# O P E N I N G Announcement

We take great pleasure in announcing the opening of the office of our district manager, J. H. Jackson, in the Chamber of Commerce building in Sanford.

As evidence of our confidence in the present Sanford and the future GREATER SANFORD and the state of Florida, we are cooperating in a spirit of real service by investing our funds here in long time loans on real estate.

Do we merit your confidence, cooperation and patronage? Investigate our latest complete protection policy that really protects.

# Jefferson Standard Life Insurance COMPANY

# Greensboro

Assets over \$23,000,000. Insurance in force over \$215,000,000.

Strongest old-line, legal reserve, ordinary life insurance company in the south. We write all forms of up-to-date life insurance policy contracts.

# J. H. JACKSON, DISTRICT MANAGER

Chamber of Commerce Building

Sanford, Fla.

North Carolina

### MONDAY, MARCH 3, 1924

mmit thy way unto the Lord: also in Him; and He shall it to pass.—Psalm 37:3, 5.

### SIMPLE THINGS

laugh at things that please my heart, simple things of every day;

creaking of the farmer's cart, e shuffling feet along the

way, little candle's winking light upon the cottage window sill, robin's raptures of delight, he winding path, the woodel

mock, for no one understands:

he platest above the chimney place.

touch of hard, work-weary hands,

he wrinkles in each homely

face, prattled wisdom of a child, the whispering of leaves astir,

### Minority Rule.

Presidential year finds much discussion in the press, pulpit and public forum regarding the "issues" of the day. Candidates wax eloquent in presenting their claims to the second Class Matter, Oc-1919, at the Postoffice at Plorida, under act of March dear people and promising reforms and "cure-alls" for the evils of the present day. The most interesting thing about the situation is the

act that this year a president will be elected, just the same s in previous years, by a minority vote of the people. The ime has not yet arrived when all the people or even a great najority of the people are going to bother themselves to go York, enters the primaries in Il-

street corner and criticise the non-enforcement of laws and the general manner in which the city, state and nation are the general manner in which the city, state and nation are run, but only a few, a very few, take the time and trouble to help remedy the condition by qualifying and voting when election day rolls around.

The ballot box has come to represent, not the will of the dividend. That means bad salesmajority, but the sentiment of an organized minority. When manship and not enough advertisto it or not otherwise the constitution was framed Alexander Hamilton told the convention that the government about to be set up must de- language, who copper means and pend for its working upon "the interest, participation and co- what it saves on building, no comoperaion of the people.'

The National Security League, quoted by the Atlanta Journal, states that today finds America ruled by a minority. The League gives facts to back up this startling assertion. The Journal says:

The Empire State of the Union-New York-furnishes a striking example. It has a population of more than five million men and women of voting age. In the senatorial election of 1922, only 2,500,000 votes were cast, and of these Senator Royal S. Copeland, the winner, receievd 1,276,000. In a word, Senator Copeland holds a seat in the United States senate by virtue of an expression of fewer than 25 per cent of the qualified voters of New York state.

Benjamin Franklin helped to establish the government, but his state of Pennsylvania registered even less interest than New York in the support of popular rule in the 1922 election. Pennsylvania has a potential voting strength of 4,326,000, yet in the last senatorial election it cast fewer than 1,500,000 votes for senator, or approximately 33 per cent of the total.

Senators Reed and Pepper each received about 800,000 votes and were elected. They sit in the senate as the result of an expression of about 18 per cent of the voters of their state.

Take a look at Massachusetts. It has 1,885,000 eligible voters, but only 800,000 of them went to the polls in the last election, and of these only 414,000 voted to return Mr. Lodge to the senate.

The state of Missouri has almost 2,000,000 voters, yet Senotor Reed was returned by the votes of 507,000, or about 26 per cent of the total.

Our sister state of Florida, we are told, returned a senator representing only 9 per cent of the voters, while Mississippi elected Senator Stephens with only 7 per cent of the voters participating.

The conclusion from these statistics is inevitable that the government at Washington, due to no fault of the senators and congressmen, is not truly representative of the will of the people. It represents a narrow and restricted minority, and in most cases a well organized body of voters or political managers.

In view of such conditions, one finds little sympathy for the man on the street who would decry present conditions unless he is doing his share to get relief. Here in Sanford rk report that Sanford and and Seminole county are hundreds of good citizens, men and inole county received a great women who should come forward and participate in each and

As Brisbane Sees It Two Go to Bat. Copper Needs Salesmen. What's "Sacred in Crime? Dangerous to Sell Francs. Copyright, 1924

THE CONVENIENT flummery that permits lawyers to withhold formation concerning clients as 'secret and sacred" should be end-

As things stand now a big legal rascal, helping a bigger corporation rascal to conceal his stealings, rises solemnly in court to say, "This is sacred confidence between lawyer and client."

There is no more reason for such sacred confidence between lawyer and client, where crime is committeed, than there is for sacred confidence between burglar and pawnshop keeper.

When a pawnshop man helps a burglar to sell his loot he is compelled to tell about it and refund. A lawyer helping a corporation to steal property from the govern-ment should also be compelled to tell all about it.

There isn't any "sacredness" in theft.

THE FRANC, while a little tronger, is still dangerously weak. Bu be careful how you go "short" of French currency. The French have a great deal of real money.

### THRIFT'S GREATEST EXAMPLE

BEN FRANKLIN is America's greatest example of thrift. He began practicing it when 12 years old and continued the habit through life.

As a result, he became the richest American of his day, not only in money, but in health, good cheer and happiness.

You, too, can get added satisfaction out of life as you increase your personal resources and place yourself in a position to enjoy the fruits of your labors... Follow the thrift example of Benjamin Franklin. The best way is to deposit a definite sum cach week or each month in a savings account.

# **Small Fruits and Nuts, Profitable Products** Giving Seasonal Enjoyment to Consumers

Small fruits and nuts add a constantly increasing tonnage to the profitable products of Florida.

The princely pecan, soon to challenge King Cotton for his throne, reaches its highest perfection in a wide area of Florida.

Bananas, figs, grapes, guavas, peaches, pears, plums and a number of other small fruits are grown in quantity, with demand exceeding supply.

Watermelons from Florida always are in the market weeks ahead of the crop of any other state. The culture of watermelons for seed is an important industry, providing most of the nation's supply. Cantaloupes of excellent quality are grown.

Strawberries are shipped from Florida in vast volume during the winter months-last year's total aggregating eight million quarts, the growers realizing on the crop approximately \$1,750,000. No other state produces these berries in quantity at the same season.

# "Florida Development Has Just Commenced, Going Forward With Marvelous Rapidity"

-CHARLES A. STONE

Head of the firm of Stone and Webster, Inc., Mr. Stone is a keen judge of investment values and general conditions. The concerns with which he is connected are heavily interested in Florida public service utilities. Mr. Stone is naturally a close observer of the state's progress and frequently visits Florida.

"Florida has a delightful climate and is most favorably located for all sorts of agricultural pursuits. It is already one of the great winter playgrounds of this country and I believe is destined to be the greatest. It is a great service to the people of the north to let them know about Florida," Mr. Stone says.

The Florida Development Board, which is the State Chamber of Commerce, is a non-partisan, non-profit organization, supported by banks, business men, boards of trade and chambers of commerce. It will furnish dependable and unprejudiced information about Florida, direct and through its affiliated mem-bership of local trade bodies. Address
