WASHINGTON (UPI)-It is a matter of individual opinion which of two games Nikita S. Khrushchev is playing in the United States.

It may be the carnival abel game in which the local yokels are invited to look for the hidden pea. Or, perhaps, it is the gimmisked game of heads I win and tails you loss.

The shell game aspect of Khrushchev's per-formance develops from what appears to be his purpose in establishing his own standards by which he wants people everywhere to form an opinion.

Khrushchev is having pretty good luck with that. The communications systems of the free and the Communist worlds have been meshed for his use. Khrushchev has established for Communists everywhere what they must regard as a basic fact of his American journey. It is that the U.S. government isolated him

from the common people of the United States.

Equally established as Communist gospel every-where is something else for which Khrushehev desires acceptance as a basic fact.

It is that he came here as a simple man of peace with a plan for peace. Communists behind the Iron Curtain must believe that, too. They will have nothing else to believe. American or British or French Communists also must believe it although they will have been exposed to both sides of the story.

The other side of the story is summed up best in the idea that Khrushchev's aim is peace at no price. That is, that he does, in fact, senire peace but not at the cost of mutual concessions which would require his side to give as well as to

take. Tails I win, heads you lose! To complete the standards by which Khrush-chev desires that his American journey be judged, he has established for Communists everywhere another basic fact.

It is that while isolated by government design from the peace-loving American commoners,

he has been surrounded, heckled, insulted, abused by representatives of the war-mongering America oan upper classes.

NO. 817

This set of standards is loaded against the United States and in favor of the Communists It is unhappily likely that Khrushchev will ge home with no thaw in the cold war. The Communist line explanation is ready-matic by Khrushchev's adroit propaganda creating standards by which his American journey may be judged. The line will be this: That the masters of

the American people prevented Khrashchev from getting through to common man; that these var-mongering masters thus were able to reject peace; that this rejection was accompanied by discourtesies dishonoring him and the Soviet

That is what Communists, American and foreign, would be told to believe, and they would believe it. Some other soft-headed Americans may believe it, too.

Editorials The Salvation Army Does Good Work

Capt. Marcella Reynolds of the Salvation Army recently issued her report of the first six months activity by the ganisation in Seminole County and it reveals two things:

have been handled through organized charities or other

The Salvation Army sent 13 girls to the State Youth Camp, five to the Band Camp, 18 to the Guard Camp and 18 younger girls to the Sunbeam Camp in addition to its charitable efforts.

Of course, this takes some money-more than these in-strious women can collect. The United Fund includes funds for the Salvation Army and this year has budgeted \$9,000 b support the work. Giving to the United Fund will help keep the Salvation

Army effort going. Remember the Army's unselfish con-tributions to the unfortunate and be just as unselfish as the inited Fund call comes.
