Prominent Citizen of Sanford Passes Away After Short Illness

The city was shocked yesterday morning to learn of the death of Cecl-Gabbett at his residence on North French avenue, Mr. Gabbett was talken ill about one week ago taking a severe cold that settled on his lungs. and later developed into pneumonia and while the symptons were alarming his many friends had hoped against hope that he would survive and all that physicians and nurses could do was done for him but it was not meant for him to linger longer on this earth. and be was gathered unto his fathers in the realms above passing away peacefully with his loved ones around him to minister to his every want to the last, death resulting Saturday night.

Cecil Gabbett led one of the most interesting lives of modern times and his history if complied would read like a romance. He was born in Tipperary Ireland and came to this country at the age of 19 years. He had received a good education in the old country and was anxious to follow hm work of civil engineering and as soon as he landed at Savannah Georgia he became identified with railroad work and his rise was phenomenal. He worked on railroads and helped to start them in Canada, Mexico and many parts of the United States and finally was called to accept the presidency of the Central of Georgia Railway a position which he held for many years until his health gave way and he decided to retire to Florida and take up

the life of a grower. During his years of railroad work he travelled in many foreign countries

studying the railroad situation and he was looked upon as an authority upon engineering feats and railroad building and operation.

When he decided to retire he moved

to Sanford where he purchased a fine piece of land on the lake shore and planted fruit trees and shubbery and made a beautiful home for himself and PIONEERS OF LONGWOOD family. Dark and cloudy days are so rare in Florida that they are apt to upset us considerably. #### THE NO FENCE LAW

The recent difficulty over the fence law in Polk county makes it sure and certain that the "no fence" law will be an issue this year. It will be recalled that some candidates for the legislature took issue on the no fence law and others evaded it if they could and it was expected that those elected would bring it up before the legislature but it proved out that the greatest fight was to keep it from appearing at all and it didn't even get honorable mention.

The combination entered into be tween the successful candidates in? both groups defeated the writer, who stated squarely and fairly just where he stood; the cattlemen were called together and it was secfetly passed about that Bloom was to be defeated and the swapping of votes and the deceitful, blackmailing system resotrted to by the political ring at Bartow won out for them and the fence law did not come up at Tallahacessee, because the intrests and others wanted it bolocked. But this campaign will be none of this fool 'em way and fool 'em another and when the vote swappers get busy and tring in that old system of politics there will be a fdifferent story to tell. I have completed careful chemical analysis of the sample of water that you brought me early last week, and have obtained the following results:

.... 1.75 Garts per million Total solids 5.00 parts per million Hardness 23.03 parts per million Nitrates Trace Free Ammonia 4. 00 parts per million Albuminoid Ammonia \_\_\_\_\_\_Trace

The absence practically of free and albuminoid ammonia in this water and its very small amount of chlorine indicates its excellent quality for household purposes. In addition to the good quality characteristics of superior bounchold water, it possesses special features of much value, especially those of excellent natura aeration and LOW degree of hardness.

The bacteriological analysis, resulting in an average total count, in four samples of the water, of 3 bacteria per cent.; and in finding no colon, or other harmful bacteria, fully confirm its good quality indicated by the CHEMICAL

Of the many waters of this and other regions that I have analyzed, I have found none superior in all good qualities to that of the "Elder Water," Yours very respectfully. (Signed) THOS. R. BAKER

Famous For its Marvelous Motor

#### Europe Welcomes The Chandler Six

NOW and then you read something about "French style and line" in automobiles, or perhaps it's "the newest English idea." And some folks have gone across to get the newest suggestions.

Europe hasn't built automobiles for five years and Europe is crying for new cars and good cars.

America's style is Europe's style now.

The Chandler Six, popular in many other countries for years but kept out of Europe the past three years because of war-time prohibition of shipments, is welcomed everywhere in Europe now-welcomed for the excellence of its performance, and quite as much for the beauty of its styles of body.

The Chandler, represented in the British Isles by Messrs. H. G. Burford & Company, Ltd., of London, was exhibited by that old established English automotive house, at the great Olympia Motor Show,

and was "quite the sensation of the show," says a London cable. "Three hundred and seventy Chandlers were sold in two days."

Apparently England is greatly pleased with America's best style in motor cars.

The Chandler Offers Highest Quality At The Fairest Price
