Most Refugees Deserve Welcome

Rioting by Cuban refugees at Fort Chaffee, Ark., we dare say, left most Americans shocked and angered. After all, arson, assaults on police and general lawlessness are strange ways to demonstrate gratitude for the sanctuary and opportunity this country has extended to more than 100,000 Cuban refugees during the last 60 days.

Congressional reaction was swift, predictable and appropriate. Senate Majority Leader Robert Byrd and House Whip Jim Wright called for the prompt deportation of those refugees identified as rioters. Significantly, Florida Sen. Richard Stone, whose constituency includes the largest concentration of Cuban Americans in the United States, joined in and also demanded the expulsion of those refugees identified as common criminals.

While we certainly share these sentiments, we also hope that the disgraceful conduct of a few hundred troublemakers does not sour the welcome extended to the overwhelming majority of Cuban refugees.

Federal official screening of the first 47,000 Cubans showed only 681 to have records as common criminals. These few will not be considered for resettlement, although the administration has yet to decide how and when they should be deported. Most of the remaining refugees are relatives of Cuban-Americans who have long since proved themselves exemplary citizens of the United States.

The events at Fort Chaffee have prompted the Carter administration to begin an investigation aimed at identifying the riot's causes and culprits. Delays in the resettlement process together with simple boredom may have been enough to incite Cubans already conditioned by life under Fidel Castro to a violent hatred of bureaucracy and authority. But we think the investigation should also explore the possibility of deliberate agitation by selected "refugees" who are, in fact, agents assigned by Cuban intelligence to embarrass the United States while discrediting those Cubans who have rejected communism. Nothing could have served both ends with more telling effect than the riot at Fort Chaffee.

Deepening Crisis

The situation in the Holy Land is deteriorating rapidly. One act of terrorism follows another. The violence escalates. Attitudes harden into hate. Blood flows. New martyrs are created. And the peacemakers on both sides are pushed aside by the extremists.

That is the picture, and it is hard to overemphasize the threat that it poses to the vital interests of the United States. This country and its people are committed to defending the territorial integrity of Israel as it existed before the 1967 war. But our government has never recognized Israel's claim to the Arab lands it occupied after the war. And the issue of the occupied lands threatens us with another Arab oil boycott and other Middle East war.

In Tel Aviv, Ha'olam Haze, an Israeli weekly, has a close-up view of the situation in the occupied lands:

"On the one hand, imposition of curfew, collective punishments, demolition of houses, mass arrests with torture, banishment of persons, establishment of settlements, firing at demonstrators — the whole well-known list of a collapsing colonial regime, along with a few original Israeli inventions.

"Blood, hate, death. All for nothing."

BERRY'S WORLD

WASHINGTON — Attorney General Benjamin Civiletti is a man who has a lot to say about the Justice Department that is rumbling like Mount St. Helens in the pre-emption state. I have charged that Justice, far from blind, has been winking at powerful politicians who run amok of the law. I have cited case after case of selective prosecutions and aborted investigations. Now the Senate Judiciary Committee is investigating more than 20 politically sensitive cases, which appear to have been mislaid.

Even the celebrated Abcam investigation has come under fire. This is the FBI's elaborate investigation, which, since it started eight months of Congress and several other public officials in a phony Arab attempt to buy influence with cash on the barrelhead.

A month ago, I suggested that the Justice Department seemed more eager to pursue President Carter's opponents than his supporters. I reported that two of the Abcam agents, Sen. Harrison Williams, D-N.J., and Rep. Frank Thompson, D-N.Y., planned to support Sen. Ted Kennedy for the Democratic presidential nomination.

But in the case of Newark's Mayor Kenneth

Around

Divisions Deepen In Israel

By DON GRAFF

One of the most disturbing aspects of the "cycle of violence and counter-violence" phrase courtesy of the U.S. State Department — tormenting occupied and occupiers alike in the Palestine West Bank is its familiarity.

The succession of incidents — the bombings, shootings, deportations, rock-throwing assaults, strikes — that are turning the situation from ugly to ominous spring from the specific circumstances of today's Arab-Israeli impasse.

But you don't have to look back through too many yesterdays to find similar incident-breeding confrontations. To cite just two, the World War II German occupation of Europe and the last days of the British Mandate in Palestine.

As episodes in recent history, both are anathema to today's Israelis and no comparisons are intended other than the insight provided into the dynamics of a basic situation in which the authority of an occupying force is challenged by hostile populations. But both tell much of what may be expected from this situation.

The instinctive response of the occupier to the challenge is repressive force. That the Germans applied with determination and unprincipled ruthlessness, but to no avail, was an understatement of a dozen countries only grew stronger and their activities were a factor, although far from decisive, in the eventual German collapse.

In the game of nations, occupation is a stratagem in which the occupier often turns out to be the loser. As the West Bank story may be proving again.

The Arab response to Israeli repression is a hardening of attitudes. The moderate element of the Palestinian population, those who might buy a modicum of autonomy short of full independence, may be a vanishing species.

Israeli attitudes are likewise changing, deepening internal divisions and lessening prospects for the development of the national consensus necessary for any eventual accommodation with the Arabs.

For Israeli authorities, the situation has become a delicate balancing act. Not only have they been unable to contain Arab defiance, Israelis are breaking ranks. The extremists are turning to vigilantism and the would-be peacekeepers are now finding themselves repeating the unenviable battle role — the men in the middle of two warring irregular forces.

Before it comes to that, however, politics could change the situation drastically. That, according to some current reports, is precisely the expectation of some intensely interested observers, most notably the Saudi Arabian.

JACK ANDERSON

Justice Department Winks At Crooks

WASHINGTON — Attorney General Benjamin Civiletti is a man who has a lot to say about the Justice Department that is rumbling like Mount St. Helens in the pre-emption state. I have charged that Justice, far from blind, has been winking at powerful politicians who run amok of the law. I have cited case after case of selective prosecutions and aborted investigations. Now the Senate Judiciary Committee is investigating more than 20 politically sensitive cases, which appear to have been mislaid.

Even the celebrated Abcam investigation has come under fire. This is the FBI's elaborate investigation, which, since it started eight months of Congress and several other public officials in a phony Arab attempt to buy influence with cash on the barrelhead.

A month ago, I suggested that the Justice Department seemed more eager to pursue President Carter's opponents than his supporters. I reported that two of the Abcam agents, Sen. Harrison Williams, D-N.J., and Rep. Frank Thompson, D-N.Y., planned to support Sen. Ted Kennedy for the Democratic presidential nomination.

But in the case of Newark's Mayor Kenneth

The fight to attract customers by businessmen has always been a tough one. Sales, signs and advertisements are all used to lure prospective buyers into a store. Unfortunately, one of the techniques being used by a handful of merchants along some of our major roadways is dangerous.

Drivers on U.S. Highway 92 and State Road 438 and other roads often find themselves staring directly into rows of pulsating 150-watt spotlights.

While these items are certainly eye-catching, they are so attractive they make driving more hazardous, especially at night.

A study for a sign law enacted by the Brookhaven, N.Y. town council led that body to ban all but small lights designed to reflect off signs.

Any lights aimed at passersby were declared illegal because of the definite accident risk safety experts said they posed.

Without similar checks in Seminole and Orange counties, the sign owners have been caught in a cycle of escalation which has ended with brightly colored flashing lights directed straight into drivers' faces.

A tired driver has enough problems focusing on traffic — signals and head and tail lights. Motorists now have to worry about flashing red and white lights which might be emergency vehicles but turn out to be advertisements or bright spots of green, yellow or red which from a distance are easily confused with traffic lights.

In localities where the research has been done, signs have been shown to be the major or contributing cause of accidents along densely traveled main roads.

If accidents can be prevented, the county ought to take steps to do so.

Payments for long-overdue parking tickets continued to pour into the Sanford police station last week as the \$100 deadline grew closer.

An overdue ticket turned in now will cost you \$4. In only a few days, each overdue citation will reach up to \$104 and a trip to court.

After years of letting 60 percent of all parking ticket recipients simply refuse to pay their fines, the Sanford police have decided to turn in all unpaid citations, dating back to 1975, to the state attorney's office for action.

Motorists who fail to pay their fines will be brought to court, where they can be fined up to \$100 plus costs on top of the original \$4 for each ticket.

Prostrate Infection Common For Males

DEAR DR. LAMB—About a year ago I got pretty sick and the doctor said I had a prostrate infection. He gave me a round of antibiotics. Then about two months ago I got the same infection again while I was on vacation. I went to the doctor there and he gave me some more antibiotics. Three weeks ago I got out of bed to go to the bathroom and was passing pure red blood. I went straight to the doctor and he said it was the same infection I had on vacation; it just hadn't healed up completely.

Now I'm having problems. When I go to the bathroom to urinate, I do a little and then wait a few minutes and do a little more and this goes on until the bladder is empty. I know nothing about prostrate trouble and would like to know everything about it. What causes it and what could I do to prevent an attack? Also my wife thinks sex may be harmful to her and that it could aggravate my trouble. Please help if you can.

DEAR READER—Almost every man will have some form of prostrate trouble at some time in his life if he lives long enough. There are several different types of prostrate disorders. One is an acute infection, which is apt to occur in young men as well as older men; it's like an inflammation or infection anywhere else. Bacteria lodge in the prostrate and cause the prostrate to become painful and tender from the inflammation.

Gardening

Chinch Bugs Are State's Most Serious Lawn Pest

Chinch bugs rank as our state's most serious lawn pest, because Saint Augustine grass is so extensive. Other lawns are seldom bothered by chinch bugs.

Chinch bugs are found, start control measures immediately. Several chemicals are effective against chinch bugs. Some are available as sprays, while others are applied as dry granular forms.

Dear Abby

DEAR ABBY: I suppose you've had dozens of letters like this, but here goes. My wife of 18 years came to me about a month ago and said, 'I've been in love with another man for a year and I want to be with him as much as I can, so I'm leaving you.'

Swim Party Honors Fifth Grade Grads

The fifth grade graduating class of Wilson Elementary School was honored at a swim party at the Banana Lake home of Mr. and Mrs. Wendell L. (Janis) Springfield.

The party was planned and sponsored by the room mothers of the fifth grade class, who also attended.

Most of the students graduating have been attending school together since kindergarten and will now go their separate ways to different middle schools.

Students attending, along with Mrs. Carolyn Durak, teacher were: Wes Springfield, Nancy Bumgarner, Susan Fluke, John Andrews, Keith Redwine, Matthew Allen, Candi Carroll, Kent Kidwell, Lynn Prescott, Susan Harwood, Opal Pearson, Tracy Sharp, Susan Beckett and Valerie Barnes.

Also Alan Fenley, Larry Proctor, Cindy Stephens, Kathy Bachmaster, Amy Allen, Stephanie Walsh, Jennifer Roberts, Rufaro Matipano, Trine Adridge, Nancy McQuatters, Cindy McWaters, Sharon Clinton, Bill Hallam, and Darleen Courtman.

Rev. Robert Burns and daughter Bethany, have just returned to their home in Devonshire, after a brief trip to Montgomery, Ala., where John had business, but with Marsha and Bethany along, it became a pleasure trip for them all.

DEAR ABBY: I suppose you've had dozens of letters like this, but here goes. My wife of 18 years came to me about a month ago and said, 'I've been in love with another man for a year and I want to be with him as much as I can, so I'm leaving you.'

Miss Greene, D.M. Howell Repeat Vows

Shirley Diane Greene and David Michael Howell were married May 24, at 2 p.m., at the Central Baptist Church, Sanford. The Rev. Freddie Smith performed the candlelight and double ring ceremony.

The bride is the daughter of Mr. and Mrs. Alfred F. Greene Sr., 3001 Jewett Lane, Sanford. The bridegroom is the son of Mr. and Mrs. John S. Howell, 211 W. 2nd St., Clarkdale, Miss.

The bridegroom's father served as best man. Ushers were Dennis Selby of Clarkdale, and Lewis Howell of Clearwater. Groomsmen were Alfred Greene Jr., brother of the bride, and Shelby Howell, brother of the bridegroom.

The reception was held at the church fellowship hall. Her lace trimmed veil of illusion was secured to a headpiece of lace and seed pearls. She carried a nosegay of roses, white carnations, stephanotis and freesias.

The bridegroom's father served as best man. Ushers were Dennis Selby of Clarkdale, and Lewis Howell of Clearwater. Groomsmen were Alfred Greene Jr., brother of the bride, and Shelby Howell, brother of the bridegroom.

Publicity Procedures

The Herald welcomes organization and personal news. The following suggestions are recommended to expedite publication.

1. Releases should be typed (lower and upper case), double spaced, and written narrative style (third person). 2. Do not abbreviate.

3. A contact person's name and phone number is necessary. 4. Keep releases simple.

5. Organization releases (the program should lead the news item) must be submitted no later than two days after the event. 6. Advance notices should be submitted one week prior to publication date.

7. Photographic coverage requests should be made one week in advance.

Swimming is a pastime enjoyed by millions of Americans but it can be deadly unless precautions are maintained.

Plunge Into Pool Safely

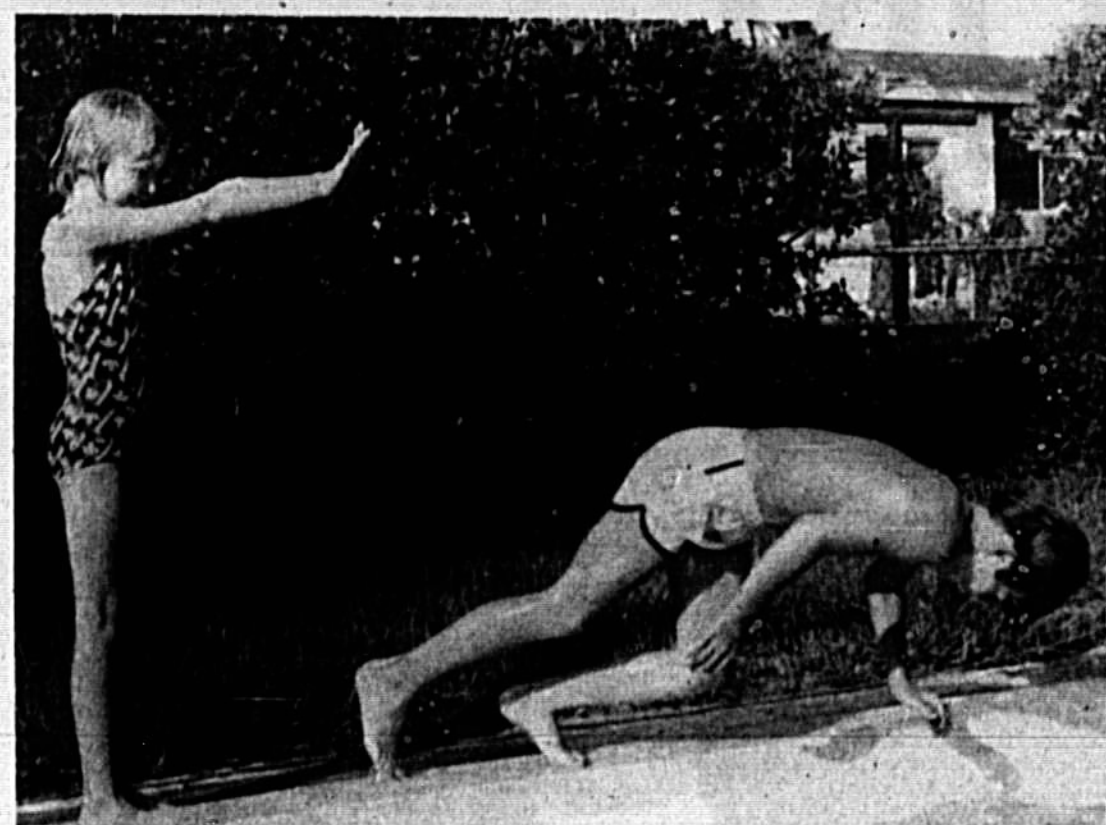

Memorial Day traditionally marks the opening of public swimming pools across the country, but with Florida's warm climate swimming is almost a year-round activity. With schools being closed for the summer, thousands of youngsters will be diving into anything that can hold water.

The National Spa and Pool Institute (NSPI) urges swimmers and splashers to plunge with caution wherever they pursue this popular pastime — at the beach, pool or lake. "It's been said that the safest thing to have around water is a child who can swim," said NSPI chairman Ken Nelson. "We urge anyone

with access to a swimming pool to take advantage of swim classes and 'waterproofing' training available through their local Red Cross, YW and YMCAs, youth clubs, Scout groups and community pools." Jacki Caolo, a Sanford swimming instructor who estimates she has

Continued on Page 2

Everyone Should Know How To Swim

Continued from Cover
taught more than 20,000 children to swim in her 20-year career, agrees with the importance of everyone, and especially children, knowing how to swim. "As early as possible they should be allowed to learn to swim," she said. "The sooner the better."

Mrs. Caolo and the NSPI suggest that families and guests learn and observe these tips for safe, pleasurable swimming:

Never swim, or let anyone else swim, alone.

Never let children play in the pool without constant supervision. Never let children play around or near the pool unless they are swimming.

Have basic lifesaving equipment available at all times, as well as a list of emergency numbers.

Do not permit roughhousing or horseplay in or around the pool.

Do not swim when you have just eaten or are overly tired.

Stay out of water during electrical storms or when electrical disturbances are in the area.

All outdoor pools should be protected by a fence which cannot be opened or climbed by toddlers.

Keep pool decks and diving boards clean and clear of debris.

Exercise caution in using diving boards and slides. Do not jump or dive in water less than 5 feet deep.

For a free brochure containing complete information on safety in and around a pool, write to "Pool Safety," National Spa and Pool Institute, 2000 K Street, Washington, D.C. 20006.

Never let children play in or around the pool without constant supervision.

Hypnosis Flunks Test

By the Editors of Psychology Today
Can hypnosis improve academic performance? Some studies have suggested that it can, but often they have been done without control groups or statistical checks. In a more recent test, done with careful controls, the technique flunked.

Randy Cole, a Houston psychologist who uses hypnosis in his own counseling practice, set up the experiment with 93 students who were taking a study-skills course at West Texas State College. The technique was a kind of hypnosis that might be efficiently administered to large numbers of students — by tape recording.

The 31 students who were assigned at random to an experimental group first donned earphones and, on two separate days, got used to being hypnotized by hearing a 40-minute tape.

On it, Cole read from a widely used set of standard hypnotic instructions. "Relax your muscles," was one suggestion; "let your eyeballs get heavy" was another. After many such promptings, Cole used a standard check on whether the students had actually been hypnotized: He asked them how many of the suggestions they had been able to follow. All of them said they had been able to follow at least some, and many said they followed them all.

Then came the test of hypnotizing. Eight times during the next four weeks, the students heard tapes with brief suggestions to induce hypnosis. Immediately afterward, they heard 10 minutes of suggestions tied to the subject matter of the course. One, for example, advised: "You will find it surprisingly simple to pick out important words and phrases rather than having to read every word."

When the course was over, the students in the hypnosis group had improved considerably in all their study skills. But so had students in two control groups who either received the recorded study suggestions without the hypnotic cues or simply attended regular class sessions.

The experiment does not utterly rule out effects from learning under hypnosis. Cole says; the curriculum may have been so effective by itself that any gains from hypnosis were lost in the

overall high level of improvement. Also, he says, mass hypnosis by tapes is not as effective as individual trance induction, which may still turn out to help students who can afford it.

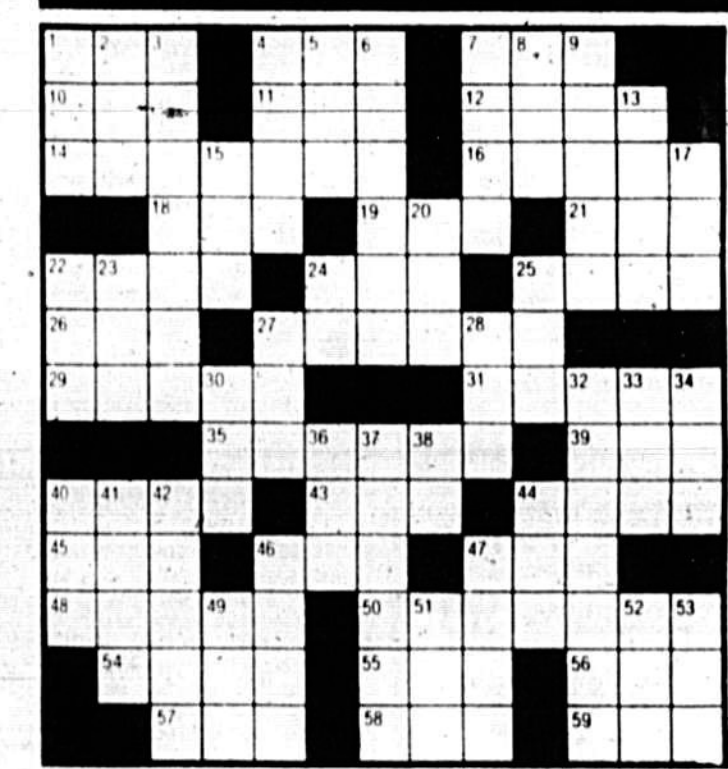

Trying to increase workers' motivation, industrial psychologists and management suggested a number of new management techniques over the last few decades. The newer techniques have involved setting specific production goals, letting workers participate in setting goals or in other workplace decisions, and "job enrichment" — increasing the variety, autonomy, responsibility or scope of a job. The studies of

how they worked out were carefully compared by Edwin Locke and several colleagues in industrial psychology at the University of Maryland.

Various monetary incentives, they found, led to a median increase in productivity. Job enrichment yielded 8 to 16 percent increases. Worker participation in making decisions was least effective of all — it produced a median increase of less than 1 percent.

The researchers speculate that the recent growth of supposedly scientific knowledge about human behavior may have made industrial psychologists lose sight of something as basic as money.

Opera Singer Makes His TV Dramatic Debut

From Verdi to Somerset Maugham, that's the story of Fred Morsell. Morsell has been an actor, opera singer and teacher, but television viewers will soon see him play a key role in the Liberty Mutual Special, "Wilson's Reward," based on a story by Somerset Maugham. Sandy Dennis and Gerald O'Loughlin also star in the comedy-drama, to be telecast over 100 stations during the week of June 21.

It all came about because Morsell auditioned for Patrick O'Neil, director of "Wilson's Reward," and casually mentioned that he was not only an actor, but an opera singer as well. "I knew he was right for the part of the governor of the island as soon as I heard his deep resonant voice," said O'Neil. "But the idea of singing opera kept popping up every time I thought of Fred."

In the play, the governor is supposed to have a close relationship with Ginger Wilson, a cultured, complex man who drinks too much and often lands in jail. Morsell brought an aria from "Rigoletto," and the moment O'Neil heard him sing, he knew where the opera music would fit into the program.

"I decided that the two men, the governor and the town drunk would both be opera fans. They would listen to records together. It was the link that bound them together. And it worked."

The opera intrusion didn't stop there. O'Neil decided to use an aria or two as background music for the drama. "It gave a lightness and it played against the

New Eye Surgery Performed Here

Central Florida eye surgeon Dr. Albert C. Neumann recently began performing a revolutionary new cornea operation that corrects nearsightedness, a condition affecting 65 million Americans. One of only four physicians in the U.S. utilizing the technique developed by a Soviet doctor, Neumann claims the procedure is safe, effective and relatively simple. Florida patients who have undergone the procedure call it "brilliant" and believe it will allow them to throw away their glasses and contact lenses forever. Herald staff writer Diane Petryk visited Dr. Neumann's office in Deland and talked with some of his patients. Her two-part report begins today.

By DIANE PETRYK
 Herald Staff Writer

"It's like being released from a ball and chain, like throwing away crutches. It's fantastic," said Steve Thomaston, who in March was one of the first three Central Floridians to undergo a revolutionary new eye operation that is now eliminating for many the need to wear eye glasses.

The operation corrects myopia, commonly known as nearsightedness because a person can see near objects clearly but distant ones are blurred. Myopia is genetically determined and usually shows up between the ages of 8 and 12.

The surgical procedure to correct myopia was developed by a doctor in the Soviet Union five and a half years ago and is being performed in Central Florida by DeLand ophthalmologist Dr. Albert C. Neumann. Fifty persons in Florida have undergone the operation.

Thomaston's surgery was performed by Neumann with Dr. Svyatoflav Fyodorov of Moscow observing and directing. Fyodorov has done over 2,000 such operations.

As a Volusia County Sheriff's deputy, one of Thomaston's greatest on-the-job concerns was that he might lose his glasses. Unable to see more than blurred images without them, Thomaston feared that losing or breaking his glasses while trying to apprehend a criminal could endanger other's lives.

"That's why he was a particularly good candidate for radial keratotomy, the surgical procedure that corrects nearsightedness by flattening the curvature of the cornea.

On March 10, the surgery was performed on one of Thomaston's eyes. The next day, he reports, he could see out of that eye without glasses. Six weeks later, his other eye was operated on. This week

he reported that his 20-400 vision has become 20-20 in one eye and 20-50 in the other.

"At 20-400 I could just make out the big 'E' on the eye chart," he said. "20-20 is legally blind and 20-40 is two times as bad, you've never worn glasses, you can't synthesize with it.

"But when you've had to wear glasses since childhood to see, the feeling that comes when you know you can throw them away is indescribable."

Following Thomaston's lead, Seminole County Deputy Sheriff Carl Rossman decided to have the surgery. So far he has had only one eye operated on. The second surgery is scheduled for July 31. The six weeks between operations is to allow the first eye to completely recover.

Rossman said in less than a day he could see much better.

"There's a little fuzziness while it's healing, but by the 3rd week there's total clarity," he said.

Rossman said that, like Thomaston, he felt losing glasses or contact lenses on the job would be hazardous.

"But the biggest thing was, I wanted good eyesight. I wore contacts for 10 years with constant eye irritations."

He said the operation has provided "amazing freedom" although he is still wearing a contact lens in the unoperated-on eye.

He added that he was not concerned because the operation is new.

"Every major medical breakthrough has had its critics. People didn't like the polio vaccine," he said. "But every new technique has got to start somewhere. It's not a miracle thing. It's a scientific procedure. Everything is calculated and they can't guarantee 20-20 vision everytime."

But Rossman's left eye looks like it will have 20-20 vision, Neumann said.

He said it is difficult to predict how much visual improvement will be attained in each case, but so far results have been excellent.

Fyodorov has reported that he has never had a case that did not show improvement and he has never had a case with any serious complications.

Thomaston reported "excruciating" pain from the surgery, which is done under local anesthesia. But the two women who underwent the procedure at the same time did not complain of any pain.

"Women tolerate discomfort better than men," Neumann said.

But then Rossman said it wasn't any worse than going to the dentist.

Neumann explained.

"The first three operations were done with Fyodorov present. The Soviets typically use weaker anesthesia — the Russians are a much more stoic people — and it would have been disrespectful to the master, so to speak, for me to have changed his method.

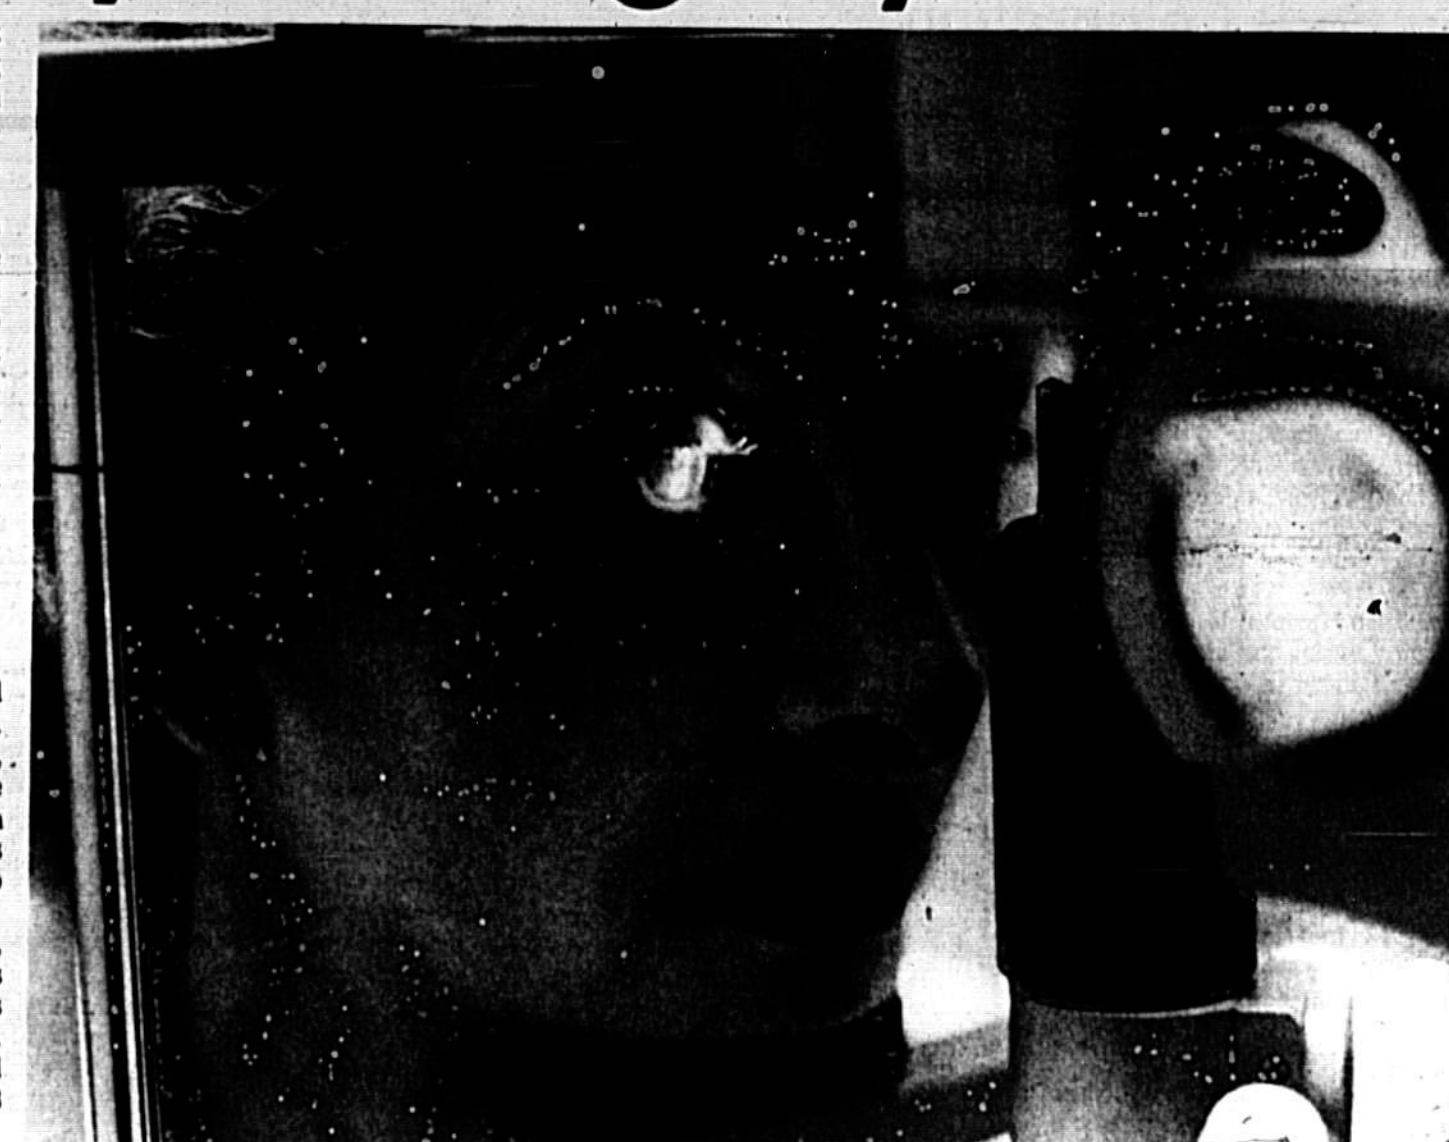

One third of the U.S. population is nearsighted, although Neumann stressed that not all are candidates for surgery. Before a radial keratotomy is performed, the patient is evaluated to determine if physically and psychologically they are a good candidate for the procedure.

Neumann said some people have conditions that are too minor for surgery. Others are satisfied with glasses or contact lenses. But, for some, he said, it is wonderful to have the third alternative.

It is particularly suited to those in professions in which it is difficult to wear glasses, such as policemen, firemen, pilots, photographers and those involved in sports.

The surgery costs about \$1,000 per eye plus the cost of post-surgical care. Neumann said results of a nationwide study will be published in a major ophthalmological journal this summer. And Neumann estimates that 200 ophthalmologists in the U.S. will be trained in the procedure this year. Currently, Neumann is one of only four in the U.S. using the technique.

MONDAY: How radial keratotomy is performed and how it works.

Deltona resident Fleurette Roy, who has had radial keratotomy on both eyes, has her right eye examined by DeLand eye surgeon Dr. Albert Neumann. "I went from not being able to see five fingers on a hand held up in front of my face, to 20-20 vision in both eyes. I told Dr. Neumann, it's a miracle," she said.

But six weeks later I gave the next group anesthesia American style and they experienced no pain at all."

Despite differences on anesthesia, Neumann called Fyodorov "a brilliant man" and said the Ukrainian doctor was a pioneer in the field of interocular lens implantation.

"He had strong credentials. So when we met a year ago in Los Angeles and he invited me to Moscow to show me the technique, I went there and saw it for myself."

Neumann said he found out that Fyodorov had saved the Soviet Union tremendous amounts of money by correcting the vision of their pilots.

"The Soviets spend thousands on their training," Neumann said. "If one of them is washed out due to poor eyesight, they lose Fyodorov's operation meant many could be kept on duty."

In Central Florida, Neumann has operated on a U.S. Air Force lieutenant who wants to be one of the first female aviators in the Air Force.

"By August she will have 20-20 vision," Neumann said. "I operated on her last Saturday morning. I think she's going to make it."

Rossman said the radial keratotomy procedure will open up new opportunities for people who were previously limited by their need for glasses or contact lenses.

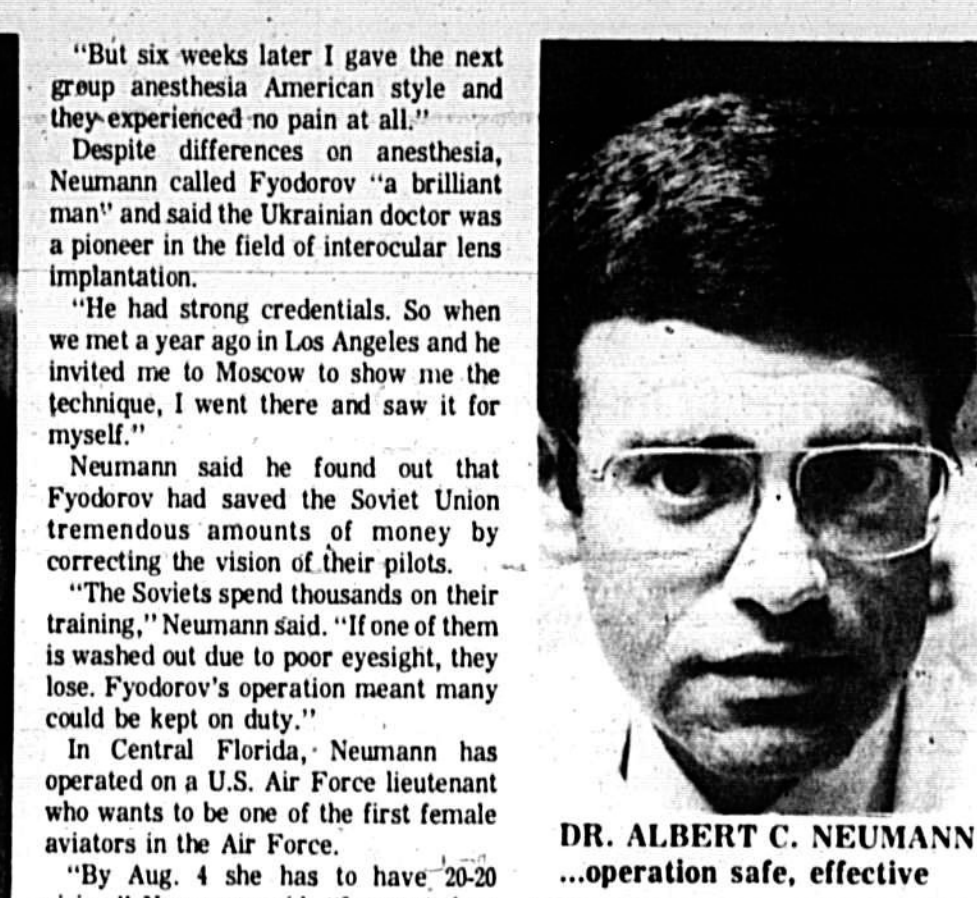

One third of the U.S. population is nearsighted, although Neumann stressed that not all are candidates for surgery. Before a radial keratotomy is performed, the patient is evaluated to determine if physically and psychologically they are a good candidate for the procedure.

Neumann said some people have conditions that are too minor for surgery. Others are satisfied with glasses or contact lenses. But, for some, he said, it is wonderful to have the third alternative.

DR. ALBERT C. NEUMANN...operation safe, effective

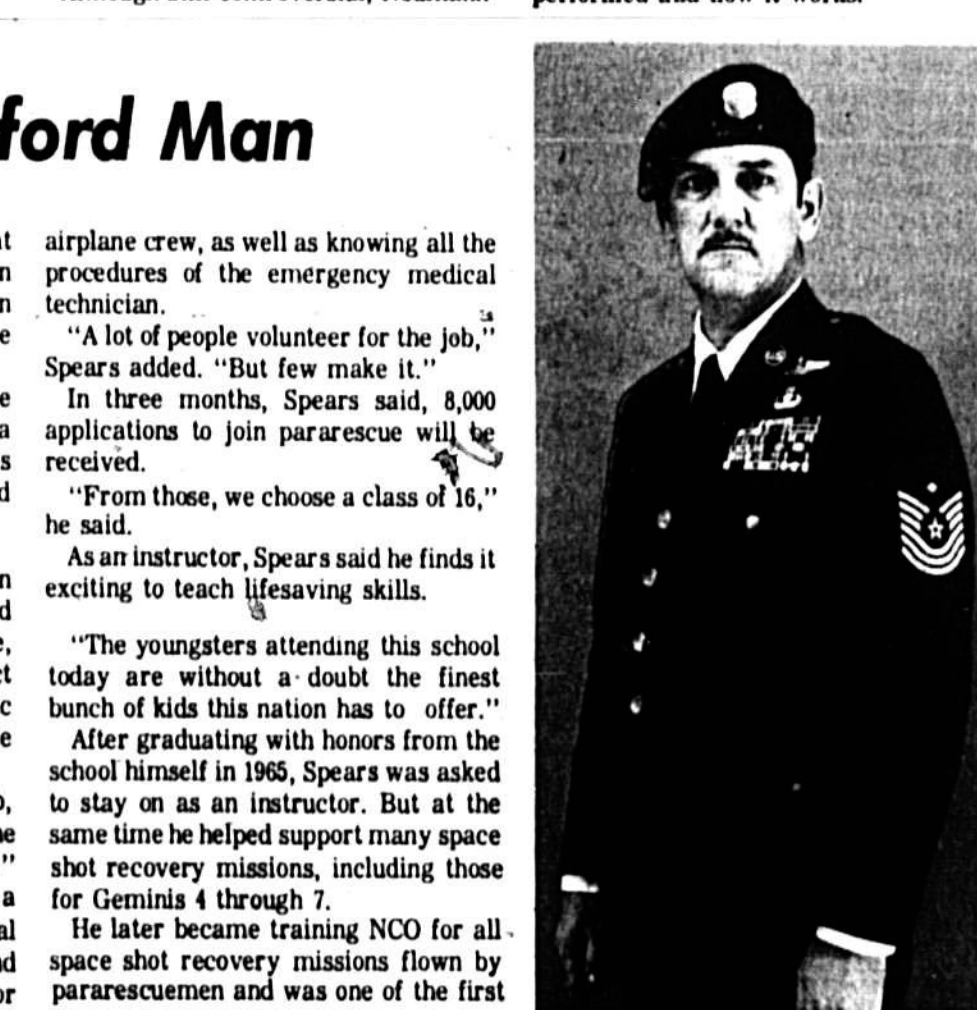

DEPUTY CARL ROSSMAN...amazing freedom

He believes radial keratotomy will soon gain widespread acceptance.

Neumann said results of a nationwide study will be published in a major ophthalmological journal this summer. And Neumann estimates that 200 ophthalmologists in the U.S. will be trained in the procedure this year. Currently, Neumann is one of only four in the U.S. using the technique.

MONDAY: How radial keratotomy is performed and how it works.

JAMES F. SPEARS...most demanding job

airplane crew, as well as knowing all the procedures of the emergency medical techniques used in the Air Force.

"A lot of people volunteer for the job," Spears added. "But few make it."

In three months, Spears said, 8,000 applications to join pararescue will be received.

"From those, we choose a class of 16," he said.

As an instructor, Spears said he finds it exciting to teach lifesaving skills.

"The youngsters attending this school today are without a doubt the finest bunch of kids this nation has to offer."

After graduating with honors from the school himself in 1965, Spears was asked to stay on as an instructor. But at the same time he helped support many space shot recovery missions, including those for Gemini 3 through 7.

He later became training NCO for all space shot recovery missions flown by pararescuemen and was one of the first three qualified for Apollo recovery missions.

In 1969, Spears flew support flood relief actions in Costa Rica with the 60th Special Operations Squadron. He flew hundreds of emergency medical evacuation missions and received credit for hundreds of saves. As a result he was promoted to master sergeant and awarded the Meritorious Service Medal.

Spears' promotion to master sergeant means, he said, that he will be eligible to serve 28 years in the Air Force. If he is promoted to chief master sergeant, as he said he feels he will be, he will be eligible to serve 30 years. This can be extended to 33 by an act of Congress.

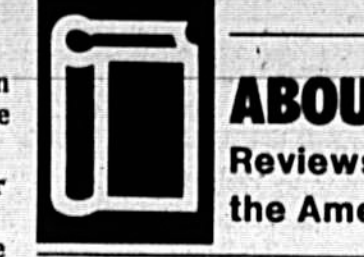

Spears said he wants to continue his work "forever."

"Where else could I come to work in the morning and wind up on the side of a mountain pulling off a mountain climber that had taken a fall — a climber who is a

Women And Law: Knowledge Is Power

By LIZ MITCHELL,
 American Library Assn.
 — How can a woman retain her maiden name after marriage?
 — Is a wife responsible for her husband's debts?
 — Can a woman file for the continuation of alimony payments after her ex-husband dies?
 — Can a creditor ask a woman about her child-bearing ability and intentions?
 These questions show there is a great deal of a woman needs to know about the law. "Knowledge is power," says Martha Pomroy, lawyer and former

TV newscaster. From that premise, she has written a book that teaches us "a little law."

"What Every Woman Needs to Know About the Law" (Doubleday, 416 pages, \$14.95), focuses particularly on issues that concern women, but it should prove helpful to laymen as well.

Pomroy's discussions concentrate on the areas

of a well-arranged, helpful reference work. It gives easy access to "viable information both through an extensive index and logical arrangement of chapters and sections.

You'll want to have it on hand when contemplating such decisions as marriage, divorce, buying a house, making investments or planning your estate. If you're faced with specific precedents or statutes. For example, you'll find no reference in the index to "prenuptial contracts," "prenuptial agreements," "marriages: prenuptial contracts," "agreements, prenuptial," or "contracts, prenuptial."

However, in the chapter on divorce, under the rule "The agreement may not induce divorce," there is information about prenuptial agreements in a discussion of separation agreements: "Agreements made prior to marriage seeking to control property rights in the event of divorce are never honored, since these openly promote divorce."

There is also much information here you will want to be acquainted with before you need it. For example, in "Until Death Do You Part," Pomroy advises, "Read this chapter long before you need it." She goes on to explain: "It's best to make arrangements long before there is any likelihood of death. At this time you and your husband can make very practical decisions about the amount of money you have available for your funerals."

She then details each legal step a widow must take, and shows which of these tasks can be provided for ahead of time.

Because the body of the law has been built up over centuries, it is not always as easy as a reader might hope to get at a legal problem — to define and find legal precedents or statutes. For example, you'll find no reference in the index to "prenuptial contracts," "prenuptial agreements," "marriages: prenuptial contracts," "agreements, prenuptial," or "contracts, prenuptial."

Three new guides, on related subjects, for women include: "Women's Handbook of Independent Financial Management" by Steven James Lee and Karen Albena Hasany (Van Nostrand Reinhold), "Everything You Want to Know About Your Husband's Money... And Need to Know Before the Divorce" by Shelley Asparkaria and Gerson Gellner (Crowell), "Divided Children: A Legal Guide for Divorcing Parents" by Michael Wheeler (Norton).

Best-Selling Books Stimulate Grandma

Belva Plain is a South Orange, N. J., grandmother, a veteran of the PTA, department store sales and nearly 40 years of marriage to the same man. She's also the author of the 1978 best-seller, "Evergreen," and the new "Random Winks."

How does it feel to become a commercially successful author this time in life? "Younger," she says. "Or maybe the word is 'more stimulated.' Every morning there's something important I've got to do.

"You get to a stage in life where you stand between the people who came before and those who come after, between grandparents and grandchildren, and you need to come to terms with it. I write about people. That's the most important thing, more important than plot, how people interact in history. I suppose these stories express my feelings about family and the debt we owe those who brought us here. To know ourselves, we have to know them."

Mrs. Plain, who describes herself as compulsive about

most ordinary citizens need to know about: family, working, housing, money, making investments or planning your estate. If you're faced with specific precedents or statutes. For example, you'll find no reference in the index to "prenuptial contracts," "prenuptial agreements," "marriages: prenuptial contracts," "agreements, prenuptial," or "contracts, prenuptial."

However, in the chapter on divorce, under the rule "The agreement may not induce divorce," there is information about prenuptial agreements in a discussion of separation agreements: "Agreements made prior to marriage seeking to control property rights in the event of divorce are never honored, since these openly promote divorce."

There is also much information here you will want to be acquainted with before you need it. For example, in "Until Death Do You Part," Pomroy advises, "Read this chapter long before you need it." She goes on to explain: "It's best to make arrangements long before there is any likelihood of death. At this time you and your husband can make very practical decisions about the amount of money you have available for your funerals."

She then details each legal step a widow must take, and shows which of these tasks

good housekeeping is equally organized in the planning of her novels. "Some authors just start writing and let a character take off and set the story. I make an outline and know just how things will turn out." She also keeps notebooks of thoughts and impressions. "Everywhere I go, I write down something."

How does her husband, a distinguished ophthalmologist, react to having an equally successful and more famous wife? "He's delighted," says Mrs. Plain. "I have to tell him not to brag about me so much."

Real Hero: Saving Lives Routine For Ex-Sanford Man

By DIANE PETRYK
 Herald Staff Writer

He's a man who loves his work, whether it takes him mountain climbing, scuba diving, into combat zones or parachuting into unknown territory.

His job is to rescue people. Anywhere in the world, under any circumstances. "I wouldn't quit for anything," said Air Force Master Sergeant James F. Spears.

A former Sanford resident, Spears, 41, has been named one of the 12 Outstanding Air Force Airmen of the Year.

Earlier, Spears has been named one of five Military Airlift Command Airmen of the Year, qualifying him to be considered for the Air Force-wide honor.

Acceptance of the award, Spears said, will involve a trip to Washington to meet with Air Force officials and the President. If he is available.

Spears is serving his 14th year with the Air Force and serves as an instructor with the Air Force Pararescue School

Medical Department in the 1550th Technical Training Squadron at Kirtland Air Force Base, N.M.

After serving his first four years in the Air Force, Spears came to Sanford where he worked for a time at the Steinmeyer Roofing Co. But Spears said the military life was too compelling.

"Once you've been in — if you like it — the camaraderie or whatever, once you're exposed to it, you can't escape."

Upon returning to the Air Force, Spears was one of the first 39th Combat Defense Squadron at Eglin Air Force Base, Fla. While stationed at Eglin, he volunteered and was accepted for training as a pararescueman.

Spears said the job offers him the opportunity to do something directly for mankind. But beyond that, he said, "it's an exciting way to live."

"When people need help, they need help right away," he said.

There was a yacht in the Caribbean caught in severe weather and a wave had washed those aboard into the rigging, Spears said.

"A teammate and myself found them and jumped from a helicopter that made a low, slow pass. We spent 20 hours on board helping them navigate and sail to an island."

Spears explained that helicopter pickup of the victims was impossible due to the pitch and roll of the boat.

In another incident last year, Spears said a Cessna 310 airplane crashed at the Arizona border and he led a team to investigate, expecting no survivors.

"Upon approaching the plane I saw a head," Spears said. "At first I thought it was decapitated, but then it moved. Then we found three persons alive."

"They had every kind of injury you could imagine. We stabilized them and flew them to Gallup, New Mexico in a helicopter."

Spears said they stayed with the in-

jured men until doctors confirmed what he had diagnosed — that one of the men had sustained head injuries resulting in intercranial pressure that had to be relieved.

"After the doctors diagnosis, we made a mad dash for Albuquerque, where a neurosurgeon was available," Spears said. "Consequently, all three men lived and are doing well today."

Spears' knowledge of medicine came in handy on another mission in the rugged Sandia Mountains east of Albuquerque, where he diagnosed and provided correct and quick aid to a man in a diabetic coma. Spears was credited with a life saved.

That's the satisfaction of the job, Spears said, adding that the risks he takes are "not really that big of a deal."

"Risk is part of it," he said, "but it's a calculated risk. You make a rational decision based on your known limits and capabilities. You commit yourself or make the decision that you can't do it."

Spears is quick to add, however, that the latter has never happened.

"It's always been able to pull it off," he said. "We always try."

"Some people die anyway, no matter what we do. But we try."

When Spears says "we," he means the group of just 240 persons worldwide who make up the "only unit of its type in any military service."

"It's the most demanding job in the Air Force," Spears said of pararescue. It involves the most highly trained persons enlisted in the Air Force. And there's no profession to match the demands of this job, physically or mentally.

"The training is beyond reason really. With most Air Force jobs you learn 25 to 30 skills. This job requires that you be proficient in 97 different tasks."

Such tasks, he said, include parachuting, scuba diving and serving in various capacities as helicopter and

airplane crew, as well as knowing all the procedures of the emergency medical techniques used in the Air Force.

"A lot of people volunteer for the job," Spears added. "But few make it."

In three months, Spears said, 8,000 applications to join pararescue will be received.

"From those, we choose a class of 16," he said.

As an instructor, Spears said he finds it exciting to teach lifesaving skills.

"The youngsters attending this school today are without a doubt the finest bunch of kids this nation has to offer."

After graduating with honors from the school himself in 1965, Spears was asked to stay on as an instructor. But at the same time he helped support many space shot recovery missions, including those for Gemini 3 through 7.

He later became training NCO for all space shot recovery missions flown by pararescuemen and was one of the first three qualified for Apollo recovery missions.

In 1969, Spears flew support flood relief actions in Costa Rica with the 60th Special Operations Squadron. He flew hundreds of emergency medical evacuation missions and received credit for hundreds of saves. As a result he was promoted to master sergeant and awarded the Meritorious Service Medal.

Spears' promotion to master sergeant means, he said, that he will be eligible to serve 28 years in the Air Force. If he is promoted to chief master sergeant, as he said he feels he will be, he will be eligible to serve 30 years. This can be extended to 33 by an act of Congress.

Spears said he wants to continue his work "forever."

"Where else could I come to work in the morning and wind up on the side of a mountain pulling off a mountain climber that had taken a fall — a climber who is a

airplane crew, as well as knowing all the procedures of the emergency medical techniques used in the Air Force.

"A lot of people volunteer for the job," Spears added. "But few make it."
