Tobacco Company Declares \$2 Extra Dividend On Stock

NEW YORK—In addition to the regular quarterly dividend of \$2 per share the Board of Directors of The American Tobacco Company has declared an extra dividend of \$2 per share on the Common Stock and Common Stock B of that Company.

In reply to inquiries, George W. Hill, President of The American Tobacco Company stated: "The action of the Board of Directors coming my belief expressed to stockholders under date of August 28, 1929, when I said that if we were feeling that the Board of Directors would be justified in increasing the dividend on The American Tobacco Company's Common Stock, but in recommending to stockholders such changes in the company's charter, as would permit, splitting of the stock. The board has been so gratified with the progress and the profits of the company in the year 1929 that it deems it only fair to stockholders to declare this extra dividend of \$2 per share, which makes a total cash dividend of \$4 per share for the year 1929, as my letter to stockholders of today explains."

UP ONE DAY AND DOWN THE NEXT

Texas Lady Says Pains Stopped Coming After She Had Taken Cardui.

Terrell, Texas—"I was run-down and nervous, and for several months my health had not been good," says Mrs. Louis Wieland, of this place. "I was up one day and down the next. I never felt like doing anything. I worried all the time, and could not sleep well at night. Periodically I would suffer from pains in my back and sides. I would have awful headaches, and would feel dull and dizzy. My sister had taken Cardui, and she persuaded me to try it. She said to me one day: 'If you will only try it, you will see for yourself how much good it will do you.' So I got a bottle of Cardui and began to take it. It was not long until I felt fine. I got stronger, and my nerves did not bother me any more. The pains stopped coming in my back, and I could do my work without any trouble. I think Cardui is a fine medicine. Cardui is a reconstructive tonic, extracted from herbs of long-known medicinal value."

Women Have Something to Say! AN ANCIENT PREJUDICE HAS BEEN REMOVED

AMERICAN INTELLIGENCE has ridiculed into oblivion that ancient prejudice which excluded women from a voice in council. Today, in millions of homes, the delicious flavor of LUCKY STRIKE fills the room as the family group respects the opinion of its women folk.

"toasting did it"—Gone is that ancient prejudice against cigarettes—Progress has been made. We removed the prejudice against cigarettes when we removed harmful corrosive ACRIDS (pungent irritants) from the tobaccos.

YEARS ago, when cigarettes were made without the aid of modern science, there originated that ancient prejudice against all cigarettes. That criticism is no longer justified. LUCKY STRIKE, the finest cigarette you ever smoked, made of the choicest tobacco, properly aged and skillfully blended—"It's Toasted."

"TOASTING," the most modern step in cigarette manufacture, removes from LUCKY STRIKE harmful irritants which are present in cigarettes manufactured in the old-fashioned way.

Everyone knows that heat purifies, and so "TOASTING"—LUCKY STRIKE'S extra secret process—removes harmful corrosive ACRIDS (pungent irritants) from LUCKIES which in the old-fashioned manufacture of cigarettes cause throat irritation and coughing. Thus "TOASTING" has destroyed that ancient prejudice against cigarette smoking by men and by women.

"It's toasted" No Throat Irritation—No Cough.

TUNE IN—The Lucky Strike Dance Orchestra, every Saturday night, over a coast-to-coast network of the N. B. C. © 1929, The American Tobacco Co., Inc.

"It's Toasted"—the phrase that describes the extra "toasting" process applied in the manufacture of Lucky Strike Cigarettes. The finest tobaccos—the Cream of the Crop—are scientifically subjected to penetrating heat at minimum, 260°—maximum, 300°, Fahrenheit. The exact, expert regulation of such high temperatures removes impurities. More than a slogan, "It's Toasted" is recognized by millions as the most modern step in cigarette manufacture.

A Message from the American Automobile Insurance Association
Florida's Oldest Insurer of Automobiles

The Directorate... composed of names that count in Florida affairs

THE American Automobile Insurance Association is proud of its directors. They are men whose names have been identified if an organization writing automobile insurance exclusively was established in Florida. This conviction to them to identify themselves with the American Automobile Insurance Association. In this matter, as in other instances, their judgment was vindicated. The American Automobile Insurance Association is now dominant in Florida automobile insurance business. Its volume of business and its method of doing business is a credit to its directors. They are as proud of the association as the association is proud of them.

This Florida Institution insures pleasure cars and trucks at lower cost and on convenient payments. Florida motorists save thousands of dollars a year because of the association's conservative, money-saving method of conducting its business.

CHASE MEN LOSE DIAMOND GAME IN POOR EXHIBITION

Both Teams Appear To Be Unable To Keep Their Eyes On Ball

By E. H. Cullum

Insane of the worst exhibitions of Diamond Ball ever played in Sanford, the Business Men won from Chase and Company last night 31 to 27. Both teams were off form and gave miserable support to their batteries. Balls that should have been easy outs went for clean hits, some of them for doubles and triples. Hogan was the only man who seemed to be able to keep his eye on the ball after it was hit and he played a bang up game in the field for the Business Men. He also was a tower of strength at the bat securing four hits and 3 runs out of five times at bat. Whitehead, pitching for Chase & Company, pitched good ball, especially as this was his first attempt in this role, and had his team given him any kind of support in the field in the first three innings there might have been a different story. Pezold, was the battling star for Chase & Company, securing four hits out of four times up.

Southern California Will Go East For Notre Dame Game Much Touted To Win

By Davis J. Walsh International News Service Sports Editor

NEW YORK, Nov. 13.— Out where gently the surf rolls in from the lazy bosom of the Pacific, they are touting Southern California to come east to Chicago on Saturday and succeed where some of the good ones of the Big Ten, the East and the South have failed, namely, to beat one of the great Notre Dame teams. A great Notre Dame team is quite an institution, considering everything that has happened around South Bend during the last 15 years, yet the man would be a sap who tried to parlay it through its final three games with Southern California, Northwestern and the Army.

Those aren't regulation three-foot-six inch hurdles; they are pole vaulting standards. Notre Dame, playing out one of the most exacting schedules ever conceived by the mind of man, obviously is defying destiny.

The deft, according to coast warnings, will live no longer than Saturday. The coast, in fact, not only is touting Southern California will win; it is insisting that this will happen. The insistence might lack real significance, if it wasn't for the fact that some of it emanates from the north. They usually don't speak the same language in the two major sections of California but when they do, it is time to pin back your ears and give marked heed.

There is, for example, the dean of all coast critics, Brick Morse. An old California star back in the pre-Ruby era, he has been calling them as he sees them for years on end and, when he sees Southern

California, they must be an eye-ful. Mr. Morse, of course, is a long way from South Bend. As smart as he admittedly is, he can't know Notre Dame. He apparently is satisfied to know Southern California.

Somehow, the Trojans still have the entire state impressed in spite of what happened in the California game. They give California no credit for stopping the concentration plays of the Jones outfit but don't think any other team will do it, not even Notre Dame.

As a matter of fact, they seem to feel that Notre Dame is less likely to do it than some others, the idea being that Rockne's team is too light to stand up under Southern California's power plays on the tackle positions, particularly after the bruising season Notre Dame is finishing. This may or may not hold good, depending on several developments. Notre Dame certainly drew its last decision very fine and with a team like Drake, at that. The latter was "up," by 7 to 6, going into the final period.

But whether this performance represented stoniness or merely an attempt to glide through an ordinary football game in order to save all if had for Southern California, only Saturday's event will disclose. And I would hate to be on the team that runs away with the idea that Notre Dame is a chump for power football.

ATHENS, Ga., Nov. 13. (INS) The Georgia Bulldogs, who arrived here yesterday from their invasion of New York, were still lumbering on today for their big scrimmage tomorrow. Friday the Bulldogs are at home to Au-

had a day of rest. Dartmouth was ready to start work for the coming struggle with Cornell. Cornell plays will be used by the scrums today in a dummy scrimmage.

NEW YORK, Nov. 13. (INS) Aligned by the ease with which Georgia completed passes, Chick Meehan this week will concentrate on providing the New York Violets with an adequate defense against aerial attacks.

NEW HAVEN, Conn., Nov. 12. (INS) Yale today will engage in its first scrimmage in preparation for the Saturday's important clash with Princeton. The scrimmage will be devoted to strengthening the defense. Host Plus seems fully recovered from his injuries and will be used in the workout today.

PRINCETON, N. J., Nov. 12. (INS) With all the quad save Troy Bennett in good shape, Princeton today begins its drive in preparation for the Yale tilt. Several new plays were added to the Tiger attack in yesterday's light drill.

HANOVER, N. H., Nov. 13. (INS) All players who participated in the Brown game having

THE PINEAPPLE, universally considered one of the finest of all fruits, has been grown in Florida since 1860. The pineapple industry has been centered in the famous East Coast belt running from Fort Pierce to Miami.

As pineapples are injured by temperatures lower than 30° F., a locality should be selected for their culture which is practically free

from severe freezes. Pineapples require open, thoroughly drained soil. Nearly all Florida plantings have been made on light, sandy soils, too low in fertility for most crops but best adapted for pineapples when properly fertilized and supplied with humus.

The chief problem which must be solved before pineapples can be replanted in Florida is the reduction of the number of Nematodes (cause of Red Wilt) and the restoration of the humus supply. This problem is being solved by planting Natal Grass, Crotalaria, Velvet Beans and the Nematode-resistant varieties of Cowpeas.

When careful production and marketing measures are pursued, the grower can reasonably expect a substantial profit.
