#### "We Don't Believe It"

In view of the trend which The Hersld's straw po on the Supreme Court has shown from the first and the latest count which shows local sentiment more than ten to one against President Roosevelt's judiciary reform proposal, let us be the first to say we don't believe it.

While we have no doubt that the people, at least of this county, are overwhelmingly against any tampering with the Supreme Court, or the Constitution, it simply isn't in the cards that a community which gave the President a blank check less than four months ago by a vote of nearly three to one, could so completely change in sentiment as to go against his very first proposal by more than ten

The essence of this phenomenon must be simply that straw polls, however accurate they be under ordinary circumstances, are utterly ineffectual as a gauge of public sentiment on any issue concerning President Roosevelt or his policies, and the accuracy of this assertion, we believe, was fully demonstrated in the polls before the last election and the results of that election.

Just why this should be so we are not prepared to say with any great degree of assurance, but we believe it rests somewhere in the assumption that the people in general who are inclined to follow Roosevelt for economic reasons are the very people who for psychological or intellectual reasons are not inclined to participate in such things as

The Sanford Herald goes into all types, sizes, and color of homes in Seminole County. Rich (such as we have) and poor alike read The Herald and had full access to the ballot printed on its front page. Democrats as well as Republicans, liberals as well as conservatives, laborites, as well as capitalists could have voted in the poll. We are convinced, from our investigations, that no effort was made by any one or any group, to stuff the ballot box.

It simply happened that those who are against packing the Court were sufficiently aroused to mark their ballots and send them in; and it probably happened that most of the rest of the people either are not much intersted in the Court proposal, or don't know anything about he controversy at all, and are perfectly willing to leave heir fate completely in the hands of President Roosevelt. 'Okay Chief, do it your way" probably accurately sums up their political philosophy.

But however all this may be, we believe the poll has uliy demonstrated one thing, the majority of the people are against the President on this issue and that not all of fifth of the national income is hem by any means are Republicans, reactionaries, or millionaires. A majority of plain every day ordinary Democrats are saving as loudly as they can, "Hands off the Supreme Court."

#### Search For Still By Two Deputies **Brings Surprise**

Deputies Jack Hickson and Lewis Tait stalked through the scrub near Geneva late esterday in search of an illicit liquor still they thought to be in the vicinity.

A rustle in a thickly wooded patch scarcely 100 feet before them brought both men to an abrupt halt. Crouching, they advanced nearer the origin of the noise which did not cease.

One of the deputies called brush - and the rustling abruptly stopped. Again the officers advanced, calling for the exit of the noise maker. No one came forth.

Recognizing that they had excellent chances of being a target for bullets, they rushed the serub out bounced a fullgrown deer who gave one startled look at the deputies and bounded off into deeper
