

More Priority For Needs Of Navy Is Asked

Threat To Shipbuilding Program Seen By Vinson, Chairman Of Naval Body

Spending More Funds Possible

Schedules Can't Be Met Without More Money, Solon Says

WASHINGTON, July 19. (AP)—The United States shipped aboard 811 planes valued at \$40,743,631 in May, a decline of 50 craft and \$6,533,374 in value from April, the Commerce Department revealed today.

WASHINGTON, July 19. (AP)—Chairman Vinson (D-Ga.) of the House Naval Committee complained today that although the country regarded the Navy as its first line of defense, "other things" are given prior call to defense materials.

He added that despite the widespread belief that the Navy was expanding fast, his committee had found that scheduled spending could not be met without spending an extra \$685,000,000. Vinson said he feared a definite threat to the Navy shipbuilding program unless priority ratings were changed to accelerate the flow of supplies to it.

United States shipbuilding yards will complete and make ready for sea about 6,000,000 tons of merchant ships during 1942, and will produce 2,000,000 tons this year, Harry L. Hopkins, supervisor of the U. S. lend-lease program, told interviewers yesterday.

He made these other statements about the war role of the United States: "Shipping: The United States will build enough ships to bring goods into the United Kingdom and into every theater in the world where democracy is fighting Hitler."

Shipbuilding: The American flag could go to Alaska, (Hopkins declared) if necessary, and all I can say is that we are going to do it.

Sanford Will Collect Aluminum For National Defense Program

To help remedy a temporary shortage of aluminum in defense production, Sanford will join in a nation-wide aluminum recovery drive by Harris Anderson, who has been placed in charge of the drive by J. L. Ingley, chairman of the Seminole County Defense Council.

Used aluminum waste will be collected from homes and businesses. Only those articles which can be spared, without making replacements which might produce a secondary shortage in some other material, are being requested, Mr. Anderson explained.

As in a previous aluminum drive in Sanford which fell short of its quota, two central collection points for the metal will be set up. One of these will be in front of the Post Office, and another will be in front of the Sanford Atlantic National Bank. Later, a third collection bin may be placed down town.

In addition, a house-to-house canvass will be instituted, plans for which will be completed and announced later, Mr. Anderson said. No one will profit from the aluminum collection, Mr. Anderson pointed out. Metal collected will be taken over by the government and will not be turned over to private companies for their own use.

Defense Called Small Aid To Rural Poverty

Half Of FSA Borrowers Are Located In South, Farm Official Asserts

WASHINGTON, July 19. (AP)—C. B. Baldwin, Farm Security Administrator told a congressional committee today the national defense program, with its re-employment of millions, has not yet made substantial inroad into rural poverty.

Baldwin said that while about 11 percent of all FSA borrowers were concentrated in the south, only about 10 percent of all defense contracts have been placed there. On the other hand, 45 percent of such contracts were said to have been placed in northeastern states where less than 3 percent of FSA needy rural families live.

George Meany, secretary-treasurer of the American Federation of Labor, asserted last night that only one twenty-fourth of 1 percent of defense work time has been lost as a result of an A. F. L. work stoppage. "Taking all defense work from the A. F. L. program," he said in a prepared address broadcast by CBS, "only one man-day work has been lost by an American Federation of Labor strike of only 2400 man-days of work performed."

Particular emphasis with observance of aid British labor week, Meany said that "the doom of Adolf Hitler and the Nazi scourge is sealed. It seems to me because every week—in the minds of the 5,000,000 members of the American Federation of Labor and likewise in the minds of the overwhelming majority of the American people—is aid British labor week."

Fight Against Nazis Under 'V' Is Sought

LONDON, July 19. (AP)—The British propaganda service issued a call early today for "mobilizing the German people in a fight against the Nazis under the secret sign of V for victory."

In a broadcast beamed to the continent a BBC announcer identified merely as "Colonel Britton" declared the act of enlistment was two-fold. "First, take a vow on Sunday, July 20, to continue faithfully this fight the best way you can for your country's independence and honor and that of other nations enslaved by the Germans."

"Second, take every opportunity this Sunday to demonstrate to the Germans the mobilization of V's on walls and every-where you can and by doing so the V you send (three dots and a dash) whenever you get a chance. Let V be splashed from one end of Europe to another."

Martins Return To Capital Of Florida

TALLAHASSEE, July 19. (AP)—The purple martins have returned to the big oaks in Tallahassee's downtown park and their duty efforts to drive them away. For several years, the migratory birds have swarmed here in such numbers that they make a black wave against the evening sky when they swirl into the temporary roosting places. A firecracker barrage was set up against the birds by hobbyists last year but the popping merely kept them in the air a little longer. The police stepped in and stopped the firecrackers.

Nazis Thrust Within 230 Miles Of Moscow, Capital City, Cross Dnestr River

Reserve Force Is Massed By Soviet

1,000,000 Reported Prepared To Begin Counter-Offensive

LONDON, (Sunday) July 20. (AP)—Britain claimed today at least a third of the German cities of Meunster and Aachen have been destroyed or seriously damaged by the R. A. F.

The Air Ministry reported more than 120 raids had been made on Germany and Nazi-held territory in the past few weeks. "Germany's boast is shattered," the ministry said. "The premises made by the prime minister in being fulfilled, and the German people are beginning to appreciate that the war which they hoped to wage on territory other than their own is being brought to their doors."

Rounding out the fourth week of the giant offensive against Russia, the German High Command today reported the widening of the Smolensk breach in the Stalin Line facing Moscow.

The Russians, perhaps significantly, omitted the usual claim that they were holding their ground. While the Nazi armored might thus thrust within 230 miles of the Russian capital from the southwest and part of the United States embassy left Moscow for Kazan in the Tartar Republic, word came from Istanbul that the Russians are holding 4,000,000 men in reserve for the defense of the city.

The source of this report was an Axis diplomat stationed in Moscow until the outbreak of the war. He said this huge reserve force is ready to roll against the Germans in a carefully timed counter-offensive.

The Russians said the full fury of the blitz offensive is concentrated in Smolensk and related sectors. Berlin announced the crossing by German-Rumanian troops of the Dniester (Dniest) river in a satellite into the Ukraine. The air advances from Russian headquarters also claimed an advance on the northern front toward Leningrad.

A dispatch from Vichy said the French had begun parleys with the British over the removal of women and children from French Somaliland, East Africa. This was taken as an indication that Vichy has virtually given up hope of holding that outpost of the Empire against the Allied blockade.

The left wing of a German thrust moving in a great arc on Moscow has reached a point 78 miles northeast of Polotak, a center of earlier fighting, Moscow acknowledged early today while the Nazis themselves were claiming a sharp continuing advance at the Red center.

This disclosure was made by the Soviet command in an early morning communique reporting violent battles in the region of Nevskiy Polotak as well as in the Smolensk vicinity, on the direct route to Moscow itself and in the Pakov-Perkhov area before Leningrad.

The Red war bulletin said plainly that the losses of the Russian defenders, as well as those of the Nazis, were great. Two, for the first time in days, the Soviet general staff made no claim that its lines were generally holding.

Bob Feller Halts Yankees To Take His 19th Victory

CLEVELAND, July 19 - (Special) - Rapid Robert Feller saved the groggy Cleveland Indians one game of their three-contest "flag series" with the red-hot New York Yankees Friday. With the gloves favoring his fast offerings, Feller fanned nine Yankees and gave up but six hits for a 2 to 1 triumph in his nineteenth of the campaign. Rain, meanwhile, finally compelled the three impartial men to black to end hostilities in the last of the eighth and prevented any last ditch stand by New York.

RED RUFFING, 37-YEAR-OLD NEW YORK YANKEE PITCHER STILL AT HIS PEAK IN EFFECTIVENESS

The days' victim was Marius Russo, Yankee southpaw who likewise granted only six hits while fanning a half-dozen Indians. All he got out of it was a wet skin and his sixth setback of the season, against eight wins. The Indians broke a 0-0 all tie to take the winning run on the seventh. Oscar Grimes marked a double which rolled to League Park's rightfield wall, took third on Ray Mack's bunt single and tallied easily on Rolfe Homsey's high bouncer to Shortstop Phil Rizzuto.

The Indians had taken the lead in the third. With two down, Larry Rosenthal and Ken Keltner placed singles just outside Short and Baseman Joe Gordon's reach for the first blows off Russo, and Lon Boudreau's single tallied Larry.

Tax Collections in Florida Show Gain

TALLAHASSEE, July 19 - (Special) - Florida's wave of defense industry prosperity last year is reflected by a general increase in the more than 10 percent in State collections from beverage, gasoline and motor vehicle taxes. Automobile license taxes and title revenues for the first six months of 1941 totaled \$41,111,111 more than for all of 1940 and Motor Vehicle Commissioner Driggers predicted a 15 percent boost by the end of the year. Beverage Department revenues for the fiscal year total \$532,000 more than in the previous year - an increase of 11 percent. Indications are that the trend will continue.

F-M HORIZONTAL EJECTOR

gives an extra volume of water at low pressure

Here's a new type of pump which fills a definite need by supplying an extra volume of water at low pressure and also provides an ample supply at normal tank pressures. Extremely quiet in operation, the F-M Horizontal Ejector pump has but one moving part. It produces greater water capacity for its motor size than any other design of pump. An ejector jet and tube, built into the suction side of the volute, increase the capacity of the pump and develop a high pressure discharge. A heavily constructed bronze impeller makes the pump less subject to wear from sandy water. Come in today - we will be glad to give you complete details on this F-M Horizontal Ejector Water System.

Paying Taxes on Monthly Basis May Prove Easier

By CHARLES H. STEWART, Chief Tax Editor

THE United States Internal Revenue Service has announced that it will accept monthly payments for the 1941 tax year. This is a significant change from the current practice of requiring quarterly payments.

The new plan allows taxpayers to pay their taxes in 12 equal installments throughout the year. This is particularly beneficial for those with irregular income or those who find it difficult to save up for quarterly payments.

The IRS has stated that this new option will be available to all taxpayers who are currently paying taxes quarterly. It is expected that this change will make tax payments more manageable for many individuals and businesses.

In hitting on the idea of his "tax anticipatory notes" one thought in the back of Henry's head was the advance cooperation of his collection. And from that, though, I think he surmised that one best tax-paying scheme to be an event that it literally will become the public's economic weapon.

Henry's "anticipatory notes" are a new type of security that will be available to the public in the form of a "tax anticipatory note" which will be sold to the public at a discount and will mature when the taxpayer's tax liability is due.

This new scheme is designed to help taxpayers manage their cash flow and avoid the large lump-sum payments required by the current tax system. It is expected to be a popular option for many individuals and businesses.

The News Behind the News

What do you find in the newspaper you are holding in your hands?

On the front page, headlines; history bursting into shape before your eyes...

Then, on the inner pages, news you might not at first recognize as such... pages of advertising from your local stores. Pages of merchandise... an assortment of wares so varied and so complete it would take you weeks to inspect it in person!

News? Yes! Not to shake the world, perhaps, but important to matters you care about. The new dress Mary wants for the Prom (here is one illustrated—see you had no idea it would cost so little). Or Junior's new bicycle (you could not very well have guessed that the sporting goods store was having a sale!)

So, when you buy your newspaper, you are not just buying news—you are buying a whole world of information and opportunity.

Roosevelt Requests Service Extension; Dangers Are Cited

Nation Will Be Taking Greater Risk Chief Executive Advises Congress

President Fears Army Break-up Eliminating Trained Soldiers Is Seen As Tragic Error

WASHINGTON, July 21.—(AP)—Sumner Welles, acting secretary of state, said today the United States had information that Germany is planning new terms of agreement against the remaining independent countries in Europe.

Welles also disclosed the United States had promised full support to Britain in the event an international incident arose from an alleged attempted Nazi coup in that country and from the order which explains the German minister there.

WASHINGTON, July 21.—(AP)—Declaring America is in "infinitely greater" danger than a year ago, President Roosevelt asked Congress today to authorize the extension of the one year period of active service in the Army of selectees, National Guardsmen and reservists.

Unless the extension is granted, Welles said, the nation will be taking a grave national risk and disintegration of the army will be under way within two months.

He added it would be a "tragic error" to eliminate about one-third of the trained soldiers and three-fourths of the officers.

Roosevelt said he was asking Congress for specific legislation in a specific bill. He said he hoped the legislators would acknowledge the national emergency which has been created and will remain for a specific period or until reversion by the Congress of the President's emergency powers.

The bill, he announced, will authorize Congress an extension of service of selectees and reservists in the national guard and in the national guard reserve.

At this time, he said, the national guard is being called upon to do more than ever before. He said the national guard is being called upon to do more than ever before.

Lehmann Tells Of Defense Bond Sale Drive

Civic, Government Leaders Asked To Form Organization

Marl Lehmann, deputy commissioner of the sale of Defense Saving Bonds for Florida, outlined the program of the drive to sell bonds before a group of men and women representing civic clubs, and the County and City governments at the City Hall this morning.

Giving three reasons for buying the bonds, Mr. Lehmann said people would feel they had bought a share in the government, that it would induce persons to save who had never formed such a habit, and would also guard against inflation due to government spending at this time.

Good habits of saving may be developed by people buying saving bonds as people who have never saved before may buy a bond and take an interest in laying something by, Mr. Lehmann said. Children in school may be taught the habit of saving through buying stamps towards a bond.

People are making more money than they will be making 10 years from now when the average over and depression sets in as it has after every war.

That hedge against the days of depression is a bond which cash money will certainly come in handy then when we are making less money.

The selling of bonds will also pay the cost of preparing for defense over a period of years. Transcendent spending must be done in the next few months to build the machine of defense and it would be impossible to pay the cost of the war.

State To Start Paving Road 44 In Three Weeks

Crew Is Surveying Link Connecting Lakeshore Drive

W. D. LeVelle, division engineer of the State Road Department at Deland, has advised that the State Road Department will begin the paving of Road 44 from near Mims to the St. Johns River, a distance of nine miles, within two or three weeks, Edward Higgins, secretary of the Chamber of Commerce, said today.

The Road Department will use its own construction crew in building the road, Mr. LeVelle said. The crew is now on Merritt Island in Brevard county and will finish its work there in two or three weeks, the engineer stated. The workers will be transferred immediately to Road 44.

A crew is still at work surveying rights-of-way from Sanford through Geneva to the St. Johns River, with a view to eventually linking Road 44 with Lakeshore Boulevard. The crew will be maintained here until the work is completed, Mr. LeVelle said.

Completion of the surveyed part of Road 44 has been an objective of the road committee of the Seminole County Chamber of Commerce and this district's legislative representatives and senators for a number of years.

England Said Winning War Of Propaganda

V-For-Victory Campaign To Organize Underground Army Called Experiment

LONDON, July 21.—(AP)—A British Broadcasting Company executive asserted today that Britain's V-for-victory campaign to raise the underground army against Germany was the "first pitched propaganda battle of the war" and that the British are "winning it."

The executive, European News Editor N. F. Newsome, said the V-drive is one of a series of experiments to test the readiness of the people of the occupied countries to accept leadership from London.

He added "There will be other things to worry the Germans."

Reports said the challenging V symbols of victory and liberty with the slogan "Nedane se" — "We will not give in" — were scrawled on walls and fences throughout Czechoslovakia, and that accompanying acts of sabotage were increasing daily in this first non-German land to be occupied.

Reports from Paris, it was said, told of 6200 V prosecutions by the German authorities there. Posters in which most of the words started with V have been scattered and pasted throughout the city, it was said while at Bayonne the letter had mysteriously appeared on German automobiles.

U. S. Soldiers Land In Guiana

GEORGETOWN, British Guiana, July 21.—(AP)—The first detachment of United States troops to garrison two South American bases landed here under the destroyer deal with Britain arrived today.

These are the first peacetime bases garrisoned by the United States on another continent, although Marine and troops have been stationed in China for guard duty.

The bases are at the approximate center of British Guiana's Atlantic coastline, about 1,500 airline miles east of the Panama Canal.

The drive is designed to gather only discarded aluminum.

Lehmann Reports Bins Are Set Up As Drive For Old Aluminum Gets Under Way

Sanford Golfers Bow To Orlando Team 19 1/2 To 16 1/2

Sanford's drive for cast-off aluminum, which will be used to help remedy a temporary shortage in the nation's defense supply, officially got under way today with two bins placed downtown to receive the metal.

One of the bins is located in front of the Post Office and another has been placed by the Sanford Atlantic National Bank.

Harris Anderson, who has been named chairman of the aluminum drive by J. L. Ingley, head of the Seminole County Defense Council, said a third receiving bin will be set up later.

Charles Morrison, manager of the Bits Theater, announced plans for a children's aluminum matinee on Wednesday afternoon, when any child under the age of 14 will be admitted by presenting an aluminum tin.

Other theaters over the state are having similar matinees in connection with Florida's aluminum drive, Mr. Morrison said.

A house-to-house canvass for the collection of the vital defense metal will be instituted in Sanford soon, Mr. Anderson said. Boy Scouts and Girl Scouts will meet tonight to discuss what aid they can give to collecting aluminum from homes.

Antlers Land Season's Biggest Catch; Crawford Pulls In 125-Pound Grouper

The largest catch of fish made this season in waters off Daytona Beach was brought in by members of the Antlers of the B. O. E. Lodge number 1247, headed by Ben Crawford, B. A. Crawford said this morning.

A total of 1,026 pounds of fish were caught by the party of 12, including 23 red snappers weighing 224 pounds. Besides the grouper, which weighed 125 pounds, other catches were crabs, Mr. Crawford declared.

Germans Say Entire Division Of 15,000 Captured In Mogilev Sector

Weather Hampers Nazi Blitzkrieg

Losses Inflicted Behind German Lines By Guerilla Bands

The Germans asserted today that Adolf Hitler's invasion armies had annihilated an entire Soviet division—about 15,000 troops, in fighting around Mogilev, on the Dnepr River front guarding Moscow while the Russians reported heavy carnage was inflicted on the Nazis in the 30-day-old struggle.

Moscow reported violent overnight battles on the north, central, and south warfronts, and indicated the three Nazi drives pointed at Moscow, Leningrad and Kiev seem effectually stalled.

Hitler's field headquarters asserted the German forces still were pushing ahead, though extremely bad weather was said to be hampering their blitzkrieg style of assault.

A Red Army bulletin said marauding Soviet guerrilla bands behind the German lines were inflicting "heavy losses on the enemy."

In the war in the air, R. A. F. planes swarmed across the English Channel in broad daylight and pounded industrial centers in Nazi-held France after smothering overnight the German Rhineland and German-occupied Netherlands.

Red Army troops were reported earlier today holding grimly to their positions, protecting the vital approaches to Moscow, Leningrad and Kiev, while Soviet guerrillas took an increasing toll of German invaders in savage fighting behind the lengthening Nazi lines.

The German High Command said merely that operations were "continuing according to plan," and military commentators gave the impression that the Germans were successfully splitting up the Red Army into blocks for steady annihilation.

The Germans and Russians even disagreed on the weather. The Nazis told of battle clouds swirling dust clouds from the Battle to the Black Sea, while the Russians said it had been raining for three days on the front.

The Soviet information bureau commander said Red armor nevertheless continued to hammer German tanks on the ground and Nazi planes in the air.

Twenty-five German planes were reported shot down yesterday morning, and in addition, a German destroyer was sunk in the Baltic.

Battle sectors in the German-Russian war remained the same as several days past, the Soviets said. Stiff fighting continued at Smolensk, 230 miles west of Moscow at Pakov, 150 miles south of Leningrad, and at Novograd-Volynsk, 130 miles west of the Ukraine capital of Kiev.

This report, issued from a Moscow which has been camouflaged and sand-bagged so as to be almost unrecognizable even to old inhabitants, said it had been raining heavily on the battlefields for three days.

Red Army men were portrayed as holding their own against numerically superior German armor. German military commentators on the other hand told of chess-like maneuvers by masses of men and tanks all covered with dense Russian dust that swirled over the plains from Leningrad in the north to Kiev in the south.
