

## Mexico May Have 'Juan Doughboy' Just Like Ours

Army Observers From Below Rio Grande Like What They See

LEBANON, Tenn., May 21. Juan Doughboy will be Mexico's counterpart Johnny Doughboy, if Mexican Army observers, sent here to witness Second Army maneuvers, have their way.

Focusing their interest on a mobile unit that supplies troops in the field with bread and pastry, the review became highly enthusiastic over three large wall tents containing three gasoline ovens and gasoline mixer capable of producing 2,500 loaves of bread a day.

"Your bread is delicious," said Captain (First Class) Ignacio Martinez Uribe. "And the way you turn it out!"

The Captain explained that the Mexican soldier receives a daily ration of two loaves of bread known as *bollo* (pronounced *bo-leyo*). It is twice as long as the average loaf of American bread, tapered at the ends with a furrow in the center, and is made of course wheat and leavening. "But we have facilities for making it in the field," Captain Uribe commented with the Mexican Quartermaster Corps, explained. "When we go out into the field, we take bread with us."

*Bollo* is an important staple item in the Mexican soldier's diet, Captain Uribe asserted. That he said was responsible for his enthusiasm over our dough making and mixing equipment.

Salt tablets, given to Second Army troops in the field to replace the deposits of salt which are lost in perspiration, also occupied the Captain's attention. That was something new to the Mexican Army observer. At first he believed that a little white pills handed to the soldiers contained ingredients which constituted a military secret. But when he heard that they were salt tablets, he was surprised.

No, he said in answer to a query, he had never given salt to our troops. Instead, he had them lemons or give them lemonade." Mexico, he revealed, has an abundance of lemons.

In addition, he revealed, the Mexican soldier receives a ration of oatmeal flavored with chocolate and "arroz con leche" (rice

and milk) to reduce his body heat during the torrid months.

Also, to add solider to Mexican rice sugar in the summer, in order to cut down the heat produced by the substance. "As a matter of fact," said Captain (2nd Class) Jose Gonzalez Garcia, his colleague, the Mexican soldier would probably receive more from him than Juan Doughboy's diet does sweet. "And strangely enough," he added with a twinkle in his eye, "since the inception of your rationing, it seems that you've put a double dose of sugar into everything but coffee and are ignoring that completely."

The lowering of the draft age and the vast increase in the armed forces are expected to make 1943 a banner year for marriage.

What's more, there's strong possibility that you'll be married in June, that it will be near his camp or station and that you'll support yourself.

Anyway, that's what the jeweler believe, and they have been busy preparing statistics. A tremendous post-war market business is anticipated when more than a million homes will be established after the war.

Girls may do temporarily without all the things they've dreamed of—an engagement ring, shiny silver fine china, a grand piano, etc. They may not want to give them up for good.

In Washington Cupid inadvertently aided the housing shortage by uniting over 40 percent more couples in 1942 than in the previous year. Even in nearby Baltimore, an aircraft production center, over 28 percent more weddin-

gs took place.

Large cities such as Chicago, Boston, Milwaukee, Youngstown, Akron, Columbus and New York all show a decrease in marriages because of the number of eligible men in service. In the south where there is a large concentration of army camps, cities such as San Antonio, Fort Worth, Dallas and Atlanta, with an anti-aircraft unit established in 1942, with increases of more than 50 percent over the 1941 marriage totals, while San Diego, the great naval training center, showed a marriage increase of more than 150 percent.

Two-thirds of the 1,800,000 brides of 1942 were married to service men.

German Tennis Star Captured In Tunis

ALLIED HEADQUARTERS NORTH AFRICA, May 21. Allied authorities announced yesterday that Baron Gottfried von Cramm, former German tennis champion, was among the prisoners captured in the Tunisian campaign.

A Davis Cup team star, Cramm was reported in advices from Berlin in August, 1940, to have been called to military service with an anti-aircraft unit.

(His last sports career was interrupted by a sentence May 14, 1938, to a year in prison on a morals charge; he was freed on parole after serving seven months. The United States later refused him a visa to enter 1939 competition at Forest Hills, Queens.)

OPA Orders New Ban On Pleasure Driving

WASHINGTON, May 21. (AP)—The Office of Price Administrator Wednesday night ordered a drastic new ban on non-essential driving in 12 Eastern States, the District of Columbia and eight Eastern counties of West Virginia and warned that harsh penalties—including denial of gaso-

line for the duration—would be invoked against violators.

The ban became effective at noon Thursday.

No cut in values of A, B or C ration coupons is involved.

Price Administrator Prentiss M. Brown said the drastic action was necessary because the available gasoline supply has hit "an all-time low" and must not be dissipated.

The miners, as we know, wanted more pay, to meet increased living costs. The owners, in war charge of the situation, was slow in ordering a boost. That was the signal for the mine workers, head, John L. Lewis, to decree strike measures whether to be considered as against the owners or the government, as an emergency ownership.

The discussion stalled. A strike was imminent. It promised to be of vital importance at a time like this.

The strain grew worse and worse.

The set-up was at the point of arriving at the busting point.

Interior Secretary Harold L. Ickes was in full charge of the government's case. John Lewis was in charge of the miners' cause.

Lewis and Ickes confabulated together into the innermost detail.

The very verge of a split was arrived at.

At that juncture, unexpectedly, John Lewis proclaimed a two-week truce.

It was a surrender, but certainly it was a miners' concession.

The notion was to give John Lewis and Harold Ickes time to agree.

If John had stayed ballyhoop to the final instant, it is understandable that President Roosevelt might have denounced him as an irresponsible—an anti-patriot of the first degree. But John didn't do that.

He declared that true. He agreed to talk further terms. Nobody expected him to yield 100 per cent, but it was obvious that he figured in yielding SOME.

That is the announcement that John had broadcast.

Twenty minutes later F. D. R. broadcast his denunciation of John.

If he had been a bit quicker about it, it would have been comprehensible—but a quarter of an hour! Is it imaginable that he did not know what John was going to say?

It also is hard to conclude that John Lewis was not in cahoots with Harold Ickes. John and Harold have been pretty closely hitched together in the industrial past. But Harold has been more radical than John has been.

Harold wants an entirely new sociology. He does not want any two classes. John wants a working class, as distinguished from another class. In fact, John divides them.

It is a new kind of society that the Ickes rearrangement is shooting at. Harold wants everybody just alike—employers and employees.

John's dope is that labor is better off with no such alliance. His theory is that the workers can protect their own interests independently, but that the owners are the slicker of the two as bargainers. Oh, rather, he holds that the employees,

when they make a bargain, stick to it; whereas he believes that the employers do not, as a general thing.

Nevertheless, John and Harold are economic friends.

Harold is more the sociologist; John is more the scrapper for the toilers' social rights—holding that man has demonstrated its ability to take care of itself, and more.

Presidents Roosevelt of the United States and Lewis of the United Mine Workers apparently cannot do so any more. Formerly they were on excellent terms. Today their relations are badly strained.

If either one is inclined to yield, it appears to be John. He at least declared a truce, after which F. D. R. denounced him.

Pending negotiations may explain matters somewhat.

Harold Ickes ought to be a valuable intermediary.

The natural intermediary would be Labor Secretary Frances Perkins, but she doesn't figure in this case.

## Chances Are Good For Marriage Vow Before End Of '43

By VIVIAN BROWN  
AP Feature Writer  
If there's a man lurking around your doorstep, or if you have a soldier sailor or marine in your correspondence line, what of Grammy's wedding dress, girls—the chances are hell propose this year.

The lowering of the draft age and the vast increase in the armed forces are expected to make 1943 a banner year for marriage.

What's more, there's strong possibility that you'll be married in June, that it will be near his camp or station and that you'll support yourself.

Anyway, that's what the jeweler believe, and they have been busy preparing statistics. A tremendous post-war market business is anticipated when more than a million homes will be established after the war.

Girls may do temporarily without all the things they've dreamed of—an engagement ring, shiny silver fine china, a grand piano, etc. They may not want to give them up for good.

In Washington Cupid inadvertently aided the housing shortage by uniting over 40 percent more couples in 1942 than in the previous year. Even in nearby Baltimore, an aircraft production center, over 28 percent more weddin-

gs took place.

Large cities such as Chicago, Boston, Milwaukee, Youngstown, Akron, Columbus and New York all show a decrease in marriages because of the number of eligible men in service. In the south where there is a large concentration of army camps, cities such as San Antonio, Fort Worth, Dallas and Atlanta, with an anti-aircraft unit established in 1942, with increases of more than 50 percent over the 1941 marriage totals, while San Diego, the great naval training center, showed a marriage increase of more than 150 percent.

Two-thirds of the 1,800,000 brides of 1942 were married to service men.

Here are two of the German generals captured during the grand climax of the battle of Africa. They are General Cramer, commander of all Panzer armies in North Africa, and Gen von Broich, commander of the Tenth Armored Division. Seventeen German generals and four Italian generals were captured in the final phase of the battle of Tunisia. It is reported that most of the captured Axis generals have been turned to England. U. S. And British Supplying Food In Middle East

## Essential Products Provided 80,000,000 Who Are Cut Off

WASHINGTON, May 21.—Essential supplies for 80,000,000 civilians in the Middle East who were cut off from sources in the Balkans and Burma by the war are being provided by the United States and Great Britain and by increased local production, American officials affiliated with the Middle East supply committee reported recently through the Office of War Information.

In the two years since establish-

ments of the supply center in the United States have sent to the Middle East 1,600,000 tons of grain, including 800,000 tons of wheat, 400,000 tons of fertilizer, 147,000 tons of cotton goods, 147,000 tons of sugar and 830,000 tons of other supplies. Of the sugar 88,000 tons were sent to the Red Sea area and 50,000 to the Persian Gulf. General supply shipments included 452,000 tons to the Red Sea and 184,000 tons to the Persian Gulf.

Palestine is producing chemicals for various parts of the Middle East, which previously import-

ed chemicals from other parts of the world. Egypt has increased her production of food so as to furnish rice and sugar to her neighbors. A factory has been estab-

lished in Cairo to crush oil seeds grown locally, saving im-

ports of vegetable oils from India and Ceylon. Canning plants are operating in Egypt, opening the way for expansion of the diet of the people of the Middle East by preservation of fish and vege-

tables.

The operation of the supply center embraces Egypt, Iraq, Iran, Syria and Lebanon, Trans-Jordan, Saudi Arabia, Ethiopia, Palestine, Sudan, Malta, Cyprus, Aden, British, French and Italian Somaliland and Eritrea.

252 Candidates To Graduate May 24 From University

GAINESVILLE, May 21.—(Special)—The University of Florida will close out its 1942-43 year on May 24 when 252 candidates for graduation expect to receive 255 degrees in a commencement program featuring Dr. Doak S. Campbell, president of Florida State College for Women, Tallahassee, speaker. Walter M. Turner of Sanford is among the graduates.

In a baccalaureate sermon on the preceding Sunday, The Right Reverend Joseph Patrick Hurley, Bishop of St. Augustine, will be the speaker.

Many of the young men to be graduated at this time are scheduled to go immediately into the armed forces of the country, some through various reserves in which they enlisted early in the year, some through the Reserve Officers Training Corps, and others through operation of the draft.

Three persons in this group are candidates for two degrees each. There are 239 candidates for bachelors degrees, nine for masters six for doctor of laws, and one for doctor of philosophy.

Among the candidates are:

St. Augustine—Clifford S. Athey, PPA; Raymond F. Cole, Jr., BCA; John A. Crookshank, Jr., BCE; ST. PETERSBURG—Francis H. Auersmann, BBA; Wilbert F. Canning, BBA; Robert J. Cummings, BIE; Lemuel E. Cunningham, BSA; Irving Cygan, LIA; David W. Miller, BSA; Charles M. Phillips, Jr., BA; David M. Walker, BBA; Randolph T. Wedding, BSA; SANFORD—Walter M. Turner, BSA; Edward A. Long, BPA; SARASOTA—Merton L. Augustine, LIA; Randolph Y. Metheny, LIA; BSA; STUART—Howard N. Ehr, BME.

ORLANDO—William L. Price, B.A.; George H. Wenzel, Jr., B.A.; OTAWA—Herbert A. Huntress, BSA; ORLANDO—Hartwig Achenthal, B.S.; Robert J. Bishop, L.I.B.; Audine A. Caruso, BSA; Bennett A. Dominick, Jr., BSA; Harry W. Goforth, BBA; James C. Robinson, B.A.; Louis C. Trapp, BBA.

The concertina was invented by an Englishman in 1822.

**We Are the Builders of Ships**  
(From The Washington Post)

We are builders of ships, the  
dreamers of steel, the  
makers of strength and courage of  
invincible hulls.

Ours is the task of the bow, the  
set of the keel,

And the salt wind thrill of a  
thousand harbor gulls.

Circling above the shipyard  
gloves the waves.

With the ships are building  
and a thousand riveting guns.

Reat at the steel ribs, where the  
blue star rays.

Burn from the welding torch  
and the hot steel runs.

The length of a transverse bulk-

head. We are the might.

Bashed, bended, broken, of hot  
channel, I-beams, angles,

plate bangers, tough

Organized babies who can glory  
in the spangled banner. On  
the afar-off banner. On  
the some distant sky.

When the gray ships go down, it  
lives who die.

**KINGSLEY TUFTS**

A car of watermelons sold  
the other day in Louisville for \$1,000.

We are where the swimming  
pool is going to be dedicated  
Tuesday. But it's one up in Jack-  
sonville.

That's a bad flood they're  
having out in the middle west all  
right, but thank heaven our floods  
are not bomber made.

The ban on secret societies in  
Florida's public schools has been  
passed and is now the law of  
the land. So hereinafter secret  
societies will of necessity be ac-  
cepted.

A new ban on pleasure driving  
has been decreed by Secretary  
Ike. In the 12 eastern states  
the idea seems to be that if you  
want to drive your car for fun,  
you must go to Mr. Ike's home  
state of Illinois.

"If Ike says it's going to get  
his African empire back, then  
African empire in Sanford, Fla.  
old. Anytime he wants a one  
way ticket to Adis Ababa, he can  
charge it to Halle Selassie.—  
Times Union.

John L. Lewis wants to get  
the United Mine Workers back  
some of their former respecta-  
bility by joining the American  
Federation of Labor. Perhaps he  
is tired of being a "lone wolf." Or  
maybe he wants to have some  
influence in next year's presiden-  
tial election.

Why is it that every negro  
who gets into trouble these days  
for stealing, driving while drunk  
or disorderly conduct, has to be  
treated as a Negro? Could they  
be wearing a pair of overalls just  
as well, or a business suit. Somehow or other, a suit  
seems to demand another  
ten days on their sentence.

Well, Governor Leinen's cigar-  
ette tax bill has passed both  
houses of the legislature so after  
the first of July you will be pay-  
ing three cents a package more  
for every package you buy. But  
when you pay it, just remember  
that the three cents goes to  
pensions for the old folks,  
the rest comes back to the county  
in which you live.

Fred Dorner, back from Cleve-  
land, where he has been work-  
ing in a shipyard, is pleased  
to announce that the movement  
of Farmers' Market, a million  
dollar concern, which he  
had such an important part in  
building a few years ago. And  
reminds us that the old  
plant had been built in  
the interest of the community.

Complimenting Mrs. Roland  
Jones and Mrs. Ralph Austin  
with the latter's mother, Mrs.  
Mabel, is another of the  
many new members of the  
Women's Auxiliary of the Or-

**Sunlit Matrimony**

Dilworth Lupton, newspaper columnist with twenty  
years in the ministry behind him and unusual opportunities  
to study humanity, is alarmed by the news that in some  
areas divorces are being granted faster than marriages.  
He is in a position to give advice on making marriage  
last.

First, he says, "the couple should not rush blindly  
into marriage but be intelligent. Courtship should have  
plenty of sunlight as well as moonlight."

He wants them to marry "with a mind set for per-  
manence," prepared to endure difficulties together as well  
as joys. Marriage should be launched with a religious  
ceremony, not cheapened with a hasty, tawdry visit to an  
unkempt office of a justice intent only on the fee. The  
religious service gives dignity and a sense that the marriage  
is supported by family, church and state.

Third, marriage should be based on real comradeship.  
In the long run, marital happiness does not depend pri-  
marily on money, health or sex, but rather on good fellow  
ship." Not merely that of dances and movies, but that  
which faces bravely all the exigencies of life.

Last is to remember the vow to honor each other.  
Marriage needs respect, mutual support, encouragement  
as well as affection. Husbands and wives must be tolerant  
of each other's blunders, of the need for privacy, should  
know that every human spirit contains a sanctuary into  
which no other living being can enter.

If the boys and girls now merrymaking in droves would  
stop to think of these points, they might turn the tide  
against hasty marriage and hasty divorce, into permanent  
solid matrimony.

**How Old Is An Egg?**

Here's an experiment with eggs and geometric angles.  
Better to find out whether your egg's fresh before you eat  
it than afterward. Put your egg in a solution of 13 cup  
salt and 23 cup of distilled water and you can tell  
its age this way:

If the egg's fresh (1 to 36 hours old) it will lie  
horizontally in the bottom of the pan.

If it's from 2 to 3 days old, it also sinks but just  
below the surface of the solution, with larger end rising  
lightly.

If it's from 4 to 5 days old, there's more tendency  
of the larger end to rise.

End of the 5th day: The long axis of the egg (the  
imaginary line drawn through the center lengthwise) will  
stand at an angle of 20 degrees from the horizontal.

End of the 8th day: The egg's angle is about 45 de-  
gress.

End of 14th day: Egg's angle is about 60 degrees.

End of 21st day: Egg's angle is about 75 degrees.

Four weeks old: The egg will stand at a right angle  
(small end down), from the bottom of the pan.—Collier's

**Thriftlessness**

Next to the war, money is probably the biggest prob-  
lem in this country. There is too much money in circula-  
tion. It is not the "root of all evil" but it gets many  
people into trouble especially the young, and people of  
whatever age who have not been used to earning so much.  
Fifty or sixty dollars a week, or more, seems like a stream  
of wealth pouring down from heaven. There is a natural  
tendency to feel and act as if that celestial stream would  
keep on pouring forever.

But it will not. Sooner or later the easy money will  
dry up. Then some millions of boys and girls and men  
and women will realize how foolish they have been.

Wild spending is not only foolish but dangerous. Dol-  
lars spent wildly puff up prices and make living harder  
for other people, and threaten the value of all money.  
Inflation may be as destructive as war. Saving money now  
instead of wasting it is a patriotic duty that helps to win  
the war, and provides a stake to carry on afterwards.

**Ever Been Swimming With A Horse?**

Dr. John Fawcett Edwards isn't being facetious when  
he poses that question in an article in Your Life magazine.  
It sounds like a foolish question," the writer admits, "but,  
leaving out any fancy tricks, the horse will swim better  
than the capable human swimmer, and, besides, will have  
the good sense not to get water in its ears. Even in a  
rainstorm, a horse holds its ears so that not a drop of  
water can run into them. Mr. Horse is taking perfect care  
of some things which we humans often neglect!"

The physician points out that water, no matter how  
pure, may cause damage to the hearing apparatus through  
the pressure encountered in diving, even though the  
swimmer escapes actual infection. As a preventive he sug-  
gests the use of cotton wads well loaded with vaseline and  
packed into the ears.

**SANFORD TWENTY YEARS AGO**

The Hastings Herald says that  
about 2,000 carloads of potatoes  
have been sent from that section  
this season.

New York—Lois Angel Flipo,  
South American heavyweight, yes-  
terday, signed articles with Tex  
Willard, Fred J. Stark, Charles Britt,  
Charles Britt, Clarence Mahony,  
Andrew Lees and Harry Walsh  
have returned to Jacksonville  
where they attended the K of C  
Convention.

Little Miss Lucille Cameron was  
the charming hostess yesterday  
afternoon when she entertained a  
number of her little friends at  
her home. "The Wigwam" on Park  
Avenue in the celebration of her  
16th birthday.

Henry McLaughlin, Jr. has gone  
to St. Paul to attend a meeting of  
the three cents for the old folks,  
the rest comes back to the county  
in which you live.

Fred Dorner, back from Cleve-

## Legislature May End Work Soon

Continued from Page One  
The session may be able to close in a few days early.

"I think the House has

done its duty," said

Speaker Edward W. Mullard.

"I think we have

done our duty."

The Legislature is headed to a short regular session which

is no longer needed in a

short time.

The distribution program is

well completed, except for flood

areas in a few hills in one branch

or the other," Mullard declared.

He reported the bill, and com-

mittee, was approved

and sent to the Senate last week,

and will be signed by the

Governor to complete action.

Mullard said a few measures to

allow the tax structure still

in committee will be

sent to the Senate and the

House to be considered and

then voted on.

The proposed physical compro-

mise bill, part of his program for

control of railroad finance, has

passed the Senate and now is in

the House.

The Senate-approved Roger com-

mittee bill, also part of the program,

was referred to the Senate Com-

mittee on Education.

Only one bill in the Mullard pro-

gram has been turned down—the

bill under wartime proposal

to establish a consolidated re-

gional power commission with

regional power over rail water

power.

The return, in the last general

election, of a conservative

majority to the Legislature made

it necessary to postpone the

legislative session to June 20.

The return, in the last general

election, of a conservative

majority to the Legislature made

it necessary to postpone the

legislative session to June 20.

The House, Florida and

Senate, now, have

the power to consider

any bill introduced in either

chamber, even if it originated

in the other.

The Legislature has been very

busy, however, during the session

and many bills have been intro-

duced and passed.

The Senate, however, has

not yet taken up the

legislative session.

**State Shows Few Small Cases**

**Capt. Crosson,  
With 7 Medals,  
Returns To Wed**

**New York 'Flying  
Cop' To See Town  
With His Bride**

**NEW YORK CITY, May 24 (UPI)—** Capt. Gerald J. Crosson, New York "Flying Cop," returned yesterday from his honeymoon. He and his bride, Mrs. Walter Hurst, were married at the Rainbow Room of Radio City, which has since closed its doors.

"But we'll get married and see the town," he said.

Two weeks after his marriage, Capt. Crosson will return to duty. Discussing his combat service in the Pacific, he said: "The Japanese were good fighters, very crafty, with no regard for their own life. They would not act as cowards. They are small, nimble birds. They are tough, but they aren't supermen."

**On the Bomber Missions**

Capt. Crosson is blond, five feet, seven inches tall and weighs 176 pounds. Yesterday he wore a white sport shirt and green slacks, exuding none of the decorations he won in 120 combat hours in forty two bomber missions. The Purple Heart, four wounds, the Soldier's Medal, four decorations and one outside the line of duty—the Air Medal, for four work and three leaf clusters—the distinguished flying cross with oak leaf cluster for a raid on Japanese bases in New Guinea and the Silver Star for valor in action.

Capt. Crosson recalled a raid on Tinian, when his B-26 medum bomber "No Sorry" was winged by ack-ack fire over New

Zealand. After his marriage, Capt. Crosson had originally set their marriage for Christmas 1944, but the Japanese attack on Pearl Harbor intervened. Capt. Crosson, who had been commissioned in the Air Force in March 1938, went to the South Pacific to set the pace for the 22nd Bomber Group.

**Arrived on Father's Birthday**

On his 35th birthday, Capt. Crosson, who had been promoted to Captain in the Air Force in March 1938, went to the South Pacific to set the pace for the 22nd Bomber Group.

He said yesterday that he will marry Miss Valina Hurst, twenty-one, Stapleton, S.I., on May 30 at Our Lady Star of the Sea Roman Catholic Church in Huguenot Park, Staten Island. Crosson is 32 years old.

Miss Hurst is the daughter of Eddie Hurst, who is the

son of Mrs. Walter Hurst,

daughter of Capt. Crosson.

## Stimson Tells How U. S. Treats War Prisoners

### Wouldn't Mind Being One Awhile; Geneva Terms Are Given

WASHINGTON, May 24.—Henry L. Stimson, Secretary of War, declared recently that the consideration and fair treatment being given to prisoners of war captured by American forces are such that "I'd like to be treated as a prisoner myself for a while."

Although he said this with a smile there was no mistaking his earnestness, as he stressed the favorable terms embodied in the plans for disposition of Axis prisoners, some of whom, he added, are already at work on American farms.

After telling a press conference that the Tunisian campaign alone netted a total of 267,000 Axis prisoners, many of whom will be sent to America, Mr. Stimson said that employment of these prisoners, as well as others to be taken in the future will be based on terms of the Geneva Convention, and that he "hoped that the humane and considerate treatment that our Department of War, according to American prisoners of war will be reflected in similar treatment of American soldiers who are prisoners of war of the Axis powers."

"Asked if the Axis prisoners would be put to work in industrial plants, Mr. Stimson said they might, but not in war-munitions factories. He declined to reveal the location of the prison camps, but added that they are sufficiently large to handle this rate of production more easily."

In response to several questions as to what agency will handle the employment of the prisoners and the various kinds of work they will be put to, Mr. Stimson said these problems are still under study. They will perform types of labor permissible under the articles of the Geneva Convention, he said, but emphasized firmly that "they will not be used as strike breakers."

Under the Geneva Convention provisions, he offered protection against "Violent abuse, public curiosity and exploitation of any kind. Prisoners of war, except officers, may be required to work at any project not directly connected with military operations."

Prisoners employed by the Federal government will be paid at the rate of 80 cents a day, Mr. Stimson said. When working for a state or private contractor, their pay will be at a rate determined in advance between the employer and the prison camp commander concerned. The rate, however, may not be less than that of 80 cents a day paid by the Federal government.

Officer prisoners may not be compelled to work. The Geneva convention provides that they must be paid, nevertheless, in accordance with the specific arrangements between the enemy powers. The allowance for German and Italian officer prisoners will be the equivalent of \$50 a month for warrant officers and first lieutenants; \$40 for captains, and \$40 for those in the grade of major and above.

Enlisted men among the prisoners who are not provided employment will be given a monthly allowance of \$16. Non-commissioned officers will receive \$16, unless work of this nature is not available and they specifically requested a remunerative occupation.

Prisoners may not be made to work longer hours than the civilian population assigned to similar work in the locality, unless except in emergency, will not exceed ten hours daily, counting the time consumed in going to and from work. In all respects, prisoners will be treated with respect, due consideration and kindness. Mr. Stimson said he was free, until recently, according to United States military personnel will be granted to them.

Rations for prisoners will be the same as those provided United States troops.

The Geneva convention stipulates that prisoners must be provided to officer prisoners from among the enlisted prisoners. These will receive pay at the rate of 80 cents a day.

Officers will be required to serve the time they spend in captivity, but the same is not true of enlisted men.

Prisoners will be required to serve the time they spend in captivity, but the same is not true of enlisted men.

Giant R.A.F. Lancaster bombers struck a crippling blow at German water power when specially trained crews blasted the Mohne and Eder Dams. The Mohne Dam is shown (left) just before the mines and bombs fell. A 200-ton steel gash caused devastating tremors (closeup, right) that are sweeping through the Ruhr Valley wrecking industrial centers and flooding transportation points. According to a report from Switzerland, at least 4,000 persons are dead and 130,000 homeless. No to the jewel master-strike. (International Radiophoto)

COMMAND of U.S. Army troops on Attu in the Aleutians is Maj. Gen. Eugene M. Landrum, according to an announcement by Secretary of War Stimson. This photo was taken in the Andros islands where Landrum was a brigadier general. (International)

### Pfc. Silver Dollar And J.P. Morgan Are Both At Camp

SECOND ARMY MANEUVER HEADQUARTERS, SOMEWHERE IN TENNESSEE, May 24.—Pfc. Morgan doesn't make much of a dash in the monthly payroll of a Fed signal company now on Second Army maneuvers in Middle Tennessee. For that matter, Pfc. Silver Dollar of the same company is leading J. P. for Army salary honors immaculate. His monthly pay is \$80 for captains, and \$40 for those in the grade of major and above.

Enlisted men among the prisoners who are not provided employment will be given a monthly allowance of \$16. Non-commissioned officers will receive \$16, unless work of this nature is not available and they specifically requested a remunerative occupation.

## Russian Front Action Now In North Central

Reds Report Capture Of 4 Settlements As Air Battles Continue Unabated

Land action on the Russian front moved from the south to the north central sector, where the Russians today reported the capture of four settlements but on the whole uneasiness continued with great softening up air battles unabated.

Col. Nikolai Akimov asserted the Germans evidently have been unable to recover from the recent blows, but warned it is a mistake to think the Nazi military might has been smashed, the Moscow spokesman pointing to signs of summer campaign preparations.

Plans of the Russian Black Sea fleet have sunk seven of a fleet of 11 German landing boats, motor-torpedo boats and transports along the 48-mile stretch of the coast between Anapa and Kerch northwest of Novorossia and have set fire to two more, the Moscow radio said earlier today.

Trapping the enemy convoy off the lagoon area at the mouth of the Kaban river, on the lower side of the Taman peninsula, the Russian planes sank two out of three big German landing boats, each with 200 troops aboard; three out of four first landing boats, one out of two motor-torpedo boats and one out of two big transports. Radio Moscow said a broadcast recorded said: "One of the landing boats carrying ammunition blew up."

The surviving motor-torpedo boat was set afire, and the surviving transport burst into flames after being heavily damaged, the broadcast said.

Refugees flee Illinois Flood

## Henry Ford's Son Dies At Age Of 49

Open Day Illness Due To Stomach Trouble And Undulant Fever Results In Death

Detroit, May 26 (AP)—Edsel Ford, 49, only son of Henry Ford, founder of the vast Ford industrial empire, died at 1:30 A.M. today at his home at Crose Pointe shores, a Detroit suburb. The young Edsel, chief executive of the Ford Motor Company for 24 years, died from a condition developing from a former stomach malady for which an operation was performed in months ago.

Untold thousands were present when he became seriously ill 10 days ago and, although his condition improved during the week end, he took a turn for the worse during the night.

His four children, Henry, son William, Josephine, daughter, and wife, and the old or infirm, about 3500 persons, were evacuated as the flooded Illinois River menaced the town. (International)

LITTLE SALLY BURDICK sits on a suitcase at Beardstown, Ill., and waits for train that will take her to safety. All women and children and the old or infirm, about 3500 persons, were evacuated as the flooded Illinois River menaced the town. (International)

Laws Respecting Child Labor Are Eased For Some

Executive Describes Post-War Bank Deposits To Kiwanis

Fruit And Vegetable Packers May Hire Children Of 14-16

Atlanta, Ga., May 26 (Special)—In a matter of aiding the nation's war-time food production program, the Children's Bureau of the U.S. Department of Labor has modified its child labor regulations to permit the employment of children between 14 and 16 years of age in the fruit and vegetable packing industry.
