

### Czech Withdrawal From Meet Seen Not Surprising

By J. M. ROBERTS, JR.  
AP Foreign Affairs Analyst

Indications that the Czechs suddenly underestimated their ability to independently of Moscow when they said they would attend the Paris economic conference comes as no great surprise.

Although there have been heavy statements in Prague, recently how there would be no point about how they are getting along all right with Russia, how there would be no point in Russian interference with their internal affairs and how they could associate normally with the West without interfering with their loyalty to their Russian neighbors, everybody knew better. As I said Tuesday, the captive states could not have met the cooperative requirements to be laid down in Paris without disrupting the Russian bloc.

There never was any chance that Russia would let them participate, except the slight one that she might keep one finger in the Marshall plan for disruptive purposes. The Czechs are too honest to be useful in such a scheme. If Russia intended something like that, Poland or Yugoslavia would have been a better agent.

Just as Berlin used to call the central European diplomats in to get their directions during the heyday of Adolf Hitler, so the Czechs were summoned to Moscow for a "conducted tour" led by their Communist premier. The idea conveyed to them probably went something like this:

"Don't you know those western powers intend to enslave you. They'll lend you money so you can buy their goods at a nice price and then let you repay the money with interest. On the other hand, we're going ahead with the 'Molotov plan' for Eastern Europe. There'll be pie in the Eastern sky bye and bye, but these

### Reporter Discovers Official War Secret In California Resort

OAKLAND, Calif., July 11 (AP)—One of the best kept secrets of the war, almost within sight of the skyscrapers of Oakland and San Francisco, came to light yesterday.

It was a prisoner of war interrogation center for high ranking German and Japanese officers at the widely known resort of Byron Hot Springs, 14 miles from Tracy in neighboring Contra Costa county.

Not even now, three weeks after the resort was turned back to its original owners, would the Army or Navy do more than admit hearing of the interrogation center.

It was learned officially, however, that the entire operation was directed from Washington, with district intelligence officers barred.

Since 1942 the concrete and brick hotel had been isolated, and all traffic on the Byron-Tracy highway carefully screened.

The top two floors of the resort hotel offered eloquent testimony of their use as the grounds were again opened following the recent withdrawal of military guards.

Gaping holes in false ceiling disclosed a network of wires, ostensibly for concealed listening devices, while false partitions provided listening space behind walls.

Windows were of barred steel and wired glass construction. Doors carried heavy locks and bolts. It was understood that there were never more than 90 prisoners at any one time. The Japanese officers, it was indicated, were permitted to make use of the hot mud baths for which the resort is famed.

So secret was the center that not even neighboring ranchers and residents knew about it.

Its disclosure came when a newspaper reporter for the Oakland Tribune passed the report and noted the open gates. Driving in to see if the resort was to reopen, he was told by caretaker Earl T. Orser that he was the first casual visitor to enter "since 1941."

Orser said the military guards had departed only recently and that the original owners had taken over just three weeks ago.

Joining hands and smiling jovially at Lake Success, N. Y., are (l. to r.): Andrei Gromyko, U. N. Soviet delegate, Henry A. Wallace, former vice president of the U. S., and Herschel Johnson, U. S. delegate to the U. N. Speaking to the Security Council, Gromyko asked that all foreign military personnel and troops be withdrawn immediately from Greece. (International)

### 7 Nazi Scientists Working For U.S. Navy

LOS ANGELES, July 11 (AP)—The Los Angeles Times published a story today saying that seven German scientists, experts on Nazi secret weapons in World War II, are now working for the U. S. Navy under voluntary contracts at the guided missile test center at Pint Mugu, Calif.

The Times said that the exact nature of their work was not disclosed but that they are completing wartime projects begun for Hitler. They are not permitted to work on new Navy developments in the field of "push-button" warfare, the story said.

The application of the science of chemistry to glass making dates back less than a century.

### Yearly Citrus Report Made By Department

WASHINGTON, July 11 (AP)—Growing conditions for the 1947-48 citrus crop have been "satisfactory" in most citrus areas, the Agriculture Department said today.

The reported conditions of oranges average 71 percent for the United States on July 1 compared with 80 on the same date in 1946 and the 10-year average of 74.

Grapefruit condition averaged 69 percent on July 1, 67 percent last year and 64 percent for the previous 10 years.

June weather in Florida was favorable for development of the new citrus crop. Texas citrus crops were in generally good condition on July 1, and California conditions are generally favorable for the new crop.

The department said total orange production from the 1947-48 crop estimated at a record of 13,000,000 boxes 13 percent more than the 1945-46 crop. Early and mid-season varieties totaled 53,000,000 boxes and Valencia 60,000,000.

Grapefruit production for 1947-48 is estimated at 61,410,000 boxes and lemons at 14,100,000 boxes.

### CURFEW—CONTINUED

MANILA, July 11 (AP)—A ban on all U. S. Army personnel movements in and out of Clark Field here and Camp Angeles in Pampanga between 7:00 P. M. and 6:00 A. M. imposed after shooting incidents, will continue for an indefinite period, the Philippines-Ryukyus command announced today.

Other fellows are heading for a big bust."

And just for emphasis, there may have been something in the Kremlin air that whispered:

"And don't forget, we've been letting you boys parade around in the clothes of independence. But if you're going to start breaking windows it'll be stripes for you, and a seat with the Hungarians."

This may, of course, be unjust. The Czechs might have been given huge new Russian orders for their products, might have been convinced that their new economic ties with the Soviet are more profitable than resumption of the rich trade.

## Senate Approves Income Tax Slash Measure By 60-32

### Two-thirds Majority Falls By 2 Votes: Special Session Is Not Anticipated

WASHINGTON, July 14 (AP)—The Senate passed the \$4,000,000,000 income tax reduction bill today, sending it to the White House where a certain veto awaits it.

The vote was 60 to 32, which was two short of the two-thirds margin the supporters of the bill would have to run up in order to make the bill law over President Truman's objections.

WASHINGTON, July 14 (AP)—The Senate today rejected a proposal to amend the \$4,000,000,000 income tax cut bill by permitting husbands and wives in all states to split their income tax purposes.

The amendment, offered by Senator McClellan (D-Ark.) and 23 other senators, lost 52 to 40 on a roll call.

Several other amendments remained to be disposed of, but Senator Millikin (R-Colo.), manager for the bill, said he is hopeful that a final vote can be reached during the day.

Arguing for his amendment, McClellan shouted that it is an "indefensible injustice" for taxpayers in 35 states to have no opportunity to participate in the community property plan.

The Arkansas Senator said that while he regards the issue as nonpartisan, "The Republican Party has the primary and major responsibility to pass the amendment because it is now."

### Dick Aiken Rests At Home Following Radio Triumph

Dick Aiken, winner of the Fourth of July Arthur Godfrey talent contest, who also appeared on the CBS Chesterfield program conducted by Mr. Godfrey on Monday, Wednesday and Friday, arrived home Saturday afternoon and was visited and telephoned by many friends who offered their congratulations.

He revealed that he had nearly recovered from the cold contracted in New York two days before his broadcast, which he attributed to the "icebox cold" of the air conditioning in Radio City Music Hall, which he visited.

At present he is resting up and enjoying the companionship of his friends and family. He revealed, however, that he is negotiating with the Columbia Broadcasting System for a contract, and that details of this will be announced later.

He declared that on the evening of the big broadcast he was dictated from his cold and that afterward he stayed in bed through Sunday at his hotel. On the first two Chesterfield broadcasts in New York he was introduced by Mr. Godfrey by remote control from the latter's home in Virginia, but the latter appeared personally at the New York studio on the Friday program.

The episode of the reading of telegrams from Sanford residents protesting that he was from Sanford and not Orlando was very amusing, he said. Mr. Godfrey shouted the word, "Sanford, Sanford," he flung telegrams into the air, and the audience laughed in delight.

Only five out of 400 applicants are chosen for the talent show each week, said Mr. Aiken. His new girl, McBride, Columbia representative of Orlando station WDBO much credit for getting him on the program, and pointed out that he had sent a recording of his voice to New York, and contacted CBS officials personally on two trips there. He likewise said he was grateful to the Orlando Police Bureau for backing him on the program, and pointed out that he had sent a recording of his voice to New York, and contacted CBS officials personally on two trips there.

### Editor To Speak At Jaycee Convention

Edward W. Barrett, editorial director of Newsweek Magazine, one of the outstanding weekly news magazines of the country, will be the main speaker at the Florida State Junior Chamber of Commerce convention, which will be held in Sanford on Aug. 9 and 10, it was announced today.

### HAIRING DOGS JOB

Two dogs out of a 18 dog pack which were raiding a chicken coop in West Twelfth Street were shot by police summoned to the scene Friday morning. Six chickens were killed by the dogs. Later, police killed another of the raiding dogs. The coop belongs to "Daddy" Burke, according to police.

## Caldwell Urges Strong Federal, State Relations

### Opposition Cited To Weakening Of Government Structure

SALT LAKE CITY, July 14 (AP)—Governor Millard F. Caldwell of Florida today told delegates to the National Governors' Conference here the states should "continue to oppose every move calculated to weaken our governmental structure."

Caldwell, chairman of the conference, said there is "a widespread conviction in the part of both federal and state officials that relations between the national and state governments stand in need of thorough-going redefinition."

"There is general agreement on the principles which should govern but not as to the manner in which they may be applied in practice. Some spots usually develop in connection with federal state grants-in-aid. The airport development program, the federal hospital-aid program and the perennial question of federal assistance to public schools are representative of the difficult problems which must be faced in the coming months and years."

He reported the "issue of state title to tidewater lands is not yet settled," but said it seems "able to agree the Congress to enact legislation clarifying and confirming the titles of states to these lands."

The United States Supreme Court recently ruled California oil-rich tidewater lands are the property of the federal government.

Caldwell's address opened the conference of state executives. He said the future was uncertain because of shifting economic policies.

## Warden Said Sober During Mass Killing

ATLANTA, July 14 (AP)—A state investigator said today he did not believe Warden W. C. Worthing was drunk or had "been drinking" when he opened fire with a pistol in last Friday's mass convict escape attempt at Brunswick, Ga., in which seven prisoners were shot to death.

J. B. Hatchett, assistant director of the state department of corrections, said his investigation at the scene indicated Warden Worthing's actions throughout the escape, troubled day were those of "a sober man trying to deal with a difficult situation."

He said he and Chief Prison Inspector Walter Matthews would report findings in their probe of the incident to a meeting of the board of corrections later today, but no announcement of action was likely until after a grand jury investigation beginning in Brunswick Wednesday.

## Television Set To Be Placed In White House

PASSAIC, N. J., July 14 (AP)—President Truman is having a television set installed at the White House, a spokesman for the Allan B. DuMont Laboratories, Inc., said today.

The set, which the President ordered but which the company said it plans to present as a gift, is to be delivered at the White House by truck today.

The company spokesman described the set as having television, an automatic record changer and FM reception, valued at \$1,795.

## Coal And Steel Urged To Wait On Price Hikes

### Truman Asks "Fair Test" Of Effects Of Wage Contract Prior To Action

WASHINGTON, July 14 (AP)—President Truman appealed today to coal and steel producers to wait until a "fair test" has been made of the effects of the coal wage settlement before making price increases.

The President, in a statement, said the effect of the wage settlement "is badly misrepresented by the bare statement that it amounts to an increase of about 45 cents per hour in the wages of miners."

"It is only reasonable to ask coal and steel producers to wait until a fair test has been made of the actual effects of the wage advance under conditions of maximum production," the President asserted.

"If prices are raised at once, and a wave of increases in related prices upsets our economy, we never will know what would have happened if the coal and steel managers had been willing to wait."

The risk involved by continuing present prices of coal and steel long enough to learn what the increased costs of production will actually be under the new wage agreement is not serious, especially in view of the fact that such action will greatly reduce the hazards of renewed inflation."

Saying the producers of coal and steel "have been enjoying their full share of high profits," he concluded:

"I am sure that they, as responsible leaders of industry, will want to invest a portion of those profits in the maintenance of business stability and prosperity for all our people."

The incident spoke of "deep concern" being expressed in quarters over the results of the recent settlement between John L. Lewis' United Mine Workers and the coal operators. He mentioned widespread fear that it might lead to substantial increases in coal and commodity prices as well, resulting in renewing "the inflationary spiral."

## Hunt For Florida Oil Shifting Northward

TALLAHASSEE, July 14 (AP)—The hunt for Florida oil, heretofore centered largely around the state's only producing field at the edge of the Everglades, appears to be shifting north and westward.

State Geologist Herman Gunters' periodic report on oil operations showed today that only two of the eight wells now being sunk in the state are in the extreme southern portion, and three of the week marked for early drilling are in the northern tier of counties.

"There seems to be a play toward West Florida, to prove or disprove possibilities there," Dr. R. O. Vernon, associate state geologist, commented.

## Inside Improvements Announced By Hotel

The lobby and halls of the Valdes Hotel have been repainted and revamped, new draperies have been ordered and new stair and hall carpets are to be laid, according to Ben Small, manager.

The work of the lobby has been painted moss-green, and woodwork is finished in a contrasting dark color. Rooms are being given a very thorough cleaning, and many are being redecorated. Many new beds are being provided and all beds will have box springs and insulating mattresses, said Mr. Small. Floors are being revarnished.

## Greeks Force Invaders To Albanian Line

### UN Balkan Group Flies To Make Inquiry; Another 1,500 Are Arrested In Plot

BEograd, Yugoslavia, July 14 (AP)—General Enver Hoxha, Communist premier of Albania, declared in Tirana today that Greek Albanian border incidents "are part of a general anti-democratic plan of Anglo-American reactionaries whose aim is to bring about a new war, recommended by Truman's Doctrine."

ATHENS, July 14 (AP)—Greek officials reported today a 1,000-man force which attacked the village of Konitsa yesterday had been pushed back to the Albanian border, six miles away.

The guerrilla ring around Konitsa apparently was broken during the night. Greek veterans of resistance fighting during the German occupation under Gen. Napoleon Zervas were engaging the rebels.

One official report said fighting was still in progress at a tiny, unidentified village about two miles from the Albanian frontier.

Government forces were reported officially to have recaptured the Greek half of the Saranta River bridge at Borozani.

A subcommittee of the United Nations Balkan Commission flew at noon from Salonika toward Konitsa for a spot investigation of what the Greek government said was an invasion by an "international brigade. Representatives of the United States, Russia, Brazil, Australia and Syria were on the team."

A letter from the Greek liaison officer yesterday told the commission an "international brigade" had invaded Greece from Albania, and that this comprised a "large number of Greek and Yugoslav volunteers, and a small number of Albanian and Bulgarian" were responsible for Greek territory invaded.

## Porter Lansing, Jr. Tells Lions Club About Boy's State

Porter Lansing, Jr., who was recently sent by the Sanford Lions Club to the American Legion sponsored by the Lions Club, told members of the Lions Club Friday at the Tourist Center that conduct of the boys at the meet was the finest in his experience. He was introduced by Dr. W. Swann and by Edward Marshall, who served as one of the advisors at Boys State.

Boys representing the larger counties in the State voted in bloc to keep smaller counties from monopolizing votes and officers, Porter Lansing reported.

He mentioned the newly established "Girls' State" sponsored by the Legion Auxiliary. For a long time, he said, he had looked forward to being selected to attend Boys' State, and he stressed the democratic basis of the project in which he was participating.

## Bath House Finished At Lake Mary Park

A six room concrete block bath house was completed Saturday at the PTA sponsored park at Crystal Lake in Lake Mary by Robert H. Eubanks, who has devoted his vacation time to this work. Last month, during a vacation period, he built a pier into the lake.

Many picnics of Sanford people, including Thursday afternoon outings of the Youth Recreation Center, are being held at the park, Mr. Eubanks reported. He is serving as caretaker of the park and facilities.

## Five Nations To Supervise Operation Of Marshall Plan

### As Czechs Withdrew From Marshall Plan Parley

SHORTLY AFTER THE CEREMONY shown above was staged in Moscow, the Czechoslovakian Cabinet in Prague, acting on phone instructions from Premier Klement Gottwald, withdrew from an earlier decision to attend the Paris conference at which the Marshall Plan will be acted upon. The presence of Soviet Foreign Minister Molotov (left) stressed the importance of the occasion. Foreign Minister Masaryk (right, background) stands by with members of the Czech group as Premier Gottwald talks into microphone. Behind Molotov (in cap) is Deputy Foreign Minister A. V. Vishinsky. (International Radiophoto)

## 12 Victims Of Plane Crash Are Still Unidentified

### Death Toll Of 21 Ex- pected To Rise As 2 On Critical List

WASHINGTON, July 14 (AP)—Municipal Judge Allen K. Brady today ordered a coroner's examination for William F. Kater, former Capital policeman charged with firing two shots Saturday at Senator Bricker (R-Ohio). An assistant United States Attorney John H. Belmont asked for the examination.

Kater is to be held without bond. The examination will be given at Gallinger Hospital here. Judge Brady directed that the findings be brought to the court to a hearing on Aug. 14.

Diamond disclosed the Kater case now faces two separate charges in connection with shooting which occurred in the Senate subway. One is second degree murder, the other carrying a death sentence. Kater had 18 months on the United States Capitol force.

Bricker, target of two 22 caliber pistol shots that missed, did not appear at today's first hearing. He previously told a reporter he would be present.

Kater appeared dazed and swayed when he was led into court for his appearance before Judge Brady. The session lasted less than a minute. Kater stumbled a little as a policeman took him out of the room.

Assault with intent to kill is a felony. To prosecute this charge requires an indictment by a grand jury. The maximum penalty is 15 years.

Carrying a deadly weapon is a misdemeanor, with a maximum penalty of one year in jail and \$1,000 fine. This offense can be proven by the maximum penalty is given and the fine goes untried.

Bricker, the 1948 Republican vice presidential nominee, in stepping before the hearing, said the officers have all the information they need but that he would be available if required.

## Optometrist Opens Offices In Sanford

Dr. Charles L. Persons, optometrist, will open a suite of offices Thursday on the fifth floor of the Sanford Atlantic Bank Building, he announced today.

A graduate in 1940 of the Northern Illinois College of Optometry, he practiced one year before going into the service. He received his discharge from the Army medical corps a year ago after serving 14 months overseas and in England and has since been affiliated with Dr. J. R. Keen in Orlando.

## Mental Exam Of Bricker Assailant Ordered By Judge

WASHINGTON, July 14 (AP)—Municipal Judge Allen K. Brady today ordered a coroner's examination for William F. Kater, former Capital policeman charged with firing two shots Saturday at Senator Bricker (R-Ohio). An assistant United States Attorney John H. Belmont asked for the examination.

## Floridians Urge Bill Of Authority For Glades Park

### Congressmen, State Cabinet Members Seek Legislation

WASHINGTON, July 14 (AP)—Florida's congressional delegation and five members of the Governor's cabinet urged a House Public Lands subcommittee today to approve legislation which they said would give the Secretary of Interior "unquestionable authority" to acquire 2,000 square miles in south Florida for inclusion in the Everglades National Park.

Attorney General Tom Watson, a member of the governor's cabinet, and Mrs. Elsie Knowles, a Florida land owner employed by the Justice Department, appeared to oppose the legislation but did not take the witness stand before the subcommittee.

Senator Holland (D-Fla.) told the subcommittee that Secretary of Interior J. A. Kousser has told the Everglades National Park on 454,000 acres in south Florida.

## C. M. Farnell Funeral Is Held In Oviedo

Funeral services for Carl M. Farnell were held yesterday afternoon at 4:00 o'clock at the Oviedo Cemetery by the Masonic Lodge assisted by Rev. H. H. Link and Rev. Lionel Nelson, it was reported today by the Erickson Funeral Home.

Mr. Farnell died at his home in Oviedo Thursday morning at the age of 54. He was born in Oviedo and had lived there his entire life. He was a grocer and was a member of the Baptist Church, the Masonic Lodge and as a veteran of World War I was a member of the Oviedo American Legion Post.

He is survived by the widow, three sisters: Mrs. J. E. Partin and Mrs. Stella Farnell of Oviedo and Mrs. W. M. Harris of Ocala, Ga.; two nieces: Mrs. C. T. Niblack of Oviedo and Mrs. Georgia Stokes of Detroit; three nephews: James Partin of Oviedo, Marshall Brown of Ocala and Alton Farnell of Jacksonville.

## Plans Made By Coast Guard For Labor Day Regatta

Plans for an annual Sanford regatta to be held over Labor Day each year and occurring next Sept. 1 were made at a meeting of the U. S. Coast Guard Auxiliary held last Thursday night at the Chamber of Commerce office.

"This will be one of the outstanding events of the state and the largest ever attempted by Sanford," Manager J. Higgins stated. "The regatta will be held under the auspices of the Florida Outdoor Association. It is expected that from 55 to 75 contestants of different classes will be entered from all over the state."

Members of the Coast Guard were reported anxious to participate in the regatta as an annual event and are planning a campaign to secure the most substantial assistance of the merchants to carry out this program.

"This is excellent publicity for Sanford and the Coast Guard Association is confident of drawing from five to six thousand people to the city for the event," Mr. Higgins said. The Southern County Chamber of Commerce is sponsoring a dinner at the Mayfair Inn during the event at which prizes and trophies will be awarded to contest winners.

Senator Spessard Holland has accepted an invitation to be the guest speaker. Governor Caldwell or his representative will attend. The Junior Chamber of Commerce will handle arrangements for a dance at the Mayfair Inn following the dinner.

## Brissson Wins First In Story Contest

Gordon Brissson won first prize in a short story telling contest conducted by Charles Morrison at the regular weekly luncheon of the Rotary Club at the Tourist Center today. G. W. Spencer won second prize and Dr. C. W. Baker and S. G. Gray tied for third.

At the suggestion of Joel Field, the Rotary Club authorized the secretary to write a letter to State Headquarters of the American Legion at Tallahassee urging favorable consideration of Sanford as the site for the proposed Memorial Building.

Others participating in the contest were Frank Evans, Fletcher Rolle, W. A. Laffer, W. A. Kader, Harry Kudell and George Touhy. Visitors at the luncheon included Clark Della of Deland and Charles Luke and James Holteclaw of Sanford.

### CITY PERMIT

The Seaboard Oil Company has secured a City permit for remodeling a canopy and repairing its building at First Street and Elm Avenue.

## Dutch Advocate In- clusion Of West- ern Germany In Recovery Program

PARIS, July 14 (AP)—France, Britain, Italy, Norway and the Netherlands were chosen by the 16-nations rules committee today as members of an executive committee to supervise the operation of the Marshall proposal for European recovery.

The rules committee completed a draft plan for organizing the economic recovery along the lines laid down by the U. S. Secretary of State. The recommendations will be submitted to a plenary session of the conference at 4:00 P. M. (10:00 A. M. EST) tomorrow.

The rules committee also named four technical committees which will advise European resources for self-help before making a bid for U. S. financial aid. The committees were:

Food and agriculture: France, Britain, Denmark, Greece, Eire, Iceland, Italy and the Netherlands.

Steel and iron industries: France, Britain, Luxembourg, Belgium, Norway, Portugal, Switzerland, Norway and Turkey.

Fuel and power: France, Britain, Austria, Belgium, Denmark, Greece, Italy, Sweden and Switzerland.

Dutch sources indicated the Lowlands would advocate prompt inclusion of Western Germany in the recovery program. A Dutch spokesman said Western Germany inevitably must be added to the 16-nation organization, emphasizing all Western Europe except Spain and excluding Russia and China.

## Plans Made By Coast Guard For Labor Day Regatta

Plans for an annual Sanford regatta to be held over Labor Day each year and occurring next Sept. 1 were made at a meeting of the U. S. Coast Guard Auxiliary held last Thursday night at the Chamber of Commerce office.

"This will be one of the outstanding events of the state and the largest ever attempted by Sanford," Manager J. Higgins stated. "The regatta will be held under the auspices of the Florida Outdoor Association. It is expected that from 55 to 75 contestants of different classes will be entered from all over the state."

Members of the Coast Guard were reported anxious to participate in the regatta as an annual event and are planning a campaign to secure the most substantial assistance of the merchants to carry out this program.

"This is excellent publicity for Sanford and the Coast Guard Association is confident of drawing from five to six thousand people to the city for the event," Mr. Higgins said. The Southern County Chamber of Commerce is sponsoring a dinner at the Mayfair Inn during the event at which prizes and trophies will be awarded to contest winners.

Senator Spessard Holland has accepted an invitation to be the guest speaker. Governor Caldwell or his representative will attend. The Junior Chamber of Commerce will handle arrangements for a dance at the Mayfair Inn following the dinner.

### MEET POSTPONED

Due to the illness of two City Commissioners and the fact that another is out of town, the regular meeting of the Commission has been postponed from tonight until Wednesday evening. It was announced this morning by H. N. Sager, city manager.

### CITY PERMIT

The Seaboard Oil Company has secured a City permit for remodeling a canopy and repairing its building at First Street and Elm Avenue.

BIBLE VERSE FOR TODAY
CHILDREN NORMALLY FOLLOW
THEIR PARENTS IN FAITH AND DEEDS. WATCH
YOURSELVES. But for me and my
house we will serve the Lord.—
Joshua 24:15.

One thing about these flying
discs, you don't have to drink
that darned stuff if you don't
want to.

As we get it, Mr. Petrillo will
let the little children play over
the radio if they don't show up
their elders.

Rep. Farris Bryant, who ad-
dressed the Jaycees last week,
may well represent this district in
the United States Congress one
of these days.

It has about reached the point
where you are a perfect nobody
if you are not among those who
have actually witnessed one of
these Flying Saucers.

Dick Cooper, a Newton law
student, announces he will run for
governor next year. He has no
idea of being elected, he says,
but if he gets struck by lightning
... Well you can't blame him
for trying.

The onetime 'dream goal' of
600,000,000 civilian jobs has
been attained -- and better -- for
the first time in the nation's history,"
says an AP dispatch in the
Tampa Tribune. You must be
including some of us fellows who
are holding down two or three
jobs.

President Truman has served
notice on Congress that it is
wasting its time in trying to re-
duce taxes since he says he will
veto the bill anyway. But he may
have succeeded in helping Con-
gress to pass it over his veto since
many of the congressmen do not
like his unorthodox manner of
delivering a veto before a bill is
passed.

America is so afraid of losing
its atomic bomb secrets that a
couple of Army privates picked up
important files on their manufac-
ture as souvenirs on a trip through
the Los Alamos atomic testing
station, and walked off with them.
Some day America may decide it
had better lock the barn door, but
probably not until after another
Pearl Harbor.

John L. Lewis may be regarded
by coal miners today as something
of a hero, having forced higher
wages for them than they ever
dared dream of. But high wages
will make higher prices for the
coal which steel industries and
others buy to make their products.
No doubt, the exorbitantly high
coal prices will intensify the search
for other practical and more
economical fuels, and with the
coming of the atomic age, that
day should not be far distant.
The net effect in the long run of
Mr. Lewis's strategy may be sim-
ply to create unemployment.

City Commissioners are consid-
ering a 10 percent increase in
assessed valuations in order to
meet rising costs of government.
A 10 percent increase in valua-
tions is certainly little enough
when houses which sold for \$1,-
000 before the war are now sell-
ing for three and four thousand
dollars, and vacant lots which you
could scarcely give away now
bring four and five hundred. Yet
property owners have born the
brunt of City costs throughout all
the lean years of the depression,
have paid for practically all the
benefits of City government which
everyone enjoys, and should be
shown every possible consideration
now.

Our Latin Neighbors

South America, for most Americans, used to be simply
a big area on the map whose name indicated that it was
south of the United States. Even today many think of it
only as a Spanish-speaking area given to revolutions.

Such misconceptions can not continue if the Carnegie
Corporation's new award accomplishes what it hopes. This
body has set aside \$250,000 for four centers of South
American study. All are in the South: The University of
North Carolina is to cover the general field; Tulane Uni-
versity of New Orleans will specialize in Central America;
Vanderbilt University of Nashville, Tenn., will deal with
Brazil; and the University of Texas will devote its attention
to Mexico.

Tulane has already become widely known for its collection
of books on Central America, and the useful volumes
which it has published on the remains of early civilization
there. The University of Texas is famous for its interest
in its neighbor Mexico. The University of North Carolina
under President Frank Graham has an enviable reputation
as an up and coming institution, a reputation shared by
Vanderbilt. The new funds should enable all four to do
even more useful work.

Not included in the Carnegie program but making
a distinguished contribution in the Latin-American field
is Rollins College. The Inter-American Department under
the guidance of Dr. A. J. Hanna and the Casa Iberia
under Professor Angela Paloma Campbell have brought
to Winter Park speakers, musicians, artists and students
who have helped to promote understanding and friend-
ship on the part of Americans for our neighbors to the
South.

More and more the United States should come into
closer acquaintance and cooperation with its Latin neigh-
bors. The Carnegie Corporation shows its foresight in
providing means to that end.

Learn To Swim

"When you go swimming, bear in mind that drownings
take fourth place in the United States as a cause of
accidental death, and give due thought to your safety
while enjoying yourself," warns Dr. Donald B. Armstrong,
in charge of the health and welfare activities of the
Metropolitan Life Insurance Company.

To be a safe swimmer, points out Dr. Armstrong,
means to be a good swimmer -- to be master of at least
one stroke, and to know how to float and tread water. It
also means never swimming alone.

Here are other practices which Dr. Armstrong recom-
mends for safety and fun in swimming:

- (1) After a hearty meal, wait at least two hours
before swimming.
- (2) If you tire easily, stay in shallow water.
- (3) Get out of the water when you feel tired or start
to shiver.
- (4) Get an instructor's advice about diving, so that
you learn to dive properly.
- (5) Investigate a new diving place beforehand for
rocks and obstacles, and recheck every season.
- (6) Never dive in the dark. The swimming pool may
be dry. The tide at the beach may be low.
- (7) Heed the warnings of local health authorities
as to the pollution of swimming places.
- (8) Learn the safest and best way of getting a
drowning person out of the water.
- (9) Finally, learn artificial respiration. By
doing so you will be ready to save the life
of someone after rescue from drowning.

Details as to water rescuing and as to artificial respira-
tion will be found in booklets obtainable from Red Cross
chapters, from Metropolitan Life Insurance Company
offices, and from other sources. Dr. Armstrong, author
of the widely used First Aid book "What to Do Till the
Doctor Comes," also advocates taking First Aid and safe
swimming courses as offered by the Red Cross and other
agencies.

Family Court

A group of Juvenile Court judges, meeting in Chicago
to discuss their problems, were addressed by Judge Elwood
F. Melson of the Family Court of Wilmington, Delaware.
Judge Melson made the statement that 85 per cent of
juvenile delinquents are neglected children whose parents
give them no support, supervision or discipline.

The judge said that during the two years since the
formation of the Family Court in his county, the number
of commitments to three juvenile correction institutions has
been reduced 18, 20 and 25 per cent respectively. He also
advocates a program for families which would provide for
close co-operation between home and school, common in-
terests for parents and children, and regulation of hours
and spending money.

The functioning of such a court should be good not
only for the child who has broken laws, but for his parents,
as well. If, under its direction, instead of spending their
evenings in the corner juke-joint, they stay at home to help
the children with their homework, winding up with a
lively game of rummy and maybe some home-made ice-
cream, they might be surprised to find they had had a
fine time. Children or adults from families that work
together and play together seldom get into trouble.

SANFORD FORUM

Editor
Sanford Herald
Sanford, Florida
Dear Sir:

The Florida Industrial Commis-
sion wishes to thank you for the
splendid cooperation you have
given the local manager of the
Florida State Employment Ser-
vice in publishing the Monthly
News Release as well as other
publicity.

We are sure that the publicity
obtained through your newspaper
has assisted your community to
achieve fuller employment.

If we can serve you in any way
please give us that opportunity.

Sincerely,
Carl B. Smith
Chairman
Florida Industrial Commission

New Safety Controls
On Rockets Now Used

WHITE SANDS, N. M., July
14. (AP)—New safety controls kept
another German V-2 rocket from
going out of bounds in a test
flight at the Army's White Sands
proving ground yesterday.
In the air only 70 seconds the
missile was brought down by a
radio signal cutting off the fuel.
Descending from a height of 36

to 28 miles, it hit two miles from
the launching platform and un-
expended fuel exploded.
A newly installed safety sta-
tion halted the straying rocket.
Lt. Col. Harold R. Turner said.

CANCER KILLS

By W. V. BITTING
Touchee Drug Co.
Cancer has demonstrated its
power to kill.

Each year, 170,000 die of this
disease. Of this number, 20,000
are boys and girls under the
age of 20.

Alarming as these figures
are, they represent the ravages
of an enemy who can be de-
feated. We know now that Can-
cer can be prevented, can even
be cured if discovered in its
early stages.

Here is a great field for pre-
ventive medicine. Regular
health examinations lead to the
detection of slight symptoms,
which if neglected could easily
prove fatal.

Medication is always import-
ant. This depends upon the
druggist. Select a good one.

This is the 166th of a series of
Editorial Advertisements ap-
pearing in this paper each
Monday.

SPEAKER OF THE HOUSE, Rep. Joseph W. Martin, Jr., (left) congratulates Rep. Harold Knutson (R-Minn.), chairman of the House Ways and Means Committee and sponsor of the revised tax-reduction bill, following the measure's passage by a vote of 302 to 112. (International)

More than 825,000 fires that
could have been prevented oc-
curred last year in this country.
Sixty percent were put out when
they were only blazes.

When picking up a hot dish use
a thoroughly dry holder as heat
travels rapidly through moisture
and it may be unsafe to use a wet
cloth.

U. S. Has Oil Supply
For Over 1,000 Years

By VERN HAUGLAND
WASHINGTON—We have en-
ough oil and gasoline for 1,000 to
2,000 years, in the opinion of Dr.
R. H. Sayers, director of the U. S.
Bureau of Mines.

Oil shortages, which have been
freely predicted for the coming
months, would be caused by lack
of transportation and lack of steel
for equipment for oil production,
according to industry spokesmen
and Interior Department officials.

But, according to Dr. Sayers,
there is plenty of oil underground.
"If the liquid fuels research and
development program is carried
out to the full extent that has
been authorized," he says, "I be-
lieve we can meet any foreseeable
needs in oil and gasoline for 1,000
to 2,000 years."

Research Makes Strides.
The Bureau of Mines has made
"substantial strides" toward es-
tablishment of a synthetic liquid-
fuels industry upon reaching the
half-way point in a five-year
\$50,000,000 program of research
and development, to be completed
by 1950, Sayers says.

Pending completion of an oil
shale laboratory at Laramie, Wyo.,
research has been carried on there
in temporary quarters. An oil
shale demonstration plant was de-
dicated at Rifle, Colo., in mid-May.

At Princeton, Pa., an almost-
completed laboratory and pilot
plant is to begin imitating syn-
thetic oil and gasoline from coal
this summer. Research has been
underway meanwhile, in tempo-
rary quarters in Pittsburgh. A
\$17,500,000 war-time synthetic am-
monia plant at Louisiana, Mo., is
being converted into a coal hydro-
genation and gas-synthesis demon-

stration plant.
Sayers adds that oil-shale re-
serves, principally in the Rocky
Mountain states, do not compare
with those of coal but probably
contain 22,000,000,000 barrels of
recoverable oil.

This, he says, is four or five
times the known petroleum re-
serves of the United States and
is enough to supply the nation's
liquid fuel needs for more than
half a century.

Natural gas, he says, is another
potential source of liquid fuels.
However, gas reserves of 100 to
115 trillion cubic feet will last
only 30 to 40 years at the pres-
ent rate of consumption, and sub-

stantially less if used also to make
oil and gasoline in large volume.
Petroleum reserves would last only
12 more years at the 1945 rate of
consumption.

See Ample Coal, Too
Viewing another section of the
nation's fuel bin, Sayers adds "we
have more than three trillion gal-
lons of coal in reserve in the United
States. That is adequate to meet
our needs for 3,000 years, even
considering the use of coal for
distillation into gas or for jet
fuels."

He says it is a mistake for any-
one to assume that atomic energy
will replace coal.

**Now! LIFE INSURANCE EXPERTS PROVE THAT FORD TRUCKS LAST up to 19.6% LONGER**

FOR THE first time in history, scientific
methods used by life insurance com-
panies in computing rates have been put
to work in figuring out life-expectancy tables
for Ford Trucks.

4,967,000 Trucks Tested . . .
Wolfe, Corcoran and Linder, leading New
York life insurance actuaries, assembled the
records of all trucks of the five sales leaders
registered from 1933 through 1941 --
4,967,000 trucks in all. Then they prepared
truck life-expectancy tables in exactly the
same way that they prepare human life-
expectancy tables for life insurance com-
panies.

Trucks are built stronger. They're built
to last longer! That extra life that's put into
Ford Trucks comes from Ford experience
in building more trucks than any other
manufacturer. Ford knows how to build
trucks that last longer!

See us today. See the life-expectancy
charts. You'll see why it'll pay you to place
your order for a Ford . . . the truck that
lasts longer!

Ford Trucks On Top!
The result? Ford Trucks Last Longer! Up
to 19.6% longer than the other 4 sales
leaders! Why is this true? Because Ford

What Longer Truck Life Means to You . . .
Why It Pays to Wait for a New Ford Truck!

It stands to reason the longer you use a truck, the less it
costs to own. That's why longer-lived Ford Trucks are
the top truck value. And, logically, Ford longevity means
lower maintenance costs . . . less time in the shop. It
means more unused miles when you're ready to trade,
and a better trade-in. Yes, any way you look at it, you'll
get more truck for your money with a Ford Truck . . .
because Ford Trucks last longer!

Certified Proof

FORD TRUCKS
LAST LONGER!

The life-expectancy of a Ford Truck is!

13.1%	longer than that of truck "B"
3.3%	longer than that of truck "C"
7.6%	longer than that of truck "D"
19.6%	longer than that of truck "E"

OFFICIAL ACTUARIAL CERTIFICATE

Based on the application of sound and accepted
actuarial methods to the actual experience as mea-
sured by truck registrations, we hereby certify that, in
our opinion, the accompanying table fairly presents
the relative life-expectancy of the trucks involved.

Now, Over 56,000 Cars of Kaiser and Frazer Cars - MORE THAN 12,000 CARS BUILT IN JUNE! FIVE IMPORTANT REASONS WHY THE PUBLIC LIKES THE KAISER AND THE FRAZER. 1. Because they are beautiful. They look like what they are - the newest things on wheels. They set the fashion for all future motor cars - in body lines and color. 2. Because they are roomy! The whole width of these cars is inside! Both seats are more than five feet wide. Six adults have room to spare. And then, too, there is 27 cu. ft. of space in the luggage compartments. 3. Because they are safe! Extra low center of gravity and stabilizer bars both front and rear, cut away to a minimum. They hug the road! Superlative vision in all directions. Smooth, positive braking action. 4. Because they perform! The economical, 100-hp., six-cylinder engine provides a very high horsepower-to-weight ratio. Reasonable acceleration. Unobscured gasoline economy! 5. Because of the ride. Owners say these cars ride a ride like this. The ride is smooth before the car can even complete. They must experience! Compare the ride, today!
