Nobody Knows How Fibroid Tumors Start

Dr. Lamb

DEAR DR. LAMB—I would appreciate your discussing fibroid tumors. I have a friend who had them in the uterus and all she had was a D and C. I had another friend with the same thing but they removed her uterus. Now I've been told by my gynecologist that I have a fibroid tumor. He will do an operation and remove it with the uterus and the ovaries. He wants to take out the ovaries because I'm over 50. Are fibroid tumors cancerous? Do they grow? How are they started? At this time I feel good and don't have any pain. Is it necessary to have the operation?

DEAR READER—The reason tumors are called fibroids is because they are hard, fibrous tissue. Sometimes they are called myofibroma, which refers to the fact that they have fibers in them related to muscles in the uterus. In any case, the simple, uncomplicated fibroid tumor is not cancerous. That's a reason reason doctors don't get upset about them as long as they aren't too large and aren't causing symptoms. The reason your friend had a D and C (a type of examination) apparently didn't really have any symptoms and the doctor checked to make sure she didn't have a disorder that needed additional treatment.

If the fibroid tumor is too large and is causing pressure on other organs, the doctor may decide to remove it. Also, some small fibroids, depending upon their location in the uterus, can cause excessive or frequent bleeding. That also is an indication for removal. The decision really has to be made on firsthand knowledge of how large the tumor is, where it's located and what symptoms it's producing. Your doctor is in the best position to know these things, in your case.

The media, including television, radio, music, motion pictures and advertisements in magazines and newspapers bombard us with sex. This is one of the root causes of sexual promiscuity.

With that thought in mind, I asked the school board to consider his three-part plan for implementing a sex education program in the public school system. The plan includes: short range, intermediate range and long range goals.

Layer said he needs the help of concerned citizens to wage a clean-up campaign to convince the media to rid itself of offensive programs and advertisements. Newspapers which publish offensive advertisements and products should be boycotted "until this is cleaned up," Layer recommended.

He also recommended the Seminole County Medical Association accept responsibility for piloting a medical type informational program in the county's hospitals for the teen-age groups and individuals under its care.

The public health service should accept responsibility also for piloting a program through its clinics and in conjunction with all welfare agencies giving aid to dependent children, he recommended.

"Extra efforts from all of these organizations are needed for guidance on the family home front," Layer said.

Under the heading of intermediate goals, a sex education program would be developed by the school staff with the help of the medical association, ministerial association, health and social organizations and interested parents, Layer recommended.

The program would then be taught on a pilot basis through youth groups and church schools of each denomination and implemented by the ministerial association, he said.

"This means presentation of the program would dispel any apprehension that the school system might not present the program in the proper light according to their individual beliefs," Layer said.

The Seminole County Chapter of the Florida Alliance for Responsible Parenting is pushing the school board to implement a mandatory "family living" curriculum in the public schools for students from kindergarten to 12th grade and includes sex education in its proposal.

Layer said the school system would "go to bat" with a kindergarten through 12th grade program if all the agencies and parents "do their part."

Layer Urges Media 'Sex' Boycott

BY SHARON CARRASCO
Herald Staff Writer

As a prerequisite to implementing a sex education program in the public schools, Seminole County School Superintendent William F. Layer today called for a boycott of all media carrying offensive advertising and products "until this is cleaned up."

Layer's statement is contained in a written recommendation released today on his position of implementing a sex education program in the county.

Layer, who made his recommendation verbally at the March 29 school board meeting, was asked by a board member to prepare his recommendation in written form for other board members to study. The recommendation, in which Layer elaborates his position, will be placed for consideration on the April 11 agenda for board action.

Last week, Layer told the school board a sex education program could not be implemented in the public schools without first cleaning up the environment in which the students must live. He blamed the media for exploiting sex and said it was the main

contributor for promoting sexual promiscuity.

"The media, including television, radio, music, motion pictures and advertisements in magazines and newspapers bombard us with sex," Layer said. "This is one of the root causes of sexual promiscuity."

With that thought in mind, Layer asked the school board to consider his three-part plan for implementing a sex education program in the public school system. The plan includes: short range, intermediate range and long range goals.

Layer said he needs the help of concerned citizens to wage a clean-up campaign to convince the media to rid itself of offensive programs and advertisements. Newspapers which publish offensive advertisements and products should be boycotted "until this is cleaned up," Layer recommended.

He also recommended the Seminole County Medical Association accept responsibility for piloting a medical type informational program in the county's hospitals for the teen-age groups and individuals under its care.

The public health service should accept responsibility also for piloting a program through its clinics and in conjunction with all welfare agencies giving aid to dependent children, he recommended.

"Extra efforts from all of these organizations are needed for

guidance on the family home front," Layer said.

Under the heading of intermediate goals, a sex education program would be developed by the school staff with the help of the medical association, ministerial association, health and social organizations and interested parents, Layer recommended.

The program would then be taught on a pilot basis through youth groups and church schools of each denomination and implemented by the ministerial association, he said.

"This means presentation of the program would dispel any apprehension that the school system might not present the program in the proper light according to their individual beliefs," Layer said.

The Seminole County Chapter of the Florida Alliance for Responsible Parenting is pushing the school board to implement a mandatory "family living" curriculum in the public schools for students from kindergarten to 12th grade and includes sex education in its proposal.

Layer said the school system would "go to bat" with a kindergarten through 12th grade program if all the agencies and parents "do their part."

"There is a special need for this phase of the program because of the incidence of repeated teen pregnancies as shown by the following: Of 215 teen pregnancies, 99 were first-timers, 69 were second-timers, 21 were third-timers, 15 were fourth-timers and 11 were pregnant for the fifth time," Layer said.

If, and only if, the media upgrades its programs and advertisements and the pilot programs have been shown to be effective, Layer said the school board should consider implementing a mandatory "family living" curriculum in the public schools on a voluntary basis. He said he hadn't determined which grades would be offered the program.

The Seminole County Chapter of the Florida Alliance for Responsible Parenting is pushing the school board to implement a mandatory "family living" curriculum in the public schools for students from kindergarten to 12th grade and includes sex education in its proposal.

Layer said the school system would "go to bat" with a kindergarten through 12th grade program if all the agencies and parents "do their part."

HOROSCOPE

BY BERNICE BEDE OBOU

For Tuesday, April 3, 1979

YOUR BIRTHDAY
April 3, 1979

This coming year several lucky breaks will give you the opportunity to complete projects you've had on the drawing board for a long time. Once completed, you'll be able to do many new things.

ARIES (March 21-April 19) It may come as a surprise to you today when someone who usually doesn't pay you too much attention is sure to find out more of what lies ahead for you from now until your next birthday by sending for your copy of Astro-Graph Letter. Mail it for each to Astro-Graph, P.O. Box 480, Radio City Station, N.Y. 10101. Be sure to specify birth signs.

Taurus (April 20-May 20) Someone older or more experienced may point out a direction for you today, and bring you new hope toward getting something you'd like to have.

Gemini (May 21-June 20) Continue to give your responsibilities top priority today. You will receive more satisfaction in achievement than through frivolous pleasures.

Cancer (June 21-July 21) You have a good chance to sell those ideas or plans you've been trying to promote. Your approach today is creative and practical.

Leo (July 22-Aug. 22) A friend is going to jump into the picture today and show you how to get something you've been wanting badly. Listen to him, though the way may not be easy.

Virgo (Aug. 23-Sept. 22) You have a chance today to make a big hit with one who doesn't know you very well, drawing business to you. Be cooperative and helpful.

Libra (Sept. 23-Oct. 22) That's extra push you need to get you out in front of the pack will be forthcoming today. You'll cross the finish line first after all.

Scorpio (Oct. 23-Nov. 21) If you allow experience to guide you today, everything should come out just the way you want it to in the romance department.

Sagittarius (Nov. 22-Dec. 21) Involvements where you share a material interest should be given full attention today. Worthwhile gains will come of it.

Capricorn (Dec. 22-Jan. 19) The timing is good today to make a request of someone who doesn't grant favors easily. This person will be in the right frame of mind and will come through for you.

Aquarius (Jan. 20-Feb. 18) It's a good day to clean out those closets or to tackle the attic. You may even discover a few valuable misplaced or forgotten items.

Pisces (Feb. 19-March 20) A social gathering could bring you together with someone who has been hard for you to reach. Use this opportunity advantageously.

Sheriff's Lieutenant Hit With Suit

BY SHARON CARRASCO
Herald Staff Writer

A Fern Park man, his wife and daughter are suing a lieutenant of the Seminole County Sheriff's Department for damages incurred for alleged false arrest, false imprisonment and assault and battery.

James and Jimmie Harvey and daughter Crystal Bunn Anderson of Fern Park filed several complaints last Friday against Lt. Charles Coffee for his alleged actions on May 11, 1978. Sheriff John E. Polk, who was not involved in the incident, has also been named as a defendant in the civil suit. The action was filed in the Seminole County Courthouse, Sanford.

In the suit, the Harveys claim they were arrested by Coffee without probable cause on May 11, 1978. The parents were taken to the Seminole County Jail while the daughter spent several hours in the Seminole County Juvenile Detention Center, which was dropped in court.

As a result of their alleged false arrest and false imprisonment, the Harveys claim they suffered "great inconvenience, discomfort, mental pain and suffering, humiliation, shame, public ridicule, disgrace, loss of time from their normal pursuits and injury to personal and professional reputations."

The Harveys claim their arrests were "malicious and willful" by Coffee who was bitter because other charges against the family were dropped in court.

Prior to May 11, 1978, James and Jimmie Harvey were arrested by Coffee for resisting an officer without violence and resisting an officer with violence according to records. Circuit Judge Anthony J. Rosenman Jr. dismissed the charges against the couple on July 31, 1978.

The Anderson girl also was charged by Coffee prior to May 11, 1978 with resisting an officer without violence. That charge was dismissed Sept. 7, 1978.

The Harveys also claim they were assaulted by Coffee while they were being detained at county jail on or about May 11, 1978. James Harvey said Coffee allegedly struck him with closed fists and a slapstick while he was handcuffed and held by another police officer.

While she was talking on the telephone, Jimmie Harvey claims, Coffee allegedly punched her in the abdomen without provocation.

All in all, the Harveys family's complaint contains eight separate counts against both Coffee and Polk. For each count, the Harveys are asking the court in excess of \$2,000 for compensatory and punitive damages.

Win At Bridge

BY OSWALD JACOBY
Herald Staff Writer

A New Jersey reader wants to know who invented the weak jump overall.

The bid was first used by Oswald Jacoby in 1931. It became a tool for a few experts in the early '30s and today is in common use and also is employed by many average players.

Seminole County Commission Okays Senior Facility \$\$\$

BY DONNA ESTES
Herald Staff Writer

The 15.5 acres of the city of Casselberry has been trying to purchase on Sunset Drive as a site for a future city hall, civic center and senior citizen complex has been sold to another buyer, Mayor Bill Grier said today.

But that doesn't mean another site will have to be purchased for the senior citizen building, Grier said. The mayor said during negotiations for the purchase of the property, the buyer whose bid was accepted Monday offered to sell the city four acres of the tract, at the price he paid for the complex site. The buyer's name was not available from the city.

Grier said when the city offered \$225,000 for the parcel it knew there were two other interested buyers. One of those offered \$250,000 for the property and posted a required \$25,000 deposit by the 5 p.m. deadline Monday.

In addition to the four-acre site on Sunset Drive, Grier said Planning Technician Bruce Furio is looking at maps to find if other properties are available in the vicinity.

County Commissioners, with Commissioner Dick Williams absent, voted 4-0 this morning to commit \$25,000 in funding over a two-year period as part of the matching funds necessary for a federal grant to build a senior citizen complex.

The commission agreed that the city of Casselberry will be the applicant for the grant and fully responsible for its use. The grant would be policed by the East Central Florida Regional Planning Council. Mowbray said, and Casselberry would be responsible for the funds if it breached the contract by allowing groups other than senior citizens to use of the facility.

If there were cost overruns in the construction, Mowbray said, the city would have to fund those overruns. "Federal grants do not tolerate overruns," Mowbray said, and none is expected.

Commissioner Bill Kirchhoff, questioned Mowbray about whether it is a requirement of the grant to have Project OASIS, Congregate Meals and Stepping Stones geriatric day care under the Seminole County Mental Health program at the facility.

Mowbray said it is not and the organizations were only mentioned as a way to assist the city in the payment of utility expenses. He said however there would have to be services for seniors at the complex such as social security and medical information.

Kirchhoff also told the senior

Nuclear Reactor Plant Core Appears To Be Damaged

HARRISBURG, Pa. (UPI)—Federal officials today cautiously expressed hope that the worst is over in the Three Mile Island nuclear crisis but said the reactor's core appeared to be damaged badly enough that it may have to be scrapped.

A Nuclear Regulatory Commission official said preliminary indications suggest most—and probably all—of the 2,000 metal-covered uranium fuel rods that make up the core were irreversibly damaged in the accident that launched the nation's worst nuclear power emergency last week.

Normally, one official said, only one-third of a reactor's core would have to be replaced each year to add new fuel. But at Three Mile Island, he said, the intense heat from the accident appears to have knocked out the entire core.

"The core appears to be damaged to the point it would not be re-usable," the official said.

Events surrounding the Three Mile Island crisis have prompted a quiet cascade of legislation that residents of the four counties around the plant, cut business by one-half in some stores and caused restaurants to close early in the evening

instead of late at night.

NRC teams have gradually raised their estimate of core damage as the full dimensions of the Three Mile Island incident unfolded.

The first estimates said only 1 percent of the core was badly damaged, while estimates Friday said 30 to 40 percent of the core had been knocked out.

At first officials said some of the fuel rods might have melted. But new analysis led officials to believe the rods might only have split and twisted.

After more than five days on the defensive, engineers said they finally have taken the offensive in subduing the reactor.

They said radiation emissions from the plant this morning measured a maximum 1 millirem about 2 miles from the facility—one-sixth the amount of a dental X-ray—and most readings were close to the minimum detectable level, indicating there have been no new major releases of radiation since Friday.

Two separate events Monday—one planned and one a surprise—marked what Nuclear Regulatory Commission experts viewed as the turning point.

First, a large hydrogen bubble within the reactor suddenly and unexpectedly appeared to have shrunk to 6 percent of its original size for reasons not entirely understood by engineers.

Later, in a planned move, engineers began removing hydrogen gas from the reactor's castle-shaped containment building, a concrete cylinder 120 feet wide and about 220 feet high. Both promises to reduce the risk of potentially catastrophic hydrogen explosions.

"These two events put us on the offensive," NRC technical specialist Tom Elmer said early today. "That was when our people started thinking optimistically."

NRC officials have raised the possibility in background briefings with members of Congress that the Three Mile Island plant may be so badly contaminated it can never be used again, the Washington Post reported today. Sen. Gary Hart, D-Colo., said: "It might be a \$1 billion mausoleum. It might be more expensive to clean up the plant than it was to build."

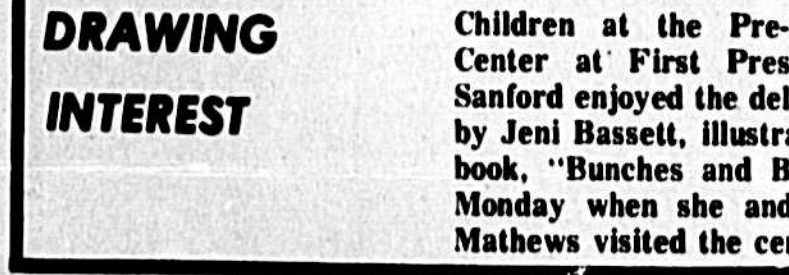

An NRC spokesman, talking about the reactor uranium fuel rods, said that special procedures might have to be devised for handling them. But with radiation drifting over the rolling Pennsylvania countryside, residents along the Susquehanna River were frightened.

WORLD IN BRIEF

Begin, Sadat Agree To Formally Open Borders

CAIRO, Egypt (UPI) — Israeli Prime Minister Menachem Begin and President Anwar Sadat of Egypt today agreed to exchange visits next month to formally open the borders between Egypt and Israel. Begin said he will go to the Sinai "capital" of El Arish May 27 — one day after it reverts to Egyptian control — and Sadat will visit the southern Sinai desert city of Beerbeha by helicopter the same day. Begin also disclosed that one month after the Egyptian Parliament ratifies the treaty — "probably next Sunday or Monday" — negotiations on Palestinian autonomy will begin in Beerbeha on the ministerial level.

Explosion Injures 10

FRANKFURT, West Germany (UPI) — A bomb exploded in an air mail distribution center at Frankfurt International Airport today, injuring 10 airline employees, three seriously, including one who lost his arm. The device exploded at 1:25 a.m. EST, five minutes after the workers, employees of Lufthansa Airlines, pushed a trolley carrying several bags full of airmail packages into the distribution center, a wing of the main terminal.

Spaniards Go To Polls

MADRID, Spain (UPI) — The left mounted a strong challenge today to centrist candidates aligned with Prime Minister Adolfo Suarez in the first democratic municipal elections in Spain in almost half a century. More than 26.7 million Spaniards were eligible to go to the polls in 8,041 cities, towns and villages where many holdovers from the Franco dictatorship still hold office. The biggest threat to Suarez's Democratic Center Union was a possible alliance between Communists and Socialists who together could outvote the UCD incumbent and elect left-wing mayors in the big cities.

Bhutto Stay Refused

ISLAMABAD, Pakistan (UPI) — An Islamic court today refused to stay the banning of Zulfikar Ali Bhutto while it hears an appeal based on the nation's new religious laws. Lawyers for the condemned former prime minister said they now hold no hope for the success of any further legal challenges. The Shariah Court asked the local attorney who filed the appeal, Mohammad Shafi Mohammad, to withdraw his request for a stay of execution. Shafi complied and immediately set out to file an amended application. No date was set for the hearing, according to Pakistan Press International news agency.

Film Director Killed

NAIROBI, Kenya (UPI) — American film director Gordon Parks Jr., best known for his film "Superfly" was killed today in the crash of his small plane in Nairobi, Kenya, 40 miles from the capital, Nairobi. Parks, 44, of New York City, was flying to the Masai Mara game preserve where he was directing location shooting of his latest film, "Revenge." Few details of the accident were available, but authorities said the plane crashed on take-off from Nairobi airport. Also killed in the crash was the pilot, Ted Gugish, the lead actor in the film; Myles Burton of Kenya, and the cameraman Peter Gilliland, also of Kenya.

\$230,000 In Dresses Stolen

PARIS (UPI) — Thieves broke into the car of Norwegian-born Paris couturier Per Spook and stole his entire collection of fall and winter dresses worth \$230,000, police reported today. The thieves smashed the lock of the small pickup truck, disconnected the alarm system and fled with the steel containers holding the collection, police said.

China Breaks Treaty With Soviet Union

PEKING (UPI) — China's National People's Congress voted today not to renew its 29-year-old peace and friendship treaty with the Soviet Union. The vote came seven days before the treaty would automatically be extended for five years if neither side decided a year in advance to abrogate it. The official China News Agency said the Fifth National People's Congress voted unanimously to not renew the pact when it expires April 11, 1980. It said the decision was taken because "great changes have taken place in the international situation and that the treaty has long ceased to exist except in name, owing to violations for which the Chinese side is not responsible."

DOCTORS HAVE A DAY

When it comes to doing what the rest of the nation is doing, Seminole Memorial Hospital is no slouch. Recently the nation honored its physicians with a National Doctors' Day. So did SMH. Left to right are Charles Behtler, hospital administrator; Dr. John Schaeffer, orthopedic surgeon; Dr. Robert Gay, chief of staff; and Muriel Lehman, cafeteria worker serving free breakfast for doctors that day at SMH. Not to be outdone, the doctors' wives treated their spouses to dinner.

Graham Calls For Property Tax Freeze

TALLAHASSEE, Fla. (UPI) — Gov. Bob Graham urged the Legislature today to freeze property taxes, use "creative restraint" in disposing of a \$800 million surplus and avoid new programs that would fuel inflation. Addressing his first joint session as governor, Graham also gave an offhand endorsement to ratification of the Equal Rights Amendment and stuck by his unpopular proposal to end annual auto safety inspections. He prodded lawmakers to pass his \$14 billion budget and go along with a two-year property tax freeze that has

drawn strong opposition of the leadership because business, rather than homeowners, would set the bulk of the relief. His 40-minute "state of the state" speech contained little in the way of new or innovative ideas. In fact, he said the state has enough laws and government programs and should "assess more than 30 years of changes as we prepare to enter the new decade."

...Senior

(Continued From Page 1A) citizens steering committee, after Furino gave the names of Chicago persons who were "supposedly owners of the parcel," that research he had done showed the land was owned by a trust. The commissioner two weeks ago questioned whether the property was owned by a trust and if so who those trustees represented. Going over the single appraisal for the tract which the city had acquired, Kirchoff noted that comparable properties listed as a basis for the appraisal were all lakefront lands and in two instances were Orange County properties located 15 miles away. A portion of the Sunset Drive property is lakefront and some is under water. Kirchoff said it appeared the city was offering 40 percent more for the property than for other properties in the area have recently sold.

AREA DEATHS

WILLIAM MORRISON
William A. Morrison, 82, of 1904 Sanford Ave., died today at Lakeview Nursing Center. Born in Welford, S.C., he came to Sanford in 1941. He grew up at Clemson College, was a captain in U.S. Marines in WWI and joined the Ford Motor Company in 1919. He came to Sanford as co-owner of Strickland-Morrison Ford Co. He attended the First Baptist Church and was past president of the Sanford Kiwanis Club. He is survived by his wife, Mrs. Dorothy M. Morrison, of Sanford; two daughters, Miss Dorothy Morrison and Mrs. Margaret Hudgins, both of Sanford; and three grand-children. Burial funeral home-PA is in charge of arrangements.

JAMES SHARON
Former Sanford attorney James G. Sharon, 76, of 189 Manago Cove, Lonsburg, died Thursday. Born in Madison, he

Funeral Notices
MORRISON, WILLIAM A. — Funeral services for William A. Morrison, 82, of 1904 Sanford Ave., who died today at Lakeview Nursing Center, will be at 11 a.m. Thursday at the First Baptist Church, Sanford, with Dr. J. Ted Connolly officiating. Burial in Evergreen Cemetery. Burial funeral home-PA is in charge of arrangements.

House Ups Debt Ceiling

WASHINGTON (UPI) — Faced with the possibility of banks bouncing \$1 billion dollars in government checks already in the mail, the House has passed and sent to President Carter a bill increasing the ceiling on the national debt.

The debt bill, which merely allows the government to borrow to pay for debts already incurred, in recent years has become more and more embroiled in partisan politics and the argument over federal spending. The debt limit has been allowed to expire in the past without ill effects. But the Treasury said the situation was different this time because there was little cash on hand, two Treasury security issues were due for payment, and millions of Social Security and other retirement benefit checks and income tax refunds were in the mail.

Graham, a longtime supporter of ERA, devoted one sentence to the anti-discrimination proposal, apparently recognizing it is in deep trouble in the Senate. He said the bill has a "prestigious study commission" makes its recommendations in November.

NATION IN BRIEF

Carter Expected To Keep Nuclear Power In Energy Plan

WASHINGTON (UPI) — President Carter is expected to stress his view that nuclear power — despite the Three Mile Island accident scare — has a role in the nation's future when he outlines his new energy policy later this week. It also is anticipated that Carter's program will include steps for a gradual decontrol of domestic oil prices, possibly in combination with a recommendation for a windfall profits tax on oil producers. Press secretary Jody Powell told reporters Monday Carter has made all the major decisions relating to the energy problems, which have been aggravated by the interruption of the oil flow from Iran and rising prices from the Organization of Petroleum Exporting Countries. Powell said he expected Carter would deal with developments at the Three Mile Island plant near Harrisburg, Pa., "along with nuclear power and its role."

Teamster Strike In 3rd Day

WASHINGTON (UPI) — The Teamsters' strike-lockout with major trucking lines today reached its third day, equaling the duration of the union's only previous nationwide walkout and disrupting the auto industry and major freight delivery. In Boston, parents packed lunches for about 21,000 school children after the labor strike cut off delivery of their hot lunches. No new negotiating sessions were scheduled to resolve the impasse that began early Sunday morning when the Teamsters called a selective strike against 73 companies. The disruption quickly escalated when the industry instituted a nationwide lockout. The Teamsters' national negotiating committee of about 300 representatives of union locals was scheduled to meet Wednesday in Chicago.

'Aunt Jemima' Services Sot

MORRISTOWN, N.J. (UPI) — A memorial service will be held Saturday for Ethel Ernestine Harper, known to millions of Americans as Aunt Jemima, who died last week of a heart attack. Miss Harper, who, friends said, was in her late 70s, was driving along South Street when she was struck. She managed to pull her car off the road where she was found by police, slumped over the wheel. Miss Harper came to Morristown more than 30 years ago as a field executive for the Girl Scouts. She was involved in many civic activities with special emphasis on youth and senior citizens. During her long career, Miss Harper included among her credits an understudy role to the legendary Ethel Waters in South Pacific. She was in the Negro Flippers in the 1950s and a member of the singing trio, Ginger Snaps. For several years, she also hosted her radio program on WMTX in Morristown.

Police State Needed?

By United Press International
An authoritative petroleum newsletter says nothing short of a police state could keep the nation's service stations from charging prices in excess of federal ceilings, and a leading economist has called for World War II-style rationing to control prices at the pump. The Lundberg Letter, a private newsletter specializing in oil market analysis and statistical gasoline data published in North Hollywood, Calif., stopped short Monday of calling the practice "price gouging," but said its latest survey indicated more than half the nation's service stations are ignoring federal price ceilings. "By simple evidence, gasoline price controls are bankrupt," the letter said. "It would take a virtual police state to keep gasoline retailers within control limits."

'Our Janey' Chicago Favorite

By UNITED PRESS INTERNATIONAL
Democrat Jane Byrne, whose primary was called the biggest upset since Mrs. O'Leary's cow kicked over the lantern to start the Great Chicago Fire, was the overwhelming favorite to win today's mayoral election in the nation's second largest city. In the San Francisco area, four candidates vied to succeed the late Rep. Leo J. Ryan, killed in the ambush that led to the mass murders and suicides of Peoples Temple members in the Guyana jungles last November. A political outcast from the Chicago Democratic machine a year ago, Mrs. Byrne is now the party's "our Janey" and the odds-on favorite to defeat Republican Wallace D. Johnson.

Fire Site: Well-Kept Home

FARMINGTON, Mo. (UPI) — The Wayside Inn, destroyed by a smoky fire which killed 25 persons early Monday, was a well-kept boarding home and included veterans and mental patients among its 37 residents. "From the standpoint of patient care and of the physical facility, it is one of the better boarding homes I've seen," said David R. Freeman, director of the Department of Social Services. Freeman, who arrived at the scene shortly after the fire was extinguished, said the 42-bed home was inspected in December and its license was renewed in January. However, he said state laws regulating boarding homes are "wholly inadequate."

It's Not Funny Anymore

BOSTON (UPI) — An estimated 30,000 residents of the city's fashionable Back Bay section awoke this morning for the second straight day to noisier radios and alarm clocks silenced by widespread power failures. "I can take a joke," said Holly McGuire at the Copely Square subway station, one of the only electrified areas in the neighborhood because transit system has an emergency generator. "But two days in a row isn't funny." The lights dimmed, then died just before 11 p.m. Monday, 24 hours after the first blackout struck. The latest outage was confined to a smaller area, affecting 30,000 of the same 100,000 residents who lost power Sunday night. The latest blackout, like the first, was caused by an underground electrical fire, triggered when secondary power lines tried to take on the load of damaged cables.

Tools, Cash Stolen From Nursery

By MAX ERKLETTIAN
Herald Staff Writer
Thieves cut a chain link fence and crawled through an attic to get to the Howell Creek Nursery, Lake Howell Lane, Monday evening to take \$4,500 in checks and cash and \$400 in tools, according to Seminole County sheriff's deputies. The burglars cut a chain link fence on the south side of the nursery then broke a window to enter the nursery, said deputies. The thieves then went through a crawl space to get to an attic where the cash and checks were kept. The thieves then proceeded into the storage area where the tools were kept, according to deputies.

PLANTS TAKEN
Plants and plant hangers, valued collectively at \$500, were stolen from private homes in Longwood and Fern Park Monday, according to sheriff's deputies.

SEASON STARTS
Little League was in the air Monday afternoon in Sanford, where the season got underway with a bang. Brian Ashcraft of Atlantic Bank tags APX runner Jimmy Roche out on this play. For a complete rundown on all the games, see Page 8A.

valued at \$150, were taken from her home Monday, said deputies. DUCT, FIBERGLASS TAKEN
At Szabo, 58, Route one, Sanford, reported 40 pieces of fiberglass and an air conditioner duct, valued collectively at \$500, were taken from his home Monday, according to deputies. VANDALISM
Vandals tore down a sign at the entrance to the Sylvia Glade subdivision, located two miles west of 14 on State Road 46, Sunday and broke concrete blocks around a house under construction, according to sheriff's deputies. Hamp Horn, 53, of 3532 Gessamine Lane, Orlando, subdivision developer, reported the damage, said deputies. Total amount of damage was placed at \$5,000, according to deputies.

The Enemy Is Invisible

By PETER COSTA
UPI National Editor
The enemy is invisible. Unlike dragons or orcs, radiation cannot be seen and then shot down. You cannot dispatch a division to capture it. It seeps undetected by human senses through 4-foot-thick concrete walls and most metals and enters your body with the silence of sleep. But like all invisible enemies, its greatest strength lies in its effect on the mind: fear. In places with heretofore secure-sounding names like Three Mile Island, Crystal River, Indian Point, Rancho Seco and other, across America, residents now fear this invisible enemy, but cannot yet see its face. "There's an opposite of the China Syndrome. It's what I call the 'Chicken-Little' syndrome. Chicken Little is alive and well in America today," Lushbaugh said. But Lushbaugh does see a real risk if evacuation is necessary and not carried out with a measure of calm and orderliness. "It has a much greater risk than sitting still and letting the nuclear engineers get on top of that thing and try to fix it. "There could be traffic accidents. It's kind of like if you're in an apartment building and someone yells 'fire' and you jump from the 20th story, then find out there's no fire. That's pretty dumb," he said. Dr. Allan Goldstein of the Temple University psychology department in Philadelphia says the fear of radioactive fallout may affect people who are susceptible to what he calls an "agoraphobic" condition. "People who are called agoraphobic have a fear of being out alone — in lines and theaters, any place they can't exit quickly. "It's a relatively small and harmless amount so far, federal and state authorities agree. But Harold Denton, chief Nuclear Regulatory Commission official at the scene, said no plans have been made to get rid of extremely large amounts of radiation still hanging in the side of the reactor containment room. At a press briefing Monday, he called it a "long-term problem."

Some Problems Long-Term

HARRISBURG, Pa. (UPI) — Radiation seeping from the Three Mile Island nuclear power plant accident site has been pushed to one side by the need to halt radiation leaks that have seeped from Three Mile Island since the accident occurred there six days ago. The latest off-site radiation readings taken by the Energy Department showed a total exposure of 1,000-2,000 man-rems to a 10-mile radius of the plant site, and 10,000 man-rems to a 50-mile radius. The "man-rem" calculation multiplies the number of people exposed by the exposure each received. NIC and state officials believe the most serious health dangers, Clark Heath Jr., director of the Chronic Diseases Division at the federal Center for Disease Control in Atlanta, said there was still a risk. "Any radiation poses some health hazard," he said. "We would assume that any radiation has some potential for genetic damage. We are exposed to background radiation from the sun all the time. It is a matter of how much and over how long a time."

Putting it another way, 0.15 extra cancers could be expected in the population within a 10-mile radius of the plant because of the Three Mile Island accident, Gersky said. He noted that 0.15 did not even constitute one person in the territory. Despite the notices that low-level radiation will cause minimal health dangers, Clark Heath Jr., director of the Chronic Diseases Division at the federal Center for Disease Control in Atlanta, said there was still a risk. "Any radiation poses some health hazard," he said. "We would assume that any radiation has some potential for genetic damage. We are exposed to background radiation from the sun all the time. It is a matter of how much and over how long a time."

Economy Gets Jolt; Sales Down

HARRISBURG, Pa. (UPI) — With tens of thousands of worried residents fleeing the Three Mile Island nuclear accident zone, the Susquehanna River Valley's economy is being jolted by a loss of commercial sales. Some merchants said business was off at least 50 percent. Most banks were closed over the weekend when they opened Monday thousands of depositors queued in lines all morning to take money out of their accounts.

FREE SPRING REFUSE CLEAN-UP

The Sanford Public Works Department will be conducting a City Wide Clean-up beginning April 1, through May 15, at no cost to the property owner. A Special Pick-up will be made on a call basis; first call, first served. City will pick up anything placed at the normal pick up point. Call Public Works Department, 322-3141 ext. 231 Monday through Friday 8:30 A.M. to 5:00 P.M.

Reds, Giants In Season Opener Wednesday

CINCINNATI (UPI) — The National League season opens Wednesday when the Cincinnati Reds, minus a quarter-century of experience without Pete Rose and Sparky Anderson, entertain the San Francisco Giants, an improving club that some pick to win the NL West this year.

For the Reds, the opener means they will begin learning if they are a better or worse ballclub without Rose and Anderson. For the Giants, the new year is a chance to turn a surprisingly strong 1978 season into something even better — maybe a Western Division title. Cincinnati, the oldest profes-

sional baseball team, is the traditional host of the NL opener. Umpires figured to boycott the game if there was no last-minute settlement in their contract dispute with the league.

The National League has made provisions to have some kind of umpires at the opener," assured a Reds official said. "Where they're coming from, we just don't know."

Umpires from local amateur leagues figured to be called in. Wednesday's pitching matchup was a dandy — San Francisco sending Vida Blue (10-10 last year) against Cincinnati's Tom Seaver (16-14).

The Giants also have a lineup change for opening day — 26-year old Mike Ivie has beaten out 41-year old Willie McCovey for the starting first base job. Manager Joe Altabelli said the decision really wasn't difficult.

"It had to be Ivie," he said. "He's a potential superstar." Skili, McCovey, who says he's willing to accept any role on the team, figures to do a lot of pinch-hitting and some starting on a spot basis.

George's Stuns Flagship Bank

Atlantic Bank, Prosser Nab Wins

Galley at second for George's

Chad Braden hurled a five-hitter, striking out 10, and paced his team at the plate with two official at bats and scoring three runs.

Bruce Sellers slammed a double and two singles and scored three runs and teammate Andre Williams slapped three singles and scored four runs to pace Jack Prosser Ford to his win over Seminole Petroleum.

The game was shortened to 3 1/2 innings due to the slaughter rule.

On the opening day games, Atlantic Bank downed American Producers Exchange (APEX), 9-4, while Jack Prosser Ford blasted Seminole Petroleum, 20-7.

A one-out triple by Errorc Knight in bottom of the first, coupled with an error put Flagship Bank in front with an early 1-0 lead.

Braden unloaded a double after Eddie Barres and Scott Carter slapped back-to-back one-out singles in the third inning, and George's went in front, 2-1. The lead was stretched to 5-1 with three runs in the top of the fourth.

Lee Charron doubled and scored in the bottom of the fourth for Flagship Bank, but George's matched it with a single tally in the top of the fifth.

Flagship Bank pushed three runs across the plate in the bottom of the fifth to pull to within one run, but Braden put an end to any hopes of a comeback by striking out the side in the bottom of the sixth.

Knight was three for three to lead Flagship Bank at the plate. Brian Ashcraft went the distance for Atlantic Bank, scattering four hits and striking out seven to record the mound

By MILTON RICHMAN

Irony To Rosenbloom Death

NEW YORK (UPI) — A grim piece of irony connected with Carroll Rosenbloom's death was that he generally had a lot of people around him but he was swimming all by himself when he drowned in the surf at Miami Beach Monday.

Now that they have said goodbye to their old coach, Chuck Fairbanks, the New England Patriots will be saying hello to their new one in another week or even sooner. The Sullivan, Billy and his son, Chuck, who run the Patriots, lean toward college guys — that's where they got Fairbanks — and the man they were taking a hard look at is John Robinson of Southern California.

It could happen if Jacques Courtois, the current president of the defending Stanley Cup champions, goes through with his threat to quit. Courtois is upset over the recent NHL-WHA realignment.

Specifically, he is unhappy over the way Molson's Beer, which owns the Canadiens, dictated the way he should vote in the NHL's absorption of the four WHA clubs. Molson's beer sales in Quebec City, Edmonton and Winnipeg nosedived sharply because hockey fans in those WHA cities were angry that the Canadiens were looking to keep them out of the NHL. Seeing their product boycotted, Molson officials instructed Courtois to change his vote to "yes" in Chicago 10 days ago. Reluctantly, he did, and then told some of the NHL's Board of Governors he planned to resign.

Among things which disappointed Peter Rose about his departure from Cincinnati was that he never received a single note or letter from any of his ex-teammates telling him how they felt about his leaving.

Wednesday being Opening Day in major leagues reminds me of how Hall of Famer Bob Feller traditionally would get murdered by the hitters all spring long and then more likely as not go out there and pitch a no-hitter or one-hitter in the opener for Cleveland.

When Mark Fidrych reported to the Tigers this spring, he wanted a room with a small cooking stove in the Florida hotel at which the club was staying. He talked to Jim Campbell about it and the Tigers' President and General Manager arranged that for him. A day or so later while shopping in Jim's outfit, Fidrych executed a tremendous but unnecessary dive for a sliding liner. Fortunately, he didn't hurt himself but he got Campy's "You dumb son-of-a-bitch." Campbell said to him, "If you care of your room for me, but if you ever dive for a ball like that again, I'll put you in a dungeon. Don't you realize what you could've done to yourself?" Fidrych knew he had pulled a rock. "Yeah, yeah," he agreed with Campbell, "I thought about it while I was in the air."

There's Help For Abused Women, Kids

DEAR ABBY: I just left a shelter for abused women and I'm starting a new job and a new life.

Abby, please tell women who are being abused by their men that there is help, but they can't get it alone.

Get to a shelter where you're safe! Take your children with you. Don't call him. He'll only put out his hooks to get you to come back. You'll hear his same promises to get counseling or to go to A.A., which will promptly be forgotten once you're home and under his control again.

Don't let your children grow up thinking this is a normal way of life. Children of abusers become abusers themselves. Don't believe that a bad father is better than no father at all.

The end of battering is death, either of the body or of the soul. There's help out there. Get it before it's too late!

I spend more than an hour each morning driving my child to a day care center and then driving to work. I'm up before 6 a.m. and drop into bed exhausted every night. But it's worth it. I'm now free of abuse and beginning to enjoy life again.

DEAR ABBY: I'm not a shelter for abused women in every community — but I hope one day there will be.

DEAR ABBY: You missed the boat when MIDGE asked if he should tell her his real name. MIDGE is a name that should be kept.

Wall Home Runs Key Auto Parts

Lloyd Wall hit two home runs and a pair of singles Monday night to lead Oviedo Auto Parts to a 15-5 thrashing of Howard Mobil in the Metro Softball League in Sanford.

Dave Richards and Albert Morton each had three hits for the winners while Rick Dearborn, Carroll Yates, Pete Holden and Bob Hood had two hits apiece for Mobil.

In other games, Don Causeaux battered and Rick Grant added a homer, triple and single while John Boggs had three singles as AAA Cooper Transportation socked it to Cardinal Industries, 17-2.

And Phil Spake had a homer and two singles and Charlie Getchen had four straight hits to lead Orlando Helicopters past Deltona Bar, 19-9, despite a homer and two singles by the losers' Freddie Washington.

DEAR ABBY: I just left a shelter for abused women and I'm starting a new job and a new life.

Abby, please tell women who are being abused by their men that there is help, but they can't get it alone.

Get to a shelter where you're safe! Take your children with you. Don't call him. He'll only put out his hooks to get you to come back.

DEAR ABBY: I'm not a shelter for abused women in every community — but I hope one day there will be.

'Great Citizen' Earns A Distinguished Award

By ELDA NICHOLS Herald Correspondent

Charlie Wales of Fern Park has been feeling "pretty rocky" from a recent bout with arthritis.

However, he's sure this setback will soon pass and he'll be out once again working in his ferneries.

A familiar figure in the area since 1928, Charlie and his wife, Louise, have been shipping ferns to retail florists in the North for many years.

His home and ferneries are nestled in a tree-shaded spot that appears unchanged from many years ago.

Charlie enlisted the aid of his long-time friend, Martin Andersen, former owner and publisher of the Sentinel-Star newspaper.

Charlie Wales displays award.

Then the good Lord stepped in. In we went to visit in Sanford and while there, I heard that Hibbard Casseberry was trying to sell some ferneries. I stopped by to see him. He wanted to go into the

gladiola business, so I worked with him for three years. Then I started my own business specializing in ferns.

Charlie hasn't been concerned all these years. He's very civic minded and was instrumental in the post of Chairman of the Board of Soil and Water Conservation District in Seminole County, retiring in 1977.

Andersen gave Charlie an assist in this project, also. Upon retiring, he received a Distinguished Service Award for his many years of dedicated service, and an accolade from Andersen, in a letter, stating, "You are a great citizen!"

Their dog, Jack, a huge Akita, not only guards their home, but can also look quite intimidating when riding in the car, filling the entire window with his bulk.

Looking back, Charlie smiled and said, "I used to have quite a temper, but this arthritis set me back a little. You know, when I first arrived here, there was only one house between here and the church in Maitland. Now, with all the traffic and building going on, I just think, 'Well, must be another bunch' of tourists coming here!"

Engagement Carpenter-Roth

Mr. and Mrs. Albert J. Prunier of 1231 Wanda Lane, Deltona, announce the engagement of their daughter, Cheryl Ann Carpenter, to Daniel Frank Roth, son of Mr. and Mrs. Leroy F. Roth of 615 Hartley Lane, Deltona.

The bride-elect is employed at Manuel Jacobson's Dry Store, Sanford. Her fiance is owner of Leroy's Nursery and Unique Landscaping, Deltona. A summer wedding is planned.

Women's, Men's Roles Overlap

Think 1950. Could you imagine Clark Gable sewing on a button or Marilyn Monroe tuning-up a car? Never!

Now think 1979. Rosie Greer, the former football player, is doing needlepoint, and Janet Guthrie, the race car driver, entered the Indianapolis 500 last year!

Call it role reversal or call it freedom — stereotypes are out! Today is when women stayed home and cooked and cleaned and cared for the children. And men went out to earn a living. Today, more than 50 percent of all women over 18 hold jobs interests and new attitudes. And men are, too.

As roles overlap, women are choosing traditionally male-oriented products and vice versa.

For example, today's women have discovered that men's scented shaving cream is great for legs, and aerosol after-shave lotion is cooling and refreshing!

4 Days At Sea

MAYPORT, Fla. (UPI) — A man clinging to a piece of debris adrift in the Atlantic Ocean today is being pulled from the ocean by a Navy destroyer.
The man, identified as Santiago Vabuen, 41, of Miami, said he survived the shipwreck of the 36-foot cabin cruiser Escapade last Friday and then held on for his life to the inverted cabin roof of the capsized vessel.
According to the story placed together by Navy officers with Vabuen's broken English, the Escapade had set out from Miami for Bimini when both engines failed. The vessel began taking on water and sank after a few hours.

Early Gray Hair Is Inherited Trait

DEAR DR. LAMB—Can you please explain how hair turns gray and is there anything a person can do to avoid this? I am only 27 and find I have quite a few gray hairs now. I love my natural hair color and would like to avoid dying it, but hate the gray hairs. Could certain vitamins help this problem?

DEAR READER—There are two factors which contribute to gray hair. The first is just plain loss of pigment. Your hair color is dependent upon pigment that's formed from pigment cells just as the color of your skin is. The amount of pigment determines whether you have black hair, blond hair or red hair.

People tend to lose pigment as they get older, both from the skin and from the hair. Of course, there is a great individual variation in this. As you probably know, some people, when they get older, develop little brown spots or freckling on their faces in other areas of the skin. This represents a change in the function of the pigment cells which is to be expected in some people.

The same thing happens to hair as it grays, and you can have a variety of colors. Some hair may look darker than it did before and other is completely without pigment.

There are also gradations in between. The other factor is a complete satisfactory recovery from a heart attack. So there is no specific answer but I can tell you that anatomically and as far as sensory nerves are concerned, there is no reason why you cannot continue to enjoy a full and satisfying sex relationship.

HOROSCOPE

By BERNICE DEE OSOL

For Wednesday, April 4, 1979

YOUR BIRTHDAY
April 1979
Be sure to explore all avenues of opportunity, no matter how remote their possibilities appear. Something unusual, holding big promise, could unexpectedly develop this coming year.

ARIES (March 21-April 19) Before you throw in the towel today wait a bit longer and keep trying. There is a good chance events will suddenly reverse themselves in your favor. Getting along with other signs is one of the sections you'll enjoy in your new Astro-Graph Letter. Get yours by mailing \$1 for each to Astro-Graph Letter, Get yours by mailing \$1 for each to Astro-Graph, P.O. Box 489, Radio City Station, N.Y. 10101. Be sure to specify birth sign.

TAURUS (April 20-May 20) There is a problem brewing today among friends with whom you mix socially that might put you on the defensive. However, one you'd least expect to do so will prove helpful.

GEMINI (May 21-June 21) Do your best to quickly resolve any problem that may arise at home today, or you may have to face a chilly atmosphere for a time.

CANCER (June 21-July 21) If you are too set on your own ideas today you'll fail to hear the suggestions of another who is trying to help you—and who knows how well.

LEO (July 22-Aug. 22) Be extra prudent in management of your money and property today so someone else won't get you out if you get into trouble.

VIRGO (Aug. 23-Sept. 22) If you want to do at this time is stymied by something over which you have no control. Be patient. It will pass.

LIBRA (Sept. 23-Oct. 23) You will reconsider success today if you resign yourself to the fact that what you're working on may take some real effort on your part. Don't give up.

SCORPIO (Oct. 24-Nov. 22) You don't want to play it solo today, and you may push too hard trying to find people to help you today. Relax. An unexpected call is on its way.

SAGITTARIUS (Nov. 23-Dec. 21) Today's obstacle can be overcome if you're prepared to exercise a lot of stick-to-it-iveness. Don't give up the ship too quickly.

CAPRICORN (Dec. 22-Jan. 19) Consider a hasty exit if you run into individuals who have narrow outlooks and begin to rub you the wrong way. It's better than sounding off.

AQUARIUS (Jan. 20-Feb. 18) Just because someone is a friend doesn't mean you have to lend them something you know they may never return. Politely say, "No."

PISCES (Feb. 19-March 20) To gain the cooperation of the people today you may first have to listen to their plans and be willing to give them a try. If they fail, they'll try it your way.

WIN AT BRIDGE

By DONNA ESTER

trump trick and, furthermore, that once trumps are out, he is home with the bacon.

So South promptly plays ace and king of trumps. Sometimes the queen drops, but this time it doesn't, so South simply leads another trump. West takes his queen, but South is sure of the rest of the tricks.

The play was really elementary, but the bidding worthy of note. The hand was played in a fairly strong duplicate manner and only about 60 percent of the North-South pairs reached bridge game.

Federal \$ Grants Eyed By Sanford

By GEOFFREY POUNDS
Herald Staff Writer

The city of Sanford will be seeking \$14 million in federal grants over the next two years, primarily in the area of storm sewer drainage and housing projects, City Manager Warren E. Knowles said today.

Knowles said the funds sought include \$11 million for completion of a regional storm sewer drainage project. The remainder is being sought for housing assistance projects, he said.

Knowles released the information after city commissioners had requested a tabulation of outstanding grant requests plus an accounting of the total amount of federal funds received by the city over the past several years.

In addition to the sewer and housing fund requests, Knowles will be used to add sophisticated instrument landing equipment at the airport, he said.

In his report to the city commission Monday, Knowles said Sanford has been awarded more than \$51 million in federal funds since 1953. The breakdown includes \$38,382,354.29 for the construction, planning and improvement of the airport and \$9,345,193 in housing assistance projects.

"We have been very successful for a city our size," Knowles said. "Our record is one to be proud of."

City Commissioner John G. Morris said the commission had requested the report on grant funds "simply to see how we're doing." He said the request was for general information only and the report has no bearing on budget hearings scheduled to begin later this month.

Knowles' report to the commission noted that the \$9 million in housing assistance money dates back only to 1972. Also excluded from the total were some federal revenue sharing funds and CETA (Comprehensive Education and Training Act) funds paid to city employees.

"If a concern exists as to Sanford applying for or receiving a fair share of grants, I believe this figure (\$51,006,354.04) can speak for itself that there are few communities of 23,000 population that have received similar value from the federal programs," Knowles wrote in his report.

There is no indication of when the city may receive word of the \$14 million in requests.

Rules Panel Rejects ERA; Gordon Keeps It Alive

TALLAHASSEE, Fla. (UPI)—The Senate Rules Committee rejected the Equal Rights Amendment today, but a parliamentary move by the measure's sponsor kept it alive for at least one more day.

Realizing the amendment was certain to be killed in committee, Sen. Jack Gordon voted against it, putting him with the majority so he could move for reconsideration.

The multimillionaire Miami Beach banker had expected the reconsideration move would give him another week to lobby to get the amendment to the floor. But Rules Chairman Dempsey Barron, D-Panama City, leader of anti-ERA forces anticipated Gordon's strategy and scheduled a special rules meeting for Thursday to take it up for another vote.

Security was tight and the room so crowded that one reporter based on sex, is probably dead. But he also contended the vote on the floor must have been at least 20-30 or opponents would not have been afraid to let it out.

While a 20-30 vote would have defeated the amendment, it would have given supporters a chance to sway only one senator to change his mind.

Clerk Of Circuit Court's Office Increased Work Cited In Resignations

By DONNA ESTER
Herald Staff Writer

Four employees in the office of Clerk of the Circuit Court Arthur H. Bechtwilt Jr. have resigned over the past several weeks. Three of them are citing increased workloads without comparable increases in pay as the reason.

Two of the four worked in the juvenile division of the clerk's office and one of the four was in charge of the probate, mental health, juvenile and marriage license divisions for six years.

"With the growth of the county and the caseload which has increased, it has become so heavy, it got to the point where we needed more employees to handle the workload. I was not able to convince Bechtwilt to hire more staff and thought it should be done," Mrs. Walker said.

"I'm new mistakes and things would start showing up in the courtroom and decided I would resign," she said.

Vicky Brown, who had worked in the juvenile division for six years, said the workload of Bechtwilt's office for the past

6 1/2 years, said additional help was not hired even though the caseload in the juvenile division increased by 7,000 cases.

"Bechtwilt brought another girl in for me to train and I was to be her assistant," Mrs. Brown said.

From the probate department, Mrs. Doris Brady has resigned. "In my resignation I explained there was not much chance for advancement in the probate department," she said, adding she has worked for Bechtwilt for the past five years.

"He asked me to train a woman who was to be my supervisor," Mrs. Brady said.

Bechtwilt noted, however: "With 40 persons working in my office, we always have some openings. I would rather talk of the 95 percent of the employees who are staying here, working hard and giving Seminole County a good job."

"We have an adequate staff and Mrs. Walker has been replaced. She decided to resign. That's her problem," he said. Bechtwilt said his office is operating satisfactorily in all its departments. He declined further comment.

'A Collective Sigh Of Relief' Engineers Prepare Shutdown Of Nuclear Furnace

HARRISBURG, Pa. (UPI)—Freed from the threat of a catastrophic hydrogen explosion, engineers today prepared a cautious shutdown of the crippled Three Mile Island nuclear furnace and the crisis that has disrupted thousands of lives.

"We have to have a collective sigh of relief," said Gov. Dick Thornburgh today. "Although civil defense authorities kept precautionary evacuation plans on a standby status, Thornburgh indicated he thought such a mass evacuation would no longer be necessary."

"I'm glad we didn't have to test it out," the governor said in an interview on NBC's "Today" show.

Life in and around Three Mile Island gradually was returning to normal with most of the estimated 200,000 people who fled the area starting to trickle back home, despite continuing leaks of radiation.

The leak engineers now faced was to reduce temperature in the reactor from 289 degrees Fahrenheit to below the 212-degree boiling point and to simultaneously lower reactor pressure without further disturbing the reactor's fuel or causing new radiation leaks.

There was no estimate how long it would take to shut down the reactor.

Harold Denton, heading the Nuclear Regulatory Commission emergency team at the Three Mile Island site, said: "There is no hope of rapidly bringing the nation's worst atomic power crisis to a conclusion. But he said no more would be taken every precaution against (radiation) leaks."

Thornburgh, smiling broadly, told reporters Tuesday night: "The news this evening is better. I think we can build to a reasonable opinion that the prospects for a catastrophic event have lessened."

Still, Thornburgh's advised program remain and preschool children to stay out of the area within five miles of the plant and ordered schools in that radius to remain closed today.

The governor also took a tentative look to the future, which he said might be even more difficult in some ways than the task of coping with the crisis that has been so rapidly bringing the nation's worst atomic power crisis to a conclusion.

Marketing Blamed For Higher Prices

WASHINGTON (UPI)—While House inflation-fighter Alfred Kahn said today market forces are responsible for double-digit food price inflation and interference would only make matters worse.

He said a subsequent surge in government intervention removed contributed to a break in prices in 1974 and low prices which continued for the next three years. Producers then sold cattle and did not rebuild herds.

The situation will correct itself as higher beef prices encourage more livestock production, but government intervention to curb wild price fluctuations.

The government can monitor middleman costs particularly because of a surprising 3 percent increase in the farm to retail spread since recent, terribly painful in-October. Attention has been directed to poultry processing, the result of competitive market forces, interference cannot stop, beef.

He blamed a current beef shortage on a 1973 price freeze accompanied by high feed grain prices which encouraged producers to hold back beef.

'Uncle Joe' Dead At 76

PALM DESERT, Calif. (UPI)—Edgar Buchanan, one of the best known character actors in movies and television, died early today at Eisenhower Medical Center where he underwent brain surgery two months ago.

Buchanan, 76, was best known in recent years for his role as the garrulous Uncle Joe in the TV series, "Petticoat Junction." He also appeared in "Cade's County" and in more than 80 feature films, including "Shane," "McClintock," "Donovan's Reef," "Texas" and "Perry Sledge."

Doctors operated on him Jan. 29 to relieve pressure on his brain caused by fluids. He was returned to a similar operation three years earlier.

His death was announced by his son, Edgar Jr., who said funeral arrangements were incomplete. Buchanan also is survived by his wife, Mildred.

The younger Buchanan said his father died at 5 a.m. Buchanan was born in Humansville, Mo., March 20, 1903, and moved with his family to the mountainous back country of Oregon in 1910 where he lived on a homestead and fishing.

Buchanan attended dental school at the insistence of his dentist-father but developed an interest in acting and theater. He was a two-year scholarship in dramatics to Yale University but his father persuaded him to finish dental school.

In 1928, Buchanan met and married a classmate and the following year Edgar and Mildred Buchanan were graduated.

While practicing dentistry in Eugene, Buchanan acted in theater for two years before moving to Alhambra, Calif., in 1938. He resumed his amateur dramatic activities at the Pasadena Playhouse. It was in his eleventh play that he was seen by the Columbia Studios talent scout.

He once said, "The only time I'm happy is when I'm in front of a camera hammering it up."

Buchanan was summoned to Columbia and cast for the role of Judge Bogardus in the movie "Arizona."

This launched a career that continued until his death.
