The message of Christian Sciis essentially one of freedom,
in an an the image of Love and consistent of the construction of

piritual states of Mind, not mahink that because one person is ealthy he has taken health away rom others and that he must therefore be penalized and made to give up some of his health in order to distribute it to those with less health. Rather do we rejoice in the health expressed by others, for we realize that they are ex-pressing that which is normal to

Mrs. Eddy not only discovered this Science, with its gospel of freedom, but she experienced in her own career this freedom. After discovering Christian Science she had to prove that true woman-hood is free from the pettiness, the physical weakness, the lack of logic, and the lack of bosiness ing limitations that, particularly pt that time, beset womankind. This Mrs Eddy did most wonder-ful y and exemplified in her life the likeness of God as true manexperience that womanhood is free to express strength, courage, infinite love, and wisdom.

pulse of Mrs. Eddy's career. It mabled her not only to discern, prove, and patiently wait for thers to prove Christian Science o to the liberator of mankind her to found her discovery in such a way that it would be available to all mankind, through the ac-tivities of The Mother Church

Association Extends Over Six Hundred Thousand DollarsIn Credit To Farmers

Reports submitted by officers Production Credit Association at in the City Hall Wednesday Indi-ConveneTonight To cated that the farmers' co-operative organization experienced the most successful year in its existance, S. E. Andrews. secretary treasurer of the Association

The reports revealed that the organization had made 209 loans during the past year and that a total amount of \$607,511,50 was lent to farmers during the past year, an amount nearly double the fgure for 1936.
The local organization, accord-

ing to the annual report, was organized in December of 1933 and during the first year lent \$90,130,00 and the success of the organization is shown in the annual increase of loans, In 1935 the organization lent \$197.758,25; in 1936, a total of \$381,485-09 and during the past year over \$600,

At the conclusion of the bust ness session, J. M. Tiddy, secretary of the Production Credit Corporation of Columbia, S. C., addressed the large attendance of stockholders present at the meeting stressing the fact that the association is a permanent, dependable, source of credit for responsible farmers organized on co-operative lasis.

A Matter Of Space

Newspaper readers who perhaps have often wondered why it is that a meeting is always a "meet" by the time it gets into the headlines, and a senator a solon, and a conference a parley, and almost any kind of a disagreement a row, and so on ad infinitum, should have read the editoria. appearing recently in the Times-Union which quoted ex-tensively from the Montgomery (Ala.) Advertiser in a effort to explain this almost universal problem of news-

The Advertiser is quoted as saying that newspaper columns are of a certain specific and limited width and that type is of a certain definite and concrete size, and that only so many letters of a certain specified size can be made to go into the fixed limitations of the column's width. Hence if the "conference" is too long for the width of the column, there is nothing left to do but to cut

of the column, training that the is an ailment from which further showing that this is an ailment from which all newspapers suffer, the Advertiser quoted in turn from the Arkansas City Traveler to show how words and phrases must of necessity be shorted into order to fit into headlines, as follows:

A speaker 'raps' the New Deal, or perhaps, the needs of space being even more demanding, he 'hits' its policies. Japanese become 'Japs' and Ethiopians 'Ethiops.' The Countess Haugwitz von Reventlow is 'Babs' and the President is 'F. D. R.' Someone 'spurns job bid,' Russians are 'Reds,' and Mussolini is 'Duce.' The Duchess of Windsor, the wishes of her royal husband to the contrary notwithstanding, will forever be 'Wally' and New York is 'Gotham.'

A 'police net' is spread over 'wide area' as 'officers seek slayer,' who is likely to be a 'moron' or 'sex fiend.'

It's all because type can't be squeezed, although some of our readers' anger is stirred ('ire aroused') when we tell them that we cannot place over their story such a headline as: "The Independent Order of the Magnified Sea Serpents Enjoy Fine Dinner and Interesting as Well as Instructive Speeches By Distinguished Guests." They are appalled when they see all this condensed into: 'Jones Speaks at Lodge Fest.'

Some of our readers are always obliging us by writing our headlines for us, but all too often unfortunately they do not fit. Then we have to change them, not because we want to be mean or unaccommodating, but because of the mechanical limitations imposed upon us. It is not easy to explain all the problems and imperfections of the newspaper business, especially to a person unaccustomed to it. But then there are lots of things we don't know about law, medicine, and music.
