

"Anvil Chorus" In Palatka; Better Papers In St. Pete; Dogwood Trees In Pensacola

Investigators for owners of a large industry planning to locate in Palatka, the Palatka Daily News reports, "most emphatically stated" to the Chamber of Commerce "that they had never been in a locality where there has been so many knockers and singers in the Anvil Chorus as in Palatka.

"They realized that during the past few years business had undoubtedly been more or less decreasing," continues the trade-buddy's report, "but they, as outsiders, had found that business was actually improving without seeming to have any apparent effect on the long faces and sombre remarks of many of those mainly engaged in business."

While Palatka is reporting the most knockers, St. Petersburg papers give out the information that the Sunshine City is going to have some of the best newspapers.

The St. Petersburg Independent announced that effective last Sunday it would start a 24-hour a day, double leased wire service of The Associated Press, thus giving its readers around-the-clock coverage on world, national, state and local news happenings.

This announcement was followed the next day by an announcement in the St. Petersburg Times that effective next Monday that paper would start 24-hour A.P. wire service, that on Dec. 1 it would begin the carrying of eight additional pages of comics and magazine materials in Sunday issues, and that on and after Dec. 2 it would carry complete market reports.

"Don't let anyone fool you with the statement that we're going broke spending money," says the New Smyrna News. "All the parties this or any other country ever had were breathless because people who had money didn't spend it. We can't have depression as long as coin is ringing in exchange. Hard times come on through pollution and pollution is due to inactivity."

Report Is Ships That Won't Sink Can Now Be Built

LONDON, Nov. 16.—Unsinkable ocean liners, warships and freighters are made possible by an amazing new steel invented in England.

Battleship built of it would be

impregnable, and tanks and armored cars could defy the biggest explosive shells. It is bimetallic and stainless, according to an ex-

pert report.

This new steel cannot be cut by

the hardest chisel, and the most

powerful oxyacetylene blowpipes

have failed to cut the smallest

hole in it.

Tools which reduced the latest

battleship armorplate, designed

to resist high explosives, to semi-

molten scrap in 17 seconds left

the new steel unimpaired after 40

minutes' application.

The inventor is that of John

Dunn, a London metallurgist. The

substance is known and patented.

Originally intended for use in the

manufacture of burglarproof

safes, a slab of the steel, six and

one-half inches thick, was sent

for testing to the British Oxygen

Company.

For seven days workmen there

attacked the slab with every de-

vice known to the scientific burg-

lar and with a great many of

which he knows little or nothing.

It resisted an oxygen lance 25

feet long—one of the most power-

ful blowpipes ever made. This ap-

paratus, weighing nearly two

tons, vainly used 8000 feet of gas

and every known type of oxy-

acetylene torch.

Mechanical tools were battered

or broken and in the end the Brit-

ish oxygen experts confessed

themselves defeated. They issued a

certificate later which stated that

their exhaust tests brought them to the definite conclusion

that the steel is totally impre-

veable.

Careful study of the substance,

they reported, revealed that the

steel had an amazing resistance

to heat caused by a protective

coating which formed over its sur-

face following the application of

the blowpipe.

Since Jan. 1, 1935, the federal government has spent on Hawaii \$10,000,000 for construction proj-

ects of army and navy and

of unemployment.

Record Number of Disasters in Year; Relief Given in 128 by Red Cross

Left—Red Cross worker aids family in New York state floods. Injured father lefts how mother and children were trapped in flooded house until rescued by Red Cross. Right—Tornin, stripped of homes and verdure by tornado in Glister, Mississippi. Insert—Admiral Cary T. Grayson, new chairman of Red Cross, who directs relief work.

OLD Mother Nature visited an unusual number of varied calamities on her children during the past year, causing distress all over the nation to many thousands of men, women and children.

Her repertoire of disastrous occurrences included drought and dust storms in the midwest; explosions, fire, floods, epidemics of disease, shipwrecks, tornadoes and hurricanes in many sections.

As a result the American Red Cross reports that this year the organization gave relief in the greatest number of catastrophes in any single year in its history. It was carried to victims of 128 disasters, which occurred in 37 of

the 48 states and Alaska. Food, housing, clothing and medical aid were given to 110,000 persons in 306 counties—or in almost one-tenth of the territory of the nation.

Two disasters which called into the field every available worker of the relief forces of the Red Cross were the floods in New York state in August, and the Florida hurricane in September, both of which claimed a heavy toll of life, and caused great property damage. In New York state the Red Cross had more than 5,000 families listed for rehabilitation aid, after the storm wreckage was cleared away. In Florida the Red Cross prepared to aid a thousand families, and also to act in problems of the dependents

of more than 100 world war veterans in government road construction camps in the keys, who lost their lives or were killed among the missing in the hurricane.

The work of mercy for these many sufferers was directed personally by Admiral Cary T. Grayson, new chairman of the Red Cross.

Funds are provided for this type of work by membership in the Red Cross and by special relief funds raised in a restricted area. Membership in the Red Cross are sought each year at the annual roll call period, and support both the local chapter work and the national disaster, public health, nursing, war veteran and other work of the society.

Clyde-Mallory Lines To Operate Cruises New York To Indies

Announcement is made that the Clyde-Mallory Lines will operate a series of cruises from New York, Wednesday, Jan. 16, and each alternate Wednesday thereafter, the steamer calling at Miami and sailing from that port Jan. 18, Feb. 1, 18 and 29, March 14 and 28, on seven-day cruises embracing the ports (in order named) of Port Au Prince, Haiti; Kingston, Jamaica; Havana, Cuba and return to Miami, arriving that port the following Saturday morning, thence proceeding to New York in express service.

The rates covering these cruises will be exceptionally economical and provide a most wonderful opportunity of visiting these outstanding points in the West Indies, and at each port various sightseeing trips may be made.

These cruises have been in operation in the past, and proved of exceptional attraction, and it is felt that they will be just one more delightful trip the Clyde-Mallory Lines are providing its Florida friends and our visitors during the winter season.

HEARING IN SANFORD

WASHINGTON, Nov. 16.—(AP)—The farm administration announced yesterday a public hearing on alleged violation of the Florida colony license by Chase & Company, Inc., of Sanford, Fla., would be held at Sanford, Nov. 21.

The administration alleged the company refused to pay its share of license administration costs.

announcements that Republicans had captured the assembly, elected a mayor in Philadelphia, and had registered victories elsewhere, recorded "Big Jim" as saying in his capacity as chairman of both national and New York state Democratic committees:

"The federal administration was sustained (in New York state) by more than 500,000 majority, which ought to be a sufficient answer to the question of the continued popularity of Franklin D. Roosevelt."

Those who scanned election headlines the morning after were at loss to understand the Farley mental processes. Some even chortled out loud.

As returns became more complete, however, and political analysts settled down to the serious business of figuring out what really happened, they were quick to see what Farley had in mind.

The total vote cast for members of the assembly in New York actually showed that the Democrats piled up one half million votes more than the Republicans, although at the same time losing control of the state assembly.

Over in New Jersey, Mayor Frank Hague's record victory in Hudson county, bulkhead of Jersey Democrats—of 177,000 majority for his assembly candidate, would keep the state in the Democratic column if repeated in 1936. In 1932 the Democrat rolled up a 117,000-vote majority in Hudson, enough to offset Republican victories in 17 of the 21 counties and carry the state for Roosevelt by 30,000.

In the preponderantly Republican stronghold of Philadelphia where the Democrats haven't elected a mayor since 1900, the G. O. P. candidate won over the Democrat by only 17,000 votes.

The psychological effect of Farley's statement that results of the scattered Nov. 6 elections "were entirely satisfactory to the Democrats" is what impresses political analysts.

There can be no doubt, they point out, that taken as a whole whatever crowing is to be done can be justified only by Republican and not Democrats. The result show unmistakably a trend away from the "New Deal" as compare to 1932 and 1934.

Farley's happy thought, however, of immediately calling attention to the fact that the people voted for the Democrats to go out and buy him another term, was apparently refuted.

The psychological effect of Farley's happy thought, however, of immediately calling attention to the fact that the people voted for the Democrats to go out and buy him another term, was apparently refuted.

Everglades National Park Helped By Hurricane Blow

MIAMI, Nov. 16.—(AP)—Ernest E. Coe, executive secretary of the Everglades National Park Association, agrees with those who hold it's an ill wind that blows nobody good.

"Fishing (not commercial) is not only permitted, but fostered in all national parks," he said.

"Instead of interfering with persons now coming to south Florida chiefly to fish, the waters within the Everglades National Park will become a veritable fisherman's paradise," he said.

When the easiest way is the best way...

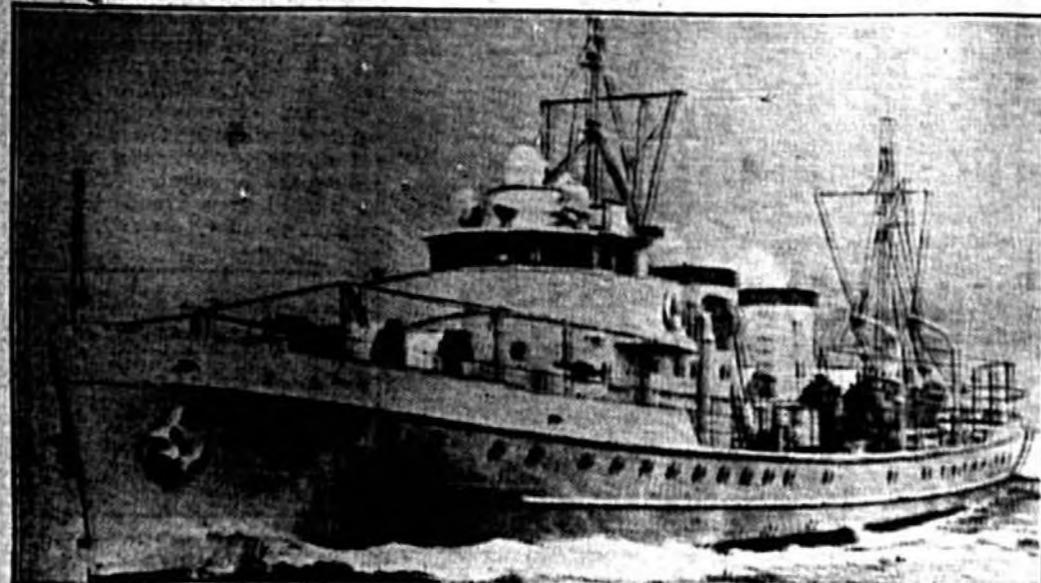

THERE are no two ways about it! Certainly the easiest way to get the most for every dollar you spend is to buy products that you know about through the advertisements in your daily paper. You don't have to go out and look for buying opportunities. The advertisements bring them to you. And all you need do is consider the facts, compare values and decide on the soap or the sedan that best fits your judgment and your pocketbook.

Certainly the best way of making your money go farthest is to buy merchandise of proved value. Advertised merchandise. Merchandise that is bought and used by many people. Merchandise that must be superlatively good enough for its maker to keep calling it to the attention of people day after day and year after year.

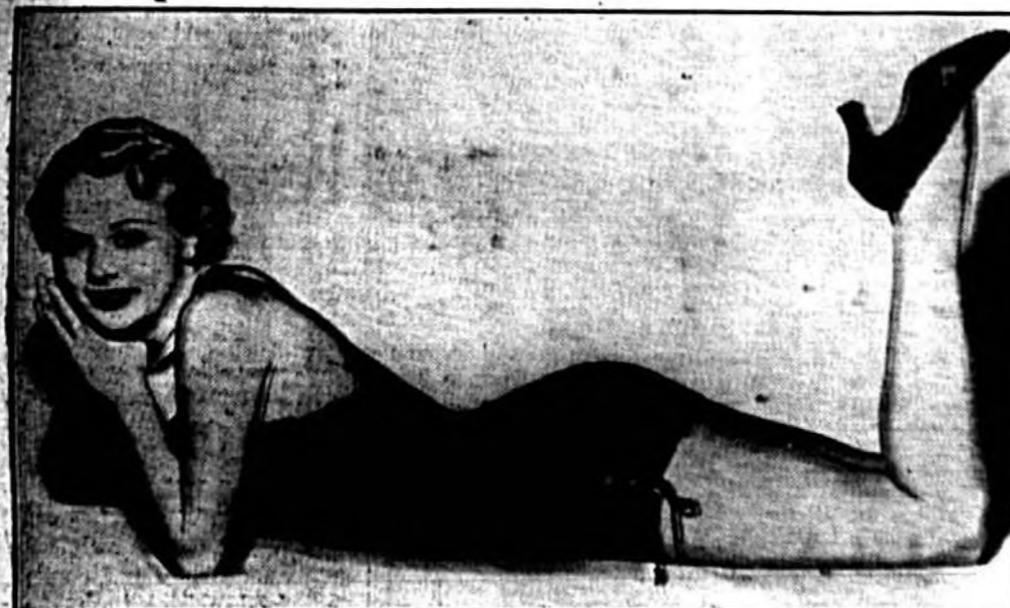

This is the service—of convenience and profit—that the advertisements offer you every day. It will pay you to read them regularly and take advantage of everything they can do for you.
