

THE SEMINOLE COUNTY exhibit at the Central Florida Fair this year. The Chamber of Commerce committee planned the exhibit which is drawing widespread attention. All phases of the county's economy are represented.

Agents Move In On Illegal Shad Fishing In Area

Florida Conservation agents moved in on illegal shad fishing in the area last night and confiscated a net and more than 500 fish.

Mackery, General Agent for the Board of Conservation, and a group of agents brought the two boat loads of shad to the Sanford State Farmers Market this morning for Judge Wilson Alexander to legally release the fish to an institution.

Agents C. A. Willis and C. V. Holland spotted the net at Mullet Lake Park last night about 10 o'clock, according to Mackery. The General Agent and three other agents moved in in an attempt to take the illegal fishermen along with the net.

The net, said Mackery, is a 300-foot four-inch stretch cotton net worth about \$500.

About 300 pounds of live fish were released back into the water, the agent said. The total amount of fish confiscated amounted to between 1,000 and 1,200 pounds.

All of the catch were white shad with a few catfish.

General Agent Mackery said that the salt water fish agents were in this area inasmuch as they had jurisdiction wherever salt water fish were found.

Other agents assisting in taking the net and fish were Frank E. Dawty, Dan Newbold and Earl Westler.

"It is a shame that fishermen of this type would take in their spawning ground," said one of the agents. "It merely ruins fishing for years to come, maybe even for the children of present day sports fishermen," he said.

Three Men Escape Bad Accident; Car Total Loss

An unemployed painter and his two nephews miraculously escaped from the wreckage of an automobile that went out of control on Onora Road shortly after 11 o'clock last night.

Wayne Remery, 35-year-old painter, was thrown from his 1949 Oldsmobile traveling east on Onora Road when it skidded for approximately 300 feet, and over 75 feet of that distance on its top.

The car was a total loss, said Sheriff J. L. Hobby, investigating officer at the scene.

Debris was scattered over a wide area as, according to the Sheriff, the car "arced at an apparently high rate of speed before coming to a stop in front of

Cdr. Deans

(Continued from Page 1)

Deans was a student in PB4Y-2 Training at NAS Hurlburt, Kan. From June 1945 to August 1946, he was a PB4Y-2 pilot in VPR-116 and VPR-117 which were based at Iwo Jima and Kwajalein. During this time he participated in "Operation Crossroad". In October 1946, Commander Deans became Flag Secretary and Aide to Commander, Fleet Air, West Coast, and served with him until June 1948. In July 1948, he was ordered to duty on the Staff, Commander, Military Air Transport Service. In December 1949, he was ordered to duty as Assistant Training Officer of the Auxiliary Technical Training Unit at NAS Corpus Christi, Tex. In March 1952, Commander Deans enrolled in General Line School, and in December 1952, he was ordered to duty aboard the U. S. S. Valcour (AVP-35) as Operations Officer. In April 1954, he reported for duty with VP-16 as Operations, Training, and Executive Officer, and in February 1956, he reported for duty at Sanford.

Commander Deans, his wife Dorothy, and their two children, Dorothy Mitchell, 12 and Thomas Anderson, 5, have been residing in their home on West Crystal Dr. since they have been in the City of Sanford. Mrs. Deans and the children will accompany Commander Deans on his new tour of duty.

Commander Deans has been quite active in civic organization and their endeavors since he's been in Sanford, and as Public Information Officer at the Naval Air Station, has done his share in establishing good working public relations between the City of Sanford and the Air Station. In spite of his many time-consuming duties as Administrative Officer, Commander Deans always found time to handle the many problems that were constantly being brought to him for solution.

Many of us, both military and civilian, are going to miss Commander Deans, whose pleasing personality and never-ending wit never failed to brighten one's day.

the Pinecrest Baptist Church. Remery received a bad cut on his left hand and he complained of his back. He was taken to Seminole Memorial Hospital for treatment.

His two nephews, Donald Eckenrode, 22, and David Eckenrode, 17, emerged from the wreckage with only a few bruises and pavement burns. Neither of the two were thrown from the car.

Remery and his two nephews who are brothers, gave their home address as 303 Holly Ave.

Assisting Sheriff Hobby in the investigation was Deputy Sheriff James Sincletary.

"The thin red line" was a name given to British troops in action by a correspondent in the first world war.

Kiwanians Vie For Eleven Prizes In Quiz Program

Members of the Sanford Kiwanis Club were vying with one another yesterday amid a "notorious quiz program" staged by Charlie Morrison, honorary member of the Kiwanis group.

Accelerating interest in the quiz were eleven prizes contributed by Kiwanis Club members which were awarded those who answered questions posed by the quizmaster.

As a result of the program Charles "Chuck" Brandies won two dinners at the Mayfair Inn; Dr. John Wilson was awarded a lubrication job and five gallons of gasoline from Brown's Amoco Station; a litter carrier contributed by Heller Motor Sales was won by Jim Grant; five quarts of oil from Nicholson Bulk Co. was awarded to Leon Cornell; a color telephone from Southern Bell Telephone Co. was won by Ed Shinholzer; 50 pounds of potatoes from H. H. Kasper Co. were won by Neil Fagnery; two steaks from Central Florida Quick Freeze Plant were won by Marion Harman; Sanford Furniture Co.'s smoking stand was won by Howard Montleth; an electric iron contributed by Wilson-Maler Furniture Co. was won by Mack N. Cleveland Jr.; and Randall Electric Co.'s canister set was awarded to Arthur Greer.

The meeting was attended by Rotarians from North Orlando Kiwanis Club and the Mount Dora Kiwanis Club.

Randy Rock Has Bagged 6 Firsts

Randy Rock, the youngest contestant in the featured ninth race at the Sanford-Orlando Kennel Club tonight, is also the winningest, having bagged six firsts in date. This one juvenile, owned by W. F. Swafford, was born in April, 1956, and only won his maiden race here in December. Then he rapidly advanced to Grade A competition. If he triumphs tonight it will be his second victory in a main event.

Seven other top notches round out the field. Included are such fan favorites as Azurine, a five-time winner, Lightning Mike and Alriguide.

Alriguide is only a month older than Randy Rock but has had more experience, having campaigned at Pensacola. Here he has been a factor in seven quintelas in 17 starts, four times with wins. Lightning Mike is the veteran in this main attraction. Born in 1954, he has been successfully campaigning several seasons and has an excellent record.

PINECREST FIRST GRADERS, their teacher, Mrs. Mary B. Groome, and "Room Mothers" pose for a portrait during their recent visit to NAS Sanford. In the background is the A3D Skywarrior, the Navy's largest carrier-based jet bomber. (Official USN Photo)

Scientist Proposes U.S. Develop Earth Launched Space Ship By '70

WASHINGTON (UP) — Rocket scientist Kraft A. Ehrlicke proposed today that the United States develop by 1970 an Earth launched atom-powered space ship which would circle the moon and circle Mars.

Ehrlicke, a German-born missile expert, glimpsed the future at the Air Force jet age conference. His proposals outlined anything else heard at the meeting for their

sheer imagination and immensity. Now an American citizen, the 46-year-old Ehrlicke is with the Convair Astronautics Division of General Dynamics Corp., makers of the Atlas intercontinental ballistic missile. He participated in the World War II development of the German V-2 missile.

Ehrlicke said he hoped the Atomic Energy Commission's current development programs would result in practical nuclear power plants which would make possible the lunar voyage by 1970.

Needed for the space jump, he said, was a two-stage "chemo-nuclear" vehicle which would weigh 1,800,000 pounds at launch. It would stand 200-feet high and

would have rockets developing 2,700,000 pounds of thrust. The lower stage of the vehicle would be a glider with triangular wings of 90-feet span. Powered with gasoline and liquid oxygen rockets, the glider would carry the Moon-bound vehicle through the Earth's atmosphere. There it would detach and return to Earth.

The second stage, carrying the crew, would be powered by "feed-back" liquid hydrogen to a rocket engine that has a nuclear pile as its energy source. A jet stream of hydrogen atoms expelled from a rocket nozzle would provide thrust for the remainder of the trip. Ehrlicke predicted that in

"concentrated national effort" these events could take place: —In the next two years, rockets could be shot to the moon or made to circle the moon as satellites. —In the 1964-66 period, manned rockets could carry out lunar reconnaissance and land instruments on the moon. —It is "worthwhile" to build a moon base, that could be done in the early 1970's.

Weather
Generally fair with little change in temperature through Saturday; tonight 51 to 62.

AN ABANDONED AUTOMOBILE was discovered on the New Upsala Road early this morning. The driver has not yet been apprehended. (Staff Photo)

22 Believed Dead As Bus Plunges Over Bluff

Abandoned Auto Found Early Today On Upsala Road

An abandoned Mercury automobile was found on the New Upsala Road early this morning. The car, according to Deputy Sheriff Verne Brewster, skidded a distance of 300 feet before coming to a stop on its top.

Apparently the car was traveling north at a high rate of speed when it failed to negotiate a sharp curve near the abandoned clay pit.

No estimate was placed on the damage but the car was badly smashed as it turned over on its top.

Spots of blood were detected at the scene.

Identification in the automobile led Sheriff's Deputies to believe that the automobile is owned by Russell Jackson of a Castle Bredner Court address.

Scouts, Manager To Arrive Tomorrow

By Jerry Covington

The Scouts and several managers of the San Francisco Giants Farm System are scheduled to arrive here tomorrow at their new home at Mellenville Avenue. A group of 14 scouts and Jack Schwarz, secretary of the farm system, will join Carl Hubbell and the advance crew. They are scheduled to look at the young free agents for the first time Monday morning.

At present there are 32 free agents who will be trying for a contract to one of the 8 clubs of the Giants' system. There are also 9 players who have signed contracts but have not been assigned to a club. They are also scheduled to work out with the free agents.

Nick Shinkoff, scout for the Florida area and a well-known local figure, is one of the early arrivals here in Sanford. Shinkoff has become a part of the baseball picture here and is looking forward to the Spring.

Carl Hubbell, director of the farm system for the Giants, is expected to have a fine spring season here and promises the local fans some outstanding exhibition games this year.

Cotton Brown, well known, retired navy man, is the newest member of the staff at the dormitory. Brown will be the assistant steward and will work with Karl Kazusa who is head steward at the Giants' headquarters here in Sanford.

The list of scouts to arrive tomorrow includes: Hans Robert, Dale Alexander, Willard Marshall, Frank Genovese, Hugh Poland, Gene Thompson, Tony Tavish, Ken Merchants, Charles Fox, Alex Pompey, Frank Burke, Ray Lucas, and Herman Reich. Among this list are many former major leaguers.

The Managers scheduled to report early are Bobby Hofman who will manage the Danville, Virginia, Class B club, and Richie Claus who will be at the helm of the St. Cloud Minnesota class C club. Both are very familiar names to baseball fans.

The first club scheduled to arrive here in Sanford is Phoenix of the Pacific Coast League. The pitchers and catchers will arrive on Mar. 10 and infielders and outfielders will arrive on Mar. 23. This club will replace Minneapolis. (Continued On Page Seven)

Walter May, news director of Radio Station WPRT, returned from the scene of the accident and said 12 of the children had been rescued.

May said the bus was carrying children from Low Creek and Knotter Hollow sections into Prestonsburg grade school when it plowed into the wreckage of two cars which previously had collided on U. S. Highway 23 south of here.

The bus veered off the wreckage, crossed a moment on the edge of the road, then dropped some 50 feet down an almost sheer embankment into the river, which was swollen by recent heavy rains.

The bus first landed about half in and half out of the water, May said, and remained there for a few moments, during which time driver John Derossset helped 12 of the children escape through the emergency door.

Then the bus fell all the way into the stream with Derossset and the other children still aboard, and is now lost in the river. Rescuers have been unable to locate it.

State police at Hazard, Ky., said about 12 of the children had been rescued, but it was not known to what extent they were injured.

Parliamentary Procedure To Be Taught In Class

A class to teach the "proper parliamentary procedure" will be held on March 13-14 under the sponsorship of the Sanford Seminole County Chamber of Commerce, M. L. Raborn Jr., president of the organization, said yesterday.

The class will be taught by Bill West, said Raborn. Booklets, distributed by the Jaycees, will be used for the instruction, he said. Raborn pointed out that the two-day instruction course will be open and there will be no charge. Members of other civic clubs who wish to participate in the course should notify the Jaycee Information Booth.

ENGINEMAN First Class John Scott of the U. S. Coast Guard. (Staff Photo)

U.S. Coast Guard's Purpose To Aid In, Prevent Disasters

"The purpose of the United States Coast Guard at New Smyrna Beach is to assist in disasters and prevent disasters in the area to which we are assigned from Cape Canaveral to St. Augustine," Engineerman First Class John Scott said at the Sanford Seminole County Junior Chamber of Commerce at its noon meeting yesterday.

"We are equipped to operate with a 250-mile radius," he said.

Scott warned the Jaycees of the importance of boating safety. "It's a good idea," he said, "to let someone know where you are going and when you expect to be back when you go out in a boat."

Safety is something everybody is looking for," he said, "and let me give you fair warning that the sea has no mercy — it will take your life and mine."

The Coast Guard man explained that there are an officer and 21 enlisted men on the staff at New Smyrna Beach. "This includes a communications section," he said.

"We are standing watch 24 hours a day," Scott said. There are five boats in the equipment at New Smyrna Beach. There are a 40-foot utility, a 36-foot, a 40-foot, a 25-foot and a 30-foot crash boat.

"In addition," Scott told the Jaycees, "the Coast Guard has its own air detachment to which we can call for assistance."

One third of our crew is aboard the station at all times, he said. Explaining that the Coast Guard is under the Treasury Department in peace time and the Navy Department during war, Scott told the Jaycees that "our primary duty is to determine a state of readiness for emergencies."

Scott was introduced by Bob Landreth, program chairman for the day.

VAH-5 Crew Breaks Coast To Coast Record

Marlin Company Official To Speak

"What is the Martin Company?" "Why did it come to Central Florida?" "What is the Martin Company doing here?" These and other questions will be answered at the regular weekly meeting of the Sanford Rotary Club Monday noon, at the Yacht Club when Norman E. Hollands, Procurement Evaluation and Services Manager for The Martin Company will talk to the local business group.

Hollands has been with Martin's for 15 years and for six years was with the New York Stock Exchange and for another six years served as a General Claims Agent for a division of the B&O Railroad. He is a member of the Rotary Club of Winter Park and with his wife and two children, both girls, has been a resident of that city since June, 1957.

In the course of his talks, he will include a presentation of both a silent movie and a series of slides that, according to John Kader, program chairman for the day, should prove very interesting to his audience. Hollands will be accompanied on his trip to Sanford by Carl B. Foster of the Information Services Dept. of his company.

VAH-5 has just smashed all existing cross country speed records from Los Angeles to Sanford. More than 10 minutes were cut from the former record of three hours and 39 minutes.

The Savage Son crew of Ledr. Charles Donnaud III, Lt. (jg) El-

ls Austin, and Donald Maxwell ATC, with WING Training Officer Ledr. Cy Fitton aboard, covered the 2,300 statute mile route at speeds up to 700 miles per hour. The new record time is 3:28:30.

Ledr. Donnaud clocked his wheels up at 10:30 a. m. Los Angeles time. Less than three and one-half hours later he reported over the Sanford tower. His feat shattered a record that has held almost a year. It was only the second coast to coast flight attempted by VAH-5.

Since there was no premeditated effort to set the new speed record on the routine training flight, Ledr. Donnaud's record will remain unofficial.

Toastmasters Club Reveals Area Contestants

The Seminole Toastmasters Club 1485 of Toastmasters International, named area contestants at a recent weekly meeting held in the game room of the Bachelor Officers' Quarters at the Sanford Naval Air Station.

Toastmaster Gene Zak presented a program which included speeches by Club President Bill Holcomb, Ray Harvey, Jack Langford and Herschel Pahl.

The speeches were evaluated by John Stribling and Toastmasters Langford and Pahl were unanimously selected to represent the Seminole Toastmasters Club in an area speech contest which will be held during a dinner meeting at the Langford Hotel in Winter Park on Mar. 8.

Ed Graham and Bill Fleming, who are vice presidents of Club 1485, have been appointed to serve as judges of the area speech contest.

Jaycee Scrapbooks To Be Prepared For State Contest

Jaycee Scrapbooks will be prepared for statewide competition by David Klingensmith, M. L. Raborn Jr., president of the Sanford-Seminole County Junior Chamber of Commerce, said yesterday.

Scrapbook competition will take place at the Jaycee state convention to be held this year at Tampa which is approximately two months away.

"Klingensmith will need as much help as possible," Raborn told the Jaycees, "and he will start to work on the project immediately."

Wheels, Tires Taken Off Car

That's the experience of one Seminole County man on State Road 430 when he lost wheels and tires off his automobile last night.

Sheriff J. L. Hobby said this morning that Banks Ford notified his office that tires broke into his garage, jacked his car up, and made away with wheels and tires.

The sheriff said that the breaking and entering is under investigation but no leads have been developed so far.

The idea now is to develop some plan to lock the wheels and tires of an automobile to the ground or devise some method to prevent a car from being jacked up and the wheels taken off.

"It's another one of those cases that presents problems hard to solve," Sheriff Hobby said.

'Normal' Florida Weather Seen Now, Next Year

WASHINGTON — Moderate weather in Florida for the rest of this winter, and a "normal" winter next year are predicted by Dr. Francis Reichelderfer, chief of the U. S. Weather Bureau.

The weather man made the predictions in a television interview with Senator George Smathers, scheduled for release to Florida stations on Sunday, March 2.

He blamed the record shattering freezes on a river of frigid Canadian air which swept down the Mississippi Valley and lingered over Florida for several weeks, rather than moving on to other areas as is the general case.

"Unusual weather of this kind does not come frequently. We can count with certainty that next year in Florida will be more normal," Dr. Reichelderfer said.

He said present indications show that H-bombs, Sputnik firings and other artificial influences do not seem to have any important effect upon our weather, because unusual patterns occurred long before the age of atomic energy.

Jaycees Adopt 'S. O. S.' Program

Members of the Sanford Seminole County Junior Chamber of Commerce unanimously adopted the "S. O. S." program recommended by the Florida Jaycee organization.

The program is a statewide effort to counteract adverse publicity given the state through recent cold weather reports.

The "spread our Sunshine" program will include the use of post-cards "boosting Florida weather," fives, prospective visitors and tourists and every Jaycee has been asked to write at least 10 or more cards "boosting Florida weather."

Businessmen are being asked to use the S. O. S. program in their

mailing projects and to include the "Spread Florida Sunshine" in their letters, telephone calls, and other correspondence out of state.

The local Jaycee organization will cooperate with other Jaycee groups throughout the state in staging the "best" program.

M. L. Raborn Jr., president of the Sanford-Seminole County Jaycee group told members at yesterday's noon luncheon meeting of the statewide plans to stage the gigantic program.

In addition to mailing 10 post-cards personally, Raborn said that the Jaycees would urge everyone to write frequently as many cards

as possible telling about "Florida weather."

Final plans for the big push that is already underway have not yet been completed but Raborn said "We'll get things going here in a big way, and we want everybody to help."

Additional Local News On Page 7

3 Top Women Golfers To Be Here For Clinic

Three of the top women in the women's world of golf will be in Sanford tomorrow for a clinic and exhibition.

Frank Mebane, general manager of the Mayfair Inn, said today that Betty Rawls, Patty Berg and Mickey Wright will conduct the clinic and play a nine-hole exhibition at the Mayfair Country Club tomorrow afternoon at 1 o'clock.

Mebane said that everyone is invited to see the two big events for golfers here tomorrow and "there will be no charge."

Patty Berg is dean of women's golf and three-time winner of

Associated Press Woman Athlete of the Year award in 1938, 1943 and 1955.

Betty Rawls is a member of the advisory staff, Wilson Sporting Goods Co. and winner of two national open crowns.

The Mayfair Inn's general manager said that his is "one of the top events of the year for us at the Mayfair Country Club next to the PGA Open each winter."

Mebane said "I hope that we'll have a huge crowd out to see this event and welcome the three top women golfers of the country to Sanford."

FLORIDA MADE PRODUCTS are on display at the Sanford Atlantic National Bank in cooperation with the statewide "Florida Products Week." R. J. Bauman, president of the bank, looks over the huge display pulping and promoting products of the area. (Photo by Bergstrom)

There's a tingle of excitement in that word *limited* as long as we're describing a train. But if we were speaking of the boy—describing the effect which spiritual neglect has on the development of the character of a child—that's a different matter! There's nothing thrilling about a soul that has been *limited* in its opportunity for religious expression and growth!

The churches of our community are here to give ALL our children religious training... to help ALL our families foster a spiritual atmosphere in their homes.

As we make use weekly of the opportunities our churches provide, the potential Christian growth of the child, the family and the Nation becomes UNLIMITED.

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a school of discipline and values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Don't Skimp On Time In The Early Morning

By HERMAN H. BARNHART, M.D.

THE big secret of planning a healthy, comfortable day at home and at work is to get up early enough to give you plenty of time to do everything that has to be done.

This includes a fresh-up shower, as I have already explained, and a leisurely, adequate breakfast. Gulping a doughnut and a cup of coffee and running off to catch the train or bus for the office is a horrible way to begin a day.

Good Breakfast
Frequently in the past I've told you about the various foods which comprise a good breakfast. But, to refresh your memory, your breakfast should consist of:

Fruit juice or raw fruit; an egg or a bowl of whole-grain cereal, or both, if you have the appetite for them; a slice of toast with butter, and a glass of milk or hot chocolate.

You can have coffee, if you wish, but drink it in addition to a glass of milk.

Increases Efficiency
Believe it or not, a healthy breakfast will increase your efficiency. You won't be so anxious to get away from the office for lunch.

There's one more thing to do before leaving the house—brush your teeth.

Dentists and doctors agree that it is best to brush your teeth after you eat. In fact, it should be done after every meal.

QUESTION AND ANSWER
B. E.: How does a child get tuberculous meningitis?
Answer: Usually the child picks up the infection from an adult. It may be the first type of tuberculosis to show itself in the child's body, or be a part of a generalised tuberculous process.

This disease was considered fatal until recently. Excellent results have been obtained in some cases, by early treatment with streptomycin.

"HI, DADDY" — During a recent visit to NAS Sanford, Little Dawn Holmes, a student in Mrs. Grooms' first grade class at Pinerest School, saw her daddy, "Dick" Holmes, A-1, walking near and promptly "broke ranks" to greet him. Holmes is a third crewman, attached to VAH-11. (Official USN Photo)

Try and Stop Me

By BENNETT CERF

ACCORDING TO BILLY GRAY, chickens out San Fernando valley may have perfected a thrilling new game. They line up along the state highway and wait for a car to come tearing along. Then they dart across the road, practically under the wheels of the car. Any chicken who loses its nerve at the last moment is called a high school student!

Some candidates for a juvenile delinquency home were tearing down a road in a sticky hot-rod at about 90 miles an hour. A gun in the rear seat noticed the door on his side wasn't well closed. Healy he opened and slammed it shut. The driver, without turning his head, snarled, "WHO just got in?"

There's a line in the ocean where, by merely crossing same, you can lose a whole day. There's one on most every highway, however, where you can do even better.

Sell Florida Sunshine Program Adopted By Jaycees Yesterday

The Sanford-Seminole County Junior Chamber of Commerce scores again!

They've adopted the S.O.S. program in cooperation with the Florida Junior Chamber of Commerce and the State of Florida. The S.O.S. program is one in which every citizen of Sanford and Seminole county can help to "Spread Our Sunshine."

Members of the local organization will be writing cards and letters to friends and business acquaintances everywhere telling them of the wonderful weather and the wealth of sunshine found in the Sunshine State.

In other words, the S.O.S. program is one in which visitors and potential visitors are told about the good things about which Florida can boast without reference to recent bad weather conditions which lasted only a brief few weeks.

The Sanford-Seminole County Junior Chamber of Commerce will be asking business men to "brag about the weather" in all of their correspondence out of state, to include mention of the "good weather" in mailings of many kinds, and to use the S.O.S. slogan as often as possible in a campaign

to bring people to Florida for the spring and summer seasons.

This is a tremendous program with an avenue through which "good" information about the state of Florida can be circulated among potential tourists and visitors in every section of the country.

Jaycees won't let this program down for they're noted for doing a "bang up" job of promoting excellent plans and carrying them to a successful conclusion.

There was no hesitation at the Thursday Jaycees meeting in the adoption of Florida's S.O.S. program. Undoubtedly, they're ready to compete with other Jaycees organizations in the state of Florida in producing the best Spread Florida Sunshine campaign in the entire state.

As a matter of fact, that's what they intend doing — winning the competition. And they can do it with the help of all of us.

When you write—write about the sunshine and good weather, tell your friends of the many glorious days to be enjoyed here — and you'll be helping the Jaycees put their program "over the top."

Warning: Beware The Quack

Medical associations in various parts of the country have been warning the public again about that deplorable breed — the medical quack. No one in this fairly enlightened age is apt to fall for the dispensers of phony medicines and vibrators and the like, but the fact is that new victims are plucked daily.

Though the ways of the quacks are devious, there is something of a common denominator in their activities: they play up on the fears and hopes of the ill, and they are out for a fast buck. They offer wonder-working medicines — which may do more harm than good. They give "treatments" with peculiar machines that ring bells, flash lights, or afford a pleasant vibratory sensation—but have no effect on the ailment they are supposed to cure.

Often the quack scorns the efforts of reputable doctors, and promises results no doctor would think of promising. That is the one way to identify him. When in doubt, checking with the local medical association is worthwhile. And if you spot a quack, the police and the federal drug administration will be interested.

Living Costs Jump Last Month

WASHINGTON (UP)—The cost of living jumped six-tenths of one per cent in January to set a new record, the government has reported.

The main factor in the general increase was record high prices for fruit and vegetables caused by freezing and rainy weather which ruined southern crops.

The bureau of Labor Statistics said its consumer price index hit 122.3 per cent of 1947-48 prices. This was 2.3 per cent higher than a year ago.

It was the 15th time in 17 months that the index climbed to a record peak. This was the largest monthly increase since a seven-tenths of one per cent rise in July 1954.

The latest advance was disclos-

ed as economists predicted \$ million Americans would be out of work this month.

Evan Clague, commissioner of labor statistics, said the price of all meats, from hamburger to rib roast, increased 4 per cent in January because of reduced livestock marketing. Food prices generally were up 1.8 per cent, reflecting sharp rises in the price of fresh fruits and vegetables.

The rise in the index meant pay boosts for 1,350,000 workers whose wages are tied to the cost of living.

Clague said the next few months "don't promise much in the way of lower prices." He said the index has not yet felt the full effect of the crop-destroying freeze.

WOMAN'S THOUGHT
"Man is like to vanish his days are as a shadow that passeth away."

Income Tax Tips

The Florida Accountants Association—an affiliate of National Society of Public Accountants.

Pension and annuity payments come under one of three groups: fully taxable, partially taxable and tax free.

There are two different rules for taxing annuity income. The first rule is the life expectancy method. The second rule is the three year rule and applies where part of the cost of the annuity was paid by the employer and the employee will get back his cost within three years out of the annuity payments.

Under the first rule, each payment you receive is considered to consist of two parts—a return of cost and income. Only the part which is income is taxed. This method is based on two things: the cost of the annuity and the expected return. The cost and expected return are used to figure a third factor, the exclusion ratio. The cost of the annuity is the total amount of premiums paid. This amount must be reduced by any amounts received tax free prior to the annuity starting date.

Veterans Corner

Here are authoritative answers from the Veterans Administration to questions of interest from former servicemen and their families:

GI loan program comes to an end advertisements stating that the GI I've seen a lot of real estate July 25, 1958. I am a Korea veteran. Is that my deadline, too?

A. No. Korea veterans have until Jan. 31, 1965, to obtain GI loans. However, must apply for GI loans before July 25, 1958 under existing law.

Q. I am a disabled Korea veteran eligible for vocational rehabilitation training. I've had an offer of a job. Would it be possible to work during the day and take rehabilitation training at night?

A. No. Vocational rehabilitation training must be full-time, unless a veteran's disability prevents him from training full-time. The law does not permit your holding a job and taking training part-time.

Q. I have a World War II GI term insurance policy. I would like to convert it to a permanent plan but at present I cannot afford the higher premium. Would it be possible to convert part of my term insurance to permanent?

A. Yes. You need not convert the entire amount to permanent insurance. Instead, you may convert \$1,000 or more, in multiples of \$500.

Q. I am going to school under the Korean GI Bill. Is there any limit on the number of times I can change schools, without changing my course?

A. No. There is no limit on the number of times you may change schools. You are limited, however, to only one change of course under the Korean GI Bill.

Cemetery Ridge was the famous ridge held by the Union troops in the Battle of Chattanooga.

The average width of human hair is about .148 of an inch.

President Accomplishes Solid End

By LYNE C. WILSON
United Press Staff Correspondent
WASHINGTON

President Eisenhower surely accomplished one solid end when he told this week's news conference that he and the vice president have an understanding about what should be done if the head man becomes disabled.

The end accomplished was to provide Richard M. Nixon with some much needed protection against crucial needlers and snipers.

Nixon has been peculiarly vulnerable because he has found himself in the uncomfortable position of being unable frankly to defend himself against charges that he was eager to seize and enjoy the presidential office on something other than the provocation of actual emergency. The vice-president apparently has considered such accusations better ignored than answered, and he probably is right on that.

The accusations have continued, although with diminishing force. Their force probably has diminished by reason of a general acceptance and public approval of Nixon's conduct under trying circumstances.

Clear Understanding
Now comes the President's news conference statement that he has as to what understanding with Nixon as to what should be done in case of the former's disability.

The nature of their understanding was not disclosed, nor was it disclosed whether it was written or merely a conversational pact. It will serve substantially, however, to relieve Nixon of the unfriendly questioning of his motives which has accompanied the President's several illnesses.

That, however, did not appear to have been Eisenhower's purpose in disclosing existence of an understanding with his younger friend. The President was seeking to emphasize again his desire for action toward a constitutional amendment dealing with disability in the White House and to assure the public of the fact that he had already done what he could do to make ready for the emergency which may come.

Emergency Action
How necessary that could be easily may be understood by the briefest consideration of the conditions which control the use of A- and H-bombs. Suppose, for example, the radar warning network alerted Strategic Air Command headquarters in Omaha that a hostile missile was on the way. SAC bombers always are revved up, engines hot and ready to go. They're off!

Between the moment of that take-off scramble and a time well before near approach to the sup-

posed enemy target, the President of the United States must act. By secret signal to those winging SAC

Consumer Prices Hit New All-Time High In January

NEW YORK (UP)—Consumer prices hit a new all-time high in January, the National Industrial Conference Board has reported.

The board said its index for January stood at 106.3 per cent of the 1953 average, an increase of 2.8 per cent over December and 2.8 per cent over the same 1957 month.

Food costs showed the largest month-to-month advance, 0.9 per cent. Housing rose 0.5 per cent and sundries 0.2 per cent. Apparel costs remained unchanged while transportation costs declined 0.3 per cent.

The purchasing power of the dollar last month was 94 cents, based on the dollar of 1953 as 100 cents.

That was a decline in purchasing power of 0.4 cent on the month and 2.7 cents from a year ago, the board said.

The NICB said January was the 21st straight month that its cost of living index has hit a new peak. The board said the rise in food prices reflected the "unusually cold weather in Florida which pushed up the prices of frozen orange concentrate as well as prices of many fresh fruits and vegetables.

"Price hikes for beef, pork, flour, bread and some manufactured dairy products also contributed to the rise. Eggs, milk, and butter on the other hand declined over the month."

Compared with January 1957, food costs last month were up 4.3 per cent; housing 2.2 per cent; apparel 1.2 per cent; transportation 1.7 per cent and sundries 3.4 per cent.

About 12 thousand people lose their lives annually in boating accidents in the United States.

Peron's Supporters Help Elect Frondizi; But Oppose Administration

BUENOS AIRES, Argentina (AP)—Supporters of ousted Dictator Juan D. Peron helped elect Arturo Frondizi as Argentina's new president—but they will oppose his administration.

Peron ordered his supporters to vote for Frondizi for "strategic" reasons, partly because some of the President-elect's economic ideas coincide with his own.

The Peronist newspapers boast that Frondizi was elected only with Peron's support. But they have now announced, as one newspaper headline puts it: "The strategic support has ended. United, we must now oppose the winner."

The Peronists are now organizing formal opposition to Frondizi even though they are outlawed as a party.

Their stand is that the election was not valid because they were not represented.

On the basis of latest returns, Frondizi received 4,009,000 votes to 2,517,000 for Ricardo A. Balbin, of the People's Radical Party.

It is estimated that about 1,400,000 of Frondizi's votes came from Peronists. In addition, there were 65,000 bank ballots. Many of these were cast by Peronists who refused to follow instructions to vote for Frondizi.

Frondizi is now working out his plans to take over the presidency on May 1 as the first freely elected chief executive in 20 years.

He has announced that he does not intend to try to make himself a dictator. He will govern, he says, like any other president in a free country, in cooperation with congress and the courts.

Weather

Partly cloudy through Tuesday. Slightly cooler tonight with low 54 to 64.

Mack Impeachment Appears Imminent

WASHINGTON (UP)—Chairman Owen Harris of a special House investigating subcommittee announced today he will file a resolution to impeach Federal Communications Commissioner Richard A. Mack.

Harris also expressed belief that a group of senators—accused of "improper" influence on the FCC—will have to appear before his subcommittee to explain their actions.

Mack is accused of letting money and influence sway his official decisions. He has denied the charges, but has agreed to consider Harris' demand that he give up his \$20,000-a-year post.

There have been unconfirmed reports that the White House has given Mack an ultimatum to quit or be fired.

Senators Accused
Harris, Arkansas Democrat, made his statement in reply to a charge by George T. Baker, president of National Airlines, that Mack is being "crucified" and disgraced for not yielding to political pressure from senators in his FCC vote on TV Channel 10 in Miami.

Baker challenged the subcommittee to hale U. S. senators before it for questioning. He accused Sens. Estes Kefauver (D-Tenn.), Spessard Holland (D-Fla.) and George Smathers (D-Fla.) of bringing "improper influence" on the FCC and said that they were escaping "punishment."

Harris told Baker "I don't think you should be too proud" of that statement.

White House press Secretary James C. Hagerty said Mack's resignation has not been received.

Mack has denied charges that he let money and friends sway his official FCC decisions, but he is considering recommendations by House investigators that he give up his \$20,000-a-year post. He promised to give the investigators his answer when he resumes testimony Wednesday.

Manufacturing Company To Move Industry Here

The Seminole County Chamber of Commerce announces that the Industrial Committee of the chamber has completed negotiations with Sam Levy, president of the York Manufacturing Company, to move his industry from Warrensburg, Ill. to Sanford.

"We plan to be in operation here by June 1," Levy said at the close of the negotiations bringing the industry here.

The west end of the building occupied by Brookfield Mills, Inc. has been leased for one year. It was stated Saturday when final arrangements were made. "We plan to train our help here in this location," said Levy, "until we are completely established. We hope to build within a year."

The York Manufacturing Co. is a subsidiary of York Radio and electronic instruments. They will manufacture televisions, radios, and electronic instruments. They will employ about 25 men.

Mr. and Mrs. Levy are in Sanford completing the details of the move from Warrensburg, Ill. Both Mr. and Mrs. Levy are ardent fishermen and have become intensely interested in the Sanford area and its fishing possibilities. They have already leased a home in Sanford.

OVER 200 DIRECTORIES were delivered to Mayfair Manager Frank Melbane Jr. by Southern Bell Telephone Co.'s Group Manager Bob Shedd. Shedd revealed that 7,394 pounds of newspaper and 43 pounds of printers ink were used in this year's Sanford Telephone Directory.

Freezing Weather Damages 209 Miles Of State Highways

TALLAHASSEE (UP)—The State Road Department reported today approximately 209 miles of highway was damaged during the freezing weather that swept Florida during January and February. Including highways in Seminole County.

Highway Engineer A. C. Church said damage occurred only to roads built 25 to 30 years ago. He said maintenance crews are making temporary repairs, but permanent repairs will not be made until weather conditions are more suitable.

The road board, at its meeting in Lake City Feb. 18, authorized spending nearly \$500,000 to repair damaged roads in Marion County. Church has estimated roads sustained nearly two million dollars damage during the cold.

Greatest damage occurred in the Second District composed of Alachua, Baker, Bradford, Clay, Columbia, Hamilton, Lafayette, Levy, Suwanee, Taylor, and Union counties, and in the Fifth District composed of Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Putnam, Seminole, St. Johns, Sumter, and Volusia Counties.

JCs Ask Cooperation In S. O. S. Campaign

S.O.S. stands for "Spread Out Sunshine". This is the code used this week by the Jaycees who have

joined with a group of responsible business people in Seminole County in an all out effort to combat some of the unfavorable publicity about the winter weather here.

An important part of the program is to include in all correspondence going out of the state, a paragraph extolling the pretty days we have been having recently.

The Jaycees are asking every business firm sending out of state mail to include something good about the weather. Their co-operation in this program will be much appreciated. They might be reminded that the rain we have been having is "Liquid Sunshine", a natural phenomenon which comes with warm air.

D. Rountree, SHS Senior, To Try For Scholarship

Invitations to display their scientific knowledge and exhibits in the Third Florida State Science Talent Search March 19-22 already have been received by the top 40 Florida students eligible.

Dr. Robert D. MacCurdy, director of the Search, said the 40 were selected from 126 applications. They will present their science projects at the contest on the campus of the University of Florida.

One of the 40 who will be displaying his project and trying out for the scholarship will be Alvah Richard "Dickie" Rountree, 601 Elm Ave., a senior at Seminole High School.

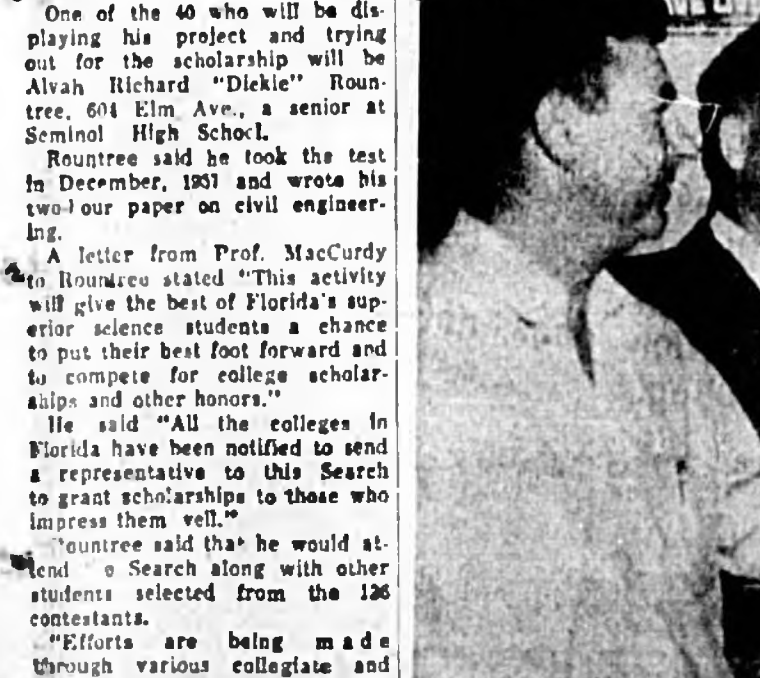

Rountree said he took the test in December, 1957 and wrote his two-hour paper on civil engineering.

A letter from Prof. MacCurdy to Rountree stated: "This activity will give the best of Florida's superior science students a chance to put their best foot forward and to compete for college scholarships and other honors."

He said "All the colleges in Florida have been notified to send a representative to those who impress them well."

Rountree said that he would attend the Search along with other students selected from the 126 contestants.

"Efforts are being made through various collegiate and science organizations to see that every other contestant in this year's Search can be provided with an activity in recognition for his excellent scientific progress," Dr. MacCurdy said.

SPREADING OUT SUNSHINE are these three members of the Sanford Jaycees, as they send cards and letters to out-of-state friends and businesses telling them of the good weather Seminole County has recently enjoyed. Left to right, Bob Cushing, Lowell Burke, Everett Harper.
