his favorite poem and to discuss it.

CORRECTION

Through error it was stated in an advertisement in yesterday's issue that the Depression Club would sponsor a dance tonight at the Lake Mary Chamber of Commerce Building. By way of correction we wish to state that the dance will be a charity ball with music by the Merry Makers.

Canadian Crops Have Suffered Due To Weather

NEW YORK — "Further deterioration in all crops in the prairie provinces has taken place during the last week owing to lack of moisture and hot weather, and poor crops, with subsequent feed shortages, are indicated over a large part of the southern and central areas of the three provinces," says the Bank of Montreal in its current crop report. "Conditions in the northern areas are more favorable," it says. "Damage from grasshoppers continues over large areas of Saskatchewan and Manitoba, while frosts have occurred in Alberta. As indicated in previous reports, the prairie crop of all grains will be considerably below average. In Quebec, weather conditions have been favorable and crops generally have advanced satisfactorily, but rain is now needed in most sections.

"In Ontario," the report continues, "while there have been no general rains for some weeks, and as a result estimated yields are reduced, recent heavy showers in some districts have been beneficial. In the maritime provinces, crops generally are making good progress. In British Columbia, continued warm, bright weather is rapidly ripening crops which generally are of good quality."

The Azarian Class of the First Baptist Church will meet at 8:00 o'clock at the church annex.

Discovery Made Of Fossil Plants New To Natural Science

SYDNEY, New South Wales.—Six species of fossil plants new to natural science have been discovered during laboratory analysis at Sydney University. The find is described as the most important contribution to paleobotanical knowledge of the Sydney region since 1925.

Growing approximately 200,000,000 years ago the plants have been preserved in a fossiliferous form in the rocks of the Narrabeen and Avalon districts on the north side of the harbor. The unutilized they are just plants painted in black on ordinary rock. Some, exceptionally fine specimens, can be lifted off, paper thin.

Aeons ago these plants were washed out of their earth by a rainstorm down into a bed of mud. Century by century they were buried deeper and, with no air to allow decay, with tremendous pressure and the accompanying heat they were carbonized and crushed to the thickness of a stain.

Members of the Students' Geological Society recently unearthed specimens which were handed to Alan Burgess, a lecturer in botany at the university. He has found that though they belong to well-known genera there are six specimens of which no other example has been found by natural scientists in any other part of the world. Their cell formation proves that they are of a genera which grew at some time in America as well as Europe.

When classification is completed duplicate specimens are to be sent to Cambridge University, or to the British Museum, and to Professor Seward, the world authority on the subject.

Code Violators Are Given Warning By General Johnson

(Continued From Page 1)
ing industries under modified re-employment agreements regulating hours and wages by Sept. 1—the date now set tentatively for clamping on pressure—attorneys for hosiery manufacturers challenged the legality of the Recovery Act's labor provisions.

The question was raised by David R. Clark, a Chicago lawyer, while other hearings were proceeding on permanent codes for the bituminous coal, legitimate theater, underwear, and knitting machinery industries.

Speaking for the L. and A. Hosiery and other companies, Clark said the section of the law reserving to labor the right to organize and bargain collectively was contrary to constitutional rights under Supreme Court decisions.

He contended that by agreeing to the code containing that provision the manufacturers would waive their constitutional rights.

The statement itself was challenged sternly by Sidney Hillman, one of Johnson's labor advisers, who labeled the criticism "The most outrageous statement to be made by anyone at any of the hearings."

Among other developments of the day:

PUBLIC UTILITIES CODE READY FOR RECOVERY CHIEF

Agreement Conforms To Minimum Wage And Work Provision

NEW YORK, Aug. 11.—A public utilities code for both the electric and gas industries has been completed and will be forwarded to General Hugh S. Johnson for administration approval. It conforms to the minimum wage and forty-hour week provisions in President Roosevelt's blanket code, and, according to Floyd L. Carlisle, chairman of the special code committee of the Edison Electric Institute, is expected to increase employment in the gas and electric industries throughout the country by 80,000.

Mr. Carlisle, who with Herman Russell, chairman of the special code committee of the American Gas Association, has had the projected utilities code under consideration for some time, described its provisions in general terms in an interview at his office, 15 Broad Street.

There are now, he said, approximately 350,000 workers employed in the utilities of this country. He expressed the belief that the new code, when put into operation, would raise this figure to 400,000.

Mr. Carlisle declined, however, to estimate what the increased wage would be under the code, nor would he make any estimate of the general cost of the code to the industry. Explaining that two codes had been drafted—one for the gas and one for the electric industry—Mr. Carlisle added that the two were virtually identical in their provisions.

"They are based," he said, "upon a forty-hour week for every one, with the exception of highly specialized operators, who will be kept on the present forty-eight-hour schedule until arrangements are made to train additional specialists to relieve them."

Mr. Carlisle explained his reference to "specialized" employees by saying that at the present time, power house and substation operators, especially skilled in the tending of dynamos and similar machinery, were working on a six-day, eight-hour schedule. Before effecting a forty-hour schedule in these cases, he said, additional men would have to be trained for the work.

The code applies both to natural and manufactured gas concerns. Utilities which are not members of the Edison Institute, he continued, will be "permitted to come in under the code" by prorated payment of the cost of administering the code.

Asked if the code would cause an increase or a request for an increase in service rates, Mr. Carlisle replied: "That is a very controversial matter. I have no comment to make. I will only say that it is not in the code."

First Girl To Walk Across Grasshopper Glacier

OAKLAND, CALIF.—Norma Snow, sixteen-year-old daughter of the late Henry A. Snow, African explorer and naturalist, is the first girl or woman to cross the Grasshopper Glacier, bordering Yellowstone Park. Norma walked fifteen miles over this ice to assist her brother in making moving pictures of the glaciers.

Valuable Russian Vases

CHICAGO—These two vases, valued at \$50,000, were once the property of the czar of Russia, and now are destined to return to that country. The Soviet Government has started negotiations to buy them from the Sovereign Hotel here, the present owners.

the oil industry, now being prepared by the Recovery Administration, was understood in informed quarters to be nearing completion.

2. With a specific reservation against "unsatisfactory wage and rate schedules," Johnson approved a modified re-employment agreement for laundry owners.

It provided minimum wages ranging from 20 cents an hour in the North to 27-1-2 cents in the North and supplanted a previous agreement approved and then annulled by Johnson because it fixed a 14 cents an hour minimum for women in the South.

3. Modified wage and hour agreements for the confectionary manufacturing and grain terminal warehouse industries, permitting employing members to obtain the blue eagle, were promulgated.

4. A report from the deputy administrator upon the lumber codes, hearings on which were held several weeks ago, was almost ready for submission to Johnson, who will send it to President Roosevelt if he approves.

5. Formulation of a copy code was under discussion between spokesmen for the industry and administration officials.

6. The administration reiterated in response to a query that all public utilities, except those publicly owned, come within the scope of the NRA.

Pushing the move to get additional temporary agreements into effect, officials said that upon the physical capacity of the NRA depended largely the date upon which consumers could be asked to patronize blue eagle firms.

NEED OF EROSION CONTROL POINTED OUT BY WALLACE

BLACKSBURG, Va.—The need for conserving the nation's chief resource, land, was stressed by the Secretary of Agriculture, Henry A. Wallace, when he emphasized the importance of erosion control. He said the federal government had set aside \$5,000,000 of public works funds for erosion control areas.

"It will be a lasting victory for our civilization when we learn to take steep slopes out of field crops and put them into grass and trees, when the humus supply of soils can be maintained, and when crop rotations that minimize erosion can be practiced," he declared.

He said the administration had adopted a definite policy with drawing submarginal land from production at the same rate at which land is brought into use by reclamation.

The "land use" round table among other things recommended the policy of zoning rural areas along somewhat similar lines as urban areas have been established for specified purposes.

Orderly development of a region so that its inhabitants may have economic well-being and at the same time have time for leisurely pursuits is the vision of the Tennessee Valley Authority, Dr. Arthur E. Morgan, its chairman, said.

It is the belief of those in

Secretary Says Five Millions Have Been Set Aside For Work

Orderly development of a region so that its inhabitants may have economic well-being and at the same time have time for leisurely pursuits is the vision of the Tennessee Valley Authority, Dr. Arthur E. Morgan, its chairman, said.

It is the belief of those in

charge of the project that order and harmony and design in the region may raise the general level of welfare. Growth by plan rather than by accident is guiding vision. A country to develop the greatest happiness for its people must be managed and not subjected to pollution as has laid waste certain sections of Portugal and Greece, it was said.

The valley authority is to operate the power resources in the Tennessee Valley in order to provide a fair yardstick for comparison of public ownership and operation of power plants with that of private ownership.

To make it a fair demonstration, a fair accounting system charging taxes and depreciation of personnel are to be made on merit system rather than through political preference.

With a year Dr. Morgan predicted, the authority will be developing itself. Research being conducted on cheaper methods of making potash and phosphates. There is at present a surplus of nitrates so that it is hardly possible that the government-owned plant can make a price cheaper than private plant are making them now, but it is possible that cheaper methods of making phosphates and potash will be developed.

Among other things the authority is interested in is the proportion of industry in the Tennessee Valley with agriculture with correcting erosion which laying waste to certain sections, conserving natural resources such as forests and minerals. The development of small industry in communities, and assisting through providing co-operative accounting means and market methods and the training of community mechanics.
