In an attempt to drive "loan sharks" and "salary buffers" from the city, Penacola contends they are a "public nuisance" and is employing a city ordinance against nuisances to close such establishments.

LOVELY MYRNA LOY makes an abrupt change from the "perfect wife" roles with which she has long been identified, in **Darryl F. Zanuck's** production of **"The Rains Came,"** the great novel by **Louis Bromfield**, which opens a two-day showing tomorrow at the Ritz Theatre. The glamorous star plays the amorous **Lady Eketh** in the 20th Century-Fox film, in which she shares stellar honors with **Tyrone Power** and **George Brent**.

RANDOLPH SCOTT, **Frances Dee** and **Ralph Bellamy** seem very carefree in this scene from **"Coast Guard,"** the screen attraction next Friday and Saturday at the Ritz Theatre.

Choice Lamb Cuts Are Found Tasty And Nourishing

By MRS. ALEXANDER GEORGE

From a choicer chop to meat for a common stew, there's lots of good eating to be bought at the lamb counter in your butcher store.

The choice cuts, naturally, are costlier, but the less expensive ones have their nourishment—and their good taste, too, when you know how to prepare them. Let's start at the lower end of the scale!

You decide on a pot-pie, a casserole dish or a stew. Buy breast, neck, shank, or shoulder of lamb. And you keep this in mind: These choicer cuts need long slow moist cooking to bring out their goodness.

To make a stew remove the bones (use them for soup or soup stock), cut the meat into inch-square pieces and sprinkle them with flour, or better flavor, brown them in a little fat. Cover with water or meat stock, add some seasoning (onions, celery, parsley). Put this in your kettle, clamp a lid on tightly and simmer until the lamb is tender. It will probably take 1 1/2 hours for 8 pounds or so of meat.

Put in some cubed vegetables during the last 40 minutes of cooking. Lima beans, carrots, turnips, and potatoes are fine. Green peppers and tomatoes add the Croix touch. Thicken the stew and it's ready.

If pot-pie is in order, make your thickened stew just the same. Then pour it into a shallow baking dish cover it with a rich pastry and bake 25 minutes.

Lamb stew with dumplings is grand on a chilly day. When the snow is down, drop soft biscuits (dumplings) on top; cover and simmer 20 minutes.

Since lamb patties require ground meat, any of the choicer cuts will do. Season the ground meat, shape into cakes and "roll" each patty with a strip of bacon. Broil or bake 15 minutes. For patties in the Spanish style, roll them in flour, sprinkle with breadcrumbs and fill into a casserole. Cook with tomatoes and bake 15 minutes.

For an economy pot roast, select shoulder or neck. Season it with salt and pepper, cover with flour, brown in a little fat, add a little onion and potatoes. The usual way for the tender cuts. There are several kinds of lamb chops—rib, shoulder or neck. Rib chops are the most and are cut into a little fat, add a little onion and potatoes. The usual way for the tender cuts. boned, stuffed roasts add an extra 10 minutes a pound.

ROAST ROLLED SHOULDER OF LAMB

Have lamb shoulder boned and rolled. Season with salt and pepper. Lay fat side up, on a rack in an open roasting pan. Insert a meat thermometer so that the bulb reaches the center of roll. Do not add water and do not cover. Put in a slow oven (300 F.) and roast until done. Lamb will be medium done when the thermometer registers 175 F., well done at 180 F. Allow forty to forty-five minutes a pound for cooking a boned lamb roast.

Serve the roast garnished with peas in hot sauce, made by frying soft slices of bread into milk. Fry and toast them in the oven.

Activity Continues On Propaganda And Diplomatic Fronts

Western Front Is Quiet As French Forces Move Off German Territory

2 More British Ships Are Sunk

Finnish Delegation Returns To Moscow To Renew Talks

INSPECTS BRITISH FORCES

In France to talk teamwork between British and French arms and inspect Royal Air Force units on Western Front, Sir Kingsley Wood, British air minister, is pictured in rear of camouflaged French tank "somewhere in France."

The eighth year of the European war has seen Britain and Germany trying to break each other, Germany against the others by propaganda and by wanting bloodshed in land warfare.

Big guns, tanks, planes and masses of troops on the Western Front, where the French have withdrawn from virtually all positions on German soil, were quiet except for scouting activity.

The British War Ministry announced that unidentified foreign planes appeared near the naval base area of Scotland this morning. Air raid alarms were sounded, then lifted. Officials substantiated the report if there had been a real fight in the air.

The ministry also announced that British planes had bombed two German submarines at sea and added that it believed they had been successful.

Soviet Russia continued its operations in the Baltic states in eastern Europe which already has brought Estonia, Latvia and Lithuania into her sphere of control.

A delegation from Finland returned to Moscow for more talks on proposed ceding Russia advanced to its little northern neighbor.

The British Admiralty admitted that two more English ships had been sunk, said German submarines attacked on allied shipping have "become considerable."

Stalin was reported by the French press to have sent a message to Adolf Hitler containing Soviet Russia's categorical refusal to commit herself to any military action against Great Britain and France, in reply to an Italian message.

Britain Would Recognize Exile German Regime

NEW YORK, Oct. 23.—(AP)—The Daily News says in a copyrighted story that, according to information reaching New York through channels attached by the British government, it is considering recognition of a de facto, rightist, rather than a de jure, German government seated in London.

The strategy behind such action would be to award the Allies a moral victory to make up, on them, and that "desirable" terms would be negotiable to a government other than Hitler's.

It would serve as an answer to former Prime Minister David Lloyd George, whose peace group is working for a peaceful settlement of Hitler's peace offers.

"Not only would Britain and France recognize this new government to exist, according to the plan but certain neutrals would be asked to do so," the News continues. "Federalists already have been extended to Secretary Hall at Washington, the report said."

The report said that four neutral German exiles, now living in England and France, have been approved as the nucleus of the new German government.

The exiles were: following: Dr. Hermann Kautsky, former head of the German Communist party; Dr. Hans Thierack, former German justice minister; Dr. Paul Winter, former German minister of labor; and Dr. Robert Winter, former German minister of agriculture.

Changes In Wage Scale And Hours Effective Tuesday

WASHINGTON, Oct. 23.—(AP)—The wage-hour administration estimated yesterday that 2,382,500 wage earners would work a shorter week and 690,000 workers would receive pay increases when the wage-hour law alters the second year of its control over wages and hours on Tuesday.

On that day the 23 cents an hour minimum wage in force during the first year of the act changes to 30 cents for employees producing goods sold in interstate commerce. At the same time the maximum work week drops from 44 to 42 hours and employers will be required to pay time and a half for all work done in excess of the 42-hour limitation.

The 30 cent base pay rate will remain in force for the next six years unless the law is revised by congressional amendment. At the end of six years, the rate becomes 48 cents. The maximum work week, however, will be reduced to 40 hours next year.

Officials said that three-fourths of the workers now receiving less than 30 cents an hour are concentrated in 11 southern states and five northern industrial states. Slightly more than 1,000,000 of those workers, however, are in the industrial states of Illinois, Michigan, New York, Ohio, Pennsylvania and Massachusetts.

The bureau said that in Virginia and North Carolina, one out of two workers now get less than 30 cents an hour; in South Carolina, Georgia and Florida, one out of four workers are in the industrial states of Illinois, Michigan, New York, Ohio, Pennsylvania and Massachusetts.

Cattle Owners Oppose Use Of Poison Spray

Industry Takes Steps To Block Changes In 1905 Law As Applied To Hyacinth Control

Desiring to protect their interests against the recurrence of the huge losses suffered in 1904, Sealok County cattlemen are joining in forwarding recommendations to the U. S. District Engineer in Jacksonville urging the department not to begin the use of poison in its program for the eradication of hyacinths.

At the hearing which was held here last Friday on the economic importance of hyacinth control and possible new methods of eradication, Col. Lewis H. Watkins suggested that his department might find poison spray useful in the eradication of the water plant in shallow water, which cannot be reached by the mechanical equipment now used by the department.

Ralph Wight, local yardman and cattlemen, was the only representative of the industry at the meeting. He pointed out that cattlemen desired to co-operate with Col. Watkins and the U. S. Engineers in the eradication program but said the industry would object to the use of the poisonous spray which might result in the death of cattle, as was the case before a law was passed against the use of poisonous spray in 1905.

Supporting the statements of Mr. Wight and in order that the engineers may have in their records the attitude of the entire industry in the county, the cattlemen are joining unanimously in submitting the recommendations to Col. Watkins and have asked the Florida Cattlemen's Association to make a petition against any change in the 1905 statement.

"The cattlemen are not protesting against the hyacinth eradication program," Joe Cameron, one of the large ranchers, said, "but we do not want poison spray used because we've seen this method tried and fall at a heavy cost to the cattlemen who were nevertheless lulled for the large number of cattle lost during the first experiment 35 years ago."

Mr. Cameron pointed out that the hyacinth makes excellent feed for the cattle, particularly during the winter months when there is a shortage of grass. "Cattle can pull through the winter in fine shape if they contain plenty of hyacinths," he said.

The cattlemen pointed out that it is impossible to keep their stock away from the river during any period when poison spray is used to kill the hyacinth and added that the cattle destroy every year an acreage of hyacinths that would cost the government thousands of dollars to remove.

The cattlemen pointed out that during the first experiment cattle began dying for no apparent reason and that hundreds of head had been killed before a veterinarian discovered the same poison used in the spray to kill the hyacinth in the stomachs of the cattle.

Of all the stock that died during this period, not a cent of damages was ever paid by the government," one of the ranchers protested adding that many of them still have their claims on file in the auditor's office.

After this outburst, the indignat cattlemen, "by threat of force" prevented the further use of the spray until the environment of the state chamber of commerce, which entirely prohibited the use of the spray.

There are thousands of acres of pastures in the St. Johns River valley and many thousands hold of stock, the cattlemen declared, and said that the poison spray should not be used at any place in the river since cattle down stream might be chances get some of the poisoned plants which had floated downstream.

Mr. Wight, who attended the hearing, pointed out that Col. Watkins declared his department would do nothing which would be a detriment to any of the interests concerned in the hyacinth control program, and the local cattlemen expressed a belief that the engineers would not begin the use of poison spray after the protests of the cattlemen were filed.

Among the cattlemen who are striving to prevent the use of poisonous spray are Joe Cameron, J. R. Eddy, Percy Book, Sealok County representatives, J. O. Leonard, Ralph Wight, W. R. Hand, Cecil C. Conner, C. S. Long, Samuel Long, W. E. Kilham, E. R. Kilham, W. E. Kilham, Ernest Tanner and Jack Jacobs.

Four Infants In Hospital Nursery Are Suffocated

Room Is Filled With Steam As Radiator Valve Blows Out

PERTHAMBOY, N. J., Oct. 23.—(AP)—Four infants in a nursery of the general hospital, two boys and two girls, died of suffocation today when Coroner James Flynn, Jr., said, a valve blew out of a radiator filling the nursery with steam.

Two other babies were revived by three physicians who worked feverishly in an attempt to save the lives of all six children.

Coroner Flynn quoted Mrs. Daisy McGinness, nurse in charge of the nursery, as saying she "found everything all right" when she inspected the room at 1:30 A. M. Thirty minutes later she returned to find the nursery "full of steam" and removed the infants from the room.

The babies, none more than a week old, were unnamed.

One girl was the daughter of Mr. and Mrs. Stanley Rozalis of Perthambo, the other was a child of an unmarried mother. The boys were sons of Mr. and Mrs. Edward Jankowski of Woodbridge and Sergeant and Mrs. John Riggs of the Marston arsenal.

Officials began an investigation.

German Raider Shot Down By British Planes

LONDON, Oct. 23.—(AP)—A German plane was shot down off the coast of Scotland yesterday afternoon, the British air ministry announced, bringing to 13 the number of Nazi aircraft destroyed in nine air raids in seven days.

An air ministry spokesman said the aircraft fell into the sea and the collapsible boat in which it was being used was reported to be sighted at sea.

The day's aerial activity started with the sound of an air raid warning in coastal areas of northeastern England when "unidentified aircraft" were reported sighted out at sea.

British authorities counted only one of nine German raids during the week as damaging, the one last Monday at the Firth of Forth when 15 British naval men were killed by enemy bombers four of which were said to have been shot down.

In a series of communications today the air ministry also announced that five German aircraft who took part in yesterday's attack on a British convoy in the North Sea had been picked up by trawlers and landed at Grimsby.

Announcements last night said at least three German planes were shot down and another was forced to alight of 12 in the attacking party.

Woodmen To Hold District Meeting Here On Tuesday

A district meeting of the Woodmen of the World will be held in the Woodson Hall Tuesday night at 7:30 o'clock at which time State Manager V. P. Miller of Lakeland will outline the program for the coming year in the nationwide membership campaign.

Another highlight of the meeting will be the initiation of all candidates in the various lodges of the district. The degrees will be conferred by the uniform rank of the local lodge under the direction of Capt. C. L. Collins.

Clara Berry, of Oak, district president, will preside over the meeting.

The lodges which will be represented at the meeting are: Oak, Ocala, Pearson and New Smyrna.

Home Mechanics Class Will Be Reorganized

The first meeting of the Home Mechanics Class, under the supervision of Alex H. Johnson, will be held in the vocational agriculture building in the rear of the high school Tuesday night at 7:30 o'clock.

This part-time vocational training class was first organized last year and its operation was termed "most successful" by the supervisor. There were 15 members in the class and during the year constructed built-in china cabinets, easy chairs, game tables, and many other useful pieces of furniture.

Mr. Johnson pointed out that a large amount of new equipment will be available for the use of the class, including a bench saw, a jointer, and a band saw. He also said there could be no charge except the actual cost of the materials used in the work. Boys above 14 years of age are eligible to join the classes.

BIBLE VERSE FOR TODAY

For I say unto you, That unto every one which hath shall be given, and from him that hath not, even that which he hath shall be taken away from him.—Luke 19:26.

MORNING'S NOT IN OUR TIME

The clock's at seven, But not the mind's at dawn; All whistles blow the morning in; All cocks crow to heaven, Calling up the sun, But darkness sweeps the heart's meridian.

Blistering Editorials

In the course of a day the editor may have several visitors. Occasionally there is one who comes in all excited, it is worked up over what some other citizen, perhaps a citizen who holds some municipal or appointive office, has done or has failed to do.

"It is your duty," the irate visitor exclaims, "to let the folks of this community know what kind of trips they've put in office. Your paper ought to expose this man. I will give you all the facts. You ought to come out with a blistering editorial against him. It is your civic duty."

The editor hears him through. "I tell you what we will do," he says calmly. "You write our paper a letter exposing the scandal and we will be glad to publish it over your signature."

A period of silence follows, during which the visitor cools down rapidly. He seems to shrink in size until he looks like a collapsed balloon. When he speaks again, it is in a different tone, lower and almost apologetic:

"Why," he says, "you cannot expect me to do that. It would get me into trouble. It would hurt me in my business."

And the next day you may find this brave man on the street saying the editor of such and such a paper hasn't any more backbone than an eel and doesn't care a d—n about the community.—Leesburg Commercial.

What do you think of the prayer offered by the Hyde Park minister with the President in the congregation, "O Lord, be merciful to these men," he prayed.

Grant oak from little acorns grow. Big criminals do not deserve overnight. They start out looking their debts, being just a little bit crooked. From refusing to pay for something already bought, it is but a little step to doing something without any intention whatever of paying for it.

"Look, gang, you know I don't want no more." "Sure, Butch! Never." "When this young fatty come by with a box of fancy cigars tucked under his arm, I do my step out and say, 'An' does he? Nah. So what's the problem, ain't it?'

"I tried talkin' him how we ought to be choosin' an' he's so damn' sure, so if he don't want no more, he better hand me that box of fancy cigars."

The Russian Enigma

Commenting the other day on the Russian position in the present European muddle, Winston Churchill, British First Lord of the Admiralty, said, "It is a riddle wrapped up in mystery inside an enigma." If there is any better way of describing the complete uncertainty in all foreign capitals as to future Soviet policy, it should be used.

Although Hitler has been boasting for several weeks of the strength of the Berlin-Moscow Axis, which for the time being seems to have relegated the Rome-Berlin Axis to a position of secondary importance, President Kallinin informs President Roosevelt that he is a man of peace, that Russia is concerned only with keeping out of war, while latest dispatches from abroad indicate that Russia will lend no military aid to Germany.

Meanwhile Russia gobbles up the fruits of the German campaign in Poland, strengthens her military position in the west with new air and submarine bases in Latvia, and dickers with Finland for fortified islands in the Gulf of Finland. At the same time, while publicly crowning on the Allied-Turkish agreement, Russia shows it to be signed without taking any positive action to prevent it.

To date, the only nation which has gained anything out of the European situation is Russia. She has seized half of Poland without having to fight for it. She has vastly improved her military defenses. She has enlarged her foreign trade both with Germany and with the Allies. And she has done so without any military involvement whatever and while appearing in the role of peace-maker.

It would seem that Russia has a triple purpose. She is promoting a war to the death among the capitalist nations. At the same time she is trying to do this while pretending to be a peace-loving nation and interested only in the establishment of peace throughout the world. The third purpose of the Russian is to keep out of war themselves and to be the only strong power left in the world after the capitalist nations have fought themselves out.

Russia is still interested in world revolution. She would like to see communism established in every country on earth. The best way to accomplish this is for every other country to become involved in a long and costly war which would exhaust their wealth and man power. After the war is over, the communists could pose as the true peace-lovers and blame the war on capitalist greed.

So Russia eggs the Germans on by giving them an agreement which looks like a military alliance but which isn't one. That gives the Germans courage to go to war against France and England. Then she helps to keep the Allies from backing down again by selling them much needed lumber and manganese and by secretly approving the Turkish alliance. At the same time she works covertly to involve Italy and other neutral nations in the war.

In the Far East, she reaches a temporary agreement with Japan and sends a mission to Tokyo to work out a permanent solution, while increasing her aid to China so that the resistance to Japanese militarism may be continued. Thus she spreads communism in China while gradually exhausting the Japanese without fighting them.

Visit Of Emerson Spent In State On Tourist Promotion

WINTER PARK, Oct. 23.—(AP)—Ralph Waldo Emerson's visit to Florida in 1827 in search of good health and his three-month stay in St. Augustine as recorded in his partly unpublished "Little Journal" are featured in an article by Mrs. Henry L. Richmond of Jacksonville in the October issue of the Florida Historical Quarterly, released yesterday.

Emerson's "Little Journal" at St. Augustine, never completely published before, was written during his stay in St. Augustine between January and March, 1827. In addition to an account of his impressions of Florida, Emerson's journal contains a poem written about St. Augustine, a portion of which is published in the Quarterly for the first time.

Because of a bronchial ailment and learning of the beautiful qualities of the Southern climate, Emerson journeyed to Florida during the winter of 1827. Arriving in St. Augustine in mid-January, he took a room in a "Spanish street" for his three months' stay. Although at first homesick for his New England countryside, the Florida climate proved beneficial and his cheerfulness and interest in the surroundings quickly returned. "I find myself better lately," he wrote his aunt, "through the blessings of God and the use of this fine air."

The air and sky of this ancient fortified dilapidated sand-bank of a town are really delicious," he confided in a letter to his brother William. Emerson recorded in his "Little Journal," perhaps for the first time, the Spanish inscription over the doorway at Fort Marion, giving the name and date of completion of the fort. He also described in his journal church meetings he attended, visits to St. Augustine's two graveyards, Jimena he encountered, his impressions of the city and the inhabitants, his meeting with Prince Achille Murat and his journey across the Florida coast to Charleston.

As he was leaving St. Augustine, he wrote his aunt, "I find myself better lately, through the blessings of God and the use of this fine air."

A large, uncovered gun was on the pier dock of the gray-painted British ship. A short time later two other British ships, the Lamport and Hull-line freighter, Swinburne from Para, Brazil and the City of Wellington from Calcutta, arrived at quarantine.

Visit Of Emerson Spent In State On Tourist Promotion

JACKSONVILLE, Oct. 23.—(AP)—Various State Departments, 21 Florida cities and nine "Tourist attractions" will spend more than one and a half millions of dollars in advertising and tourist promotion this year, according to a compilation released today by the research department of the Florida State Chamber of Commerce.

Largest single expenditure will be made by the Florida Citrus Commission with an estimated \$750,000 for advertising Florida oranges, grapefruit and tangerines. Funds are raised by a small assessment on each box of fruit sold.

Next largest item of the State's current fiscal year is a \$118,000 appropriation for the Florida Exhibit at the New York World's Fair. The 1939 Legislature made a total appropriation of \$250,000 for the exhibit, \$132,000 of which has already been paid and the \$118,000 to be paid this fiscal year.

Remainder of the State's total expenditure of \$961,000 comes from the Bureau of Immigration, Department of Agriculture, \$75,000 for booklets and maps; and Department of Agriculture, \$18,000 for bulletins and marketing news.

"Twenty-one Florida municipalities will spend \$528,340 as follows: Miami, \$200,000; Miami Beach, \$50,000; Jacksonville, \$31,250; Clearwater, \$2,645; Daytona Beach, \$5,000; Jacksonville Beach, \$3,000; Kissimmee, \$325; Lake Wales, \$600; Orange County and Orlando, 12,000; Ocala, \$1,000; and Panama City, \$1,000.

Passwell and fair befell thee, gentle town! The prayer of those who think thee for their life, The benison of those thy fragrance air, And simple hospitality hath blest. Be to thee ever as the best perfume Of a good name, and pleasant memory!

Tobacco ... opens Doors to Fields where People Live, Work & Achieve

Today there are about 1,000,000 cigar stores, drug stores, country and grocery stores where you can buy cigarettes in the United States.

THERE ARE ANOTHER MILLION people who are engaged directly or indirectly in the transportation of cigarettes to every town, hamlet and crossroads.

IT IS ESTIMATED that there are 1,602,000 tobacco farmers raising tobacco in 20 out of the 48 states. Good tobacco is one of the hardest crops to raise and bring to market, requiring great skill and patience from seed-bed planting to harvesting and curing.

THE AVERAGE LENGTH of service of the 13,230 people working in the Chesterfield factories, storage houses, leaf-handling and redrying plants is over 10 years. This means that every step in the making of Chesterfields, regardless of how small, is handled by people who have had 10 years of experience and ability in knowing their jobs.

TRULY TOBACCO OPENS DOORS to fields where people live, work and achieve, and Chesterfield takes pride in its ever increasing part in this great industry that is devoted entirely to the pleasure of the American public.

TO SMOKERS, Chesterfield Cigarettes have always said, and now repeat, that in no other cigarette made can you find the same degree of real mildness and good taste, or the same high quality of properly cured and aged tobaccos.

Fed Eleven Meets DeLand In Postponed Tilt Tonight

Locals To Seek Let Win With Revamped Team

A revamped county Fed eleven team will meet DeLand tonight in a light but speedy DeLand tilt in a contest that was postponed from Friday night because of the wet field. The start-up will be at 8:00 o'clock.

The county Fed eleven will go into the game with a drastically revamped lineup from that used in the first three games of this season which were successive losses.

Coach Leonard L. McClure announced the following men would take the field at the opening of the game: Leavitt, left end; M. Smith, left tackle; Ward, left guard; Blaser, center; Stansland, right guard; Tommy Smith, right tackle; and L. M. Telford, right end. The backfield will lineup in the following: Berkwith, quarterback; Dymon, left half; Page, right half; and Angel, full back.

The combination is much lighter than the former first string but the same line. It is much lighter and inasmuch as the DeLand eleven is also light this should not work too much against the county team.

It is believed by the lighter team will give a good account of themselves. The tackle also considerably lighter and faster.

McClure plans to use the same lineup named to take the field Friday which will include Richard Robinson and Cliff Jones at fullback, Larry Owens and Robert Spink, tackle; C. J. Harlow and Carroll Green, guard; Stanley Arnold, center and a backfield composed of Bill Carr, Walter Stewart, Paul Winburn and Tom Thompson.

While both outfits boast a rivalry of long standing, evidence of tonight's game will be a light one for the season is given the fact that both the county and DeLand are rushing for their first win of the season.

DeLand has had three wide margins in its opening year; falling victim to the county team and DeLand.

Stetson Focuses Attention On Erskine Battle

DELAND, Oct. 23.—The attention of the Stetson Hatters today will be focused in the direction of Erskine Recorders, second of four South Carolina foes on the Hatters schedule, who will be met here on Hulley Field next Friday night.

The Hatters came through their 18-18 deadlock with Presbyterian in better shape than any other of the three preceding scraps this season. No series was recorded excepting a few extra knees, most of which were credited to the excellent blocking of Presbyterian's outstanding fullback, 190-pound James Moore, who was the spearhead of the Blue Hose attack.

While not wholly pleased with the work of the Hatters because of the almost disastrous first half in which better-fingered fumbles and a weakness on pass defense figured prominently in Presbyterian scoring, Head Coach Eddy Cowell nevertheless had little but praise for the fine performance turned in by the Hatters during the second half when the green and white warriors returned to the playing field a rejuvenated eleven.

Excepting that first half, Cowell and Line Coach Ben-Glenn were both optimistic at the improvement shown by the Hatters in virtually every department.

Said Cowell, "We haven't reached our peak, yet, but we're coming along. We have a lot of sophomores who are looking better every game. The starting lineup Friday night included but three seniors and only five men with pre-variety experience."

Cowell was especially pleased with the fine work of Russell Darr at fullback and diminutive Bennie Smith at quarter, both of whom played the entire 60 minutes without relief. Ralph Brant, 206-pound junior college transfer playing his first year with the varsity, likewise turned in a 60-minute game at tackle.

This week, little change is expected to be made in the starting eleven. Walter McDonell, held out of Friday night's clash because of a severe charley horse from which he has not fully recovered, is expected to be ready to take over the quarter duties Friday night.

The Hatters will be occupied mainly in scrimmages against the freshmen, with rough work eliminated from the menu Thursday.

Team No. 4 Ties Team No. 6 For First Place In Tournament Of Bowling Club

With only two more weeks remaining in the first tournament conducted by The Sanford Bowling Club, Team No. 4 seems to be the only team able to give Team No. 6 a fight for first place. By taking three straight wins from Team No. 2 while team No. 6 was losing two and winning one, Team No. 4 pulled up to tie with team No. 6 which is leading in total pins with 7008 to 6870 for team No. 4.

"King Fish" Priddy continues to lead by rolling up a total of 560 for an average of 189.2 for three games.

Tournament games are rolled three nights weekly on Tuesday, Wednesday and Thursday. Visitors are always welcomed in witness any of these matches at the Sanford Bowling Club over Kents Garage starting at 8:00 o'clock.

Beware Coughs from common colds That Hang On

Creomulsion relieves promptly because it goes right to the seat of the trouble to loosen germ laden phlegm, increase secretion and aid nature to expel and heal raw, tender, inflamed bronchial mucous membranes. So matter how many medicines you have tried, tell your druggist to sell you a bottle of Creomulsion with the understanding that you are to like the way it quickly alleviates the cough or you are to have your money back.

Here's one that usually fills all three requirements when the easy directions are followed. It's an all-vegetable product whose principal ingredient has medical recognition as an "intestinal tonic-laxative."

This ingredient enables BLACK-DIAUGHT to impart tone to lax bowel muscles. And it is the main reason for the punctual, thorough relief from constipation that most often follows next morning after you take a BLACK-DIAUGHT. The millions of packages used prove its merit. 25 to 40 doses. 75c.

"It's the one unforgivable social error"

There is seldom any excuse for offending others with halitosis (bad breath) due to food fermentation in the mouth. It is so easy to make your breath sweeter and more agreeable with Listerine, the safe antiseptic.

The invidious thing about this offensive condition is that nearly everybody has it at some time or other without realizing it. Experienced people protect themselves by gargling with Listerine Antiseptic morning and night, and before every important social or business engagement. Listerine Antiseptic quickly halts fermentation, said by some authorities to be a major cause of mouth odors, and overcomes the odor themselves.

Why risk offending others... undermining your social or business position? Get the enjoyable Listerine Antiseptic habit. Use it as a safe, mild, mouth antiseptic and deodorant regularly.

ACHING CHEST COLDS

Need More Than "Just Salvo" To Relieve DISTRESS!

To quickly relieve chest cold misery and muscular aches and pains due to colds, it takes MORE than "just a salvo"—you need a warming, soothing "counter-irritant" like good reliable Mustard.

Used by millions for over 30 years, Mustard penetrates the outer layers of the skin and helps break up local congestion and pain. 2 strength Regular, Children's (mild) and Extra Strong, 6c.

The property in Seminole County assessed to the State this year because of tax delinquency is nearly \$1,000,000 lower than it was last year because of the Murphy Law, through which thousands of dollars' worth of delinquent taxes were cleared, according to Tax Assessor Sanford Dandrey, who has just completed the tax roll for 1939.

WHO'S A PUMPKIN HEAD NOW?

Halloween in a pump-kin-headed world takes its fashion cue from Europe this year. Pumpkin heads will find the going more ghastly if they appear in assimilated gas masks, with top hat and black tie to match. Witch's hats and pointed broomsticks to ride in latex type pursuit ships. Spectres, keeping to the home front, will probably wear sarings.
