Chase Says Story In Morning Paper

Berlaring that a story appearing in a morning newspaper quoting a letter he was said to have written to Arthur Kudner, In advertising agency for the which planged into the sea of Florida Citrus Commission, was found today by seasching planes and Company, today said the commemeration was a confidential matter between himself and Mr. Kudner and was not intended for publication.

Mr. Chase was quoted an explaning his company's views on the "color-added" process of dyeing fruit by means of which the appearance of the fruit is made more attractive and over which a great deal of controversy has razed among citrus growers and o ppc. .

there are two schools of hought existing among fruit men regarding the process. One insists that color-added makes the product more marketable and increases its demand; the other contends that the process does not add any value to the fruit for the consumer, that color-At Home Of Sister sided does not help the "keeping" qualities or flavor of the fruit and that it is an additional expense to the grower,

Wanted: Trees And Plants

In last night's Herald City Clerk Frank Lamson listed number of trees, shrubs, and vines which are needed for Fort Mellon Park and urged public spirited Sanford citizens, civic organizations, and various business houses to make such contributions as they can afford."

The Herald is glad to join in Mr. Lamson's plea for the support of this beautification project. The Ci.y and the federal government are spending some \$30,000 in ing out this park and preparing it for the planting of these shrubs. When completed it will be one of the most beautiful spots in Florida.

As an attraction for tourists, and as a source of community pride, it should be fully appreciated by every Sanford of the purpose of ford citizen. It should be a privilege and a pleasure to contribute to its beautification. Look up the list of desired trees, shrubs, and vines in last night's Herald. Notify Frank Lamson of your contribution.

A Job Well Done

Around the world in three days, and 19 hours! That is the record which Howard Hughes and his companions have hung up for future generations to shoot

Or perhaps, a: the rate aviation progress is being made, it will be only a few years before some other enterprising airman, will have sha tered Howard Hughes'

It was only a matter of five years ago that the world acclaimed Wiley Post's equally spectacular flight over the same course in 7 days and 18 hours. But Hughes beat this record by only one hour less than four days. He made the way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you, if you have a way his face from you. He was a way his face from you have a way his face from you have a way his face from you. If you have a way his face from you have a way his face from you have a way his face from you. He was a way his face from you have a way have his 161 miles per hour.

Future airmen may cut Hughes' record. They may do the job in three days or a little less. Or they may fly a longer route, say around the equator. But they will never knock his record as completely cockeyed as Hughes did Wiley Post's.

So Howard Hughes is the man of the hour. No one has been such a national hero since Colonel Lindbergh returned from his first expedition to Paris. And like the good hero that he is, after a job well done, Hughes quietly slipped away from the crowd and went home to bed.

Life Expectancies

The inference that the world will soon be peopled largely by men and women in their late sixties is gathered from a recen, report on the League of Nations' statistical year book. Although the spread of birth control measures is rapidly reducing the birth rale in most countries of the world, the advance in medical science has extended the life expectancy of the average child, once it manages to be born, to almost twice what it was a few shon. years ago.

The figures show that a white girl born in the United States in 1935, the latest year for which figures are given, had then the highest expectancy of life of any child on There the wild hirds flutter and earth, 64.72 years. Her brother could expect only 60.72 Park," according to R. S. Greg cunce of steel nor irpn, so that In seven cruises the Carnegie sing. There are no her compass-needle would not be covered 297,579 mautical miles longer. He was born in Denmark with the expectancy of 63.8 years.

These expectancies for both girls and boys were exceeded in 1934 in Australia and in 1931 in New Zealand, THE INONLESS SHIP . . . which then reached a peak of 65 years' expectancy for boys A true world-traveler was the ing the usual iron work. The and 68 years for girls. There are no later figures for Carnegie, non-metallic survey rigging was of hemp; the four 16-pound hammer been thrown? those countries.

only 27 years, with boys enjoying a slight advantage over girls. In Japan the expectancy was 47 years for girls and 45 years for boys. India was the only place on earth where a boy had the bet er of it, although his chances were almost equal to a girl's in Ireland,

In the United States infan's of either sex in ence, some figures this correspon-dent gathered might be interest-ing. Our figures, near enough first hand to be satisfactory, were little brunette item sitting beside could expect two years more of life than in 1929, when The new State Road Depart- the economic depression began. Reversing the process, a company with a "capitalized value" of \$200,000 might be found to their many friends. Capt. But west side, and is a valued emhant west short line ployee of the Western Union have shinings of \$20,000, or anything size from nearly nothing to the main line but as this expitalized Mr. and Mrs. Ray Butt have

Corporal George Huff and Private James Estridge are spending a few days with home folks. Both of them are located at

Our information is that the young Roosevelt puts the "capitalized value" of his insurance business at \$150,000 to \$200,000. That is a somewhat cleatic factor but at the time we obtained the figures two were told that his earnings from insurance were considerably less than the "capitalized value." This letter represented the amount at which he valued his business as families and a few friends.

Immediately after the ceremony the happy couple left for In arriving at the capitalized Orlando where they spent Sunvalue of a company this procedure tay. The groom left yesterday is followed. A company may extitot his duties at Camp Wheeler mate that it is making a 10 per where he is in the Ordinance December 10. partment. He is the son of Mr. value" becomes 10 times its earnand Mrs. F. N. Estridge, and ings. Thus, if the company's earnwas engaged in farming when ings are \$20,000 its "capitalized Uncle Sam asked and received value" is \$200,000.

4 ... DELIGHT

HOW MANY IS HE FOOLING? ORLANDO REPORTER-STAR

President Roosevelt declare he hide, nor for a party promotiwanted it understood that he was atorial race believed the state-

"I want to make definite and clear to you," Mr. Roosevel; said, "that I am not interfering in any shape, manner or form in the primary campaign in Kentucky. I do not reside in this state-you do, you have the absolute right to vote for any candidate in ac cordance with the dic ate of your conscience, no outside source ought to drag on you"

"Bot," said the President, " do have a righ to tell you the national picture," and then be launched into an eulogy of Senator Barkley, the candidate of his choice, which was one of the most glowing tributes one man could pay another.

Mr. Roosevelt plainly told Kentuckians no other man could serve them as Senator Barkley. If hat is not meddling, if his speech was not a gem of oratory in behalf of the man he wants sent back to Washington, nothing in the world could be.

Rosevelt as a man has right to go out and stump for the men he wants sent to Congress to keep him in power to make easy the passage of his program. That is one of the policies of our political make-upto the victor belong the spoils But why come out and deny that you are going to do that, when b fore the sound of your voice has died away you are doing the very thing. The President's speech re-

moved any doubt that this journey of his is not a campaign tour to bost the candidate of his choic?. And that perhaps within the pale of a President's privilege. You can't blame a fel-

How many of those who heard low for taking care of his or its own interests, but this should not meddling in Kentucky's sen-whot be done at the expense of the taxpayers many of whom do not belong to that party.

We are saying this not because we do not want Mr. Boosevelt to go out and campaign for his personal benefit at the taxpayers' expense, but because it is setting a dangerous precedent. We might have a Republican or Socialist President in the White House some day, and they may prove better spenders than we Democrats, or perhaps we'd beter say the New Dealers have proven to be. And the worse it gets, the harder it's going to be on the taxpayers. If it is permissable for the President to do this, why not extend it all the way down the political line, and we'd soon have politicians from mayors on up using the taxpayers' money to maintain them-

It is a bad business and should be stopped.
