# VISUAL NEWS of the WORLD in PICTURE

### Baer And Braddock Were Well-Matched For Fight

Champion Max Baer and Jimmy Braddock were well-matched from the standpoint of physical attributes. The former held the title over the heavyweights for a long time. (Associated Press Photos)

### AS BRADDOCK WON WORLD TITLE IN UPSET OF THE CENTURY

A year ago Jimmy Braddock was a "has-been" in the ring but now he's heavyweight champion of the world by virtue of his triumphant decision over Max Baer in their 15-round fight in Madison Square Garden here on Long Island. These visual pictures in part tell the story of Jimmy's victory. At the left, Braddock is shown taking one on the mouth in the thirteenth round but going on as a fast fighter. Here a harder left jab from Max sends Braddock to the right. What a sign of Max's shortcomings that cost him the championship is his inability to connect with his right hand. Baer's right has just swung one, but Braddock is able to evade it. (Associated Press Photos)

### Fast Street Train Collision

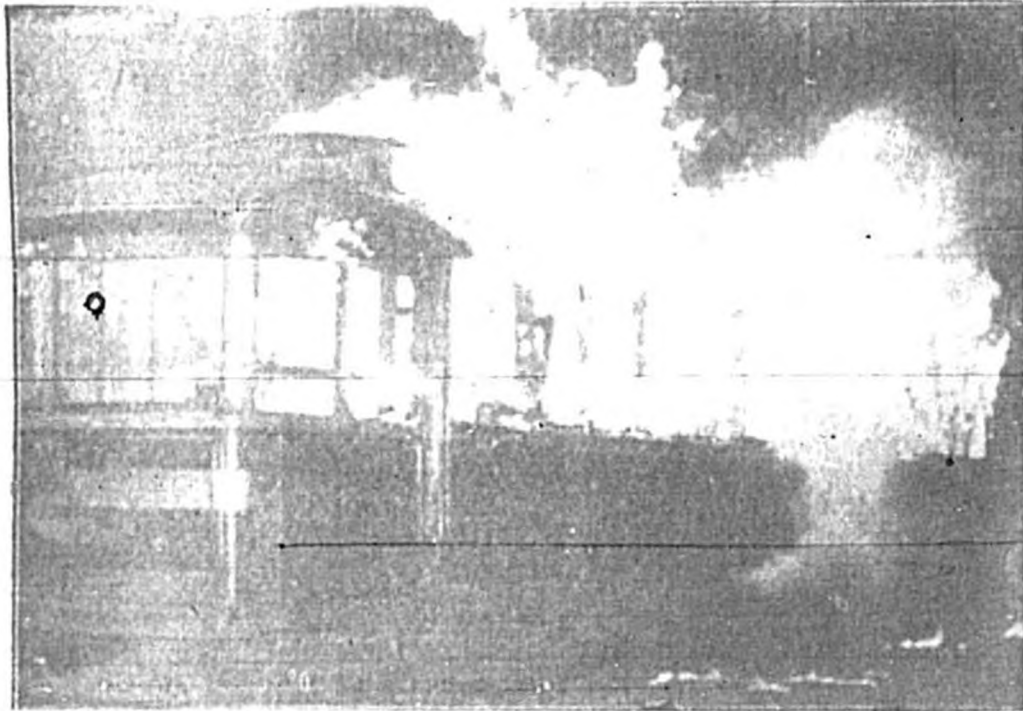

WATER VAY 24—(AP)—Mrs. Vay was killed and her 2-year-old son was critically injured when the Gulf, Mobile and Ohio "Rebel," struck at a grade crossing in service between New Orleans and New Orleans. The train was bound for Fulton and was damaged by the collision. The station was damaged. The boys' church here, where home two are from here.

## Health Tax Plan Will Be Rider To 'Quisance Tax' Act

### Of Controversy Over President's Demand For Action This Term

WASHINGTON, June 25.—Chairman Harri- the Senate finance committee said today a new tax program to \$40,000,000 through taxes and gift levies. The measure would be added to the measure to continue of "quisance" tax. The Senate banking committee approved a joint resolution recommended by a subcommittee extending for one year the 50-cent temporary health tax. The measure was taken by voice vote. The committee rejected, 11-3, a temporary extension of the health tax by Senator Byrnes, of South Carolina. The measure was over President Roosevelt's demand for quick action on the tax program. The measure was reported by the Senate Finance Committee. The measure was reported by the Senate Finance Committee. The measure was reported by the Senate Finance Committee.

## Trade Seems But Little Affected By NRA Decision

WASHINGTON, June 25.—(AP)—The Commerce Department has reported that there was no indication that the NRA situation was exerting any pronounced effect on trade one way or the other. In the fact of code abandonment, it reported "widespread gains" in retail trade in its weekly survey of 35 cities. The same survey, however, noted a breakdown in code wages and hours in many sections. "The trends in wholesale trade," the survey said, "were of no special significance, with gains and losses being about equally balanced throughout the country." "New York gave evidence of a larger volume in substantially all lines, although actual increases were not large. Department stores in Philadelphia showed some improvement over the previous week, but the volume was seven percent below that of last year."

## Nye Report On Ship Building Assails Costs

### Evidences Of Collusion Uncovered By Senate Group As It Probes Conditions

WASHINGTON, June 25.—Construction of cruisers apparently costs the government from one to two million dollars more in private yards than in Navy yards, the Senate maritime committee reported yesterday. Making another preliminary report of its extensive investigation of naval construction contracts, the committee headed by Senator Nye recommended passage of four pending bills. One is designed to prevent collusion in bidding, another to safeguard government military secrets, another to make public activities of shipbuilding lobbyists, and the fourth to prevent profiteering on naval construction. Next fall, the committee indicated, it will investigate war-time financing examining the activities of J. P. Morgan and Co., and other international banking houses. The preliminary report listed these general findings: 1. Some shipbuilders "are certainly not above suspicion of willingness to waive the flag or to circulate war scares in the plain and simple interest of their own pockets, regardless of results." 2. Builders should be "definitely policed in any and all cases made by them or through them to confuse public defense needs with their private profits, or they should be cut off entirely from the building of ships for the Navy." 3. Indications are that private yards cost the government from one to two million dollars more per cruiser than Navy yards. 4. The Navy is left at the mercy of shipbuilders in bids on construction. 5. Naval officials make no attempt to determine whether profit limitations set up in the Vinton Trammell Act are enforced or evaded. 6. If there was no collusion in bidding, there was a sympathetic understanding among the big companies of each other's desire, and if there were no conversations about bidding among them, there was telepathy. 7. Shipbuilders "know that the Navy feels it has to have the ships, and they raise the prices." 8. Opposition of private companies to Navy yard construction has been intense. 9. There are "indications of the use by the Navy of the shipbuilders as a lobby for its interests." 10. There is "a clear and definite danger in allowing self-interest groups, such as the shipbuilders and their allied interests, to be in the close position of influence, as they are at present, in such an important instrument of national policy as the Navy."

## Connor, Swope Laud City For Lending Aid In Crisis

### Commissioners' Donation Of \$200 Draws 'Pat On Back' From FERA Officials

Because they donated \$200 to the local Emergency Relief Administration office last month during a time when it appeared as though the personnel might have to suspend operations, the Sanford City Commission has received a warm "pat on the back" from Jerome A. Connor, assistant administrator of FERA in this state, as well as from O. P. Swope, Orlando, administrator of the FERA in this district. This was revealed at the City Hall last night in letters from Mr. Connor and Mr. Swope. It also was revealed, in still another letter, bearing the signature of T. K. Aggan, as director of operations for the FERA in this county, that "as far as the City of Sanford is concerned, the local ERA unit will have no cases (of direct relief) to turn over" on July 1, date when the FERA will cease having any responsibility in the care of direct relief and unemployable persons in Sanford. In connection with the latter letter, it was learned this morning that an almost identical letter was sent to the County Commission on June 14, it stated—that only five cases of direct aid are to be turned back to the county on July 1. Mr. Connor's praise of the City Commission is as follows: "Mr. Swope, our District Administrator in Orlando, and our local relief officials in Sanford have been very enthusiastic in their comments on the assistance and co-operation which have been rendered to them by the City Commission of Sanford." (Continued On Page Three)

## City Donates Land For Use In Experiments

### Dawson Says PWA Will Erect Green- house So Important Tests Can Be Made

Advised that the Public Works Administration has indicated that it will give favorable consideration to the erection of a new and improved greenhouse on county-owned property, Sanford City Commissioners last night accorded to a request by County Agent G. R. Dawson that they donate a six-acre tract of land east of Municipal Park and the old Greenhouse at Laurel Avenue near 12th Street to the County Commissioners. The donation of land was made under the condition that if the cost of it is not used for the purpose sought, it will revert to the city. Also the cost of removing the old Greenhouse and its re-erection on an enlarged basis, must be borne by the county or PWA. Agent Dawson had stated that there is a prime need for better facilities in the form of buildings and lands where more complete experiments might be made by federal, state, and local persons of soil, insects, and other things contributing to the success or failure of group growing conditions in this and other counties. Because a discussion of the subject had the Commissioners' attention, they called many "involved" channels, they voted to take an action on a request by G. W. Spencer, attorney for L. W. Eichelberger, negro undertaker. Eichelberger, who has been dispossessed of his present Pinedale Home, desires to build a new home at 10th Street and Laurel Avenue on a corner lot which was included in the recent sheriff's sale of municipally owned property. Another negro purchased the property at the sale and he has agreed to sell it to Eichelberger. However, pending a Supreme Court ruling on the city's protest of the sale and because he wishes to start erecting his new home at once, Eichelberger has agreed to sell the lot for the equity provided the Supreme Court rules with the city. He indicated that he would post the money immediately. The Commissioners' discussion of this problem led them to recall that they usually dispose of property by competitive bid. The Commissioners then short a discussion of their responsibilities under the Workmen's Compensation Act by instructing L. H. Connelly, local insurance agent, to prepare the necessary papers at once. From Single today City donates. He had pointed out that the city had no alternative under the law, that the City would have to pay approximately \$542 instead of \$542 per year for protection for its various employees, and that the difference between the present employees' liability form and the new compensation act is that under the old form the employer (Continued On Page Three)

## City Commission Asks Roosevelt For Underground Probe

### Request Made In Belief That Digging Of Canal May Hurt Artesian Water

In a special resolution in which they plead the cause of the citrus and vegetable producers of this county, members of the City Commission today appealed directly to President Franklin D. Roosevelt that before construction is begun on the proposed cross-state canal, "a comprehensive survey of the underground waters of central and southern Florida be made." This, Sanford boasts the first city in Florida to raise its voice officially in a plan, respectfully submitted, for full consideration of a question which has assumed state-wide proportions. Copies of the resolution also are to be sent to all of Florida's representatives and senators at Washington and to the project engineer of the Public Works Administration at Washington. The Commissioners were moved to action during their meeting at the City Hall last night after the subject had been presented by them by Randall Chace, treasurer of Chace and Co. and A. P. Michalski, Orlando engineer who has been active recently in his association with various groups now opposing construction of the canal. A more comprehensive survey is being made. Mr. Chace emphasized that what had been done in the matter of surveys, pointed out the irreparable loss which would occur should the artesian water supply of this county be diminished or turned into salt water, and stated that to the best of his knowledge, no survey has ever been made in this section relating to the possible damaging effect of the canal's construction near Ocala. Mr. Michalski elaborated on Mr. Chace's remarks by saying that geologists are agreed that this position received its artesian water supply from the Ocala limestone formation's catchment area in the neighborhood of Ocala, that it is commonly accepted that if the fresh water supply is reduced by one foot, the salt water held below the earth by the pressure of (Continued On Page Three)

## Van Hying Needs Stone As Head

CHASSER, June 25.—(AP)—The Florida Highway Administrator, Van Hying, today announced that he would resign his position as head of the Florida Highway Department. He would be succeeded by Stone as head of the department. The resignation was announced today at a conference today at the state capitol building. The resignation was announced today at a conference today at the state capitol building. The resignation was announced today at a conference today at the state capitol building.

## Costly Yachts Go Up In Flames On Coast

PORT LAUDERDALE, June 25.—(AP)—A \$1,000,000 fire yesterday raged through a fleet of yachts berthed in the Port of Lauderdale. The fire, which started in a boat near the city, spread rapidly and destroyed many of the yachts. The fire was caused by a gas leak in one of the yachts. The fire was caused by a gas leak in one of the yachts. The fire was caused by a gas leak in one of the yachts.

## Cummings Pleads For Help In War On "Bucket Shops"

WASHINGTON, June 25.—(AP)—Declaring that a nationwide ring of chain bucketshop swindlers is melting the public, "in millions" Attorney-General Cummings made a plea today for public co-operation to wipe out the "bucketshops." Evidence collected by the Justice Department, Cummings said, in an interview with the Associated Press, points to bucket, shop headquarters in New York and Chicago. "We know the names of the leaders," he said, "but it will take the co-operation of both the public and legitimate brokers to put them where they belong, behind the bars of a federal prison. With unquestioned superior ability as salesmen, with thousands of dollars to spend on elaborate offices, long distance telephone calls, and telegrams, and an intricate system of payoff, the swindlers offer one of the most serious menaces to law enforcement in the country today." Head of the victims, Cummings said, are doctors, lawyers, professors, and businessmen.

## City Commission Decides Not To Tear Down Stable

Representative E. E. Brady's lively stable on East First Street will not be torn down as a "slightly and unsightly" menace. No members of the Sanford City Commission decided during their routine session at the City Hall last night. They came to this decision after they had listened to the reading of a report by City Sanitary Inspector G. P. Paxton. In the face of this report, the Commissioners decided that they could do nothing about their property-annoyed intention of condemning the property. Dated June 11, the report is as follows: "I have inspected the conditions about Mr. Brady's stable and report as I found them. "No animals were present, nor were there any evidence that any had been kept there, recently. No piles of manure, but the floor was covered with straw mixed with manure for some inches in depth, but perfectly dry, odorless, and clean. "The building, not much more than a shelter, does not constitute a serious fire hazard, and containing little that fire could gain much headway on. "The fences about the place could be made more tightly and some portions of the roof are in need of repair. "I do not regard the building deteriorated to the extent that it would require more than 40 percent of its present value to restore it (as is required by city ordinance) before being condemned." This report was not submitted until last night, and after a short discussion in which Commissioner H. J. Lehman contended that "We've torn down buildings in much better condition and with much better surroundings than the stable and I still maintain that it's an eye-sore, particularly unimpressive to our visitors using the new hotel."

## Power Company's Offer Of Cheaper Power Is Denied

"Forget it," was the unanimous reply of members of the City Commission last night to the Florida Power and Light Co.'s offer of an "opportunity" for the city to decrease its operating expenses at the water pumping plant on French Avenue. They made this reply when, although it was indicated in the offer that the city would have saved over 650 this year had the suggested new rate schedule been in effect, they discovered that in order to secure the rate they would have to install an electric motor with a 49 horsepower pump at a cost of approximately \$1200. "This is the second time within the past few years that the Commissioners have turned down the company's offer of a new rate schedule for water pumping purposes. As presented in a letter signed by H. H. Goldman, local manager of the new offer is as follows: "I discussed with you May 11, 1935, an opportunity for the city to decrease its operating expenses at the water pumping plant on French Avenue. "We have a new rate schedule for municipal water pumping, and an analysis of your plant, for the year ending Sept. 30, 1934, shows its application very beneficial. Including the price of the new unit, is approximately \$1190. The pump efficiency (guaranteed by manufacturer under actual test) of the new unit should not be less than 79 percent. "This substitution complete, including the price of the new unit, is approximately \$1190. The pump efficiency (guaranteed by manufacturer under actual test) of the new unit should not be less than 79 percent. "Kilowatt hours used at the water plant during your fiscal year ending Sept. 30, 1934 was 71,330. Under the proposed plan your kilowatt hours used would be approximately 108,777 kWh. You paid us during this period the sum of \$3,002.63, but under the (Continued On Page Three)

## Commissioners Balk At Necessity For Buying New Motor

Another negro purchased the property at the sale and he has agreed to sell it to Eichelberger. However, pending a Supreme Court ruling on the city's protest of the sale and because he wishes to start erecting his new home at once, Eichelberger has agreed to sell the lot for the equity provided the Supreme Court rules with the city. He indicated that he would post the money immediately. The Commissioners' discussion of this problem led them to recall that they usually dispose of property by competitive bid. The Commissioners then short a discussion of their responsibilities under the Workmen's Compensation Act by instructing L. H. Connelly, local insurance agent, to prepare the necessary papers at once. From Single today City donates. He had pointed out that the city had no alternative under the law, that the City would have to pay approximately \$542 instead of \$542 per year for protection for its various employees, and that the difference between the present employees' liability form and the new compensation act is that under the old form the employer (Continued On Page Three)

## Government Made Target Of Latest Labor Arguments

By The Associated Press  
The federal government became the focal point again today in the current wave of labor disputes. The Central Labor Council of Tacoma, Wash., sent to President Roosevelt a vigorous protest against "lawless activities" by National Guardsmen. This was the answer of organized labor in the Northwest to the use of troops in reopening six mills closed by a strike of sawmill and lumber workers. Troopers were employed to disperse strikers and sympathizers. National Guardsmen were prepared for duty in Oregon where other mills planned to re-open tomorrow. In New Orleans, the federal government once more took over the task of collecting garbage. City workers announced their intention to strike until past wages were paid in full. The Federal Emergency Relief Administration came to the city's rescue.

## Government Sued For \$2,500,000 By Cotton Textile Firm

CONCORD, N. H., June 25.—(AP)—The Amoskeag Manufacturing Company of Manchester, the largest single cotton textile unit of its kind, today brought suit in federal court against the government for \$2,500,000 charging that the cotton processing and flour taxes were unconstitutional. The suit, brought against Peter M. Ogden of Newsmarworth as collector of internal revenue for New Hampshire, claimed \$2,175,000 paid to the government from August 1933 to March 1935. The Amoskeag Company entered in its suit, first of its kind brought in a United States District Court in New Hampshire, that the taxes were unlawfully assessed and unlawfully collected.

## Sanford Group Returns From Study Of Bird Life In Islands Off Keys

Florida of the Keys and Common Terns. It was estimated that approximately 100,000 birds were nesting on this 15-acre island. A number of other unusual birds were also observed on this and other neighboring keys, including the Brown Noddy, and Man-of-War Birds, and the Tropic Bird. Steps were also made at Key West and other of the Florida Keys to observe the bird life of this outlying part of the Florida Keys. In Key West, the party were guests of W. W. Bennett, superintendent of lighthouses and an enthusiastic bird bander and breeder of doves. In the Tortugas they camped at Fort Jefferson, where Fred O. Eberhardt, former Tallahassee publisher now in charge of the rehabilitation of this new national monument, was their host. On Bush Key of the Tortugas, they observed the only breeding colony of the Sooty and Noddy Terns in North America, and the only breeding colony known in (Continued On Page Three)

## After Next Thursday HOLC Loans To Cease

Prospective borrowers from the Home Owners' Loan Corporation are reminded today that the deadline for accepting applications through the Corporation is June 27. The Orlando District Office of the Corporation, located in the Delisle Building at Washington Street and Orange Avenue, will be open until midnight June 27 in order to receive last-minute applications. Officials in charge of the office stated today that borrowers on great numbers of loans already made are co-operating in making their payments without delay. So far, it has been necessary to institute foreclosure proceedings in only one case, it was stated.

## House Passes Bill To Aid Sharecropper

WASHINGTON, June 25.—(AP)—The highly controversial Bankhead bill, to use government money for financing tenant farmers and sharecroppers in the purchase of land and homes, was passed yesterday by the Senate and sent to an uncertain future in the House. Though it had once been sent back to committee for revision and further safeguarding language, there remained so much opposition that it only passed with a margin of 13 votes, 45 to 32. Eighteen Democrats joined 14 Republicans in opposing it.
