## Will Head Of Inflation - LBJ

WASHINGTON (UPI) President Johnson is going to make vigorous use of the federal government's taxing power to head off inflation. He also plans to go on opposing price increases he feels are out of line, such as the recent price hikes in aluminum, copper and steel. Johnson's broad strategy for achieving wage and price stability emerged in his State of the Union message. Details will be spelled out in the Chief Executive's economic report to Congress later this month. The need to guard against inflation was underscored by the President when he predicted that gross national product be a gain of about \$45 billion,

## Speed Ranks No. 1

Nothing takes the place of a reduced, safe speed. Of the many appalling fatal wrecks in Seminole County within the past Florist month, speed has been a factor in all but one. Seven persons have died. 322-0886

Not all of the motorists were going beyond the speed limit but many of them were driving at a pace too fast for conditions. Many people have the false impression that drinking is the major cause of fatal wrecks in Florida. Such is not the case. Speed is the No.

Road and weather conditions must be observed if the driver is to avoid an accident and possible death. Some of the recent accidents also point up the need for better roads in our country and better railroad

crossing signals.
