NewGadillac surpassing all previous conception

N so far as the new, 1 90-degree, eight-cylinder Cadillac is concerned, discussion of mechanical supremacy is unnecessary and almost useless.

That supremacy proclaims itself unmistakably in performance as it has in every Cadillac which preceded the present splendidly successful car.

Once again in the unprecedented sales of the new, 90degree, eight-cylinder Cadillac we are witnessing that silent turning awaythat return to something

solid and assured and unmistakably superior which Cadillac has always provided.

In this case, however, Caditlac finds itself almost the only occupant of its own fine car field-and the old Cadillac clientele is being so enormously augmented by new accessions that the careful, painstaking capacities of this great plant are being taxed to the utmost.

The Cadillac market is growing—it will-surpass all previous conception in the immediate suture.

# SANFORD GROVE

"Amid Majestic Pines"

There's something about a pine forest that appeals to every man, woman and child. In the mind's eye of many people is the picture of a home, completely surrounded by trees. In most of those mental pictures the pine tree predominates.

To those who long for a home, completely surrounded by virgin pine, yet within easy access of the downtown shopping and business district, Sanford Grove is an opportunity.

It is an opportunity not only as a beautiful homesite, but as a secure investment. There is no compromise on the future of Sanford. There is only one direction for the builder -- and that is east and south.

How many letter "f"s can you find in the following sentence?

TO the above question, a majority will answer, "one,"

Nor are such illusions infrequent in examining real estate titles. Even the most able examiner will at times see words and whole sentences in their reverse meaning . . . especially when he becomes mentally fatigued. In one case, an examiner mistook the word "with" for "without" and the result was that the title was taken without the consent of

interested parties,—and the purchaser bought a lawsuit. But optical illusions, purely human errors, on the part of examiners, searchers, or copyists, are not the only contingencies to guard against. Forgery, false affidavits, dower claims, undiscovered heirs, and other equally threatening
