Snap Bean Crop May Escape Competition Of Early Fall Area

Late Planting Will Give Florida
Producers Shipping Advantage

Because of late planting the Florida snap bean deal will probably escape the stiff competition it sometimes gets during the fall months. If reports are reasonably correct, there will be very few cars of snap beans loaded out of Florida before November and by that time other sections will be finished.

So far as the Atlantic coast states are concerned, it looks as if they would clean up a little earlier than usual. Most of them have smaller acreages also.

The New Jersey fall crop, which runs until frost time, is lighter than usual because of poor weather for growth. Rains at planting time were injurious and now the weather is too cool and dry for best growth.

The eastern shore of Virginia planted the usual acreage but was hurt by weather conditions similar to those in New Jersey.

A small acreage was planted in the Norfolk, Virginia, district and this crop is now moving to market in limited quantity and will be heaviest in early October. North Carolina lost most of its crop in floods and will have relatively few beans for fall shipment this season.

Conditions are somewhat better in South Carolina although the crop will not be exceptional by any means. There will be a few cars for October shipment but not a great many.

However, one of the states that is an exception is Louisiana. The acreage was increased and conditions have been very favorable for growth recently. Louisiana will probably ship quite heavily during October and may possibly overlap with the Florida deal at the outset.

Tennessee and Mississippi have rather light crops for fall shipment and they are usually eliminated by frost ahead of the Florida season.

Small Truckers Busy Planting Vegetables For Home Markets

Many September Plantings Rotted In
Ground—Home Trade More Profitable

With the arrival of October the thousands of small truckers—as differentiated from the various big growers—became as busy as bees throughout the northern and central areas of Florida. These truckers grow all kinds of vegetables, and some flowers, in truck gardens ranging in size from less than half-an-acre to two or three acres. The produce is usually sold in nearby cities and towns. Quality stock usually brings profitable prices.

Around such cities as Tampa, St. Petersburg, Jacksonville, Pensacola, Gainesville, Orlando, Daytona Beach, Cocoa, New Smyrna, etc., the gardeners have been planting practically every variety of cool season vegetables lately, including English peas, cabbage, cauliflower, broccoli, red, white, and green beans, various "greens," escarole, spinach, and a host of other vegetables. These plantings of plants in the field have done well in practically all sections, excepting of course the areas where the September storm hit early plantings. Sowings of seeds, however, turned out badly for many growers the latter part of September, because the almost continuous rains caused much seed, especially beans, to rot in the ground after being planted.

Good Market Develops
This condition, however, as stated, did not adversely affect settings of plants and when seed was re-planted good stands usually resulted at once. In general the outlook for small truckers is now better than in several seasons, with prospects for a good market also ahead of anything in a good many years. The town and city buyers are waiting for the first vegetables to turn very dry after the cool season sets in. Insects and pests have been kept under control this fall by most growers.

Each year now for several seasons the small trucker has found a better market for his produce in nearby towns and cities. The buyers—grocers and market proprie-

ties—are looking more and more to the market gardeners in his territory for home-grown vegetables. As the truck growers learn how to turn out quality stock and supply the markets regularly all winter and spring they find that growing vegetables for home consumption pays better. Many have turned to irrigation plants which insure crops even if the weather turns very dry after the cool season sets in. Insects and pests have been kept under control this fall by most growers.

From the standpoint of Florida competitive conditions are better than they were last season. Maine has a much lighter crop and the same is true of New York and Pennsylvania. Last season all three states had such bumper crops that a short crop was expected all through the season and affected the prices of Florida new potatoes adversely.

Reports from Maine indicate that the potato crop this season will be only about 50% of the crop of last season. The New York crop is very spotted and the big potato section in the southern part of the state has only a half crop. This will reduce the earliest shipments materially.

Pennsylvania late potatoes are mostly a short crop and will be only 50 to 55% of what they were last season. However, the early crop was one of the best ever harvested in the state.

Another factor that complicates the potato deal is the new potato law known as the Warren act. This puts certain limitations on the marketing of potatoes and no one knows what the attitude of growers will be toward the law. It may be to reduce plantings and that seems to be the case in south Florida. Also, there is some uncertainty about its enforcement. The law itself seems worthy of a trial as it has some features that should work to the benefit of the potato industry.

The matter came up when City Clerk F. S. Hanson informed the Commission he had received three bids for supplying the city with gas for the remaining 11 months of the current fiscal year. The bids were not opened, upon request of Commissioner Vivian Speer who was unaware proposals had been asked for and had therefore informed a local distributor that, as far as he knew, bids were not to be received. New bids will be received at a later date.

ed that the city was looking for 200 and 1500 gallons of gas in a month, and the mayor had figured that a four-cent cut in the price of gas would mean a saving of \$18 to \$30 a month. The tank and pump offered the municipality for \$50, he declared.

But Commissioners W. A. Laffler and Vivian Speer said they doubted if there would be any saving in the end, as the services of a man to look after the pump installation would be necessary.

The new ordinance of the local distributor, J. J. Vaise, master commissioner of the city, senior councilman J. J. Vaise, junior councilman A. J. Boniske, senior councilman A. J. Boniske, senior deacon, I. M. H. Ford, junior deacon, S. P. H. Chapman, Billy Davison, master of Sam High-ton, senior steward, Leland McClendon, junior steward, Morris Bonlake, sentinel, and Max Ramsey, standard bearer.

will be sent to Tallahassee on the Wednesday morning train and final arrangements will be made for the funeral in that city tomorrow.

Mr. Dash was born in Chattanooga, Tenn., and is survived by two daughters, Mrs. E. C. Perkins of Tallahassee and Mrs. H. Reagan of Pensacola, two sons, Everett O. Dash of New York City and William G. Dash of Sarasota; two sisters, Mrs. E. C. Adams of Birmingham, Ala., and Mrs. C. W. DeWese of Chattanooga; and two brothers, Cleve Dash of Chicago, and Everett Dash of Cleveland.

Seedmen See Good Florida Business Through The Fall

Seedmen in practically all sections of Florida report a brisk business this fall and most of them say their business is considerably ahead of last season at this time. Growers seem optimistic over general conditions and appear to have plenty of money to spend on seeds, fertilizers, etc. The business of the seedmen has been increased considerably by purchases of home gardeners who are now active. There will be as many home gardens in all parts of the state as usual and some merchants seem to think there will be more.

Fertilizers, garden tools and insecticides have all been selling well. Growers and gardeners have learned that it is poor economy to try to grow anything without ample fertilizer, while the up-to-date garden tools save much labor and expense. Bugs which in former seasons gave gardeners considerable trouble are easily controlled if proper equipment is used.

Alert vegetable growers everywhere are taking the advice of crop authorities who urge SEMESAN treatment of seeds to control seed rotting and damping-off.

In return, many of them are getting larger yields, improved quality, often even a better price at market because their crops mature earlier.

SEMESAN is easily applied, either as a dust or liquid. It does not injure the seed. And it costs so little that every grower can afford it! Just 1/4 to 1/2 will treat one pound of seeds, depending on their size and whether SEMESAN is used as a dust or liquid.

Save Money on
TRACTOR TUGS

New 10-1/2" Spade Lug for John Deere, Case, etc. 10-1/2" Spade Lug, 10-1/2" and 12-1/2" Spade Lug. Guaranteed to last longer than any other brand.

WHEN YOU ORDER FERTILIZER PAPER BAGS

CUSHION-STITCH CLOSURE
The unique Bagpak cushion stitch will not tear out. No fertilizer can leak from this closure, yet it opens easily.

EASY TO HANDLE
The bag that spares your back. This 100-lb. bag can be easily handled by one man.

NO SIFTING
Four separate thicknesses of heavy Kraft paper make the Bagpak bag tough, moisture-resistant, sift-proof.

Save time, money and labor on fertilizer handling this fall. Have your fertilizer delivered in convenient 100-lb. Bagpak paper bags. Clean, durable, easy to handle—these sturdy bags will be a revelation to you.

No fertilizer can escape through the four thick walls and the unique cushion stitch of the Bagpak bag. And no moisture can get in. You can pile these bags on the damp ground—even leave them out in the dew or rain. When you open the bags the fertilizer will be dry and drillable.

Bagpak bags stack neatly, handle easily, open in a jiffy. There is no loss of valuable plant food through sifting. Yet fertilizer packed this way actually costs less than in old-fashioned bags. Make sure you get your fertilizer in Bagpak bags this fall.

Three-Fold Effort For World Peace Is Advocated By Hull

Ethiopian Troops And Town Of Alaji Bombed By Planes

Mass Concentration Of Warriors Along Front Is Ordered

By The Associated Press.
Italian bombing planes roared across northern and eastern Ethiopia today.

Emperor Haile Selassie wept over the fall of holy Aksum and summoned his people to a holy war.

At Geneva the League of Nations sub-committee for economic sanctions decided in principle to recommend an embargo against the shipment to Italy of "key" products—materials used in the manufacture of war munition.

The committee drew up a specific list of products needed by Emperor Haile Selassie in the Ethiopian campaign. The tentative list included aluminum, zinc, copper, molybdenum, coal, wool, manganese and gasoline.

Selassie answered the plea of Italian planes with additional concentrations of thousands of Ethiopian warriors. The Ethiopian campaign, the tentative list included aluminum, zinc, copper, molybdenum, coal, wool, manganese and gasoline.

Selassie answered the plea of Italian planes with additional concentrations of thousands of Ethiopian warriors. The Ethiopian campaign, the tentative list included aluminum, zinc, copper, molybdenum, coal, wool, manganese and gasoline.

Speech Delivered By Secretary Of State Is Regarded As Of Great Significance

War Can't Cure Economic Ills

Simultaneous Action Needed To Rebuild International Trade

WASHINGTON, Oct. 15. — (AP)—Declaring that the "obsolete and bloodstained instrument" of war cannot cure the world's economic ills, Secretary of State Hull today advocated a three-fold international effort for peace and prosperity. He called for "simultaneous action of many countries" for:

1. A vigorous rebuilding of international trade.
2. A gradual restoration of international monetary stability.
3. An international agreement upon the organization and principles which will assure that the all-important raw materials will become available on reasonable terms whenever they are needed.

Hull's speech, regarded as of much significance, was delivered by radio on the program of the New York Herald Tribune's annual forum on current affairs.

His declaration that war cannot achieve the hopes of people for a "less difficult and more rewarding destiny," comes at a time when Italian spokesmen are declaring that Italy's need for expansion is one of the justifications for the Ethiopian campaign.

Hauptmann Given Opportunity To Appeal His Case

TRENTON, Oct. 15. (AP)—Bruno Richard Hauptmann's execution was stayed indefinitely today when the Court of Errors and Appeals granted him the opportunity to appeal his conviction in the Lindbergh kidnap murder case to the Supreme Court of the United States. The court gave Hauptmann 30 days in which to ask the Supreme Court to review allegations that Hauptmann's constitutional rights were violated in the trial.

Slot Machines May Have To Pay More

Competition for the right to collect the license fee for operating slot machines in the city of Tallahassee, Fla., was deferred until a later meeting.

Mr. Moss wanted to know what would be the license fee for operating a "race horse" machine and City Attorney Fred J. Wilson asked the commission to decide under which classification such a machine comes. The latter cost the new state law which specifies license fees of \$15 on automatic sending machines, \$5 on trade machines, \$5 on skill machines, and \$250 on "all other machines," the quoted words being those used in the legislative enactment.

Commissioner Speer said that the city used to charge license fees of \$50 on slot machines. City Attorney Wilson replied that he feared that the municipality would now be governed by state law, but Commissioner Leffler moved postponement of decision until the license ordinance can be revamped, and higher license fees be established.

Mayor Dumas said he saw a "whole truck load" of slot machines being unloaded in Tallahassee a few days ago.

Seven Sentenced On Drunkenness Charges

Judge J. G. Sharon in County Court today sentenced seven men to pay fines of \$5 and costs, or to spend 60 days in jail, each, on charges of drunkenness. The costs in each case are \$25.

The seven are Martin M. Clelland, Alvin Harding, J. C. Locke, John Scott, George Knottel, George Cook and Norman Jones, the last named being colored. Locke, Scott and Jones were liberated from the County Jail on bond, but the others were still in jail this afternoon.

One other prisoner, James Sharnka, colored, was held before the judge, charged with the possession of concealed weapons. He was handed a fine of \$100 and costs, and ordered to serve four months in jail unless the fine is paid.

Plans For Year Are Outlined By Rector

The Rev. Martin Bram gave a short talk on plans for the year at the regular meeting of the St. Agnes Guild of Holy Cross Episcopal Church, held Monday afternoon at the parish house.

Mrs. S. M. Lloyd presided over the business session when plans were made for a subscription bridge party to be given Thursday afternoon at the parish house. Those present were: Mrs. George W. McKory, Mrs. M. M. Mithrth, Mrs. Heyward Walker, Mrs. G. C. Cochran, Mrs. R. F. Monalvate, Mrs. C. B. Wiscup, Mrs. W. H. Stewart, the Rev. and Mrs. Martin Bram, Mrs. Joe Gonzales, Mrs. Arthur Branam, Mrs. Estelle Peaks, and Mrs. S. M. Lloyd.

FERTILIZE LIBERALLY

WITH Granular 'AERO' CYANAMID

In advance of
planting your
TRUCK CROP.

Remarkable effects are secured by applying AERO Cyanamid at the rate of 500 pounds per acre, and cultivating into moist soil two weeks before planting. In addition to supplying nitrogen and lime to feed the plants and sweeten the soil, AERO Cyanamid serves as a partial sterilizing agent, aiding in the control of nematodes.

If you are troubled with
nematodes in your soil, you
will certainly want to give
AERO Cyanamid a trial.

HOME MAKING HINTS FOR THE RURAL HOUSEWIFE

Hints For The Fall Wardrobe

Just to give you a faint idea of how intriguing are the styles in our new catalogue, we have put three "honors" on display in this month. The new catalogue will surprise you by its difference from former and other fashion booklets. It has lovely photographs of actual frocks worn by movie stars, and you may have frocks exactly like theirs by purchasing the patterns through this newspaper.

Pattern 8302, worn by the littlest girl will be your small daughter's favorite frock. It permits of a nice variety in the contrasting material. Available in sizes 2, 3, 4, 5, 6 years. Size 4 requires 1 1/2 yards of 36 inch material, with 1/4 yard contrasting.

The dress made from pattern 8364 is in a silk fabric with a trend like pattern in gray with a red tie and belt. The white collar is plain. This design is so versatile, it looks just as nice on the young woman as on the high school girl. Available in sizes 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25. Size 17 requires 4 1/2 yards of 36 inch material with 1-1/2 yard contrasting.

The gay little plaid frock worn by the third girl, is made from pattern 8308. Here is all that can be desired in a practical school frock, and plaid is exceedingly popular with the younger generation this season. Available in sizes 8, 10, 12, 14, 16 years. Size 12 requires 1 1/2 yards of 36 inch material with 1/4 yard contrasting. With short sleeves 2 1/2 yards.

Each of these patterns is 18 cents. The new 21 page Fall and Winter Pattern Book which shows photographs of the dresses being worn is 10 cents. (One pattern and the Fall and Winter Book 25c.) You may order the book separately for 10 cents. Address Pattern Department, 11 Sterling Place, Brooklyn, N. Y.

The Right Foods For The School Child

By ANNA MAE SIKES
Extension Nutritionist

When the child reaches the age of six or seven years, the time to begin school, new problems present themselves in child feeding. The period in the child's life from six to twelve years may well be called the "Age of Activity." He is becoming interested in vigorous contacts, games, long hikes, and, through the school and church, has many interests outside the home. Since activity means expended energy, it is necessary that his food be adequate to meet this energy requirement but it must be remembered that the energy requirement is only a part of the story. Besides supplying energy, the food must furnish the proteins needed for building and repairing muscular tissues, the minerals necessary for hardening the bones and teeth, making good blood, and those essential for the various body processes, and the vitamins needed for normal growth and health. It will be necessary for the mother to have a knowledge of food values, to be assured that her children are receiving the correct amounts of food, proteins, minerals and vitamins.

Breakfast Foods Ready
By the time a child is ready for school, all the foods essential for optimum growth and for health have been added to the diet. His diet should include daily one quart of milk, a whole cereal, one egg and vegetable besides potatoes, one raw vegetable, green leaf vegetable, two fruits (one of which should be raw), one egg and a serving of fish or meat three times per week.

The coarser raw fruits and vegetables may be added gradually to the diet. Care should be taken that a quart of milk be used in some form, and that the amount of meat be not increased to the extent that it displaces other foods, such as vegetables, cereals or the milk.

The wise mother serves foods which are simply prepared and easily digested. She avoids rich gravies, pastries, cakes, fried and highly seasoned foods.

A healthy, normal, properly trained child will eat heartily of plain food set before him three times a day, if the right kind of food is prepared properly, and served regularly and at the proper time to eat between meals. Under these conditions the average child will remain well, he will have a happy, cheerful disposition

and will develop normally, physically and mentally.

Regulating Food
An underweight child who is organically sound may be brought up to weight by regulating his food and hygiene habits. He should have long hours of sleep at night, a rest period during the day, and at least three hours of outdoor play, live in a calm atmosphere, and eat more food than would ordinarily be needed for growth and health. A weekly weighing at the same time of day and as far away from meal time as possible, and with the same weight of clothing is a good plan. However, if a child does not respond to this regime and begin to gain within a couple of weeks, he should have a thorough examination by a competent physician to locate the organic difficulty and should then have medical treatment.

The school child's breakfast should always include milk in some form. It may be used as a beverage itself or in the form of cocoa, milk toast, cereal cooked in milk, or in other ways. Raw fruits, or those cooked with very little sugar, and a whole cereal, either in the form of a breakfast food or whole wheat toast should be eaten to give laxative qualities to the diet.

When possible the heavy meal of the day should be served at noon, since the school child should go to bed early in the evening. Meat dishes should be served at noon.

The evening meal should be one that digests quickly. Soups, creamed vegetables, fruit sauces and custards are good types of food for this meal. An egg should be served if it has not been included in one of the other meals of the day. The remainder of the child's quart of milk should be served in some form.

Wide Selection Of Plants Give Color To Winter Gardens

By JOHN V. WATKINS
Annals whose seeds are sown in the autumn will give, under favorable conditions, a wealth of colorful bloom during the winter and early spring months. This group of plants plays a most important part in the scheme of the Florida garden, both for cut flowers and garden decoration during the tourist season.

The one item of greatest difficulty with the most gardeners is getting a good stand of seedlings and protecting them from the frost during the winter. During September and October, when most annual seeds are planted, the warm weather is very favorable to the growth of damping-off organisms, and the loss of seedlings is tremendous if proper precautions are not observed.

First of all, the autumn annuals may be divided arbitrarily into two classes; those whose seeds are planted in flats and those whose seeds are sown in the open where the plants are to stand. The former will be discussed first.

Planting in Flats
A flat is a shallow body of any convenient size, with a hole or drainage hole or cracks in the bottom to allow water to pass freely out of the soil. In the bottom of the flat, place a layer of pine straw or small grass clippings so that the soil will not wash through the drainage holes. Then firm the soil—composed of hammock soil and cow manure or peat moss is best—so within a half inch of the top of the flat, with a brick or block of wood. Firm this soil with a solution of one of the mercury compounds that are recommended for the control of damping-off. After this solution drains off the seeds, broadcast, on the wet soil. Cover lightly by sifting fine soil through a screen, over the seeds. Then cover with newspapers and keep the papers wet. The wet newspapers should stay over the flats until the seeds germinate. Place the flats on boxes or blocks that are protected from ants which carry away the seeds.

The emergency sowing kitchen at Melbourne, Broward county, has canned more than 4,000 cases of vegetables recently, reports Mrs. Emma Y. Gay, home demonstration agent.

*A little cooked meat,
Some butter and salt,
A few sliced pickles,
And a slice of bread.*
Although very simple,
You save here at hand
An Italian loaf recipe.
Try it, it's grand.

Guests coming! The day is hot! You are in a hurry of excitement. If you have some leftover meat and an emergency shelf containing mustard pickles (every woman should have such a shelf), you need not worry. Follow the recipe below and prepare a pleasing salad dish for your guests. It is but one of many unusual meat dishes that may be prepared if your emergency shelf is kept stocked with pickles of various kinds.

Italian Leaf
1 cup cooked meat
4 cup mustard pickles
1/2 teaspoon salt
2 tablespoons melted butter
2 tablespoons mixed herbs
from jar

Put through a meat grinder the meat and mustard pickles. Mix remaining ingredients and blend thoroughly. Pack firmly into a mold, baking slowly in oil or fat pan. Cover tightly. Cut thin slices. Garnish with watercress, mint or parsley.

Recipes

By Betty Barley
Here are two recipes for delightful dishes which require only a few left-overs and the ordinary ice box and emergency shelf. Try them when unexpected company arrives, or when you desire to please the family with something "different."

Beef Sauté
1 tablespoon onion, minced
1 tablespoon fat
1/2 cup sliced beef, minced
1 egg slightly beaten
Salt, pepper, paprika
2 cups cracker or dry bread crumbs
1 cup cooked tomatoes

Cook onion in fat until tender. Add remaining ingredients. Season to taste. Blend thoroughly. Turn into greased loaf pan. Bake in modern oven (350 degrees) 45 minutes.

Ground Beef Hash Puffs
2 cups ground beef hash
2 eggs
1/2 cup onion, chopped
1/2 cup water
Parsley
1-2 cup butter

Add well-beaten egg yolks to ground beef hash and mix thoroughly. Fold in stiffly beaten egg whites and drop hash mixture by spoonfuls onto buttered baking sheet. Place under broiler and brown. Combine onion, chopped pickles and water, and heat to make a sauce. Top puffs with hot sauce, garnish with parsley and serve immediately.

HOME AGENTS NAMED

Appointment of home demonstration agents in Wakulla and Indian River counties is announced by Miss Florida Gleason, state home demonstration agent, and A. P. Spencer, vice-director of the State Agricultural Extension Service.

Mrs. Pearl Fennel has been named Wakulla county home agent, while Miss Hattie Wells is taking up the work in Indian River. Neither county has had an agent for several years, and the appointments are made at the request of local citizens who realize the value of the work.

Baked plants should be clean, crisp, cool, dry and set in uniform glass when served. To improve the flavor, meat, fish, potatoes, and other vegetables may be marinated an hour before preparation, chilled and drained of excess dressing just before serving.
