

Ten Fast Events On This Evening's Boxing Program

Show Will Be Put On By Boys' Club In 4th Street Arena

Ten events, advertised as fast ones, are on the card for tonight's boxing show in the Fourth Street Arena...

Crooms-Bronson Tilt Is Won By Sanford

Crooms Academy of Sanford defeated Bronson High of DeLand on the football field by the decisive score of 14 to 0.

Gators Defeated By Tulane, Score 19-7

By SAM MURRAY NEW ORLEANS, La., Oct. 14.—Fighting back at Florida with its own game Tulane's Green Wave overcame the visiting Alligators from the air Saturday to overcome a first quarter touchdown deficit, and drove on to a 19 to 7 victory before a sunny day crowd of 10,000.

Fast Stetson Squad Beats Oglethorpe, 7-6

ATLANTA, Oct. 14.—Stetson's eleven came from DeLand last Saturday and defeated Oglethorpe, 7 to 6. The visitors played defensive football until the third period when they launched an offensive pegg on a combination of end sweeps to come from behind and nose out the lighter Oglethorpe team.

Black - Draught And Good Health Year After Year

"I have never had a bad sick spell and for years I have taken Black-Draught for the least symptom of upset stomach or sluggish feeling," writes Mr. W. F. Pulliam, of Gatewood, Mo.

Myer, American, Vaughan, National, Lead Batters In Big Baseball Leagues

NEW YORK, Oct. 14.—Floyd Vaughan, of Pittsburgh, who led the batters most of the season, finished with a mark of .385, topping his nearest rival, Joe Medwick, of St. Louis, by 31 points for the undisputed batting championship of the National League.

CHICAGO, Oct. 14.—The American League individual batting championship goes to Charles Myer, of Washington, who during the last four games of the 1935 season lambasted 10 batters in 16 1/2 times at bat to beat out Ed Cavanah, of Cleveland, by point. Myer's winning reads 349 and was made hits in 616 times at bat.

Ralph Wight Sees Banner Year For 1936 Oldsmobiles

"I've seen the 1936 Oldsmobiles. I've heard about the 1936 plans. I've been told of the great production expansion. And so I want to say that I am confident that 1936 will again see all records for production and sales of Oldsmobile broken."

LONGWOOD

The primary department of the Baptist Sunday School had a picnic with all kinds of entertainment at the home of the superintendent, Mrs. L. W. Entaminger, on Greenwood Lake, Wednesday afternoon, Games, swimming, boat-rides and refreshments were enjoyed.

Evolution Of Machinery And Its Influence On Modern Agriculture

By HENRY CONNOR, JR. The past few years have constituted a period of world wide depression—a period of mental and economic confusion; a period in which men's souls have been tried; a period in which the hearts of many have failed them because of the things which have come to pass in the world, for humanity has seemed to be drifting aimlessly, with no set objective.

Contest Winner

HENRY CONNOR, JR. This Chapter, F. F. A., whose address, published herewith, was the public speaking contest at the convention of the Future Farmers of America.

QUESTIONS

- 1. In what country did the Bear war take place? 2. What two important rivers of India have their sources in the Himalayas mountains? 3. What country in the western hemisphere is divided into two distinct parts by a possession of another country? 4. What city in South America is located practically on the Equator, yet enjoys a temperate climate? 5. What valuable coal region, for 15 years under the administration of the League of Nations, has been returned to Germany? What nation has had the coal output during this time? 6. Name four states whose capitals were named for United States presidents. 7. What is meant by the Polish Corridor? 8. Name the six largest cities in the world. 9. What city is sometimes called "The Fountain City"? 10. What is Father Coggin's church? The Shrine of the Little Flower, located? Answers will be found on page 11.

4-H Club Boys Pioneered Work of Record Keeping

For more than two decades, says E. W. Stockwell, state boys club agent, 4-H club boys have been working on the problem of farm record keeping. One of the first things they did was to keep a record of their projects and, during the past few years, the 4-H organization has gone even further and developed projects for keeping records of the entire farm.

Finest Rural Youth To Gather In Windy City For Club Meet

Annual 4-H Club Congress Climaxes Year of Boys and Girls Work. By LESLIE E. TROGER. Special to Florida Farm and Grove. For the 14th time outstanding rural boys and girls in 4-H club work will gather at Chicago the first week in December for their annual national assembly.

## HOME MAKING HINTS FOR THE RURAL HOUSEWIFE

### Hints For The Fall Wardrobe

Just to give you a faint idea of how intriguing are the styles in our new catalogue, we have put three "honors" on display in this month. The new catalogue will surprise you by its difference from former and other fashion booklets. It has lovely photographs of actual frocks worn by movie stars, and you may have frocks exactly like theirs by purchasing the patterns through this newspaper.

Pattern 8302, worn by the littlest girl will be your small daughter's favorite frock. It permits of a nice variety in the contrasting material. Available in sizes 2, 3, 4, 5, 6 years. Size 4 requires 1 1/2 yards of 36 inch material, with 1/4 yard contrasting.

The dress made from pattern 8364 is in a silk fabric with a trend like pattern in gray with a red tie and belt. The white collar is plain. This design is so versatile, it looks just as nice on the young woman as on the high school girl. Available in sizes 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25. Size 17 requires 4 1/2 yards of 36 inch material with 1-1/2 yard contrasting.

The gay little plaid frock worn by the third girl, is made from pattern 8308. Here is all that can be desired in a practical school frock, and plaid is exceedingly popular with the younger generation this season. Available in sizes 8, 10, 12, 14, 16 years. Size 12 requires 1 1/2 yards of 36 inch material with 1/4 yard contrasting. With short sleeves 2 1/2 yards.

Each of these patterns is 18 cents. The new 21 page Fall and Winter Pattern Book which shows photographs of the dresses being worn is 10 cents. (One pattern and the Fall and Winter Book 25c.) You may order the book separately for 10 cents. Address Pattern Department, 11 Sterling Place, Brooklyn, N. Y.

### The Right Foods For The School Child

By ANNA MAE SIKES  
Extension Nutritionist

When the child reaches the age of six or seven years, the time to begin school, new problems present themselves in child feeding. The period in the child's life from six to twelve years may well be called the "Age of Activity." He is becoming interested in vigorous contacts, games, long hikes, and, through the school and church, has many interests outside the home. Since activity means expended energy, it is necessary that his food be adequate to meet this energy requirement but it must be remembered that the energy requirement is only a part of the story. Besides supplying energy, the food must furnish the proteins needed for building and repairing muscular tissues, the minerals necessary for hardening the bones and teeth, making good blood, and those essential for the various body processes, and the vitamins needed for normal growth and health. It will be necessary for the mother to have a knowledge of food values, to be assured that her children are receiving the correct amounts of food, proteins, minerals and vitamins.

**Breakfast Foods Ready**  
By the time a child is ready for school, all the foods essential for optimum growth and for health have been added to the diet. His diet should include daily one quart of milk, a whole cereal, one egg and vegetable besides potatoes, one raw vegetable, green leaf vegetable, two fruits (one of which should be raw), one egg and a serving of fish or meat three times per week.

The coarser raw fruits and vegetables may be added gradually to the diet. Care should be taken that a quart of milk be used in some form, and that the amount of meat be not increased to the extent that it displaces other foods, such as vegetables, cereals or the milk.

The wise mother serves foods which are simply prepared and easily digested. She avoids rich gravies, pastries, cakes, fried and highly seasoned foods.

A healthy, normal, properly trained child will eat heartily of plain food set before him three times a day, if the right kind of food is prepared properly, and served regularly and at the proper time to eat between meals. Under these conditions the average child will remain well, he will have a happy, cheerful disposition

and will develop normally, physically and mentally.

**Regulating Food**  
An underweight child who is organically sound may be brought up to weight by regulating his food and hygiene habits. He should have long hours of sleep at night, a rest period during the day, and at least three hours of outdoor play, live in a calm atmosphere, and eat more food than would ordinarily be needed for growth and health. A weekly weighing at the same time of day and as far away from meal time as possible, and with the same weight of clothing is a good plan. However, if a child does not respond to this regime and begin to gain within a couple of weeks, he should have a thorough examination by a competent physician to locate the organic difficulty and should then have medical treatment.

The school child's breakfast should always include milk in some form. It may be used as a beverage itself or in the form of cocoa, milk toast, cereal cooked in milk, or in other ways. Raw fruits, or those cooked with very little sugar, and a whole cereal, either in the form of a breakfast food or whole wheat toast should be eaten to give laxative qualities to the diet.

When possible the heavy meal of the day should be served at noon, since the school child should go to bed early in the evening. Meat dishes should be served at noon.

The evening meal should be one that digests quickly. Soups, creamed vegetables, fruit sauces and custards are good types of food for this meal. An egg should be served if it has not been included in one of the other meals of the day. The remainder of the child's quart of milk should be served in some form.

### Wide Selection Of Plants Give Color To Winter Gardens

By JOHN V. WATKINS  
Annals whose seeds are sown in the autumn will give, under favorable conditions, a wealth of colorful bloom during the winter and early spring months. This group of plants plays a most important part in the scheme of the Florida garden, both for cut flowers and garden decoration during the tourist season.

The one item of greatest difficulty with the most gardeners is getting a good stand of seedlings and protecting them from the frost during the winter. During September and October, when most annual seeds are planted, the warm weather is very favorable to the growth of damping-off organisms, and the loss of seedlings is tremendous if proper precautions are not observed.

First of all, the autumn annuals may be divided arbitrarily into two classes; those whose seeds are planted in flats and those whose seeds are sown in the open where the plants are to stand. The former will be discussed first.

**Planting in Flats**  
A flat is a shallow body of any convenient size, with a hole or drainage hole or cracks in the bottom to allow water to pass freely out of the soil. In the bottom of the flat, place a layer of pine straw or small grass clippings so that the soil will not wash through the drainage holes. Then firm the soil—composed of hammock soil and cow manure or peat moss is best—so within a half inch of the top of the flat, with a brick or block of wood. Firm this soil with a solution of one of the mercury compounds that are recommended for the control of damping-off. After this solution drains off the seeds, broadcast, on the wet soil. Cover lightly by sifting fine soil through a screen, over the seeds. Then cover with newspapers and keep the papers wet. The wet newspapers should stay over the flats until the seeds germinate. Place the flats on benches or benches that are protected from sun which will carry away the seeds.

The emergency sowing kitchen at Melbourne, Broward county, has canned more than 4,000 cases of vegetables recently, reports Mrs. Emma Y. Gay, home demonstration agent.

By BETTY BARLEY  
*A little cooked meat,  
Some butter and salt,  
A few sliced pickles,  
And a slice of bread.*  
Although very simple,  
You save here at hand  
An Italian loaf recipe.  
Try it, it's grand.

**Guests coming!** The day is hot! You are in a hurry of excitement. If you have some leftover meat and an emergency shelf containing mustard pickles (every woman should have such a shelf), you need not worry. Follow the recipe below and prepare a pleasing salad dish for your guests. It is but one of many unusual meat dishes that may be prepared if your emergency shelf is kept stocked with pickles of various kinds.

**Italian Leaf**  
1 cup cooked meat  
4 cup mustard pickles  
1/2 teaspoon salt  
2 tablespoons melted butter  
2 tablespoons mixed herbs  
from jar

Put through a meat grinder the meat and mustard pickles. Mix remaining ingredients and blend thoroughly. Pack firmly into a bowl, being sure the oil or fat pan cover tightly. Chill this mixture in a refrigerator, garnished with watercress, mint or parsley.

**KNITTING YARNS**  
AT LOW FACTORY PRICES  
SAVE half or more on your yarn. Buy direct from low-cost manufacturers. The best guaranteed quality. Write for a price list. 100 for sample and price list. The Knit Yarn Corporation, Dept. 10, 100 Broadway, N. Y. C.

### Three-Fold Effort For World Peace Is Advocated By Hull

By the Associated Press  
Italian bombing planes rained terror on northern and eastern Europe today.

Emperor Haile Selassie went over the fall of holy Aksum and summoned his people to a holy war.

At Geneva the League of Nations subcommittee for economic sanctions decided in principle to recommend and embargo against the shipment to Italy of "key" products—materials used in the manufacture of war munition. The committee drew up a specific list of products needed by France, Mussolini in the Ethiopian campaign. The tentative list included aluminum, zinc, copper, nickel, tin, coal, wool, manganese and gasoline.

It also answered the plea of the League of Nations with additional contributions of thousands of U. S. dollars to the League of Nations fund for the relief of the Italian people. The fund had been raised by the League of Nations and the League of Nations.

His declaration that he stood for the achievement of peace for a "less difficult and more rewarding destiny" comes at a time when Italian spokesmen are declaring that Italy's need for expansion is one of the justifications for the Ethiopian campaign.

### Ethiopian Troops And Town Of Alaji Bombed By Planes

Mass Concentration  
Of Warriors Along  
Front Is Ordered

### Speech Delivered By Secretary Of State Is Regarded As Of Great Significance

War Can't Cure  
Economic Ills

Simultaneous Action  
Needed To Rebuild  
International Trade

WASHINGTON, Oct. 15. — (AP) — Declaring that "absolute and bloodstained" war cannot cure the world's economic ills, Secretary of State Hull today advocated a three-fold international effort for peace and prosperity. He called for "simultaneous action of many countries" for:

1. A "vigorous rebuilding of international trade."

2. A "gradual restoration of international monetary stability."

3. An international agreement "upon the organization and principles which will assure that all important raw materials will become available on reasonable terms whenever they are needed."

Hull's speech, regarded as of much significance, was delivered by radio on the program of the New York Herald Tribune's annual forum on current affairs.

His declaration that he stood for the achievement of peace for a "less difficult and more rewarding destiny" comes at a time when Italian spokesmen are declaring that Italy's need for expansion is one of the justifications for the Ethiopian campaign.

### Hauptmann Given Opportunity To Appeal His Case

Slot Machines May  
Have To Pay More

TRENTON, Oct. 15. — (AP) — Bruno Richard Hauptmann's execution was stayed indefinitely today when the court of Errors and Appeals granted him the opportunity to appeal his conviction in the Lindbergh kidnap murder case to the Supreme Court of the United States. The court gave Hauptmann 30 days in which to ask the Supreme Court to review allegations that Hauptmann's constitutional rights were violated in the trial.

The order, which would have returned the case to Supreme Court Justice Thomas W. Woodhead for retrial, was a victory for the execution date, was stayed by the court of Errors and Appeals, but will automatically take effect on Nov. 14 if the appeal is not perfected by that time.

The seven are Martin M. Clelland, Alvin Harding, J. J. Locke, John Scott, George Knodell, George Cook and Norman Jones, the last named being related to Locke, Scott and Jones were liberated from the County Jail on bond, but the others were still in jail after noon.

The other prisoner, James Sherkin, colored, was held before the judge, charged with the possession of concealed weapons. He was handed a fine of \$100 and costs, and ordered to serve four months in jail unless the fine is paid.

### Recipes

By Betty Barley  
Here are two recipes for delightful dishes which require only a few left-overs and the ordinary ice box and emergency shelf. Try them when unexpected company arrives, or when you desire to please the family with something "different."

**Beef Hash:**  
1 tablespoon onion, minced  
1 tablespoon fat  
1 cup cooked beef, minced  
1/2 cup sliced onion, minced  
1 egg slightly beaten  
Salt, pepper, paprika  
1 cup cracker or dry bread crumbs  
1 cup cooked tomatoes  
1 cup mustard pickles, finely chopped.  
Cook onion in fat until tender. Add remaining ingredients. Season to taste. Blend thoroughly. Turn into greased loaf pan. Bake in modern oven (350 degrees) 45 minutes.

**Ground Beef Hash Puffs:**  
2 cups ground beef hash  
2 eggs  
1 tablespoon chopped dill pickles  
1 cup water  
Parsley  
1-2 cup butter  
Add well-beaten egg yolks to ground

### HOME AGENTS NAMED

Appointment of home demonstration agents in Wakulla and Indian River counties is announced by Miss Florida Gleason, state home demonstration agent, and A. P. Spencer, vice-director of the State Agricultural Extension Service.

Mrs. Pearl Funnell has been named Wakulla county home agent, while Miss Hattie Wells is taking up the work in Indian River. Neither county has had an agent for several years, and the appointments are made at the request of local citizens who realize the value of the work.

Dried plants should be clean, crisp, cool, dry and cut in uniform sizes when served. To improve the flavor, moss, fish, potatoes, and other vegetables may be marinated an hour before preparation, chilled and drained of excess dressing just before serving.

### Ten Fast Events On This Evening's Boxing Program

#### Show Will Be Put On By Boys' Club In 4th Street Arena

Ten events, advertised as fast ones, are on the card for tonight's boxing show in the Fourth Street Arena, put on by the Seminole Boys' Athletic Club. The first bout is scheduled for 8:00 o'clock. Tonight's card is as follows:

Glenn Cochran vs. Paul Moore, Jack Emanuel vs. Billy Harrison, Edward Crosby vs. Theodore Klieker, Marvin Smith vs. Billy Hoolehan, Laurence Barrineau vs. unnamed opponent, Edward Smith vs. Stanley Re-Char, Harry Lee Moore vs. Earl Felry, H. C. Tippins vs. Duane Tillis, Eugene Tippins vs. Clarence Barrineau, Charles Cameron vs. Ray Edge.

### Crooms-Bronson Tilt Is Won By Sanford

Crooms Academy of Sanford defeated Bronson High of DeLand on the football field by the decisive score of 14 to 0. During the first quarter the Crooms squad received 10 points for safety, and then with their linemen as a stonewall of defense Patrick climaxed a touchdown. Rozier made a 30-yard run at the start of the second half and Earl made a 15-yard gain through center, ending the third quarter.

Bronson High cheered Quarterback Peters for a 40-yard run. After losing the ball to Crooms, Rozier ran for 30 yards, and then Crooms lost to Bronson, and Peters gained 35 yards. Linemen on both teams battled from the start.

Crooms intercepted a pass in the last few seconds of play, and a perfect touchdown was the outcome.

### Gators Defeated By Tulane, Score 19-7

By HAM MURRAY  
NEW ORLEANS, La., Oct. 14.—Fighting back at Florida with its own game, Tulane's Green Wave demolished the visiting Alligators from the air Saturday to overcome a first quarter touchdown deficit, and drove on to a 19 to 7 victory before a sunny day crowd of 10,000.

Floyd Christian, the big Florida right end, scored the Alligators' touchdown, standing in the end zone to bring in a long pass from Captain Chase which was made from Tulane's 24 yard line.

### Al Hickland Supplied Florida's Extra Point

Al Hickland supplied Florida's extra point from placement and Dick Page made a perfect kick for the unit after Tulane's first touchdown.

### Fast Stetson Squad Beats Oglethorpe, 7-6

ATLANTA, Oct. 14.—Stetson's eleven came from DeLand last Saturday, and defeated Oglethorpe, 7 to 6. The visitors played defensive football until the third period when they launched an offensive pegged on a combination of end sweeps to come from behind and nose out the lighter Oglethorpe team.

First downs were at premium and most of the game was played out of the danger zone, Oglethorpe held the edge in first downs, five to four.

In the see-saw battle, punt exchanges were frequent, with some husky booting turned in by Lewiston, Stetson quarterback and Luella, Petal halfback.

Both lines presented a solid front during most of the game. Stetson twice repelling goal line charges, and Oglethorpe repeating the performance.

### Black - Draught And Good Health Year After Year

"I have never had a bad sick spell and for years I have taken Black-Draught for the least symptom of upset stomach or sluggish feeling," writes Mr. W. F. Williams, of Gateway, Mo. "I am a very hearty eater and sometimes I eat too much. If I feel uncomfortable, I just take a small dose of Black-Draught and soon feel all right. I feel I owe my good health to use of this reliable, palatable medicine, Black-Draught."

Where constipation is at the bottom of such troubles as Mr. Williams mentions, take a good laxative.

Thousands of men and women have given Black-Draught credit for having helped them to avoid serious developments of constipation troubles.—A.G.V.

### Myer, American, Vaughan, National, Lead Batters In Big Baseball Leagues

NEW YORK, Oct. 14.—Floyd Vaughan, of Pittsburgh, who led the batters most of the season, finished with a mark of .385, topping his nearest rival, Joe Medwick, of St. Louis, by 31 points for the undisputed batting championship of the National League.

Vaughan made 192 hits in 499 trips to the plate and drove in an even 100 runs. Medwick made 224 hits in 633 times at bat and drove in 124 runs.

Billy Herman, of the champion Chicago Cubs, made most hits, 227, while his teammate, Galan, scored most runs, 133, one more than Medwick. Herman also made most two-base hits, 57. Wallis Berger, of the lowly Boston Braves, rapped out most home runs, 34, and drove in most runs, 127, though he batted only .297.

Bill Lee, of Chicago, is the leading pitcher with 20 games won and only six lost for a mark of .709. J. Dean, of St. Louis, won most games, 28, and pitched more innings than any other pitcher, 325. Dizzy also was top in strikeouts with 190.

CHICAGO, Oct. 14.—The American League individual batting championship goes to Charles Myer, of Washington, who during the last four games of the 1935 season lambed 10 hits in 15 times at bat to beat out Ed Mick, of Cleveland, who reads 349 and was a hit in 616 times at bat.

Greenberg, Detroit runs for the top in ment and tied Forphia, for home runs of New York, who I was always a be more departments, honor among the be son by scoring me Werber, of Boston, base than Lary, of according to the s ords.

Elden Auker, of I leading pitcher h g lost, with 18 win losses for a peven Wes Ferrell, of los games, 25, and jtc nings, 322.

### Ralph Wight Sees Banner Year For 1936 Oldsmobiles

"I've seen the 1936 Oldsmobile. I've heard about the 1936 plans. I've been told of the great production expansion. And so I want to say that I am confident that 1936 will again see all records for production and sales of Oldsmobile broken."

This was the enthusiastic statement today of Ralph Wight, Oldsmobile dealer in Seminole County, after returning here in one of the 1936 model Oldsmobiles from a dealer meeting at Jacksonville.

"The country knows Oldsmobile as 'the car that has everything,'" he said, "and the new 1936 cars have everything plus. There is a definite advance in style leading styling, keeping Oldsmobile far in front in graceful streamline design."

"The 1936 cars are big, new automobiles, beautifully designed, roomy and comfortable, and possessing all those features which have made Oldsmobile famous."

"When the cars were shown to the dealers of the area, and plans for the coming year were outlined, unanimous approval of both cars and program was expressed by the dealer organization."

Popularity of the 1936 Oldsmobiles was so great that when the factory was closed at the end of the 1935 production season there still remained on hand a large number of unfilled retail orders. Mr. Wight pointed out. This condition is unprecedented in the industry.

### Hog Producers Make Big Money On Lowly Porkers

(Continued from Page 1)

and forth as the demand grows. There seems to be plenty of corn in reserve on the various farms and such farmers are not feeding it themselves but are making a nice profit selling to farmers with hogs to fatten.

"With western pork selling so high in the markets, butchers are discovering that 'native' Florida pork can be sold for less money and that the chops, steaks, roasts, etc. from a fattened Florida porker are just as good to eat as any pork as far as the mass of customers is concerned."

There seems to be an ample supply of hogs for fattening. The crop of young pigs this summer was better than average, many farmers report, and so there will be plenty of sows for breeding purposes for next season. The woods are full of hogs which have been branded by owners (and branding young pigs) and at such round-ups the best hogs for fattening are selected and taken up to the farm-yard for feeding.

Florida Pork Popular  
With pork prices in the United States continuing high it looks like Florida farmers who have hogs will be in a position to make some nice profits all through the winter. The fact that thousands of consumers are learning that Florida pork is unexcelled from an eating standpoint, if the hogs have been properly fattened by the same date it opens their market as well. As in the case of native beef, also becoming more and more popular, there is being built up a permanent demand for increasing quantities of Florida-grown pork and pork products.

Farmers have in many cases improved their strains in recent years and the old-fashioned rasorbacks are becoming scarce. While many hogs show their rasorback ancestry by their somewhat lengthy snouts, nevertheless pigs are becoming more rotund and fatter each year on Florida farms. The Florida strain of pig which is being developed is a hardy animal, well able to forage for itself part of the year, and an animal which fattens quickly into desirable butchering stock when penned up and given plenty of corn, peanuts, etc. Undoubtedly the hog is doing much to bring back prosperity to large areas of Florida farming territory.

### MOTOR TRUCK SHIPMENTS

Motor truck movement of Florida citrus up to the first of this month totaled 95 cars of grapefruit and 17 cars of oranges, according to figures released by the Federal-State Market News Service at Orlando. Thus it may be seen that trucks opened the orange deal this year for by the same date it opened the grapefruit car of oranges had rolled by rail-boat. This season's truck movement compares with a truck movement last year (to same date) of 8 cars of oranges, 114 cars of grapefruit.

### Cottonseed Meal Recommended As Winter Pasture Supplement

By J. FRANCIS COOPER  
Editor, Extension Service

With the introduction of improved blood into Florida beef herds in practically all parts of the state, with the giving of more attention to the animals on account of screw worm fly, and with the greater interest in cattle practice for Florida, the state experiment station has undertaken a series of experiments along this line. Heretofore all ages and cottonseed meal have been used, and during the winter of 1934-35 cottonseed meal was employed for the first time. This product is generally used on the ranges of southern Texas and New Mexico.

Cottonseed meal recommended  
Following the results obtained in this preliminary experiment, Station workers are recommending cottonseed meal for Florida beef cattle, says Bradford Knapp, Jr., assistant animal husbandman. It is efficient and economical, maintaining weight practically as well as meal and silage in the dry lot, and costing about half as much. In the wintering experiments, the aim has been to feed just enough to keep the animals from losing flesh and not to incur excessive expense in doing so. Pure-bred and grades need to be kept in better feed than natives, and winter feeding carried the breeders into the spring breeding season in better condition. The calf crop is the important consideration in the breeding herd.

In the 1934-35 test, one lot of cows was kept on pasture and fed from 1-1-3 to 3-1-3 pounds of cottonseed meal per head per day. The other cows were put in a dry lot and fed cottonseed meal and silage. The feeding period was for only 28 days during the winter months. Unfortunately, it was necessary to use cows which had just been calmed. The average weight of the cows on pasture was 877 pounds, and on dry lot 851 pounds. At the end of the trial the cows averaged 681 and 674 pounds, respectively. This gave a net loss of 96 pounds per head for the pasture group and 77 pounds per head for the dry lot group, or an average daily loss of about 2.3 and 2.2 pounds, respectively.

The cows in the pasture group consumed an average of 187 pounds of cottonseed meal, while the dry lot group averaged 160 pounds of cottonseed meal and 1,120 pounds of silage per head during the 28 days. The total feed cost for the cows receiving cottonseed meal was \$12.25, while for the cows fed meal and silage it was \$4.75. Both meals made both cows look better. The silage was valued at \$3 a ton.

At a normal price of around \$25 a ton for cottonseed meal, Mr. Knapp figures that cattle could be fed for 28 days at a cost of around \$1.75 each per head. If they are fed only 14 days, the cost would be only \$1.25 per head.

This cost is well within the ability of cattlemen to pay, and the improvement in

### Efficiency In Cooperative Marketing Talked by M'Kay

(Continued from Page 1)

Some organizations are formed with local associations which grade and pack the products; others are centralized. Some operate warehouses or packing plants while others operate solely as sales agencies.

Attention should also be given to the legal structure of a cooperative association. The association should be incorporated under the best available law which permits the conduct of the business in a cooperative manner. The articles of incorporation should state correctly and completely the purposes and powers of the association, and conform to the requirements of the act under which the association is to be created.

The by-laws of any association should provide a workable plan for carrying on its business. The most essential features are that provisions are made for the control of the association by its members and for the distribution of earnings on a basis of patronage. An association should be organized and operate so as to comply with the provisions of the Capper-Volstead Act. To comply with this act, an association must operate only for the mutual benefit of its members or patrons and must provide either that no member is allowed more than one vote, or that dividends on stock or membership capital are restricted to eight per cent per annum. In any case, a cooperative association must conform to the requirements that it "shall not deal in the products of non-members to an amount greater in value than such as are handled for members."

Members' Interests Protected  
The third requisite for successful cooperative marketing is that an association must be supported by its members and operated in their interests. The actual direction of an association, of course, is in the hands of a comparatively few men—the board of directors, who are often represented in turn by the members and officers of the association, and the general manager. There is a difference, however, between an association whose directors and officers are working in the interests of the members and one which is managed without reference to the members' wishes or needs.

Support of an association by its members raises the question whether farmers in a region are good cooperators, whether they are likely to take the active part in the affairs of the association, or are inclined to leave everything to the management. Oftentimes failure of an association to operate in the interest of the members is due to failure of the members to inform themselves regarding the policies of the association or to make their wishes known.

It is only fair to say, however, that growers as they gain more experience in cooperative marketing, and as they become interested in their association, provided the policy and management are such as to encourage it. There is justification for the statement that the best way to develop the cooperative spirit is by cooperating.

### County Agents To Gather Soon For Annual Meeting

Florida's county agricultural and demonstration agents will gather at the University of Florida College of Agriculture October 28 for their annual conference. It is announced by A. J. Spencer, director of the State Agricultural Extension Service. Farm and home problems, programs and plans will compose the principal topics on the program, which will continue through November.

There are now 44 county agents and 88 home agents, with a number of others to be appointed before the annual session begins. The new agents will receive valuable instructions concerning their work. Agricultural adjustment work, home demonstration problems, extension assistance in rural rehabilitation, farm credit, community problems, recreation, 4-H club work, changes in farm and home life and adaptation to new conditions, plans of work and reports will receive attention at the session, Mr. Spencer says.

### Proper Soybean Rations Reduce Soft Pork Danger

Prevention of soft pork, the U. S. department of agriculture says, is especially important in the case of heavy yielders, the hog's body fat and such soft hogs are objectionable on the market.

This year more soybeans than usual are being harvested as grain, particularly in the corn belt, because of heavy yield of the heavy crops. Soybean acreage in Illinois, Indiana, Iowa, Ohio and Missouri is estimated at 21,000,000 bushels, which is twice as large as the crop harvested last year. Soybean meal, the by-product of the soybean crop, is a valuable feed for hogs. It is estimated that 100,000,000 pounds of soybean meal will be available for hogs this year.

Proper rationing of soybean meal is essential to reduce the danger of soft pork. The meal from which the oil has been removed has a much higher percentage of protein than the meal from which the oil has not been removed. The meal from which the oil has been removed contains 48 per cent protein, while the meal from which the oil has not been removed contains only 38 per cent protein. The meal from which the oil has been removed is a much better feed for hogs than the meal from which the oil has not been removed.

### MEAT PACKERS OF NATION RAP PLAN FOR CURBING HOGS

Hog prices are out of line with consumption according to meat packers who demanded recently at Washington that the AAA discontinue its curbing adjustment program.

Two resolutions for the packing industry were passed by the National Meat Packers' Association, which supported the program. W. W. Woods, of Chicago, head of the Institute of American Meat Packers, declared any attempt to limit production would mean the end of the industry.

Conflicting views were presented during the gathering at Washington. The farmers' group says that the latter, more correct.
