### You Must Have A Certain Feeling To Compose A Good Nonsense Song

By SAUL PETT

(For Hal Boyle)

NEW YORK — (A) — Not everybody could write, "Sailaga Doola Minchika Boola Bibbidi Bobbidi Boo." It takes an intuitive sense, a feel, a touch, or something. You got t or you haven't got it.

This is the secret of such creation, say Mack David and Jerry Livingston, two rational young men who wrote the current song hit. "Bibbidi Bobbidi Boo" (copyright Walt Disney Music Corp.)

If you're wondering what "Sa-lega Doola," etc., means, don't. It means nothing except about \$50,000 to David and Livingston, who wrote the music for the movie. "Cinderella." These boys are experts. They have a case history of irritational hits, having turned out "Mairzy Doats" and "Chi Baba.

Sanford, Florida dy." said David.

Over a cup of coffee, the com-porers tried to expisin how "Bib-bidi Bobbidi Boo" came about.

"it's really harder to explain than write," David began. "Actually, you go into a room and bang it out," said Livingston. David, being the man who writes the words, did most of the talking. He explained the specific problem that led to the song. They deeded a tune and lyrics which would help depict the scene where the fairy godmother turns the pumpkin into a splendid coach and the mice into

"We needed words to suggest the mumbo-jumbo of magic," said Livingston, "but not the usual abracadabra stuff. We needed norsense words with a good rhythe couch"

So, putting on their loafers and their sports jackets, they went to work in a studio where they could draw inspiration from the San Fernando valley and the surrounding people hills.

David was the pacer, Livingston was the sitter, David, the nerv-ous branch of the partnership, wore out the rug and three to

four packs of cigarettes a day.
While David was walking up and down, occasionally surrendering to chairs which stretched out to beds. Livingston sat at the plane smok-ing what he calls his "Dreaming ligar." He smoked and "noodled," which means he casually stroked the piano keys, hitting an experi-mental chord now and then. "We tried many, many differ-

ent combinations of sounds, of meaningless words," said David. "We rolled them on our tongue and ran them through our ears. We must have discarded 30 or 40 combinations, and it's funny, isn't it. I can't remember one of them now. Maybe it's because I don't "It's just an intuitive sense. It

No other way to explain it." After two weeks of intensive efcame up with the first two lines.

Even if it were true that Senator Pepper has changed his mind about Communism, that "Compulsory Health Insurance" is not really socialism, that he is actually against the FEPC bill, and that indefinitely continued deficits and skyrocketing government debt will not bankrupt the country, all of which he insists in the heat of this political campaign, why take that chance? The alternative to Senator George Smathers, "I want to Pepper is neither a Republican, nor a Wall Street reaction-

Before the war he was appointed an assistant Attorney General under President Roosevelt, and he voluntarily gave up this draft-exempt job to join the Marine Corps and fight for America against Japan. After the war was over he was again appointed an assistant At torney General in President Truman's administration.

> In 1946 he was elected to Congress from the Fifth Dis trict and his voting record there shows him to be "a little left of center", as President Roosevelt frequently described himself. One of Senator Pepper's favorite tricks in this campaign has been to quote from Smathers' speeches in Congress to show that he, too, has "sought CIO support", has made "friendly" remarks about Russin, has been "liberal" in thought and deed.

### Rainfall Supplied

Was it because New York City hired a rain-maker that copious rain began to fall on some of the city's watershed area? The rain-maker can't take much credit unless it is supposed that man's activities have some psychic and perverse effect on the weather, for the rains began two days before he was scheduled to start his experiments, and delayed them. Unfortunately the rains did not always fall in the right places; and the rain-makers had to go to work af

It often asems that Nature has an uncanny knack for giving man the kind of weather for which he is not prepared. Many an old loke is based on the premise that the way to shaut rain is to plan a picnic, and the way to preven it is to carry an umbrella. Thus it might be that New Yor by preparing for drought, could obtain rain.

Charles VEAR WRITTEN GUARANTEE Sonator Popper broke completely with Dixle col-leagues to declare "for ensetment of the President's full Civil Rights Program without delaying taction of any kind." In a speech to the Young Democrats at the University of Florids, the Gainesville Sun quoted the Senator on Dec. 15th, 1948, as follows: "It is my intention to support President Trusca's whole program of Civil Rights it it bests me in the next election."

## PEPPER "BETRAYED" FLORIDA ON STILL **ANOTHER ISSUE!** The wilv Senator Pepper, with his oily-

tongued oratory, is endeavoring to lead the unwary Florida voter into an F.E.P.C-Civil Rights trap. This vicious legislation, conceived in Communistic Russia in 1917 is sponsored by Senator Pepper in an attempt to regiment and control our way of life, and with whom we work, worship and associate.

The slippery Senator, who is so expertly adept at talking out of both sides of his mouth, depending of course, on whether or not it's an election year, now infers that he is very much against the F.E.P.C., the heart of the Civil Rights Program, but his stand was quite different in non-campaign years and in other places. When Pepper was opposing Truman for President at the Philadelphia Convention in July of 1948, he was quoted in the St. Petersburg Times as follows:

"I believe in Civil Rights," he told the Delaware Group, "and I am going to fight for them. Provident Truman has only given lip service . . . "

When the Civil Rights issue was before the U.S. Senate in November 1948, Pepper was quoted thusly by the Washington, D. C. Post:

The vicious F.E.P.C.-Civil Rights proposal could take away your besic American rights to think, work, worship and associate with whom you please and place you under bursaucratic control forever, It would destroy amiable relations between races and create widespread discord and disconsion.

But the production department in many companies is putting more pressure on the purchasing agent. The NAPA finds that increased production in the first weeks of the year was cutting into stocks a little faster than there were being replaced. Since many production departments expect this high level of output to continue for some time, they are inducing the purchasing departments to go in for a little invent ments to go in for a little invenquirements.

That, says NAPA, is why more buying programs have switched over to the 60 to 90 day policy.

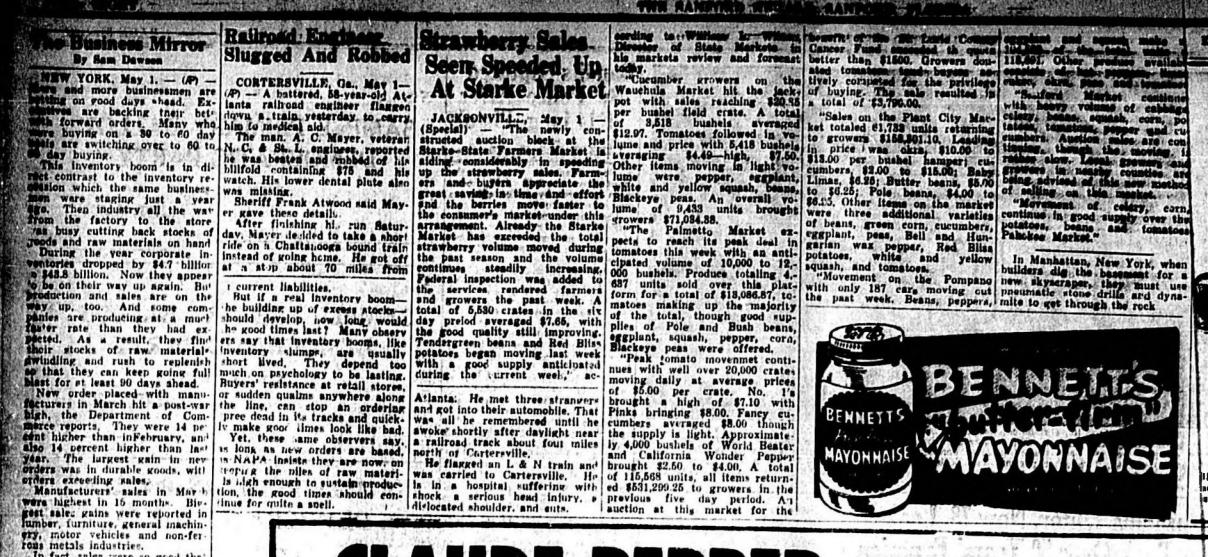

over to the 60 to 95 day policy. Rising prices of some materials like the non-ferrous metals, apparently has played only a small part so far in spurring orders.

American Corporations as a whole have more cash on hand to back these orders than at any other time in history. The Securities and Exchange Commission reports that the average corporation at the start of this year had 78 cents of working capital in cash or government securities for every dollar of current liabilities. The total working capital for U. 8. corporations, excluding banks and insurance companies. was \$67.7 billion, a gain of \$2.9 billion in the year. The manufactur-ing companies did even better as a group, and had more than a dollar in the bank for every dollar

# Therefores OH THESE FACTS

WHAT IS FEPC?

The letters FEPC stand for and abbreviate, "Fair Employment Practices Commission." It is an act attempting to tell you whom you must employ and with whom you must work.

Since this bill first made its appearance on the American scene in 1938 in the Communist Party Platform it is evident that it is inspired by Communist agitators of all races, and is an attempt to use the minority groups to destroy the friendly relations that now exist in the South.

### DOES FEPC AFFECT YOU?

It would destroy your individual freedoms by taking away from the employer the privilege of selecting his own workers. and would end the right of the worker to choose where, when, and with whom he wanted to work — and wealth problem laber unions from freely selecting their membership.

JUDGE SENATOR PEPPER'S FUTURE ACTIONS BY HIS PAST RECORD

In this campaign year Senator Pepper is shouting "I hate Communism!" and attempts to deny his defense of Dictator Joe Stalin and appeasement of Russis, but on March 20th, 1946, in a speech on the floor of the U. S. Senate—criticizing America, criticizing Britain and defending Russis, Senator Pepper proposed a conference of the "Big Three" and said in that speech:

"I would prefer that we should first, before the convening of such a conference, after calling on Britain and Canada to Join us, destroy every atomic bomb which we have, and smash every facility we possess... then we could so into the court of this conference with the cleanest of hands and talk about future control of atomic power..."

le also proposed in this speech that we loan Russia.
