

THE WOODMEN-CIRCLE PRESENTED SERVICE FLAG TO CITY OF SANFORD

CEREMONY TOOK PLACE WED. AFTERNOON

The Woodmen's Circle of Sanford detaches the high honor and the credit of conceiving the idea of presenting a service flag to the city of Sanford and the presentation took place Wednesday afternoon in the Woodmen's Circle in the Masonic building.

A well chosen program followed the exercises being opened by a salute to the flag followed by the singing of the Star Spangled Banner.

After the invocation by Dr. Brownlee and the presentation of the flag by Mr. Foster, Dr. Brownlee and Mr. Holly were called upon for a few remarks and responded in a most able manner.

The singing of America and our Bless Our Boys the exercises closed by the benediction. Mr. Holly stated that all the mothers in the army come forward to get their boys home.

The flag is of silver with beautiful tassels and fringe of gold and is mounted upon a pedestal that will be placed in the City Hall.

The presentation exercises were beautiful and there were no dry eyes in the lodge room during the exercises and after they were over it brought the friends and relatives of the boys together into a great family of sympathy and sorrow.

At the First Methodist Church next Sunday the services will be as follows: Sunday school at 9:30 a. m., preaching at 11 and 7 p. m.

There were Boche on three sides of us, so after daylight, it was not safe to stick up one's head. In front of us, about 100 yards, and the other side of the crest, was a machine gun nest that was annoying one of our outfits advancing on our right.

Accident to Airplane One of the airplanes alighting on Chase field yesterday had the misfortune to go into the ditch at the edge of the field through the miscalculation of the driver.

LETTER FROM E. T. HILBURN

Most Interesting Letter From The Battle Front This personal letter from Lieut. Hilburn to his parents here, Dr. and Mrs. J. P. Hilburn was not written for publication but is such an interesting letter that we asked for its publication.

Copy of letter from First Lieut. Oscar P. Hilburn of 38th Infantry, A. E. F., France. Written from Base Hospital No. 48 Nov. 2, 1918.

Dear Folks: At last I've been able to get paper again and indite a few lines to let you know that I am coming along nicely.

I cabled you a few days ago so that you would not be worried in case you heard of my wounds. Could not say in my cable that I was wounded but only let you know that I was safe.

Yes, I am safely wounded and out of the line for some time. All my wounds are entirely well now except my left ankle and it is doing nicely.

Everyone says it is very remarkable that one should get hit as many times as I was and get out of it so lightly. The one through my right leg went straight through the bone without shattering it.

Today I hobbled about the ward a little on crutches and had a big time. We have a good time in the ward with a jolly bunch of wounded officers.

How was I hit? My company took over part of the front line the night before. We were in the big offensive of Verdun and so it was not a trench sector but open warfare.

There were Boche on three sides of us, so after daylight, it was not safe to stick up one's head. In front of us, about 100 yards, and the other side of the crest, was a machine gun nest that was annoying one of our outfits advancing on our right.

We went to the crest of the hill and opened up. I started fire with the shotgun, firing over the crest, dropping down and coming up to fire again in another place.

At last I must have forgotten to dodge, for a bullet grazed my right elbow and knocked my hand off the gun stock as I started to fire. I took aim again and fired. Then later they clipped me in the abdomen and in the thigh.

When extricated from the mud where it had landed it was found that one of the propellers was broken. This caused a delay of several hours while the machine was being repaired.

When extricated from the mud where it had landed it was found that one of the propellers was broken. This caused a delay of several hours while the machine was being repaired.

SEMINOLE PRODUCT FAMOUS

PRES. HAS GUAVA CHEESE FOR THANKSGIVING

Seminole County Guava Cheese or to be more exact the Wakefield Guava paste or cheese was on the table of the White House yesterday and on the tables of most of the high officials of Washington.

And yet when you know about this wonderful factory at Geneva in the Wakefield Guava products are made it is not strange that President Wilson should have them on his table.

Last week there were several truck loads brought to this city of the Wakefield Marmalades and they were shipped to Lexington, Kentucky, to make the guava of the Kentucky Colonels, made by one of the recent decisions of the courts, backed up by the people.

The Wakefield Co. at Geneva has a right to feel proud of their wonderful cheese as the cheese has been in operation for the past two years.

They are considering the possibility of a larger factory and better and more central location and Sanford has secured their promise to locate here in the near future.

NEW HOTEL DISCUSSED AT MEETING

BOARD OF TRADE WAKENS UP THE CITY

The special meeting of the Board of Trade last Tuesday night in the court house was well attended despite the rain that fell during the afternoon and evening and kept many from coming in from adjacent territory.

The meeting was called to order promptly at 7:30 by President Holly who stated that the object of the meeting was primarily to accept his resignation made necessary on account of his being called to France and also on account of the fact that there was considerable reorganization and work of all kinds to do in the Board made necessary by the war.

His resignation was accepted with regrets and his successor will probably be named by the board of governors at their meeting next Tuesday night. The new president to fill the term of office until the regular session in January.

E. P. Foster, Ed. Putnam and many others took occasion to compliment the retiring president and to wish good luck to the Board despite the fact that the war had temporarily closed the city for the past year.

Mr. Douglas brought up the question of a new hotel proposition which will mean the taking care of the Wakefield Hotel and the Board of Trade and making a new hotel.

Mr. Douglas and his associates have already made arrangements to purchase the property and to build for men to live in.

Various other phases of industry for the city were discussed and some straight talks from the shoulder made by prominent citizens who recognize the fact that something must be done at once to revive the city and to take advantage of the many good things that are headed this way.

The new home of the Board of Trade was taken up and it was decided to purchase chairs at once and have the rooms ready for the next big meeting. It was also decided to make a campaign for memberships

THANKSGIVING SERVICES IN BAPTIST CHURCH WERE WELL ATTENDED

PROMINENT MEN MADE GOOD TALKS

The greatest Thanksgiving in the history of America since the foundation of this country was celebrated yesterday in the United States and Sanford was among those patriotic cities that gave full measure of thanks and praise to Him who has made it possible for this country to achieve such a wonderful victory that brought peace and comfort again to our homes.

The services were held in the Baptist church beginning at eleven o'clock. Dr. Brownlee of the Presbyterian church, chairman of the meeting opened with a prayer and a short talk on the many blessings of the season and also mentioned the fact that Dr. Hyman, the former pastor was now a chaplain in the army and R. J. Holly expected to leave today as Y. M. C. A. secretary in France.

Rev. Massey followed with a fervent prayer for all mankind and giving praise to the Lord for His many blessings. The choir made up from the several churches rendered some very beautiful selections, the following taking part: Mrs. Edward Higgins, Mrs. Phillips, Mrs. Hoy, Mrs. Stogden, Mrs. Morgan, Mrs. George Fox and S. O. Shindler.

H. C. DuBois, Dr. C. DeW. Brower, L. R. Phillips and Dr. Hilburn made five minutes talks that were pronounced perfect gems by all who heard them. These gentlemen touched upon the world races and their freedom, their freedom just now gained by this great sacrifice of life to save the world, the ruin of autocracy, the wrong idea of Germany that Christianity should be abolished, the fact that America was quiescent when humanity was calling to us for help especially when the Turks were butchering the Christians, the bravery of our men over there and their faith in the religion of Jesus Christ and then at last the joy and thanksgiving over peace declared and the news that the boys were coming home.

The services were greatly enjoyed and no one present minded the fact that they were kept in later than usual for the speakers held the undivided attention of the audience and it was a treat to hear them.

Everyone recognized the fact that the Thanksgiving services this year were fraught with wonderful possibilities and that from this time forward all people are to have a greater reverence for the house of God and His sacred Word and from the sacrifices and suffering of the world have come peace and a closer relationship to God and the churches.

The Herald regrets the fact that lack of space will not permit the giving of each address as it was delivered for it would make the best of reading and most interesting to the many who failed to hear them delivered.

Such a Thanksgiving service is a benediction and a great help to the people who are seeking higher things in life and who recognize the fact that the world is entering upon a new era in which character, morality and clean living will have first place and only the clean will inhabit the earth.

The regular monthly business meeting of the Woman's Club will be held in the club rooms, Wednesday, Dec. 4th, at 2:30 p. m. The hour of meeting has been changed owing to the days growing shorter. The report of the F. W. C. convention will be given, and the business of the meeting will be shortened in order that the the conservation program may begin not later than 3:30. Special music has been prepared and matters of deep interest will come before the meeting. Every woman of Sanford and Seminole county is urged to attend.

Preparations are under way for the all-membership drive, or "roll call" of the Red Cross in December. Rev. Mr. Brower attended a conference of speakers in Atlanta Tuesday as he is to serve in the campaign.

TO OUR PATRONS Beginning on December 1st the Herald will be published on Fridays only instead of Tuesdays and Fridays as formerly. The Semi-Weekly Herald has made its appearance regularly for exactly seven years, through good times and bad until it has become a habit for the people of Seminole county to look for the Herald on these days. Previous to the establishment of the semi-weekly the Herald was published weekly and the subscription price was \$2.00 per year. When the semi-weekly was established the price was not advanced. Now that we are going back to a temporary weekly basis the price will not be reduced but will remain at \$2.00. The Herald is one of the few papers in the country that did not raise subscription or advertising rates during the war. However, the increasing costs have necessitated a raise and we feel that it will best serve the interests of all concerned to publish this paper only once a week instead of raising the price at this time. It is our purpose to make the weekly Herald one of the very best papers in the state. Arrangements are being made to have regular, reliable correspondence from every part of the county and the Herald belongs to the outlying sections of the county as well as to Sanford. The Herald has become a part of Seminole county and Seminole county has become a part of the Herald. It will be our purpose to continue to work for the betterment of the county in the future as in the past and we will expect the hearty support of every citizen.

WE STAND BEHIND OUR WORK
and not only guarantee that our tire repair will stand up, but also that they will satisfy you in the extra mileage gained for the moderate charges we make. We particularly want patrons who are skeptical regarding the economy to be derived from the service we offer. Are you a prospect?

LAST, BUT NOT LEAST, FLORIDA'S OWN NEEDY KIDDIES

The Children's Home Society of Florida, Florida's Greatest Charity Announces Its December Campaign for \$50,000.00 to Begin Dec. 1st and End Christmas Day

The \$50,000 is Needed by the Children's Home Society
\$35,000 to provide for 1000 Homeless Orphans and Needy Kiddies during the coming year of 1919, at an average cost of \$35 each.
\$10,000 to provide for 200 Fatherless Kiddies, whose widowed mothers would otherwise be compelled to give them up permanently, at an average cost of \$50 per child.
\$5000.00 to finish free of debt the work of 1918, which has provided good homes, aid and care for practically 1000 children.

National Bank of Jacksonville, to take over the bonds and stamps at par so that the society can secure the funds, and yet keep the money in the service of our government, so your bond or stamps will in this way serve two great causes, the cause of the allies and the cause of Florida's children.

"Your Bonds and Stamps" Will Still Help Uncle Sam
And at the same time HELP FLORIDA'S NEEDY KIDDIES IN NEED. Arrangements have been made by the Home Society with the Atlantic

Why Suffer?
Mrs. J. A. Cox, of Alderson, W. Va., writes: "My daughter... suffered terribly. She could not turn in bed... the doctors gave her up, and we brought her home to die. She had suffered so much at... time. Having heard of Cardui, we got it for her."

CARDUI
The Woman's Tonic
"In a few days, she began to improve." Mrs. Cox continues, "and had no trouble at... Cardui cured her, and we sing its praises everywhere."
We receive many thousands of similar letters every year, telling of the good Cardui has done for women who suffer from complaints so common to their sex. It should do you good, too. Try Cardui. E-77

Fertilizer Makes Every Stroke Worth Double
Labor was never so short. Big crops were never so needed. The Government has called and still calls for more food. Farm implements, better seeds and better farming methods help to make labor more effective. Finally, to make every stroke count double, use the best available plant foods in
E. FRANK COE'S FERTILIZERS
By using these high grade fertilizers Florida growers are now doubling their crops—are doubling their profits—are doubling their help to the Government—are shortening the stay in the trenches—are saving our boys!

"Market Crops of Florida" gives information that will help you increase the net returns from your labor. Send today for a free copy.

future, and who must not be permitted to suffer.
WILL YOU DOPFONE FLORIDA KIDNIE FOR NEXT YEAR?
One Fifty Dollar Bond will provide for the entire year of these kiddies in good. Will you be one of the thousands to accept the responsibility for the care of one of these little ones?

STATE HEADQUARTERS, 48 ST. JAMES BUILDING, JACKSONVILLE, FLORIDA. Send your bond or stamps, or contribution to our treasurer, R. V. Covington, 48 St. James Building, Jacksonville, Florida, and be sure to register your letter if you send a bond, and ask for a return receipt card.
Pleading for some aid from every man, woman and child in Florida, we are your servants in the "greatest work under the sun," the CHILDREN'S HOME SOCIETY OF FLORIDA.
Judge W. H. Baker, President; R. V. Covington, Treasurer; Marcus C. Fagg, State Supt.

Restrictions Removed
Our government has now removed all restrictions on building operations and it is now again possible to proceed with individual building projects. Skilled labor is turning back to the regular channels of work and the building material markets are again open to the trade.

The call of the country today is to Business as Usual, at the earliest possible date, so if you are intending building there is now no need for further delay.
S. O. SHINHOLSER, Contractor.

VELOCITY OF BIG SHELLS
Geometer Uses Problem of How Long Time is Required for Stone to Fall to Center of Earth.
Studying the velocity of shells and bullets fired in the war led Maurice Sauger, a French geometer, to turn to the old question of the time it would take a stone to fall to the center of the earth. His conclusion was that it would take about 20 minutes 34 seconds.
Gassendi, who gave the subject much thought in the last century, made the time 20 minutes even. Mercator on the other hand contended that six hours would be required.
Sauger says that as the stone approached the center of the earth it would be drawn downward by the curve of the earth and upward by the shell which it had already penetrated. The rate at which the density of the earth varies or increases as we penetrate to greater depths is unknown. Sauger's formula is based upon considerations of the moment of inertia of the earth, as calculated from the precession of the equinoxes, which agree with observations on the density of the earth conducted in 1862 by John Shufeldt.
If a shell were driven right through the earth the stone would appear at the Antipodes after 38 minutes 30 seconds and then return to its starting point, at which it would make its reappearance at the end of 1 hour 17 minutes.

SEVEN LOAVES OF BREAD FOR EVERY PERSON IN U. S. SAVED FROM WASTE

Farmers and Threshermen Patriotically Respond to Call of Food Administration.
From information received by the U. S. Food Administration from the principal grain growing states, it is now possible to announce with fair accuracy the amount of wheat saved last harvest by improved methods of handling. According to official calculations, efforts toward cleaner threshing saved fully 10,000,000 bushels of wheat with corresponding savings of other small grain harvested and threshed in a similar manner. In addition, other states, though unable to furnish figures, reported greatly reduced harvest losses.
The figure for wheat alone is equivalent to seven one-pound loaves of bread for every person in the United States and represents food that formerly was either an absolute loss or was recovered to only a slight extent by poultry and livestock. While opportunities in the branch of conservation were large, the quantity of grain recovered surpasses early expectations. It is noteworthy also that results were secured principally through voluntary co-operation.
No conservation measure of the Food Administration, it is declared, has received more wholehearted support than that pledged and rendered by farmers and threshermen toward reducing grain waste at its source.

When Horses Get "Pipped."
When an army horse is wounded about the face or jaw it is not sent down to the veterinary lines, but is kept to be tended by its driver.
Then it is that a good driver's care comes in, for the men tend them most carefully, feeding them by hand, bolting their oats, making them mash, and spending most of the day with their charges until they can feel in comfort again. It is this personal care of the man for his horse that has been the cause of the new order that all horses have to be returned from hospital to their own units again; for a man's care is by no means transferred to the same extent to a new team of horses.
"Bike" Revived Again.
Folk who commenced to think that the bicycle was passing along the way that the horse has given up to the automobile as a pleasure vehicle have another guess. The war has given added impulse to wheel manufacture, according to a wheel salesman quoted in the Boston Post, and outside of the thousands being made for our troops across the water many more wheels are being made for the American public, a larger number than in former years.

The benefits of our food-saving campaign that was a vital factor in the winning of the war were not all to these we fed. We have at home a new appreciation of food that will prevent it ever being wasted again by those that have come to understand the religion of saving and the place that food occupies in our new, world-wide human relations.
Out of empty granaries to draw 141,000,000 bushels for export—the will of a free people accomplished that marvel.
Do you remember when food control by voluntary action was deemed a daring adventure in democracy?

CONTEST OF THE SUPERMEN

Warfare of Remote Future Predicted to Depend on Battles Conducted by Picked Combatants.

A day, now far removed, may come when the embattled hosts of rival nations will give place to a wager of battle to decide the conflict. The battle will then be confined to the combatants alone without violent interference with the peaceful pursuits of non-combatants or destruction of their property.

First, however, we must evolve great engines of destruction, so perfect that a few skilled heroes will direct each one of them. Ellery C. Stowell writes in the Century: "These war-machines will be so costly that only a few great powers will have the resources to construct and maintain them. Wise legislation and skillful systems of taxation will be necessary to organize the whole people for their support. A chosen few, picked from the whole nation, will man these men in the full vigor of their strength, physically perfect to endure the terrible strain and powerful of brain to meet and surmount every intricacy of mechanics and every difficulty of strategy.

Above all, these hero supermen must be of such unswerving character that they will, day in and day out, without succumb, devote their unflinching zeal to the great task of defending the civilization for which they contend. This evolution and the increasing economic burden of maintenance of this machinery will make war the luxury of the most powerful states and will cause the area of war constantly to recede. Small nations will no longer be able to maintain military establishments and eventually the millions of men now battling upon the field of honor will have been replaced by a contest among a few men in control of stupendous machinery.

VELOCITY OF BIG SHELLS

Geometer Uses Problem of How Long Time is Required for Stone to Fall to Center of Earth.
Studying the velocity of shells and bullets fired in the war led Maurice Sauger, a French geometer, to turn to the old question of the time it would take a stone to fall to the center of the earth. His conclusion was that it would take about 20 minutes 34 seconds.
Gassendi, who gave the subject much thought in the last century, made the time 20 minutes even. Mercator on the other hand contended that six hours would be required.
Sauger says that as the stone approached the center of the earth it would be drawn downward by the curve of the earth and upward by the shell which it had already penetrated. The rate at which the density of the earth varies or increases as we penetrate to greater depths is unknown. Sauger's formula is based upon considerations of the moment of inertia of the earth, as calculated from the precession of the equinoxes, which agree with observations on the density of the earth conducted in 1862 by John Shufeldt.
If a shell were driven right through the earth the stone would appear at the Antipodes after 38 minutes 30 seconds and then return to its starting point, at which it would make its reappearance at the end of 1 hour 17 minutes.

Speed of New Telegraph

Within the past few weeks a seven-league stride has been made in high-speed telegraphy, says the Popular Mechanics Magazine. An apparatus which in actual tests has proved its ability to transmit over a single grounded wire 4000 words a minute has been evolved.
The real significance of this escapade is that it is realized that 4000 words set in type will fill seven and one-half standard magazine pages.
Details of what appears to be an epoch-making achievement must be withheld for military reasons. It is a war invention and has for its chief purpose the liberation of hundreds of expert operators from the signal corps without demoralizing our much-needed commercial lines. No secret is divulged, however, when the apparatus is described as a printing telegraph system depending upon a universally used recording instrument that has never before been associated with telegraphy. The system is applicable to wireless, but so far has not been actually used in connection with it.

WRIGLEY'S

The Government wants tin

So hereafter all three brands of WRIGLEYS will be wrapped in pink paper and hermetically sealed in wax.

Look for WRIGLEYS in the pink-end package and take your choice of the same three popular flavors.

Be sure to get WRIGLEYS for quality and because

The Flavor Lasts!

HERALD ADVERTISEMENTS BRING RESULTS

HAVE YOU EVER seen a Lewis Machine Gun?
—Or a Browning Machine Gun, a torpedo, a depth bomb, a hand grenade, a big mountain gun, a gas mask, a naval mine, an aeroplane bomb?
These, and a host of other war features just as big, will interest fair visitors this year.
Most of them are to be shown under direct supervision of the Government, thousands of square feet of space being required to display them.

If you want to know all about the conditions under which YOUR BOY, or your neighbor's boy, is fighting, visit the big War Exhibit at the Florida State Fair, Jacksonville, Nov. 27th to Dec. 6th; and Farmers' National Congress, Dec. 3rd. to 6th—Excursion Rates on All Lines of Travel.

Doctor Johnson, in writing a poem, from time to time would run his finger down the page, counting the verses to see how many more he had to write.

LETTER FROM L. T. HILBURN

Continued from page 1

It was not until I had been in the hospital for some time that I realized the importance of the Home Guard...

But the usefulness of the Home Guard was not ended with the war and it has been affected at all by the close of the conflict...

My plan was to wait for dark and then crawl back about a half mile to the barned village where I could probably get a stretcher to take me to the hospital...

Dark finally began to come on and I sat up to see if it were dark enough to start safely at the slope...

The message that was being broadcast by the Florida Home Guard...

The message of conservation, surrounded with the sacredness which the appeal from the pulpits will lend to it tomorrow will be sounded again...

Every agency in the state has been mobilized and with the clergy at the head of her forces, Florida will drive forward during the coming week to an honorable achievement...

Ancient Paraphraser. Doctor Johnson, in writing a poem, from time to time would run his finger down the page, counting the verses to see how many more he had to write.

THE BANK THAT INSURES YOUR DEPOSITS

Two months sleeping in the mud and rain, you can imagine the danger of rolling out of bed while folks are exposed to the dangers of numerous Ford's, except on "gasless Sundays."

Nov. 2, 1918. Your No. 27 has just come with a letter from Robert the very first one I have seen from the front. You can see my delight, it makes me feel like a million dollars.

The last mail received at the front was read under shell fire - an awful bombardment with one-hundred-fifty five very varied lot of letters.

My plan was to wait for dark and then crawl back about a half mile to the barned village where I could probably get a stretcher to take me to the hospital...

Dark finally began to come on and I sat up to see if it were dark enough to start safely at the slope...

The message that was being broadcast by the Florida Home Guard...

The message of conservation, surrounded with the sacredness which the appeal from the pulpits will lend to it tomorrow will be sounded again...

Every agency in the state has been mobilized and with the clergy at the head of her forces, Florida will drive forward during the coming week to an honorable achievement...

Ancient Paraphraser. Doctor Johnson, in writing a poem, from time to time would run his finger down the page, counting the verses to see how many more he had to write.

TRIN NO. 85 WRECKED

Engineer Shelly Hart and Fireman Hutchison killed

W. F. Shelly, engineer of this city was badly injured and colored fireman Hutchison also of this city was killed yesterday when train No. 85 went into the open switch at Huntington, a small station near Crescent City on the A. C. L. Railroad between Sanford and Jacksonville.

The engine, one combination mail and baggage car and one combination passenger and baggage car were derailed and one car turned over. Engineer Shelly suffered a blow on the head and badly scalded feet. His shoulder is also bruised but he is reporting as resting easy this morning. Two passengers suffered slight injuries.

A relief train was at once dispatched to the scene and in a few hours the wreckage was cleared up and the train arrived in Sanford only five hours late.

The train was running at full speed and the fact that no more damage was done is probably due to the efficiency of the engineer and other members of the train crew.

Mutchison leaves a wife in Sanford where he has resided for some time.

From Conservation Chairman

All women of Sanford and Seminole county, whether or not club members are invited, through the courtesy of the Sanford Woman's Club to attend the Conservation meeting to be held at the club rooms Wednesday, December fourth.

The Conservation program will follow the regular monthly business meeting which it is expected will be a short one and finished by 3:15.

The first week in December has been dedicated; set aside as Conservation week by our government and Mr. Hoover as food administrator earnestly asks us all to give some time during this period to serious consideration of what our country now faces.

War work, however, must still go on to a certain extent, and now we have the approaching Christmas season to add to the many demands upon the time of our busy Seminole county women, so that it will be difficult to get together to talk and think of this vitally important subject unless you embrace this opportunity.

There is a message for you—a message for you to carry to others—a message for you to act upon yourself. Please come and invite your friends to come.

HER PRAYER WAS ANSWERED

Little Girl's Appeal for Automobile Ride Proved That Her Argument Was a Good One

The six-year-old daughter of an attorney has been taught from infancy to have implicit faith in prayer. So strongly has this been impressed on her mind that practically all of her desires and childish wishes sooner or later find expression in prayerful appeal.

The child is a motor enthusiast, and on the first warm day after the severe winter weather she asked her father to take her out for a ride. He explained that their machine was put away for the winter, and that it could not be used at that time. The child then sought her mother and asked her to pray for somebody to come around and take them out for a ride. The mother tried to explain that such a prayer would be unavailing, but, undaunted in her firm belief, the child went to her room and prayed that she might have an auto ride. An hour or so passed, and the little girl waited expectantly and anxiously for the automobile to arrive.

Seeking to allay the child's disappointment the mother started to explain more fully, when the shriek of an automobile horn was heard outside. The child rushed to the door, and to the amazement of the mother, a neighbor asked the girl whether she desired to take a ride.

"Will you have room for mother, too?" the girl asked.

"No, we just have room for one little girl," replied the man at the wheel.

The child hurriedly put on her coat and cap, and as she left the doorway she turned to her mother and said: "See, mother, if you had prayed with me you could have come, too."

The mother is still wondering.

MARINE CORPS' NEW INSIGNIA

Green Instead of Blue Uniform Is Not Recognized by Those Who Are Not Up to Minute

Surprisingly few civilians even after their country has been in the world war for nearly a year can readily identify the various uniforms of the United States service, especially in the marine corps.

The change of the uniform from blue to forest green has added greatly to the bewilderment of the layman who likes to recognize a military man by his uniform or insignia.

The small boy, however, is not so easily puzzled, as is shown by an incident which occurred a few days ago. One of the sergeants from a marine recruiting station was walking about the street when he came on a group of small boys and girls playing on the sidewalk. As he approached them one of the girls asked:

"What is that man in uniform?"

"I guess he's a French officer," said another girl.

One of the boys eyed him closely for a moment, and then planted himself squarely in front of the sergeant, and holding him by the coat with two chubby little hands said: "I wanna see what he got on his cap."

The boy knew that the dexter emblem of the globe, eagle and anchor means "marine," whether the wearer be clothed in blue, forest green or khaki. "Oh, you're a marine, alutcha," he exclaimed jubilantly. "An' he's a sergeant and a sharpshooter, too," he told his playmates, with a knowing little nod.

Messenger Wears Tie

What times and the unprecedented demand for aids for Uncle Sam have brought many quaint characters to Washington, notes a capital correspondent.

One of the quaintest guards is seen daily at the main door of the old Land Office building, now occupied by Provost Marshal General Crowder and his staff. He is a gentleman of the old Southern school and while on duty wears a shining black silk hat of ancient vintage. On the left lapel of his frock coat is a little silver badge of authority and his courtly manner as he bids one enter the portals of the building always brings a smile. On the pay roll he is listed as a "messenger" and he is the only messenger in Washington who wears a silk hat.

U-Boats Have Murdered Thousands

There is a danger lest familiarity, even with such a monstrous crime as unrestricted U-boat warfare, should breed indifference to its enormity, says an exchange.

Therefore, it is well to bear in mind that, except when the attack is made on fighting ships or transports carrying fighting men, the torpedoing of ships and sending men to their death far out at sea, is simply murder, unredeemed by any extenuating circumstances whatsoever.

Just how great a bill of indictment is being drawn up by the German admiralty against itself is seen in the statement given by the government leader in the house of commons, that up to February, 1918, the German U-boats had killed 14,120 non-combatant British men, women and children. This, he pointed out, is exclusive of the murders done upon peoples of other nationalities.

As She Is Spoken

The teacher was giving dictation for a writing lesson. She began "Once upon a time—"

"Please, teacher, what is a punny?" asked a little girl.

"What do you mean, Lizzie?" asked the teacher. "I do not understand you."

"You said 'Once a punny time,'" the teacher explained by improving her enunciation.

NOTICE!

I am leaving the city and can take no more orders for hemstitching and piecing work.

I wish to thank the ladies of Sanford for the excellent patronage I have enjoyed while here and if I return to Sanford I will be glad indeed to take up this work again.

MRS. G. C. HILL

506 MAGNOLIA AVE. SANFORD, FLORIDA

Notice to Teachers of Seminole County Public Schools

The State Board of Teachers' Examiners will conduct examinations for all grades of Florida Teachers' Certificates in the Court House at Sanford, Seminole county, Florida, beginning December 10th, 1918.

Teachers not now holding valid Florida certificates are required to take the examination at that time.

Each examinee must furnish paper and pencils, pen and ink, but must not take into the examination room books or notes of any kind.

Respectfully, T. W. Lawton, Supt. Public Instruction.

Need Cash for Overseas

Atlanta, Ga., Nov. 27. America has responded wonderfully to the appeal for funds made by the seven officially recognized war welfare work agencies in the United States.

The Salvation Army, American Library Association and War Camp Communities service.

More than \$204,000,000 has been pledged, assuming continuation of service among our American and other allied soldiers and sailors during the temporary reconstruction, occupation and demobilization period, following the cessation of hostilities.

This is \$12,679,048 in excess of the amount originally asked—\$170,000,000—and the largest sum ever raised as an outright gift in the history of the world.

There is an immediate need for ready cash with which to promote the intensive program which the War and Navy departments have asked be put into immediate operation overseas.

To enlarge the educational, entertainment, athletic and other features demands a tremendous amount of money at once; if the high morale and the exemplary cleanliness of body, mind and spirit of our men is to be kept up to its remarkable war-time standard.

The Southland was first over the top in the United War Work Campaign, the Southeastern Department standing second in the country, the Southern Department passing its quota first.

R. H. King, campaign director for the Southeastern Department announces the Department percentage in the campaign thus far is 140% and that the percentage of the various states in the department are as follows: Mississippi, 146; North Carolina, 164; Alabama, 162; Tennessee, 140; Georgia, 136; South Carolina, 125; and Florida, 107. Every state in the department over-subscribed its quota.

Southern leaders now urge that the largest possible payments to the fund be made December 2 when the payment of pledged amount is due. The urgency of the need justifies the request that as many pledges be paid now in full and not in installments, even if some personal sacrifice is entailed.

Now is the time, and not later, that our boys need this attention which the home folks have promised them through these governmental agencies which are looking after their welfare until the homecoming.

PEACE ADDS TO U. S. FOOD TASK

Europe Needs Nearly Double Last Year's Supplies From America.

ECONOMY MUST CONTINUE.

World Survey Shows Sufficient Wheat, But Shortage of Fats—Government's Stimulative Program Justified.

With the return of peace America is confronted by a food problem even harder of solution than that with which we coped last year.

Last year we shipped 11,820,000 tons of foodstuffs to the European Allies. Had the war continued we would have increased this enormous figure to 17,250,000 tons in the present year.

The world food demand increased. The world's population is increasing at an enormous rate.

In order to meet this new situation the Food Administration has made a careful survey of the food resources of the whole world in relation to the total demands.

Great Fat Shortage. The most distinct reversal of policy will come with pork and dairy products, vegetable oils, sugar and coffee.

Of the world total required to produce these results, North America will furnish more than 90 per cent.

The food situation allows the world to obtain the use of substitute products.

WHEAT SHOWED SPIRIT OF U. S.

Sacrifice to Ensure Allied Food Greatest Single Food Achievement.

SUFFICIENT SUPPLY NOW

All the Nations Will Be Able to Return to Their Normal Supply of White Bread.

Overshadowing all other accomplishments of the American people under the leadership of Food Administration, is the history of wheat exports in the past sixteen months.

Now that pressure on ocean tonnage is eased by the stopping of large movements of troops to Europe, we may relax our efforts to save wheat.

We entered the past crop year with a wheat supply which gave us only 2,000,000 bushels available for export.

A survey of wheat raising shows that the consumption of flour brought out by the countless mills, wheat flour is the most important product.

ALLIES ARE FED BY SELF DENIAL

Generous Doing Without in America Supplied Food to Europe.

Generous Doing Without in America Supplied Food to Europe.

Exports from this country since it entered the war have kept starvation from Allied Europe and have maintained the health and strength of those who have been bearing the brunt of our battles.

Systematic Effort Wins

If we take our days and reduce them to the essentials we shall find that there are many real things to do, needful things to do, and we shall go about these tasks quietly and earnestly, not expressing our energies through a hundred trifles, but through true effort, properly directed, doing whatever our hands and hearts and minds find to do, nobly and well.

HIGHEST CASH PRICES paid for sacks, rags and all kinds of metal and iron. Sanford Junk and Bag Company. TELEPHONE NO. 114. P. O. BOX 305, SANFORD AVE.

What Determines Meat and Live-Stock Prices?

Some stock men still think that Swift & Company—and other big packers—can pay as little for live-stock as they wish.

Some consumers are still led to believe that the packers can charge as much for dressed meat as they wish.

This is not true. These prices are fixed by a law of human nature as old as human nature itself—the law of supply and demand.

When more people want meat than there is meat to be had, the scramble along the line to get it for them sends prices up.

When prices of meat go up, Swift & Company not only can pay the producer more, but has to pay him more, or some other packer will.

Similarly, when prices recede all down the line, Swift & Company cannot continue to pay the producer the same prices as before, and still remain in the packing business.

All the packer can do is to keep the expense of turning stock into meat at a minimum, so that the consumer can get as much as possible for his money, and the producer as much as possible for his live-stock.

Thanks to its splendid plants, modern methods, branch houses, car routes, fleet of refrigerator cars, experience and organization, Swift & Company is able to pay for live cattle 90 per cent of what it receives for beef and by-products, and to cover expense of production and distribution, as well as its profit (a small fraction of a cent per pound), out of the other 10 per cent.

Swift & Company, U. S. A.

A Memorable Achievement of the Titanic Struggle

America saved and sent to Europe in a year of crop failure 141,000,000 bushels of wheat, which saved Europe.

A GERMAN HOPE DISPROVED AND A GERMAN FEAR CONFIRMED

A statement made by a prominent German official soon after the state of war with Germany was declared, shows that even in the enemy country clear thinking students did not undervalue the strength of the American republic.

"I do not fear the American soldiers," he said with a high official of our government, "because they cannot arrive in time. What I fear is the intelligence and devotion of one hundred million original minds and people trained to a faith in individual initiative. The day that these people, now so materialistic in outward appearance, are stirred spiritually, that day is the day of Germany's doom."

Eighty millions of men cannot be taken out of production for four years without lasting losses of yield. It will be years before their fields recuperate, farms are restored and herds restocked. Save food.

Sure Proof. "That rich old fellow hasn't the slightest suspicion his young wife detects him." "How do you know he doesn't?" "Because I've seen him eat her mince pie."

She's Patient. Newlywed—I have just insured my life in your favor for twenty thousand dollars. But if I die within a month you won't get it. Wife—Oh! that's all right, dear. I can wait that long.

Save food Who shares in the struggle Will share in the triumph

MEAT INCREASE AT TIME NEEDED

Producers Responded Nobly When Demand Was Shown to Them.

CATTLE AND HOG FIGURES.

Government Justified in Pork Policy Which Now Provides Chief Supply to Meet Three Billion Pound Fat Shortage.

In line with the general plan of conservation formulated by the U. S. Food Administration immediately following the entrance of the United States into the war the contribution made by the meat producers of this country to the war program is of particular significance, as it demonstrates the hearty cooperation accorded the Food Administration by the meat producers of the country.

According to reports of the U. S. Department of Agriculture, there was an increase in cattle of 10,238,000 head and 12,447,000 hogs, these figures compiled to January 1 last. In the same period there was a decrease of \$10,000 head of sheep, but indications are this decrease will show an increase following the latest reports.

Since January 1 unofficial information indicates an increase in hogs of not less than eight per cent, and not more than fifteen per cent, compared with one year ago, with an increase in average weight.

Following the request of the Food Administration for increased hog production for the fall of 1918 and the spring of 1919 the increase may yield not less than 1,000,000,000 pounds of pork products than were produced last year. Without this increase the shipping program arranged by Hoover regarding animal food products would have been impossible.

The dressed hog products during the three months ending September 30, 1918, amounted to 400,172,000 pounds, as against 377,800,000 pounds for the same months of 1917, an increase of over 37,400,000 pounds for the quarter.

During the same period in 1917 the total slaughter records of dressed hogs showed 1,253,000,000 pounds as against 1,154,000,000 pounds for the three months period ending September 30, 1918.

The meat increase our meat shipper, especially our pork products, is the added demand for meat not liberated from German appetites.

And at the same time we must look forward to the rehabilitation of European meat herds. The policy which we have followed in the past year has been fully justified, for the heavy pork production which has brought about will enable us to supply the increased demand for our coming year.

There will be a world shortage in fats, and it is to the United States that Europe must look to supply its deficit.

As the same time there will come the heavy demands for lard for the production of margarine to supply European imports of lard for some time will be limited.

The United States, Australia and Argentina will be able to maintain a supply that will keep all available freezer vessels operating at capacity.

America's Pledge to the Allies When Their Lines Were Breaking

America will send the food, what ever needs for victory. They believed they stood fast and with our men they carried on to victory.

THE TEST NOW FULFILLED.

This government is nothing more than the expression of the people, and if we are to win the war it will be only because every man, woman and child charges himself daily and hourly with the test, Does this or that contribute to win the war?—Herbert Hoover April 18, 1918.

With the solemn obligation of providing that "margin" of food that would safeguard against starvation our friends in Europe the housewife and the consumer have learned hitherto to ignore and unsuspected things about food, have absorbed a whole "college education" in food values, food handling, buying and substituting that they will not want to forget.

Our voluntary food-saving not only saved the Allies and made vital contribution to the winning of the war, but saved to ourselves in administration expenses the outlay out of our own pockets that any effective system of rationing would have extracted. It would have cost us about \$15,000,000 to have police-controlled as against the 2 cents per capita for cooperating.

By saving and sharing America kept the world together during the war crisis. By saving and sharing America will help to bring the healing of nations.

America's food Saving saves starving people

SUGAR TESTED MORAL FIBER

Doubters Declared Saving Staples Would Be Easy Compared With Sacrificing Luxuries.

FIGURES SHOW RESULTS.

Americans Demonstrated Sturdy Support of War by Conserving for the Benefit of the Allies.

When figures began to show that the United States was doing its duty in the war, the doubters were silent.

paratively easy to bring about conservation of staple necessities, but that it would be far more difficult to accomplish an actual decrease in the use of luxuries. The doubters took sugar as an example, and declared that it would be practically impossible to bring our consumption of sugar down to a point that would meet only the food needs of the people.

Now that demands upon ocean tonnage will be lightened, European nations will be able to go farther afield for foodstuffs, and will no longer be entirely dependent for sugar upon North American supplies. With the stocks now in prospect, we will have sufficient sugar to place this country back upon normal consumption if the present short rations in Europe are not materially increased. If the European ration is to be materially increased over the present low amount it can be only through the American people's making it possible by continued restriction to a greater or less extent here.

The fact that the Food Administration has been able to relax the voluntary sugar ration is in itself proof that the ration of two pounds per person per month was generally observed throughout the country. This conservation allowed the Food Administration to build up a reserve, and to tide over the period of scarcity, until the new crops of Louisiana cane and beet sugar were ready for distribution. The records of the Food Administration show that in July, August, September and October 50,000 tons were distributed. Normal consumption for that period is 1,000,000 tons. This shows a definite, concrete saving of over 50,000 tons. These figures apply to sugar consumed on the table, in the kitchen and in the various industries, and show conclusively that in the homes and public eating places of America, where 70 per cent of all our sugar is consumed, the sugar consumption has been reduced by more than one-third.

In the four-month period beginning with July, the country normally uses 10,000 tons of sugar per month. For July 29,000 tons entered into distribution. In August only 22,000 tons were distributed. In September the figure showed 27,000 tons, and then in the month ending October, 30,000 tons.

AN AMERICAN HABIT THAT WAS EXPANDED

Adding to the relief of the distressed is not a new sensation to us. Having long depended on food to the remote corners of India as offhandily as the housewife hands out a bit of the loaf to the wailer, it seemed the most natural thing in the world to save our surplus, to take on the feeding of a nation quite informally.

The test of peace is to summon for the healing of nations devotion equal to that given the tasks of war.

LESSONS FOR THE Home Embroiderer Specially prepared for this Newspaper by Pictorial Review

A New Shape Gives Novelty to a Buffet Set Consisting of Oblong and Round Dollies.

By KATHRYN MUTTERER. EMBROIDERIES for Spring and Summer use are quite as interesting as the latest frocks. Their designs show an element of restraint that is admirably in keeping with the general demand for simplicity, while adequately measuring up to the most exacting standards of decoration. Linens for the

METHODS OF DEMOCRACY. The extent to which the United States Food Administrator has relied on the voluntary support of the American people is shown by a statement made by the United States Food Administrator at speaking before the Senate Agricultural Committee less than three months after this country entered the war. That he was justified in his implicit confidence in the strength of democracy has been clearly reflected by the measure of support we have lent the Allies.
