Despair Forecast Unless Countries Temper Prejudice

Chamberlain Declares Nations Must Adopt Give And Take Attitude At Conference

LONDON, June 2.—(A.P.) Chamberlain of the British government today declared that unless nations in the House of Commons on foreign affairs temper their prejudice against each other, the world will be plunged into a new era of despair.

He said nations, "our difficulties are appreciated by the British government," he said.

The British cabinet ministers expect a pronouncement on British foreign policy on June 10, although Chamberlain said that the cabinet report, little basis for the expectation.

He told Commons that unless nations temper their prejudice against each other, the world will be plunged into a new era of despair.

He said nations, "our difficulties are appreciated by the British government," he said.

President Gives Diplomas To 432 ANNAPOLIS MEN

ANNAPOLIS, Md., June 2.—(A.P.) President Hoover today conferred the 432nd set of diplomas on the graduates of the United States naval academy and the United States military academy at Annapolis, Md.

The president, in a message to the graduates, said that they should cultivate the relationship of their fellow citizens, the relations and sympathies of the relatives and sweethearts of the officer graduates, and the relations of the officer graduates to the public.

He said that the graduates should be prepared to accept the duties of the officer's profession with a "right purpose of heart."

Mr. and Mrs. Roosevelt lined up at the academy to watch the formation of the undergraduates for final orders and to have lunch with the graduates at the home of Rear Admiral Thomas C. Hart, superintendent of the academy.

They departed at 3:27 p.m. for the White House.

Following from president Hoover's message to the graduates, the graduates of the United States naval academy and the United States military academy were given diplomas by the president.

Mr. and Mrs. Roosevelt lined up at the academy to watch the formation of the undergraduates for final orders and to have lunch with the graduates at the home of Rear Admiral Thomas C. Hart, superintendent of the academy.

Huge Stabilizing Corporation Possessed Assets Over 200 Millions

WASHINGTON, June 2.—(A.P.) A gigantic banker, pool, organizer in those first dark days of 1929 to stabilize the crashing market, was shown in testimony today before the Senate committee investigating the Securities and Exchange Commission.

The witness fingered a small, obscure corporation, the Stabilizing Corporation, as the holder of the huge operations of the pool.

He said that the corporation had assets of \$250,000,000.

Out of a steady stream of questions and answers, the witness, George Whitely, of the United States naval academy, said that he had been in the company of the witness, Whitely, at the time of the formation of the pool.

He said that the witness, Whitely, had been in the company of the witness, Whitely, at the time of the formation of the pool.

Evidence Given To Show Income Of Big Banker

Michell Claims Sum Was Made On Contemplated P.R. Fils

NEW YORK, June 2.—(A.P.) Charles E. Michell, former president of the National City Company, today produced evidence to show that he had received a sum of \$1,000,000 from the National City Company in 1929.

The evidence, which was given in testimony before the Senate committee investigating the Securities and Exchange Commission, showed that Michell had received the sum of \$1,000,000 from the National City Company in 1929.

Michell claimed that the sum was made on a contemplated P.R. Fils.

War Department To Build Lake Stock Pile

Persons wishing to protest against the granting of a War Department permit to the State Department for the construction of a stock pile in Lake Superior, should do so before June 10, according to a statement today issued by the War Department.

The War Department is planning to build a stock pile in Lake Superior, and the State Department is planning to grant a permit for the construction of the stock pile.

17-Year-Old Girl Killed In Wreck On Highway Today

Albino, Okla., 17-year-old, Sara F. Smith, was killed today in a wreck on a highway near Okla. City.

The girl was driving a car when it was struck by a truck, and she was killed.

Lindbergh Urges Continuation Of U. S. Experiment With Dirigibles

WASHINGTON, June 2.—(A.P.) Charles Lindbergh, flying editor of the St. Louis Post-Dispatch, today urged the continuation of the U. S. experiment with dirigibles.

He said that the dirigibles were a valuable means of transportation and that the U. S. government should continue to experiment with them.

Holy Label Bill Approved In House By Vote Of 61 To 7

A bill to prohibit the sale of Holy Label cigarettes in Florida was approved today by the House of Representatives by a vote of 61 to 7.

The bill was introduced by Representative Frank J. Murphy of Florida.

Germany To Call Debt Moratorium

BERLIN, June 2.—(A.P.) The German government today declared that it would call a moratorium on its foreign debt.

The government said that it was unable to pay its foreign debt and that it was calling for a moratorium.

Public Debt, Interest At \$1,000,000,000

WASHINGTON, June 2.—(A.P.) The national public debt today reached \$1,000,000,000, according to a report today issued by the Treasury Department.

The report said that the public debt had increased by \$100,000,000 since the end of May.

Substitute To Taxation Plan Is Presented

New Scheme Contemplated To Finance Government's Huge Public Works Deal

WASHINGTON, June 2.—(A.P.) A substitute bill to finance the government's public works program was presented today to the House of Representatives.

The substitute bill, which was introduced by Representative Charles E. Michell, provides for a new scheme to finance the government's public works program.

24 Law Violators Appear In Month Of May Before County Judge Sharon

A total of 24 white and colored law violators appeared in the month of May before County Judge Sharon in Okla. County.

The violators were charged with various offenses, including carrying a concealed weapon and driving a motor vehicle without a license.

Stopping Of Clocks Makes It Unanimous In State's Capital

2 Injured In Gun Battle In Cuban Capital

HAVANA, June 2.—(A.P.) Two persons were injured in a gun battle in the Cuban capital today.

The battle took place in the city of Havana and resulted in the deaths of two persons.

Bank Demands On R.F.C. Take Deeded Slump

WASHINGTON, June 2.—(A.P.) A report today showed that the Reconstruction Finance Corporation (R.F.C.) had received a large number of bank demands for loans.

The report said that the R.F.C. had received a total of \$100,000,000 in bank demands for loans.

Germany Plans To Aid Young People Planning Marriage

BERLIN, June 2.—(A.P.) The German government today announced that it was planning to aid young people who were planning to get married.

The government said that it was providing financial assistance to young couples who were getting married.

Charles O. Bare Victim Of Early Morning Hold-Up

OKLAHOMA CITY, June 2.—(A.P.) Charles O. Bare, a prominent Okla. City banker, was the victim of an early morning hold-up today.

Bare was held up by a group of men who demanded money from him.

Deadlock In Committee Continues A 4 Hour For Adjournment Is Reached

TALLAHASSEE, June 2.—(A.P.) A deadlock in the Senate committee today continued for a fourth day.

The committee was unable to reach a decision on the bill and adjourned for four hours.

Public Debt, Interest At \$1,000,000,000

WASHINGTON, June 2.—(A.P.) The national public debt today reached \$1,000,000,000, according to a report today issued by the Treasury Department.

The report said that the public debt had increased by \$100,000,000 since the end of May.

Germany Plans To Aid Young People Planning Marriage

Sanford Herald

Published every afternoon, except Sunday at Sanford, Florida, 117 Macquett Avenue. Entered as second class matter October 27, 1918 at the Post-Office at Sanford, Florida, under act of Congress of March 3, 1879.

Subscription Rates: One Year \$7.00, Six Months \$4.00, Three Months \$2.00, Single Copies 10 Cents.

OUR HOPE: And now, Lord, what wait I for? My hope is in thee. Deliver me from all my transgressions: make me not the reproach of the foolish.—Psalm 138.

The Florida Legislature does not believe in disarmament. It has refused to pass a law curtailing the promiscuous sale of firearms.

As we get it, Senator Whitaker sends the Legislature to do nothing because it can't do the thing that Governor Sholtz promised.

We have just found out what "preferro" stock is. That's the stuff sold by Morgan & Co. to their special list of friends under the "Warrior" price.

Al Capone loses another attempt to gain his freedom from prison on a legal technicality. Technicalities are not as popular with eminent jurists now as they used to be.

We were interested to note in one of our exchanges the other day that pajamas are being advertised fifty percent off. Which is just another indication that summer has come.

Necessity is the mother of invention, or something like that. The Chipley banner has discovered what to do with accumulated blank bank checks lying around the office. It uses them as wrappers for its mail edition.

The population of New York City has increased from 6,930,446 in 1930 to 7,218,000 now. Which just goes to show that the back to the farm movement inaugurated by penthouse occupants is gathering momentum.

A Sales Tax Would Help

As a result of the Morgan investigation the conviction is steadily growing that drastic changes ought to be made in the American system of taxation. In a year which saw less than 1,500,000 individuals, 85 percent of whom had incomes of less than \$5,000, pay all of the income taxes collected in this country, J. P. Morgan and his 19 partners were not required to pay one cent as income tax to the support of the government.

It is being pointed out by advocates of the sales tax, that Mr. Morgan could not have escaped so easily during the past three years if there had been a small tax levied against everything he bought. Some estimates indicate that his living expenses last year reached the enormous total of half a million dollars. They may have been much higher. But a two percent sales tax on a half million dollars worth of purchases would have netted the government \$10,000.

What was true in Morgan's case was probably true in scores of others. Persons spending fifty or a hundred thousand dollars a year on automobiles, yachts, and other luxuries were able to escape the payment of income taxes by taking advantage of the provision allowing for deductions on capital losses. A sales tax covering all such purchases and all other commodities which are bought and sold could not have been escaped. A two percent sales tax on Mr. Morgan's \$2,500,000 yacht which he bought in 1930 would have amounted to \$50,000.

Thousands of persons in the United States derive a comfortable portion of their income from tax-exempt securities. We have seen it estimated that there are seventy billions of dollars worth of these securities owned in this country. Revenues from such sources are not subject to the income tax. If these bonds all bear interest at an average rate of four percent, the annual income which is tax exempt amounts to \$2,800,000,000. In other words a single individual might have an income of a million dollars a year, and if it came from these tax exempt securities, he would not be required by law to pay any income tax whatever.

It is not now possible for the government to tax directly the income from these bonds, as they were issued with the understanding that they would be exempt from such taxation, and the government could not repudiate this feature of the bond any more than it could repudiate the bond itself. But it could reach the income indirectly through the enactment of a sales tax, and collect something from that portion of the income which is spent for commodities of one kind or another. A two percent sales tax, if it reached all of the income from tax exempt securities, would amount to \$56,000,000 a year.

Of course, the sales tax is not a perfect system of taxation. But neither is the income tax, it has become fully apparent recently. Perhaps the sales tax, and the income tax, one supplemental to the other, might overcome many of the injustices which have existed in the past.

"Dixie"

All of us know when we hear the strains of "Dixie" that it is the national anthem, as it were, of the old Confederacy. Most of us know that "Dixieland" refers to that territory in the United States lying below the Mason Dickson line, but few of us know for certain whence the name "Dixie" came.

There are at least two theories about the origin of the word, both of which are surrounded by facts lending credence to their authenticity. Whichever is correct there is a magic about the name, that never fails to kindle a spark in the heart of every Southerner and makes him rush into the street when the band strikes up the stirring air of "Dixie".

One version concerning the origin of the word, whose source has long been a puzzle to scholars, is that it came from the name of a slave dealer, Mr. Dixy, in New York whose practice it was to fatten his slaves by giving them plenty to eat and not making them work. The fame of the Dixy slaves spread throughout the country, and some way, some how, the cognomen became synonymous with abundance of food and much leisure and was applied in general to the slave territory. Since, however, that section was not exactly a land of idleness and plentiful edibles, there has been a doubt raised about the explanation of the term.

WILL THEY PAY?

EDITOR'S NOTE: This is the first installment of a planned continuation of the Morgan story. Many believe it is an important factor in preventing recovery from the depression. It will tell you in first reader language how the war debts affect you, and how the value of your Liberty Bonds, the price of your farm products, your business and your job, will answer many of the questions that this most perplexing of all economic problems has given rise to.

The late ambassador Myron T. Herrick was a wise and kindly man. He was also a great representative of his country in France. If he had a fault it was that he was too ardent a friend of France. Whether because of his affection for the country where he was so sincerely honored by a foreign people, or because of his economic wisdom, Mr. Herrick consistently advised the settlement of war debts due to the United States on a basis of extreme generosity to Europe. In 1925, Mr. Herrick was in Washington, and had many conferences with Senators and Congressmen, on whom he urged his point of view. Needless to say, he met with little response from them. One day he had lunched at the White House, and had spent some time urging on President Coolidge, the advisability of a particularly lenient funding of the French debt. Mr. Coolidge's only reported reply, which was often repeated with considerable glee by Mr. Herrick, was: "Well, they hired the money, didn't they?" In that classic remark are summed up the feelings of the average American towards the debts which Europe owes us. They are debts and they should be paid!

But the American people have had forced upon them the unpleasant realization that the question is not one which can be dismissed forever by a simple pithy sentence. The ghost of the debts will not remain laid—it persists in reappearing at intervals, and now seems to have come to stay. We have gradually become aware of the fact that the burden of the war debt, once it is of great importance, is only for our peace of mind. The majority of the thinking population, and certainly those who pay taxes or are in active business, desire a final settlement that will not be an added tax burden upon them and will operate to assist in business recovery. Many would be glad to have the question resolved in a way that would be fair to the debtors and would not place an unfair burden upon foreign nations.

Despair Forecast Unless Countries Temper Prejudice

(Continued From Page One) of them on the basis of one-tenth or anything like that. "I should like to say that there is no intention on my part to try to define what will be the policy of the administration respecting debts should an impasse be reached relating to their collection. "I have no authority to do that, and do not assume to say what recommendations, if any, the President will make. I do know as a matter of fact that the President has not sought to compromise the debt—that he has not disregarded the existing law on the subject."

The Indiana Robinson went into the debt question after discussing a speech in London by Ambassador Bingham and asserting Bingham should be recalled for "seeking to overturn the traditional policy of the United States against foreign entanglements."

He recalled he had protested against Bingham when the nomination was before the foreign relations committee on the ground that Bingham had made "pro-British" statements while abroad in 1927 but said he withdrew his objections when informed Bingham had denied the statements attributed to him.

Tydings, Democrat, Maryland, who proposed a lump sum settlement of all the foreign debt before he concluded a long speech, defended Bingham, saying "when the remarks were read in full they would show he was 'being candid and if an ambassador does that he's the best ambassador we can have."

The Marylander denied he was for cancellation, but said he would welcome any genius to show him how Great Britain, with only \$750,000,000 in gold, can pay a debt of \$4,000,000,000 when we won't accept goods in payment. Robinson, of Arkansas, said the President "necessarily in the conduct of foreign relations realizes the difficulties that are to be met in collecting the debts, but there is every indication that he is studying and carrying out, insofar as it can be done, the joint resolution of the Congress upon this subject."

SUCH IS LIFE—

SUBSTITUTE TO TAXATION PLAN IS PRESENTED

(Continued From Page One) the closed shop, and for many years has been and is now prepared to deal directly with its employees collectively on all matters relating to their employment. He added, however, it was opposed to "conducting negotiations regarding such matters otherwise than with its own employees and was unwilling to conduct them outside organizations of labor or with individuals not its employees and in his preferred list.

"Therefore, when overseas he must pay some attention to the House of Morgan. The quicker he's brought back here the better." He then took up Wooten, who also was on one of the Morgan lists, both before he became secretary of the treasury, and said "the people of this country will feel a far greater confidence in it if both these gentlemen leave the government service."

Congressional leaders have said they expected President Roosevelt to send a message to Congress soon outlining the war debts situation.

NOTICE TO OWNERS OF DOGS. As required by law, all dogs in the City of Sanford, Florida, except those that are kept on the premises of the owners or are muzzled while at large, must be vaccinated for rabies each year. Dr. C. W. Baker, Veterinarian, will be at the rear of the City Hall from 10:00 A. M. to Noon, each day during the week commencing Monday, June 5th, 1933, to do this work. After that time, any dogs found running at large, unmuzzled and not vaccinated for rabies, will be picked up by the police and killed. The cost of vaccination will be borne by the City from the annual license tax of \$1.25 per dog. F. S. LAMSON, City Clerk.

He flips old suspenders to show why fresh Gulf gas is better

WHEN gas gets old—STALE—something goes out of it that never returns. It gives less power on hills—less mileage on the road. Your motor starts slower... seems sluggish. Gum forms faster. New R-D-R Process insures FRESHNESS in Gulf. Gulf's high-speed delivery system rushes fresh Gulf Gas to the pumps. And that gas stays fresh longer, due to Gulf's exclusive R-D-R process—a process that actually delays deterioration. 5 important facts about fresh gas: 1. Fresh Gas starts faster than stale gas. 2. Fresh Gas gives you more power than stale gas. 3. Fresh Gas gives you more mileage. 4. Fresh Gas is higher in anti-knock rating than stale gas. 5. Fresh Gas is clean-burning—causes less motor fouling than stale gas. Try a tankful of fresh Gulf Gas. No extra cost. GULF OIL CORPORATION, PETERSBURG, VA.

that good Gulf gasoline—(ALWAYS FRESH) NOW LUBRICATED!

'Guest Day' Is Staged At Municipal Links

'Guest Day' was observed yesterday afternoon evening at the Sanford Country Club by golf games, an informal supper, bridge, and ping-pong. A large number of persons of the city enjoyed the hospitality of the club at that time.

After the golf games in the afternoon supper was served buffet style on the club porch which was decorated for the occasion with vases and bowls of marigolds and statice. Bridge games were then enjoyed until a late hour when high score prize for the women was awarded to Mrs. L. P. Hagan, Jr. and high score prize for the men given to Fred Stanley.

Among those present were: Mr. and Mrs. H. M. Payworth, Mr. and Mrs. Gordon Barnett, of Fern Park, Mr. and Mrs. L. P. Hagan, Jr., Mrs. Roy F. Symes, Mrs. George S. Witmer, Mrs. Allan Moseley, Mrs. John M. Kapp, Mrs. A. H. Moses, the Misses Mary Dight, Mary Hill Pierce, Elizabeth Shoemaker, and R. B. Chapman, B. L. Beldin, A. C. Reynolds, Charles Dunn, Alfred Stanley, Warren Herbert Chanter, Sharon, Fred Holly, Henry Zor, Heide, John Ludwig, C. E. Williams, A. C. Fort, S. D. Highleyman, Howard Fyall, Marion Wagner, Robert Highleyman, Fred Stanley, Frank Pierce, Joe Tucker, of Kissimmee, Roy F. Symes, Jr., Buddy Gainer, of Tampa, George Anderson, and H. B. Pope.

Invitation Extended To See Quilt Exhibit

Mrs. Augusta D. Coffington of the Women's Club today invited residents of Sanford to come to Ovid's this afternoon and tonight to attend a quilt exhibition that has for a feature the service of home-made pies, cream and cake at an outdoor sidewalk cafe.

Quilts that are to be displayed will vary in size from one to 100 years, she said, with many other unique articles, all of them home-made, also will be displayed. The proceeds are for the benefit of the Club she said.

President Gives Diplomas To 432 Annapolis Men

(Continued From Page One) ceremony and during the principal a dress I went sound asleep. Talking earnestly to the 1933 graduating class the President said:

"I ask you to avoid an exclusive relationship to your own clan—to your clan of the navy or to some other special government service or to the clan of your profession in civil life. Remember to cultivate the friendship of people, not alone in your own class or profession—but the average run of folks—the same folks you would have known and liked an affiliation with had you not been chosen to enter and to graduate from this highly specialized institution of higher education.

"This I ask of you, not only for your own sake, but for your country's sake. You who become officers of the United States navy are not set apart as a class with different interest and different ideas from those of the rest of the country. Those of you who are to enter civil life are, in the same way, in no sense a clique."

Only 244 of the graduates were commissioned in the navy. Because of the lack of places for new officers, the remainder were returned to civil life.

The Florida graduates at the naval academy are:

Richard L. Kline, Vineland; Frederick W. Purdy, Sarasota; David McCampbell, West Palm Beach; William L. Dawson, Brighton; George M. Price, L'Le Oak; James B. Burrows, Pensacola; Bernard H. Meyer, St. Petersburg; F. W. Purdy, Sarasota Springs.

The identity of Mickey Mouse, played by Rimora Grad-fek, will be a guest without charge tomorrow.

Invention Makes Possible Operations Under Safe Conditions

LONDON—The aviator who is credited with one of the most effective inventions for war-time aerial combat today is at work upon devices which he hopes will usher in a new era of safety in flying.

With a newly-designed helicopter, Capt. Victor Dibovsky believes that flight "safe as a bird" is within reach. Such attainment would enable the average suburban dweller to trundle a "baby" helicopter from his garage and fly to the office as he now uses a motorcar.

Captain Dibovsky's design makes possible a single-seater, mid-engine, capable of being housed in a five-foot-wide garage and driven by two pairs of small vanes. In mass production the helicopter could be built to sell at about 150 pounds, it is stated.

Captain Dibovsky also foresees Jules Verne's dream of "The Clipper of the Clouds" coming true. A hull filled with 36 sets of his helicopter vanes, he says, would safely carry 200 passengers.

He claims that his helicopter has from six to ten times the lifting efficiency of the ordinary airplane propeller.

The inventor contemplates that landing and taking off in the utility plane of the future must be as simple as it is for a bird.

In a lofty laboratory here he gave a demonstration with a large model about five feet long, weighing 19 pounds, and driven by a 14-h.p. electric motor. The vanes, spaced ones are mounted on crossbars one above the other on a central perpendicular shaft. There are no wings like those of an ordinary airplane or autogiro.

When the electric motor was started the vanes revolved and on attaining a certain speed the model rose vertically into the air and when about a foot from the ground remained poised in the air.

The movements of the model in the air were controlled entirely by Captain Dibovsky at the switch of the motor by which the speed of the revolutions was regulated. When the power was switched off the helicopter sank gently to the ground. Forward or backward movement is achieved by a controller which can be reversed, while lateral control is obtained by the lateral braking of a drum on the motor system.

The single-seater will be built to fly, run on wheels, or be propelled in the water. In the latter case the single back wheel will act as a rudder.

Captain Dibovsky, who was in the Russian Navy up to the time of the revolution in that country, has been engaged in aviation for more than 20 years, having gained his first certificate in the St. Petersburg Aeronautical School in 1910. During the war he was awarded 500 pounds by Great Britain for the invention of the first synchronizing gear for firing a machine gun through an airplane's propeller. But now, he says, he wishes to make life safer, not to destroy it.

As Harry Gustafson's Airport Symposium, Mr. Gustafson, Walter Trapp, Talmaidge Melis, Paul Heidiger, Willard Connolly, Jerry Senkarik, and Harry Westler.

The program was as follows: "Washington and Lee Wines" and "Orange and Blue" by the band; "They Cut Down the Old Pine Tree" by the band; violin solo, "Just An Old Shanty in the Shanty Town," Harry Gustafson; "She'll Be Coming Around the Mountain" and "When It Springs in the Rockies" the band, vocal solo, "Voice in the Old Village Choir," Walter Trapp; "Somebody Loves You" the band; vocal solo, "Prune Song," and "A Home on the Range," Walter Trapp; violin solo, "Santa Lucia," Harry Gustafson; "Has Any One Seen My Girl" and "Farewell Ladies," the band.

MISS KATHERINE LOUISE SCHIRARD IS WED BY ROBERT G. PITTMAN, JR.

A marriage of statewide interest, that of Miss Katherine Louise Schirard, daughter of Mr. and Mrs. John Schirard, of this city, to Robert Grover Pittman, Jr., son of Mr. and Mrs. Robert Grover Pittman, of Apopka, took place last night at 8:30 o'clock at the home of the bride's parents, 107 West Tenth Street. The Rev. A. S. Peck performed the ceremony in the presence of a large group of relatives and intimate friends of the couple.

The rooms of the Schirard home, opened ensuite for the occasion, were decorated with a profusion of garden flowers, and were lighted with quantities of candles. The ceremony was performed against a background of apparatus fern, white gladioli, and aster. On each side of the bride and bridegroom were placed 101 identical bouquets of white gladioli and fern. In the room where the guests were gathered, a number of bowls containing pink roses, lavender statice, and fern, were arranged while the staircase was outlined in a parasol fern and marked with vases of pink asters and fern.

Following the ceremony Mrs. Gladys Morris Williams sang, "A Dawning," with piano accompaniment by Miss Helen Gordy. The bride party entered the room to the strains of Lohengrin's Wedding March played by Miss Gordy.

The bride had as her only attendant, her cousin, Miss Nellie Ray, of Jacksonville, who served as maid of honor. Attending the bridegroom as best man was Robert Becher, of Apopka. The bride was given in marriage by her father.

Pink chiffon and pink Spanish silk lace were the materials combined in form the dress worn by the bride. Feature of the dress was the unusual sleeves, which were made of a long band of chiffon from which fell in soft folds length rows of the material. The body of the dress was fashioned about simple lines with a girdle skirt and the only ornament was a rhinestone buckle fastened to the left. She carried a sweetie, roses, swainsone, and valley lilies.

A ruffled collar of the organza and blue lace marked the necking of the dress worn by Miss Pittman. The dress was made about simple lines of blue lace with covered lace buttons in the front of the dress. The waistline was adorned with a blue organza sash which tied in the back with a low. Her accessories were in blue and she also carried a shower bouquet.

Mrs. Schirard, the bride's mother, selected for the wedding a soft blue and white print dress fashioned along simple lines and worn beneath a jacket of the same material which was made with a draped shoulder and large pockets.

Among the out-of-town guests at the wedding were Mr. and Mrs. R. G. Ingman, of Apopka; Mrs. J. C. Bay, Mrs. Geneva E. Munroe, Miss Catherine Ray, and C. J. Rogers, of Jacksonville; Mrs. W. L. Chandler, of Apopka; Mr. and Mrs. Robert Elarson, Max Wolfstein, and James Harper, of Orlando; Mr. and Mrs. Stevens, Mr. and Mrs. V. A. Stewart, Mrs. William A. Becher, and W. A. Becher, Jr., Mrs. Orlin Mitchell, Oscar Cashwell, and Dr. Carroll of Apopka; Mr. and Mrs. S. L. You, Mrs. Berice You, Miss Stella You, and S. L. You, Jr., of Winter Park; Don Williams, of Tampa; and Joe Tucker, of Kissimmee.

Mr. Pittman was a graduate of the Georgia Military Academy at College Park, Ga. in 1929 and since then has been attending the University of Florida at Gainesville where he will receive his A. B. degree in education on June 5. He is a member of the Phi Kappa Alpha social fraternity, the Blue Key honorary fraternity, and the Serpent and Pirate clubs. He played for three years on the varsity basketball and baseball teams and has been active on the campus during his four years at school.

The bride is the only daughter of Mr. and Mrs. Schirard and has made her home here with them for the past 17 years. She was graduated from Seminole High School in 1930 and later attended Florida State College for Women at Tallahassee where she was a member of the Delta Delta Delta social society.

IRENE FELLOWS MARRIES ANTHONY STUMPE IN THURSDAY CEREMONY

In the presence of a large group of relatives and intimate friends the marriage of Miss Irene Alice Fellows, daughter of Mr. and Mrs. George Carl Fellows, to Anthony William Stumpe, of this city, son of Mr. and Mrs. N. A. Stumpe, of Ocala, took place yesterday afternoon at 3:03 o'clock at the home of the bride's parents on 50 1/2 Sanford Avenue. The Rev. J. J. Kellaghan, pastor of All Saints Catholic Church, performed the ceremony.

The bride was given in marriage by her father and was attended by her sister, Miss Annie Marie Fellows, who served as maid of honor. John Smith, of Daytona Beach, attended the bridegroom as best man.

Immediately before the ceremony the bride's sister, Miss Naomi Fellows, sang, "I Love You Truly," with accompaniment by Miss Madeline Mallon, pianist. The bride party then entered the room to the strains of Lohengrin's Wedding March, played by Miss Mallon.

The walls of the rooms where the guests were gathered were banked with a profusion of lilies and tall baskets of pink lilies. The ceremony took place beneath an arch of apparatus fern around which were placed

Ivy Hemmanhaw Says:

One of the most exciting and at the same time practical fashions of this summer is the dark frock to be worn in town under a white cotton or linen three quarter coat or a waist-length jacket of the white fabric. The three quarter length is newer. This black and white combination is bound to appeal to women, since the all-white coat can be tumbled whenever necessary and the desirability of the all black frock is undebated for town wear.

With one such general wear ensemble it is wise to provide changes of accessories, which, as is so generally admitted, can alter the whole aspect of the costume. For hot weather in town it is correct to wear all white accessories this year, white fabric hat and gloves, white kid shoes and bag to match. This is summery enough for the warmest days. For those summer days which are not so hot, the white side when you start out in the morning, the costume may be keyed in a more practical note by selecting black accessories, lightly designed or monochrome black kid footwear (sandals are especially good), black, neutral or once again the white gloves, and a hat which is in one of the smart neutral shades or in a color to accent the ensemble.

The Weather Bureau's requests for clear actions.

Hurricanes originate in the Atlantic Ocean, off the coast of Africa and in the vicinity of the Cape Verde Islands; also in the western Caribbean Sea. As a rule, they travel westward or northwest. Most of them, after moving westward for some distance, recurve to the north or northeast, though many continue west to the Central and South American coast. Now, of the passage of these storms far out at sea includes the Weather Bureau's forecast the kind of disturbances to be expected on land. The unaided observer may be misled by the signs of an incoming storm. The hurricane warnings, issued by the Weather Bureau, therefore, prevent unnecessary anxiety, as well as make it possible for people living in the path of such storms to take the precautions really required.

WEATHER ADVICE ON HURRICANES WILL BE FULLER

WASHINGTON, June 2.—The United States Weather Bureau this year will strengthen its hurricane warning service by calling directly on ships at sea for reports, under a plan developed by E. R. Colvert, chief of the Forecast Division, in cooperation with the South Porto Rico Sugar Co. Short stations equipped to communicate with vessels in the zones where hurricanes hatch will send out radiograms asking for observations.

The Weather Bureau, for the past 60 years, has taken advantage of every advance in telegraph and radio facilities to obtain as full and timely information as is humanly possible on approaching hurricanes. Its present program calls for weather reports twice each day throughout the hurricane season (June 15 to November) from a number of ships that regularly traverse the areas where these storms originate. If none of the ships happen to be in a zone where a tropical disturbance is in progress, however, the Weather Bureau misses vital advance information. This program, therefore, is being supplemented by the plan of calling directly on ships in waters where a tropical storm is known, or thought, to exist.

When information from any zone is needed, Weather Bureau officials in Washington, D. C. inform the nearest local Weather Bureau official of the zone and the times for which observations are desired. This official gets in touch with the operator at the designated shore radio station, and he, in turn, sends out a message asking that the needed reports be wireless in to the Weather Bureau in Washington. For information on the location of ships at sea the Weather Bureau must rely on shore radio stations, which are constantly kept busy wirelessly with all vessels. This system has always had to do their part by the country's hurricane warning service by immediately completing

Maer, Margaret Tarkenton, L. B. Wathen. The refreshment table was overlaid with a lace cloth and decorated with ferns and pink roses. A three tiered white wedding cake was used as a centerpiece.

Mrs. Stumpe was born in Vincennes, Ind. but has lived in this city for the past 18 years. She attended the public schools of Sanford and was graduated from Seminole High School in 1929.

Mr. Stumpe was born in Titusville and made his home there and in Palatka. He was graduated from Palatka High School and received a degree in mechanical engineering from the University of Florida in 1926. He is a member of Sigma Tau and Phi Kappa Phi fraternities, and is also a member of the Orlando Chapter of the Reserve Officers Association. He has been employed since 1923 by the Florida Power and Light Company and has been living in this city for three years. He is a brother of Mrs. W. E. Varn, of this city.

After the receipt in the couple left in their car for Washington, D. C. where they will spend two weeks. On their return they will make their home in the bungalow at the corner of Eleventh Street and Oak Avenue.

RECOGNITION OF RUSSIA IS SEEN AS WAY TO TRADE

Advantages Of Diplomatic Relations Recited By Journal

MOSCOW, June 2.—(P)—Diplomatic recognition of Soviet Russia must precede any hopes for better trade relations on the part of the United States, declared the publication, "For Industrialization," in launching an editorial campaign for establishment of normal relations between the two countries.

The Journal, organ of the Communist Party, said, "the time has come when the question of the relations toward the Soviet Union has become the acid test of the wisdom of the American political and business circles."

"We are for normal diplomatic relations with the United States, as well as with other countries," the publication asserted, "but such relations do not belong to the category of philanthropic or abstract humanitarian ideas. They are based fundamentally on economy."

"Losses must occur when there is an absence of a firm legal base for mutual trade."

Referring to speculators abroad as to whether President Roosevelt's direct message to President Kalinin constituted recognition, the article says:

"President Hoover's policy was trade without recognition, the results of which are obvious. In 1932, the American exports to Russia were only \$15,000,000 or \$100,000,000 less than in 1930."

Asserting that some Soviet sympathizers in the United States sought to find a "middle ground" for Soviet-American relations, the paper added: "They forgot this is not 1920, but 1933—the first year of the second Five-Year Plan."

"The heads of our national economy are planning industry a year ahead, and this includes imports," the article continues. "Naturally preference will be given to countries where our trade

relations are not exposed to the whims which are unavoidable under the absence of normal diplomatic relations."

"It is known that our economists are greatly inclined to American technique. American electric equipment, lathes, machines of certain kinds, and American cotton are greatly esteemed by our economists and engineers. Our agriculturists are interested in the seeds of a number of American plants. But despite all that, Soviet-American trade turnover is declining, and it is not our fault, as represented. President Roosevelt's favorite program is economic disarmament. We will welcome it. Will the new United States Administration, having proclaimed a new beginning, continue the old boycotting policy?"

speed of 110 miles an hour and a sustained speed of 90 miles, the Union Pacific Railroad hopes to win back lost traffic to the rails.

In plans announced recently this railroad verified rumors extant for some time that the rail people were putting their heads together to develop something radically new in the way of equipment, and that the new train has been developed to the point, it was said in the announcement, where its construction can begin at once and it can be put into service within six months.

The whole train, which consists of three cars hinged together into a long tubular rocket-shaped train which looks like it is made of one piece, is described as weighing no more than a regular type Pullman car. Its construction is to be of aluminum or a light-weight stainless steel, the shape streamlined to avoid unnecessary wind resistance so maximum speed can be attained at minimum effort. A 600-horsepower internal combustion engine, located in the front car, will give the power.

Completely equipped with modern roller bearings and with liberal use of rubber in the trucks and probably a new type of resilient wheel, the train is designed to ride smoother than anything yet known. Being completely sealed, cooled in summer and warmed in winter by an air conditioning system, it will furnish travel comfort per excellence.

Present plans do not include sleeping facilities, although they will be included in trains to be designed later, it is said. The first train is to be used on daylight runs on parts of the Chicago to California route.

To get the full effects of streamlining, which is carried to a further extent than has ever been attempted either in this country or Europe, according to the announcement, all devices such as headlights, tail lights, whistles, bells, etc., are recessed into the body, and windows are flush with the train.

Although there are three cars there are but four sets of trucks, one at the front and one at the rear, and two others in between the coaches, thus saving weight and reducing cost of maintenance.

HIGH SPEED TYPE OF TRAIN MAY BE SOLUTION OF ILLS

Revolutionary Design Calls For Light And Swift Railway Cars

CHICAGO, June 2.—With a revolutionary type of railroad train borrowing its design from the airplane and the streamlined automobile, and capable of a top

speed of 110 miles an hour and a sustained speed of 90 miles, the Union Pacific Railroad hopes to win back lost traffic to the rails.

In plans announced recently this railroad verified rumors extant for some time that the rail people were putting their heads together to develop something radically new in the way of equipment, and that the new train has been developed to the point, it was said in the announcement, where its construction can begin at once and it can be put into service within six months.

The whole train, which consists of three cars hinged together into a long tubular rocket-shaped train which looks like it is made of one piece, is described as weighing no more than a regular type Pullman car. Its construction is to be of aluminum or a light-weight stainless steel, the shape streamlined to avoid unnecessary wind resistance so maximum speed can be attained at minimum effort. A 600-horsepower internal combustion engine, located in the front car, will give the power.

Completely equipped with modern roller bearings and with liberal use of rubber in the trucks and probably a new type of resilient wheel, the train is designed to ride smoother than anything yet known. Being completely sealed, cooled in summer and warmed in winter by an air conditioning system, it will furnish travel comfort per excellence.

Present plans do not include sleeping facilities, although they will be included in trains to be designed later, it is said. The first train is to be used on daylight runs on parts of the Chicago to California route.

To get the full effects of streamlining, which is carried to a further extent than has ever been attempted either in this country or Europe, according to the announcement, all devices such as headlights, tail lights, whistles, bells, etc., are recessed into the body, and windows are flush with the train.

Although there are three cars there are but four sets of trucks, one at the front and one at the rear, and two others in between the coaches, thus saving weight and reducing cost of maintenance.

Being completely sealed, cooled in summer and warmed in winter by an air conditioning system, it will furnish travel comfort per excellence.

Present plans do not include sleeping facilities, although they will be included in trains to be designed later, it is said. The first train is to be used on daylight runs on parts of the Chicago to California route.

To get the full effects of streamlining, which is carried to a further extent than has ever been attempted either in this country or Europe, according to the announcement, all devices such as headlights, tail lights, whistles, bells, etc., are recessed into the body, and windows are flush with the train.

Although there are three cars there are but four sets of trucks, one at the front and one at the rear, and two others in between the coaches, thus saving weight and reducing cost of maintenance.

speed of 110 miles an hour and a sustained speed of 90 miles, the Union Pacific Railroad hopes to win back lost traffic to the rails.

In plans announced recently this railroad verified rumors extant for some time that the rail people were putting their heads together to develop something radically new in the way of equipment, and that the new train has been developed to the point, it was said in the announcement, where its construction can begin at once and it can be put into service within six months.

The whole train, which consists of three cars hinged together into a long tubular rocket-shaped train which looks like it is made of one piece, is described as weighing no more than a regular type Pullman car. Its construction is to be of aluminum or a light-weight stainless steel, the shape streamlined to avoid unnecessary wind resistance so maximum speed can be attained at minimum effort. A 600-horsepower internal combustion engine, located in the front car, will give the power.

Completely equipped with modern roller bearings and with liberal use of rubber in the trucks and probably a new type of resilient wheel, the train is designed to ride smoother than anything yet known. Being completely sealed, cooled in summer and warmed in winter by an air conditioning system, it will furnish travel comfort per excellence.

SUCH IS LIFE

"She's considered the most eligible bachelor in town." "I noticed he isn't married."

MENUS

As part of her final examination in the Home Economics Department of Seminole High School each girl in the second-year class has served a luncheon for four people, served in the Home Economics department.

Miss Mabel Wilson and Mrs. Gladys Adams Smith, home economics teachers, released these luncheon menus today for the benefit of Herald readers. All menus used were canned in the department at the beginning of the year, but all other articles may be secured at the stores of Herald advertisers. Names of the girls preparing the menu are in parenthesis accompanying each menu.

The menus are as follows:

- Chicken Salad
- Strawberry Jam
- Iced Tea
- (Helen Dresser)
- Corn on the Cob
- Green Peppers Stuffed with Cheese
- Creamed Potatoes
- Butter
- Muffins
- Fruit Cup
- Iced Tea
- (Sally Wright)
- Molded Egg Salad
- Bran Muffins
- Apple Pie
- Iced Tea
- (Robert Stahl)
- Stuffed Tomatoes
- Bran Muffins
- Ambrosia
- Teed Tea
- (Catherine Jowers)
- Fricassee Pork
- Noodles with Tomato Sauce
- Beet Salad
- Pineapple Whip
- Iced Tea
- (Pauline Crawford)
- Fried Chicken
- Mashed Potatoes
- Lettuce and Beet Salad
- Cornmeal Muffins
- Buttermilk
- Raspberry Junket with Whipped Cream
- (Mary Manning)
- Cheese Souffle
- Walnut Salad
- Muffins
- Jello with Whipped Cream
- Iced Tea
- (Virginia Brooks)

Grocery Concern Is Staging Bonus Month

"Bonus Month," the South's Blue Ribbon Food Event, will be featured by five important weekend sales, the first of which is a "Great Opportunity Sale," Mr. Galbreath, manager of Piggly Wiggly, announced Thursday.

Mr. Galbreath explained that "Bonus Month" is an annual event with his organization, patrons of their stores being given bonuses in the form of lower prices. Store managers who increase sales receive cash bonuses.

The first week-end sale of "Bonus Month" will be staged Friday and Saturday, June 2-3. It is heralded as a "great opportunity to make food savings as commodity prices are shooting upward with great rapidity."

Many of the special values made possible by the "Great Opportunity Sale" are listed in an advertisement elsewhere in this issue.

Announcement was made yesterday that O. H. Stansford, who has been managing the Piggly Wiggly store on South Sanford Avenue, has been promoted to the management of Piggly Wiggly's store in Fort Pierce. Effectively yesterday, J. H. Cochran, former manager of the Piggly Wiggly on Sanford Avenue, who has not been able to work for three months because of ill health, resumed his duties there.

"Bonus Month—The South's Blue Ribbon Food Event"

Bonuses for our customers in the form of record-breaking, history-making low prices—Bonuses for our store managers who increase sales!

GREAT OPPORTUNITY SALE

Here it is—the first great sale of "Bonus Month" . . . the South's Blue Ribbon Food Event. The special prices are so low that you can't believe them. This is your chance to buy in "opportunity" and get the most for your money. Don't miss this chance to buy at savings not likely to come your way again for months or even years!

2 ATLANTA BEER RETAILERS ARE GIVEN ACQUITTAL

Are Freed Of Violating State Of Georgia's Bone Dry Law

ATLANTA, June 2.—(AP)—Two retailers of 3.2 beer, operating under Atlanta's "home rule" plan, were acquitted yesterday of charges of violating Georgia's bone dry law which prohibits sale of any beverage containing 1-2 of 1 per cent alcohol.

A five-man jury deliberated the charges about two hours. The men—J. H. Falk and C. M. Owens—were charged with selling beer in violation of state laws. They pleaded that 3.2 beer had been legalized by the City of Atlanta.

It was the first test case of Atlanta's home rule plan—a plan that has brought beer to several Georgia cities which licensed the beverage, despite state restrictions on prohibition 3.2 beer is non-intoxicating and is so recognized by congressional decree. The defense appealed for acquittal because "of the overwhelming public sentiment in favor of beer."

The sections of the bone dry law were read to the jury. One prohibits sale or possession of beverages containing 1-2 of 1 percent alcohol. The other section makes it unlawful for "any county or municipality within the state" to license the sale of such beverages.

Atlanta, like many other Georgia cities, licensed sale of 3.2 beer several weeks ago and since then the beverage has been sold openly here. The case attracted much attention. Chief of Police Sturdivant,

IT'S POSSIBLE

AFRICA - CENTER OF WHITE CIVILIZATION?

THE CENTER OF THE FUTURE WHITE CIVILIZATION WILL NOT BE NORTH OR SOUTH AMERICA, BUT AFRICA. UNLIMITED MINERAL AND AGRICULTURAL RESOURCES, YET UNTOUCHED WILL DRAW MANUFACTURERS FROM ALL OVER THE WORLD. VAST MANUFACTURING PLANTS WILL BE SET UP IN THE SANDS OF THE DESERTS AND THE SPRINGS WILL BEAVERLY WASH A NEW AND FASTER CIVILIZATION ARISING BY THE QUESTION OF AFRICA'S HEAT WILL BE OVERCOME BY COLLARS & REFRIGERATION PLANTS IN EVERY HOME AND FACTORY.

THE WORLD'S FASTEST MAN
A CHAMPION OLYMPIC RUNNER WILL BE DEVELOPED AT SOME FUTURE DATE WHO WILL BREAK ALL EXISTING RECORDS - RUNNING THE MILE IN ABOUT 3 MIN.

The Future Dentist!
WONDERFUL CHANGES WILL TAKE PLACE IN DENTISTRY IN THE FUTURE. DENTISTS, AFTER MUCH RESEARCH, WILL FIND A WAY TO EXTRACT AN INFECTED TOOTH, FIX IT UP AND PUT IT BACK AND IT WILL STILL HAVE LIFE - THANK OF THAT YOUSE GUYS WITH FALSE CHOPPERS!
