FLOCKED FABRICS Shoppers: Curious about flocking? It is a decorative surface design and is achieved by applying short fiber ends to a cloth or plastic base. This is done by pressing the fibers into a resin substance preprinted on the fabric. It also is done by applying the fibers to the adhesive by electrolysis. Always check hangtags or labels for washing instructions. Quality flocked fabric usually can be laundered safely.

SAFETY FIRST IN KITCHEN Neatness in the kitchen also contributes to the family safety. Always mop up any spills. It takes only one slip to put someone in bed with a bad sprain or bone fracture.
