

AMERICAN TROOPS ARE READY TO GO IN AND STOP THE GERMANS

Hun Drive Not Progressing As Anticipated

The American people can rejoice today over the advantages gained by the allied troops in holding the furlous hordes of Huns who for seven days have tried to break the British and French lines but so far have not accomplished what they sought to do when they started. And now comes the welcome intelligence that the American troops will go in. We have no means of knowing how many Americans are waiting and ready, but that there are over 100,000 men available on the front lines, men who have been trained and killed in the actual warfare that they will now be called upon to face and that they will be of great assistance to the French and English is assured by all those who have seen them.

The miserable weather which has broken over the country is proving no deterrent to the Americans as they push forward from all directions toward the battle zone.

From the region of the Somme southward to where the battle line turns eastward, furious fighting continues, on various sectors but everywhere the enemy has been held and even pushed back at some points.

Nowhere has he been able, although he continued to throw great masses of men into the fray, to gain ground, except an infinitesimal tract from the French north of Meuseul. British and French machine guns and riflemen, as in days past, again tore great holes in the ranks of the Huns of gray as they endeavored to press on. So great have been the losses of the Germans in front of the British north of the Somme, that Sunday saw them unwilling again to take up the gage of battle.

Along the Scarpe the British themselves went on the offensive and to the east of Arras captured the village of Fourty. On the southern end of the line where von Hindenburg is endeavoring to pierce through to the old German positions as they stand before his great retreat in 1916, the British and French troops, fighting together have met the enemy in furious combats, but everywhere defeated him with sanguinary losses.

The town of Moreuil changed hands four times but finally rested in the hands of the British and French while the woods to the north of the village were captured by the French.

In the bend of the line between Moreuil and Lassigny the Germans made frantic efforts to break through but the French held them in their tracks and in addition recaptured several villages.

Get Machine Guns

Not alone has von Hindenburg lost large numbers of men, killed or wounded but both the British and French armies have taken a considerable number of new prisoners and also captured machine guns. At last at last account the Germans had launched a fresh attack in the region between the rivers Luce and Avre and fierce fighting was in progress.

The reports from both the British and French war offices seemingly indicate that the allied troops have reached the limits of their retrograde movement. In any event they have cancelled the engagement Field Marshal von Hindenburg made with himself to take dinner in Paris on All-Foos' Day. Instead of the truffles and other viands with which the German commander in chief had predicted he would regale himself in the French capital on April 1, his fare will be that of the German army.

On the other battle fronts the fighting continues of a minor character, although the maneuvers in the Italian theater still seem to indicate the near approach of hostilities of a major character.

Allies Help Bols Moscow, April 1.—(By the Associated Press)—Allied co-operation with the council of soldiers and workmen's delegates in the defense of the Kola and Mourmansk coast and railway is an established fact, according to dispatches that an-

nounce that French and British officers are working with Bolshevik troops as instructors, as well as supplying British marines and French soldiers returning from the Russian front.

Apparently the Mourmansk Soviet originally was suspicious concerning allied offers of assistance in resisting the encroachment of Finnish white guards upon the Mourmansk district, but Leon Trutzky, president of the revolutionary military committee authorized the soviet to accept the help. The allies are said to be prepared to supply the food and materials required by the red army already forming to oppose the white guards.

TO SHOOT UP SANFORD

Pictures to Be Shown at the Lyric Theatre

Manager Lane has arranged to put on a "Booster Week" at the Lyric beginning Monday, April 15. Expert photographers will visit every home in the city and make pictures of the children from 6 months to 80 years of age, and these will be reproduced on the big curtain during "Booster Week." Pictures will also be made of all industries, in fact, everything of interest around Sanford will be photographed, and it goes without saying that this will be a gala week for our city.

No doubt a number of our citizens will remember what a clean, unique and amusing entertainment these same people put on at the "Imperial" five years ago. McGary & Corbett promoters of "Booster Week" and other distinctive features promise that this will be one of the most interesting entertainments of the year.

DuBose Accepts Chairmanship

H. C. DuBose has accepted the chairmanship of the Red Cross War Fund Campaign which will be launched in Seminole county, May 20th-27th. Mr. DuBose will be assisted by Judge E. F. Housholder, who will act as publicity secretary and speaker.

Yesterday at a meeting of the directors of the Seminole County Chapter it was decided to have Messrs. DuBose and Housholder attend the State Red Cross gathering to be held at the Seminole Hotel, Jacksonville April 3rd. No doubt with these progressive hustlers in the front line with a backing of our 1,000 members, something big will be accomplished in this War Fund Drive.

Old Circus Clown Here

Louis Tranter, formerly with Ringling's Circus but now with the Kirkland Society Circus is in the city looking after the advance matters connected with this big event that will be pulled off here next week, Thursday, Friday and Saturday nights. Mr. Tranter is collecting for the programs and will look after the bill posting and advertising in the many cities outside of Sanford where the publicity stunt will be pulled off on a large scale as people from all the neighboring cities will all be here next week. Mr. Tranter says that they have some of the finest attractions that money will procure and the people will be more than pleased with the Red Cross Society Circus.

Recruiting Station

The local army recruiting station of Sanford still is open for volunteers between the ages of 18-21, 31 to 41 years of age. All lines of the service in the regular army are open for enlistment and all kinds of trades are wanted.

Some of the few lines of service are engineers corps, signal corps, ordnance corps, quartermaster corps, infantry, medical department, field artillery, coast artillery, cavalry. All regular army service for the duration of war only.

Mr. and Mrs. Steele expect to move into their new home south of the city next week. They have just completed a fine bungalow that will add much to the suburban part of this city.

SUFFRAGE SENATOR TRAMMELL

Believes In States Rights On Woman's Vote

Washington, D. C., April 1, 1918 Upon being asked for a brief statement as to why he proposed to vote against the National Suffrage Amendment, Senator Park Trammell today made the following statement: He said:

"It is my opinion that the state government and not the United States government should prescribe the qualifications of those who exercise the right of the ballot; and that the state government and not the Federal government should control and regulate elections.

The National Woman's Suffrage Amendment takes from the states the right to prescribe who shall be entitled to exercise the right of the ballot. It also vests in the national government the authority to enact appropriate legislation to enforce the provisions of the proposed amendment to the United States Constitution.

"In its effect the proposed amendment in its grant of authority to enforce its provisions gives congress the power to enact laws for the regulation and control of our elections. Whether this authority would be exercised or not, it is never the less granted and may be taken advantage of much against the best interest of Florida.

"In our state at present our elections are participated in almost exclusively by our white men and the negro is not a factor in the selection of our public officials. I am opposed to any proposition which would possibly invite greater and more extensive participation in our elections on the part of the negro population. I am also opposed to any policy which may invite and probably stimulate citizens of other states who do not understand and appreciate our race problem in making an effort to bring the negroes of Florida into politics.

"Under the proposed Federal Suffrage Amendment the negro woman should be given the right to vote the same as the white woman, and under the Amendment congress is authorized to pass laws to protect them in the enjoyment of this right.

"If a majority of the white women of Florida desire the privilege of suffrage, it is my opinion that this prerogative should be procured by an amendment to the state constitution and I believe the men of the state would vote to give them this privilege if it should be apparent that they desired it.

"An amendment to the state constitution would still retain in the state the control over the electorate.

"With the conditions prevailing as they do in Florida, I am decidedly of the opinion that if our state is to adopt a policy of giving the women the right of suffrage it can be effected just as readily, in fact more expeditiously perhaps by amending the state constitution, and in so doing, the people of Florida who are familiar with the conditions would have the privilege of wording the provision with proper safeguards.

Madame Scovell Here

The famous Madame Scovell of Tampa is here this week and will rehearse the young ladies for the big feature event of the Red Cross Society Circus called the Battle of the Roses. This was such a feature of the Tampa Society Circus that the moving picture people took films of it and all the leading metropolitan papers featured it. Madame Scovell has a wide reputation as one of the leading teachers of dancing and is one of the most graceful little ladies on the stage today. She has large classes of young ladies and young girls in Tampa and her coming to Sanford will be a boon to the young ladies who are to have the free lessons in poses, dancing and spectacular pieces. The Sanford girls will have the advantage of Madame Scovell's teaching for one week before the Circus.

Dr. O. L. Miller spent Sunday with his family and says that Jacksonville is booming.

COMMITTEES ARE BUSY WITH CIRCUS

The Big Show Starts Next Week In Sanford

The Red Cross Society Circus is on big and strong. Madame Scovell and L. R. Tranter of the Kirklands are here and both begin their line up work today.

The training for the Battle of the Roses begins today under Madame Scovell. This feature is spectacular, occupying space 50x150 feet and is a thing spoken of by some of the best known eastern papers. So far in Florida this specialty has only been shown in two other places and the surrounding country is expected to witness this Red Cross battle the coming week in Sanford.

The queen's contest is growing in interest daily. Today the standing of the "queens" is shown, this being the first count of votes. It is expected that this feature alone will cause a hot friendly rivalry as is always the custom. Until the closing time or last day of the circus, the standing of "who's who" in the queen's contest will appear in the Herald and daily a complete careful count of all votes will be made and tabulated in order to keep a perfect record and make quick announcements when the contest is over. It is wondered who will be queen and who will be the recipient of the beautiful diamond ring now on display at McLain's for the winner. It cost a penny a vote. Some pretty girl must have the ring. It all depends on the boys and how they hustle. Any girl in Seminole county is eligible for the race and since places like Oviedo, Geneva, Longwood, Altamonte, Chuluota and Lake Monroe have their queens, it is anticipated that Sanford girls will have a race equal to that of the polka.

The circus management is as follows:

- General Committee Mrs. R. J. Holly, chairman, Mrs. Galloway, Mrs. Curlett, Mrs. Gerrer, Mrs. Chase, Mrs. Deane Turner and R. J. Holly. Show Committee Mr. Holly, Mrs. Housholder, Mrs. Galloway and Mrs. Holly. Program Mrs. E. P. Morse. Ticket Committee Mesdames Gerrer, Abernathy, Morgan, Zebb, Rathin, Sanford, Goodhue, R. L. Jones, J. P. Hurley, Harold, Curlett, C. D. Brumley, Ballard, Hardaway, Dieterich, S. M. Lloyd (Miss Hand), Miss Annie Hawkins. Parade C. M. Hand, Chairman, Mrs. Deane Turner, R. J. Holly and D. C. Marlowe. Publicity D. C. Marlowe, Chairman, C. M. Hand, W. M. Haynes, Mrs. Curlett, Mrs. Ballard. Concert C. H. Dinger, Chairman (Members to be named by Mr. Dinger). Country Store Mrs. Forrest Lake, Chairman; Mesdames Rumph, J. S. Wilson, Ernest Krupp, W. J. Thigpen, McLaughlin, E. P. Morse, Austip Williams, Mesdames C. M. Hand and D. C. Marlowe (office boys).

Bombards Paris as Usual

Paris, April 1.—The bombardment of Paris by long range German guns was resumed at 2:15 p. m. today.

At the services this morning the churches were even more crowded than is usual on Easter Sunday.

No unexploded shell from a gun bombarding Paris has thus far been found. However, there have been examined in the municipal laboratory fragments of sufficient size to permit the directors to reach certain conclusions. They have found that a double fuse is used and that the guns are 160 millimeters (6 3/8 inch) shells. Apparently four guns are being used, two on each alternate day. The tubes of the guns, which are rifle guns are more than 60 feet long. The installation and adjustment of the guns must require at least three months. Doubtless they are concealed under mountains of ce-

TICK ERADICATION WILL BE CARRIED IN THIS COUNTY

Farmers And Growers Meet Saturday Night

The farmers and stockmen had a good meeting at the court house last Saturday night. The farmers were present at a meeting of the Board of Trade and the stockmen were meeting for the purpose of discussing the tick eradication. Since most of those present were interested in both questions the meetings combined and President Holly of the Board of Trade stated the objects of the meetings and called upon Secretary Marlowe of the Board of Trade to render a report of his trip to Atlanta to assist in moving the trains of Florida perishables. Since his successful trip has been given in this paper in former issues it is unnecessary to give it in detail here. Mr. Marlowe merely wanted to tell the growers what Director Markham had said about the routing of the cars and carried to the growers the advice and the promise of assistance given to them by Mr. Markham. Several other matters of interest were discussed by the growers and it was apparent to all present that if the growers of this community want anything they can always get it from the Board of Trade and there will be most important developments along this line later on and the growers who are members of the Board of Trade will realize on their investment of the annual dues.

Big Advertising Campaign

The Red Cross Society Circus will probably go down in history as being the best advertised piece of work that has ever been produced in this county. Owing to the public spirit of Sanford and Orlando and DeLand and Oviedo and other merchants the programs were made possible and three thousand of them have been printed at the Herald office in beautiful lithographed covers and they will be scattered over the territory surrounding Sanford for a radius of one hundred miles. This circus will not depend wholly upon the local patronage but will reach into the neighboring cities and get people in here from all the cities. This means that the Red Cross will not be pulling the money from the pockets of the home people alone but they are getting in new money and new people to come here and see our City and help the local Red Cross. This feature of the Red Cross Circus should appeal to those who have been standing aloof on the principle that this money is going out. This is strictly a local affair in reference to the handling of the money and the Kirkland Circus is rented for three days to put on the paid attractions. It promises to be one of the events of the season and the acts are high priced paid professional acts. Get in line and boost the Circus.

Put Up Fine Tomatoes

The great cry in this county and every other county is for the farmers to can the surplus in vegetables and fruits and yet if this surplus is not marketed there is no need for putting it up. Something should be done by the proper authorities for the marketing of the home products first. For instance, the Southern Products Co. of Geneva put up some of the finest tomatoes last season that have ever been eaten in this state and yet they have a large number of cans of these elegant tomatoes on hand and cannot sell them. The grocery dealers and wholesale dealers can get cheaper tomatoes from the big canning factory and while they are not as good and the cans are much smaller the trade will not pay the extra price. The home canner can not find a market and stops canning. The money that should be left at home goes to Baltimore and there is just another loose link in our chain for helping each other. The Southern Products Co. brought in some of these tomatoes to The Herald office and they are on display now. If anyone wants to try them they can do so and they are guaranteed by the Geneva people who put them up. If you want real tomatoes and think it worth your time to patronize the home people get a can and see if they are not worth the price.

WEALTHY PLANTER HERE

May Locate in Seminole County In Few Days

Mr. W. S. McGregor, a prominent planter of Kentucky passed through Sanford yesterday enroute south for a stay of two or three days after which he will return to Sanford and if suitable locations can be found he anticipated the purchase of a winter home but prefers some location four or five miles from town. Mr. McGregor has been a farmer for twenty-five years and states that only in the past two years has the farmer come into his own. His principal crop is tobacco and his net returns on eighty acres the past season has enabled him to enjoy life a bit and this is his first visit to Florida. He expects to remain in Sanford long enough to see the surrounding territory and make his decision as to location.

Fine Electric Sign

The Sanford Shoe & Clothing Co. have just installed a fine electric sign that calls attention to this enterprising firm on the darkest of nights. It is one of the tallest in the city and looks like a periscope in the heavens. The new sign makes a big difference in First street and if more of the merchants would go in for display signs the business streets would look more lively at nights.

Ed. Biggers of the Ft. Reade section reports that his cotton is up and ready for cultivation. He has about twenty acres that is said to be ahead of all the cotton in this section.

Farmers And Growers Meet Saturday Night

The farmers and stockmen had a good meeting at the court house last Saturday night. The farmers were present at a meeting of the Board of Trade and the stockmen were meeting for the purpose of discussing the tick eradication. Since most of those present were interested in both questions the meetings combined and President Holly of the Board of Trade stated the objects of the meetings and called upon Secretary Marlowe of the Board of Trade to render a report of his trip to Atlanta to assist in moving the trains of Florida perishables. Since his successful trip has been given in this paper in former issues it is unnecessary to give it in detail here. Mr. Marlowe merely wanted to tell the growers what Director Markham had said about the routing of the cars and carried to the growers the advice and the promise of assistance given to them by Mr. Markham. Several other matters of interest were discussed by the growers and it was apparent to all present that if the growers of this community want anything they can always get it from the Board of Trade and there will be most important developments along this line later on and the growers who are members of the Board of Trade will realize on their investment of the annual dues.

After the meeting of the Board of Trade the stockmen called Hon. E. H. Kilbee to the chair who stated the object of the meeting and in a ringing speech called attention to the fact that Seminole county would soon be the only spot in this part of the state that was not in the tick free territory and that the dipping vats called for in the government specifications should be built at once. That an election would soon be called and if the county would not pay for the vats that the stockmen could easily do so.

It was the opinion of G. Z. W. Spencer, Gaston Jacobs, James McClellan, Joe Cameron and several others present that the small amount necessary for the building of the dipping vats could easily be raised by the cattle owners and it would not be necessary to ask the county for any money but in the event that they wanted the county to stand the expense it could be voted on in the primary election and at the same time compulsory tick eradication would be voted upon, thus making it compulsory that all the cattle in Seminole county be dipped.

Joe Cameron was elected permanent chairman and Walter S. Hand secretary and treasurer and after some good talks on the question of tick eradication the meeting adjourned subject to the call of the chairman.

It is certain that the cattle owners of this county will push the matter of compulsory tick eradication and they will be assisted in the movement by the Board of Trade and by many of the people who believe in a better grade of cattle and a tick free county. The necessary number of dipping vats being constructed in this county will then be under government supervision and the vats will be constructed according to government specifications.

This is certainly a move in the right direction by the cattle owners and means another step forward in this county for better cattle in the future.

Fine Electric Sign

The Sanford Shoe & Clothing Co. have just installed a fine electric sign that calls attention to this enterprising firm on the darkest of nights. It is one of the tallest in the city and looks like a periscope in the heavens. The new sign makes a big difference in First street and if more of the merchants would go in for display signs the business streets would look more lively at nights.

Mrs. Rogers of the Children's Home Society of Jacksonville was in the city today enroute home from Enterprise where she was looking after the orphans.

Presbyterian Church
 The hours of service at the Presbyterian church will be as follows:
 Sunday school 10:45 (new time), 9:45 (old time).
 Preaching 12 (new time), 11 (old time).
 Preaching 8:30 (new time), 7:30 (old time).
 The following musical program will be rendered at the services:
 Morning:
 Prelude—Serenade, Schubert.
 Anthem—Sing for the Day is Breaking, by Ira Bl Wilson.
 Anthem—The Dawn of a Wonderful Day, Ira B. Wilson.
 Offertory—Adoration, A. R. Gaul.
 Postlude—Marche Ve Feti, Edgar Darrell.
 Evening:
 Prelude—Festal Prelude in C, Rowlwell.
 Anthem—Christ is Risen, Caleb Simper.
 Anthem—God so Loved the World from the Crucifixion by Stainer.
 Offertory—Shepherd's Pipes, William Harris.
 Postlude—Crusaders, Bolkmanu.

If every farmer of Florida and of the south had burned in his conscience a wise saying of Gov. W. D. Hoard of Wisconsin, written in his 78th year: "I cannot bear to go to my grave until I see imparted to my nation the spirit that will make agriculture not only the support of men's bodies but an inspiration to their intellects," would not our state and the south become great?

Frederick Wide, a Texas chemist has invented a process to change common grades of cotton and linters into silk. The process has the endorsement of Prof. J. B. Bagley of the textile department of the Texas Agricultural and Mechanical Col-

lege. Cotton is the great fibre plant of the earth and has a myriad uses, even that of being changed into high explosives. The growing of cotton in quantity in the world is in Florida and other states of the south. We cannot afford to let the boll weevil put it out of business.

GOVERNMENT MARKET REPORTS

Lettuce
 Florida head lettuce was in fair demand but markets were uneven, jobbing sales ranging from \$1.00-3.00 per 1 1/2 bu. hamper in northern markets. Lettuce shipments have been three-fold those to corresponding date of last year. The week's movement included 82 cars from Florida and 109 from California, total of 203 cars, decrease 77 cars.

Citrus
 Florida oranges advanced, Indian River Seedlings, Brights, reaching \$9.00-10.25 per crate in New York City. Central district seedlings, Brights, held a general range of \$7.00-9.50. Central district Valencia ruled generally at \$6.10-9.05 and southwest district fancy, sold at \$9.00-10.00 in New York City. Florida shipped 134 cars and California 529 cars. Total increased sharply to 664 cars against 469 last week. Grapefruit advanced 25-40c. Florida West Coast Brights, medium sizes, ranged \$4.25-5.50 per crate, and Indian River Brights \$4.50-5.50. Shipment of 129 cars showed a small gain over the volume of recent weeks.

Tomatoes
 Florida tomatoes, fancy, weakened to a range of \$3.00-3.50 per 6 basket carrier at shipping stations and ranged slightly weaker in northern markets at \$4.00-5.25. Movement

of car loads is increasing, Florida starting 172 cars the past week compared with 71 last week and 40 the week before.

In Circuit Court Seventh Judicial Circuit Seminole County—Florida.
 In Chancery
 Grace E. Williams, Complainant
 vs.
 Addison L. Williams, Defendant.
 To Addison L. Williams, United States.

You are hereby ordered to be and appear to the bill of complaint filed herein against you at the court house in Sanford, Florida, on the first Monday in May, 1918, being the 6th day of said month, according to law, failing in which decree pro confesso will be taken against you, followed by final decree.

It is further ordered that this order be published in the Sanford Herald, a newspaper published in Seminole county, Florida, once each week for four consecutive weeks.

Given under my hand and seal of said court this 28th day of March, 1918.
 (seal) E. A. DOUGLASS, Clerk.
 Dickinson & Dickinson,
 Solicitors for Complainant.

CURBSTONE GLEANINGS

BUDGET OF OPINION JUST BETWEEN YOU AND ME.

EVEN THE GATE POST NOT IN IT

A CHIEF IS AMONG YE TAKING NOTES AND FAITH, 'HE'LL PRENT 'EM'—SO SAYS SAUNTERER.

Florida My Florida
Land of my birth, bright sun-kissed land,
Laved by the gulf and ocean sand,
Florida, my Florida.
Of all the states in east or west,
Unto my heart you are the best,
Here may I live, here may I rest,
Florida, my Florida.

In country town, on hills and dells,
Florida, my Florida.
The rhythmic chimes of thy school bells,
Florida, my Florida.

Will call thy children day by day,
To learn to walk the patriotic way,
Firmly to stand for thee for aye,
Florida, my Florida.

Thy golden fruit the world outshines,
Florida, my Florida.

Thy gardens and thy phosphate mines
Yield their rich store of good supply,
To still the voice of hunger's cry—
For thee we'll live, for thee we'll die,
Florida, my Florida.

The oppressor's rod can't rest on thee,
Florida, my Florida.

Thy sons and daughters free must be
Florida, my Florida.

From north and south, from east and west,
From freezing blasts they come for rest
And find in thee their earnest quest
Florida, my Florida.

When ills betide and woes o'er-take,
Florida, my Florida.

Thy sons and daughters quick will make,
Florida, my Florida.

The sacrifice of love and life,
To save from war, from ills and strife,
To tell thy foes in danger rife,
Florida, my Florida.

The legislature of 1913, by concurrent resolution No. 24 of that session called attention to the popularity of a song entitled, "Florida, My Florida," written by Dr. C. V. Waugh, formerly a professor in languages in the old Florida Agricultural College at Lake City, and as said song has metrical and patriotic merit, it was

"Resolved, That this song, "Florida, My Florida," be and is hereby declared by the legislature of Florida to be the state song, to be sung to the tune of "Maryland, My Maryland," and that it is recommended for use in the daily exercises of the public schools of the state of Florida, as well as at all public gatherings where singing forms a part of the program."

Ever sit at a typewriter and try to see what matter of public interest you could write about, how much you could say something nice about this one, and something nice about that one, give some ideas on a popular topic, make some suggestions that might be carried out by some one in the community who had the time and money to do so, smooth over some one's mistakes who had reached the public ear, try and explain why such and such things are not so, make a hero or heroine out of some one who had done something a little unusual, give the proper space to the life of a departed citizen, laud the grace and beauty of a bride, see that every organization that has met has its name mentioned, give the names of all the new officials of any order, announce the events which are planned, write up the programs of entertainments, omit everything that should be omitted from publicity, write everything which everybody wants you to write about, and withal make no enemies? Then you're partly fitted to be an editor of a small town newspaper.

There is a kick all over town on the sulphur water eating out the pipes and causing endless trouble and expense. The water pipes in many instances are under buildings and sidewalks and the extra work of taking up the pipes and putting in new ones is awful, saying nothing of the delay in business. In many cases the pipes are upstairs and they break in the night and cause damage to the lower floors. It is high time that the Sanford Utilities Co. get that apparatus in for breaking the water or everybody in Sanford will be broke. They say they are doing this but I have not seen it up to date.

The new time seems to cause some people endless confusion and yet it is the easiest thing in the world to observe. The government asks us to set the clocks ahead last Sunday morning one hour and save an hour of daylight by starting every thing off an hour earlier in the morning and quitting one hour earlier at night. All we need to do is to set the clocks ahead and go right on about our business. Some of the churches had a hard time getting down to the real time and some of them started one hour later thus defeating the aims of the government by holding at eight at night instead of seven and keeping the members up one hour later. This is certainly not in conformity with government orders and churches and business houses generally that want to change time to suit their conveniences should remember that when you make a change you should make one that will give the hour of daylight and when you do not you are in conflict with the government orders and you know what that means. All business and all churches should start on the regular time by the clock and that is all there is to it.

Can Feed Hogs Peanut-Meal - Just how much peanut meal can be used in the ration for fattening hogs without producing soft pork is an unsettled question. The University of Florida experiment station has just completed an experiment in which peanut meal was used for the purpose. One lot of hogs was fed a ration consisting of 85 per cent corn and 15 per cent peanut meal. Another lot was fed 80 per cent corn and 20 per cent velvet bean meal. A third lot was fed shelled corn. In addition to the grain, all hogs received green dwarf Essex rape. These hogs were slaughtered and put through the cooler by Armour & Co. in Jacksonville. The result of the test showed that the carcasses of all these hogs killed hard. Other experiments will be conducted to determine the maximum amount of peanut meal that can be used in the fattening ration and still make a hard pork. The addition of 15 per cent of peanut meal to the ration will mean a big saving in the amount of corn used for fattening hogs for the market.

Temple Wednesday evening 7:30 o'clock.

Mr. Massey has demonstrated the fact that he can teach as well as preach, he having taken the Royal Ambassadors last Sunday.

The Temple choir, under the leadership of Miss Margaret Davis rendered a very nice program of Easter music Sunday evening.

The Baptist Temple began its first services Sunday according to Federal time, and will continue to observe the time of the nation.

New Dental Offices
Dr. D. L. Brown has opened new dental offices in the Yowell Speer building and is ready for business. Dr. Brown comes to this city from Palatka where he has practiced dentistry for some time and comes highly recommended from his home city. His advertisement appears in another part of this issue. The Browns are former residents of Sanford and Dr. Brown is only coming back home.

Habits.
It is astonishingly easier to get into a bad habit than to get out of it. It is like the difference between sliding down a mountain slope and climbing up it. Therefore, when you find an undesirable habit growing on you, climb back, before you have gone down too far.—Exchange.

Can Feed Hogs Peanut-Meal - Just how much peanut meal can be used in the ration for fattening hogs without producing soft pork is an unsettled question. The University of Florida experiment station has just completed an experiment in which peanut meal was used for the purpose. One lot of hogs was fed a ration consisting of 85 per cent corn and 15 per cent peanut meal. Another lot was fed 80 per cent corn and 20 per cent velvet bean meal. A third lot was fed shelled corn. In addition to the grain, all hogs received green dwarf Essex rape. These hogs were slaughtered and put through the cooler by Armour & Co. in Jacksonville. The result of the test showed that the carcasses of all these hogs killed hard. Other experiments will be conducted to determine the maximum amount of peanut meal that can be used in the fattening ration and still make a hard pork. The addition of 15 per cent of peanut meal to the ration will mean a big saving in the amount of corn used for fattening hogs for the market.

Grow Your Own Eggs
One phase of food production in which the town man can play a part is that of raising poultry for eggs. While eggs are not looked upon as a commodity which can be shipped to supply our military forces they do go far toward reducing the consumption of meat at home. And meat is a prime necessity for shipment.

Continue to Save Meat
Our country needs meat. A shortage of meat and dairy products still confronts us. The resourcefulness of the housekeeper can do much toward saving the situation. Here is where the vegetable can be made to play an important part, says the University of Florida extension division. Combined with left over meat a dish palatable enough to constitute the main dish of the next day's dinner can be prepared.

In spite of the fact that there are fewer meatless days now than there were a month ago, we should cut down our meat allowance. This is some is a real hardship regardless of the fact that many other foodstuffs are as nourishing. There are, however, so many ways of "camouflaging" roast beef, for example, that the up-to-date housewife has no excuse for not conserving the meat supply and at the same time keeping her family well nourished and satisfied.

Conserving meat means growing and using more vegetables, which is another inducement to cultivate the vegetable garden. Vegetables and some of the more concentrated foods in the diet grown here at home will release large quantities of meats and other food supplies for the American army abroad.

Watch for Red Spiders
Red spiders are a pest which give trouble during the spring months through attacks on a variety

of plants, among which are peas, strawberries, beans, citrus and cotton. They may also be found on violets and camphor. The remedy prescribed for this pest is a liberal use of free sulphur or one of its compounds.

Infested plants become gray and dried up in appearance and finally turn yellow and die. Peas when attacked become dry, mealy or "cobwebby," cease to grow, wilt down and soon die. Strawberries turn brown and remain small and hard. If examined closely, infested plants, particularly the under side of the leaves are found covered with a web of fine silk under which the minute, yellowish mites can be seen with the unaided eye. Under a good lens one can readily discover the eight-legged adults which are from green to red in color, the bright red eggs, and the white skins which were cast off when the spiders molted.

These pests belong to a group called spider mites, which include the rust mite of citrus. The best remedy for any of these mites is some form of sulphur.

Free sulphur or some of its compounds may be used by applying dry or in the form of a spray. Free sulphur is one of the best remedies. It is somewhat slower in action than some of the sulphur compounds, often taking two or three days or more to do its work, but it remains active for a long time, frequently two or three weeks, and usually kills the mites. Sulphur can be applied dry, and driven into the vines by hand, or shaken into the vines through a closely woven cloth or a perforated can.

It is better to mix three parts of dry sulphur with one pound of hy. The lime can be bought or be made by adding 32 pounds (4 gallons) of water to every hundred pounds of quicklime. Mix hydrated lime and sulphur thoroughly.

The best results will be obtained by applying the dust at night or in the early morning when the air is quiet and the plants are wet with dew, as the dust adheres better then. It works better when the nights are moist and the days bright and sunny, for under these conditions the oxidation of the sulphur takes place more rapidly. As a spray, from one to five pounds of sulphur to fifty gallons of water can be used.

Of the compound, of sulphur, lime sulphur is one of the best. Use about one gallon to seventy gallons of water, and in the mixture be sure to heat and stir sulphur thoroughly. When the shaking is over, cool the mass quickly by pouring cold water into it.

Temple Chimes
The Temple choir was very beautifully dressed with Easter lilies, roses, carnations and potted plants Sunday.

H. E. Tohr is the new superintendent of the Intermediate Department of the Sunday school.

H. D. Sterns has taken the Beacon Class and is making a splendid teacher for the young men.

The Temple folk are delighted to know that Lieut. George Hyman, Chaplain 326th Infantry, until recently the pastor, will speak at the

Office: Herald Building Telephone No. 148

The war news today is greatly reassuring and we should all take a new start in helping the Red Cross, the Liberty Loan, the Thrift Stamps and all the other war work.

The farmers of the county are requested to see the president of the Board of Trade when they come to town. He has something of importance to communicate to them.

Sanford is going to have a society circus and with Editor Bob Holly as the leading clown and F. F. Dutton as ringmaster, is a success at the start.—Moorehaven Times.

We ought to have your pet rooster here.—Bill.

Good business as well as patriotism urges support of the government in its financial needs, and no class of Americans more than the farmers of the nation whose own welfare is indissolubly bound up with that of the United States government.

The sooner the irresistible might of this great Republic is organized and put into full action the sooner the war will end. Every dollar invested in government securities works to shorten the war, to save the lives of American soldiers and sailors.

WAR FOR HUMANITY

War, in a good cause is not the greatest evil which a nation can suffer. War is an ugly thing, but not the ugliest of things; the decayed and degraded state of moral and patriotic feeling which thinks nothing worth a war is worse. When a people are used as mere human instruments for firing cannon or thrusting bayonets, in the service for the selfish purpose of a master, such wars degrade a people. A war to protect other human beings against tyrannical injustice; a war to give victory to their own ideas of right and good, and which is their own war, carried on for an honest purpose by their free choice is often the means of their regeneration. A man who has nothing which he is willing to fight for, nothing which he cares more about than he does about his personal safety, is a miserable creature, who has

HERALD PRINTING CO.
Phone 148 Sanford, Florida

no chance of being free, unless made and kept so by the exertions of better men than himself. As long as justice and injustice have not terminated their ever renewing fight for ascendancy in the affairs of mankind, human beings must be willing, when need is, to do battle for the one against the other.—John Stuart Mills.

This was written a half century and more ago, but it might have been written yesterday it applies so well to today's conditions. The truth is the same yesterday, today and tomorrow.

SANFORD TAKE NOTICE

To Bob Holly, Walter Haynes and the good fellows of the Sanford Herald:

Thank for your kind editorial. It is true I did "sneak through" on you; but it was because the boat was late and I just had time to eat one of Pa Carnes' dinners with Frank Dutton and beat it for the train.

It hurt my feelings worse than yours, for I was looking forward to a couple of hours of visit in Sanford. See you next time, surely.—F. K. A., in Courier Bartow Informant.

WHY AMERICANS WILL WIN THE WAR

Major William J. Donovan, receiving the French war cross was cited as "a high officer who showed brilliant military qualities, giving during a violent bombardment, a remarkable example of bravery, activity and presence of mind."

A French officer who was with him in the trenches reported to his own superior officer that "he was the best officer under fire he had ever seen."

Yet Donovan was a lawyer in Buffalo until America entered the war last April 6.

The great significance of this is that the best hope for such a military machine as Prussia built up was that the new armies quickly raised to oppose them would be deficient in officers.

The falsity of that fatuous confidence is to the ability of both officers and privates has been disproved day after day in the raids at the sector held by Americans in France.

The element in war which remains to be demonstrated is that a democracy like the United States can unify itself in war industries to withstand the assault of such a centralized power as the autocratic German empire.

This element does not concern the armies on the firing line, but the forces which keep them munitioned. To achieve this unity of effort requires the earnest cooperation of private citizens and intelligent directing by the war administration at Washington.

There remains another element of success in this war which is a best asset of the United States.

That is America's genius for mechanical invention, which never has been equalled elsewhere in this century. It is indicated by the invention of the flying machine and the submarine, the basic patents for the tanks of Great Britain, and our own new Liberty motor.

No one has better understanding of this mechanical genius or is better able to speak of the industrial forces which apply it than is Henry Ford, of Detroit, who said this week in New York:

"American mechanisms, designed by American engineers, constructed by American workers and operated by American fighters are going to win the war on the land, in the water and in the air—for America."—Tampa Tribune.

THE CRISIS

We have entered upon the military crisis of the war.

Since the beginning it has been evident that there would be no peace until one of the opposing armies won a decisive victory over the other.

In the thrust along a fifty mile front from La Fere to Arras, the Germans are seeking to drive a wedge of steel through St. Quentin, the most direct route to Paris, and take the French capital.

It is not too much to say that this is the supreme effort of the enemy. Military experts have long held that Germany would seek a decision before America was capable of throwing her weight against her.

There is no better time than the present for Germany, or one more unfavorable to the allies.

That the British were forced back is admitted in the official announcement, and though there was a loss of territory, men and artillery, the line is not broken, and every indication is that the new positions will sustain the onslaught.

The German drive was not unexpected and even the most pessimistic must have conceded some

forethought to the allied generals. Now that the clouds of the first attack have lifted it is apparent that Germany's intention was to overwhelm the British, and at the same time create an impression that Paris was in great danger from her new weapon, and by the joint movement trip France into an unholy peace. The new gun is more spectacular than effective, and as far as actual results are concerned is a failure.

On the whole the situation is not as grave as in the first onrush in the fall of 1914 when Paris was within the grip of the Hun. The miracle of the Marne stemmed the tide, and what was possible then, with an almost beaten army is not impossible now with much better equipment and more men.

The Germans will probably not hazard a defeat similar to the British at Cambrai, by piercing the lines too far, and subjecting the wedge to flank attack.

If the drive is successful and the objective taken, which is extremely doubtful France will not be crushed. Paris is not a republic, though it is not to be denied that loss of the capital would be a serious blow. France will never be beaten until every Frenchman is dead; and America has not yet begun to fight.

That is the pity of it. America, with her vast resources, is impotent. Those who have held the lines for nearly four years are sorely pressed, and we cannot help them. Our small expeditionary forces occupy a sector below the scene of the present momentous battle. The others we have trained and are training are useless without ships to carry them across.

If the allied armies, by superior strategy are able to repel the attacking hordes, then a victorious peace is nearer, for Germany will have sent her greatest effort.

In the breathless suspense, as we gaze as bystanders on the death grapple we must keep our purpose steadfast and our eyes on the ultimate goal, so that when at last we throw our full strength into the conflict with high constancy and unwavering determination, we shall push on and bear our full share of the burden which Germany's mad ruler has placed upon the world.

We must remember always, in the darkest hour of defeat even as in the brilliance of victory, that we are right, and being right, we can't be beaten.

Soldiers' Hope

When we end the imperial growth We will marry our betrothed, Whom we know are working hard, Cooking corn with little lard; As it is their country's plea That is made to you and me.

Sing the songs our sweethearts sing In the church before their King: "Onward Christian Soldiers" true, Wave our flag, red, white and blue! O'er the men who are in drill, To destroy old Kaiser Bill.

In the shadow of the cross, Not a single soul is lost; Yet his blood is trampled deep Underneath those Germans' feet. Still we say to all we can: "Be thou true American!"

Now the Germany line we break, And as soldiers they do take, Eager! Eagerly we try Now to see their Kaiser die In this storm of fire and smoke; Yet we know our last word's spoke.

In this dying breath so weak, "Now I lay me down to sleep," This I learned on mother's knee, Oh, dear mother, I'll not see; Here am I, her only boy! Yet I have a thrilling joy.

When our dying moans are o'er We shall meet on Jesus' shore, Knowing that the stars above Smile upon a land of love; Made free by our blood and tears, Shed abroad these present years. High School Girl.

Horace Williams Abroad

The following letter in the Lumpkin, Georgia, Independent will interest the young friends of Horace Williams in this city:

Signalman Horace Williams of the United States Naval Merchant Service is at home for a short visit to his parents, Mr. and Mrs. W. H. Williams. Mr. Williams was among the first Lumpkin boys to volunteer his service in the present conflict. His record in the naval service has been splendidly progressive and has given him the advantage of a wide and varied experience, his travels having carried him to England, France and Italy during his few months of service. An interesting array of souvenirs consisting of foreign money of numerous denominations, and other small articles collected during his travels has proven an absorbing source of interest to his friends here. Mr. Williams will remain here only a few days when he will leave for the "Somewhere over there."

Time Is The God Of Battles

Let every hour count—don't waste the precious minutes that mean so many more of our brave boys going over the Top to DEATH. WATCH THE CLOCK and speed up your work for the Boys Over There. SAVE your money for the Government that will need it before the HUN has been subdued.

Preserving Eggs for Winter

Eggs will soon be much lower in price than during the winter season and every housewife in Seminole county should put down a goodly supply of eggs for the coming winter when prices will again be very high. It has already been proven that water glass will successfully preserve eggs (if eggs are sterile) in Seminole county for from six months to a year, so it behooves us to get our water glass and have it ready. All those interested in getting water glass will please let me know at once that I may be able to get the best price on this preservative for them.

Instructions for putting down eggs by this method, quoted from pamphlet by the Bureau of Animal Industry, U. S. Department of Agriculture will be found elsewhere in The Herald. Please read.

Riley M. Fletcher Berry,
Emergency Home Dem. Agt.

Preserving Eggs in Water Glass Solution and Lime Water

During the spring and early summer, when eggs are abundant and reasonable in price, attention should be given to preserving them for winter use. Fresh eggs properly preserved may be kept for eight or twelve months in excellent condition and used with good results.

Eggs laid during April, May and early June have been found to keep better than those laid later in the season.

If satisfactory results are to be obtained, the eggs should be fresh and clean, and if possible, infertile. Eggs that float when placed in the solution are not fresh and therefore cannot be preserved. When an egg is only slightly soiled, a cloth dampened with vinegar can be used to remove such stains. Under no circumstances should badly soiled eggs be used for preserving; if put into the jar while dirty they will spoil, and washing removes a protective coating which prevents spoiling.

Water Glass Method

A good method for the preservation of eggs is the use of sodium silicate, or water glass. If the price of sodium silicate is about 30 cents a quart, eggs may be preserved at a cost of approximately 2 cents a dozen. It is not desirable to use the water glass solution a second time.

Use 1 quart of sodium silicate to 9 quarts of water that has been boiled and cooled. Place the mixture in a 5-gallon crock or jar. This will be sufficient to preserve 15 dozen eggs and will serve as a guide for the quantity needed to preserve larger number of eggs.

(1) Select a 5 gallon crock and clean it thoroughly, after which it should be scalded and allowed to dry.

(2) Heat a quantity of water to the boiling point and allow it to cool.

(3) When cool measure out 9 quarts of water, place it in the crock and add 1 quart of sodium silicate, stirring the mixture thoroughly.

(4) The eggs should be placed in the solution. If sufficient eggs are not obtainable when the solution is first made, additional eggs may be added from time to time. Be very careful to allow at least two inches of the solution to cover the eggs at all times.

(5) Place the crock containing the preserved eggs in a cool, dry place, well covered to prevent evaporation. Waxed paper covered over and tied around the top of the crock will answer this purpose.

Lime Method

When water glass cannot be obtained, the following method may be

used in its stead. Many consider this method entirely satisfactory, though instances are known where eggs so preserved have tasted slightly of lime.

Dissolve 2 or 3 pounds of unslaked lime in 5 gallons of water that has previously been boiled and allowed to cool, and allow the mixture to stand until the lime settles and the liquid is clear. Place clean, fresh eggs in a clean earthenware crock or jar and pour the clear lime water into the vessel until the eggs are covered. At least 2 inches of the solution should cover the top layer of eggs. Sometimes a pound of salt is used with the lime, but experience has shown that in general the lime without the salt is more satisfactory.

Using Preserved Eggs

Fresh, clean eggs, properly preserved can be used satisfactorily for all purposes and in cooking and for the table. When eggs preserved in water glass are to be boiled, a small hole should be made in the shell with a pin at the large end before placing them in the water. This is done to allow the air in the egg to escape when heated so as to prevent cracking.

George Hyman Coming Back

Lieutenant George Hyman, Chaplain 326th Infantry, and our George Hyman of the Baptist Temple will return from Camp Gordon for a

visit with his friends in Sanford next Wednesday.

While here Chaplain Hyman will speak at the Baptist Temple, Wednesday evening, 8 His subject will probably be "Trench & Camp." In as much as the Chaplain has only a few hours to spend with us, it is his desire that as many as possible meet him at the church so that he may shake hands with all. Further announcement regarding the speaking will be made in Today's Herald.

Can't Run Business Without License

It has been the custom of a few people in Seminole county to conduct their business without having a proper license from the state and county—this custom will undoubtedly receive a sad reversal this year as Prosecuting Attorney Schelle, Maine has given notice that he was instructed by the county commissioners to enforce the payment of the various license taxes. The offenders have had six months in which to comply with the law, and those that have so far evaded the license tax should not look for further mercy at the hands of the court. It is the intention of the officials to summons all people who are running a business without license before Judge Housholder to show cause why they should not pay the regular fee, without any further delay.

A new Varsity style by Hart Schaffner & Marx

THERE have been a good many changes in young men's styles this spring. They have been designed to conserve wool fabric by eliminating any unnecessary use.

Here's one; a perfect example of the spirit of conservation; neat; form fitting; one of the most striking effects of the season.

You fellows who know a lot about styles will want to see this one. It's a Varsity model and you'll find your size in brand new color combinations at this store.

Dr. Cecil Butt left today for Jacksonville on business.

Dr. D. C. Ward, Osteopathic Physician, First National Bank Bldg., Phone 330-W. 64-tf

D. L. Thrasher spent yesterday in Jacksonville on business.

Break your Cold or Cough with a few doses of 666. r139-26tc

Mrs. McLaughlin is visiting friends in Leesburg a few days this week.

For Wood and heavy hauling see Murrell, or phone 378. 48-tf

Will Stringfellow spent Sunday in the city and reports that his cotton crop in Volusia is doing well.

Mrs. E. G. Tyner is in the city from Tampa and will spend the summer with her daughter, Mrs. R. J. Holly.

RUB-MY-TISM - Antiseptic Relieves Rheumatism Sprains Neuralgia etc. 39-26tc

J. W. Osteen, a prominent citizen of the Altamonte Springs section was in the city several hours today.

Allen Jones arrived yesterday from Charleston and will be home on a few days' furlough. Allen had a severe attack of measles and is on the sick list in consequence. He has made several trips to France since joining the naval hospital corps.

Expensive Hematiting Machine just installed at the millinery shop of Mrs. H. L. Dubart. Ladies of Sanford are invited to call and see this machine in operation. Fourth and Sanford Ave. 13-tf

The Carnes Hotel has a new sign board on the First street entrance that will be a menu for the cafe.

Notice
Notice is hereby given that the board of county commissioners offer for sale one pair of mules, pair to be designated by the board. For information see commissioner in your district.

E. A. Douglass, Clerk. 58-tf

Woman's Club Notes
Wednesday, April 3rd is the date for the regular monthly business meeting of the club and Birthday Celebration. It is hoped that all members will be present.

The Music Department announces that on Wednesday evening, April 3rd the Ladies' Chorus will give "Crucifixion," Stainer, at the Holy Cross church. The silver offering which will be taken to go to St. Agnes Guild.

Royal Neighbors Social
The rock social of the Royal Neighbors of America was held Friday, March 29th at the Modern Woodmen Hall and proved a great success. The hall was beautifully decorated. A fine program was rendered and refreshments were served. We were more than pleased with the attendance of the R. N. of Orlando and Winter Garden. The hall was crowded to overflowing. All went away deploring themselves more than pleased with the evening's entertainment.

Demonstration Notice
A demonstration of quick corn and barley breads will be given this week Friday, April 8, at 3:00 p. m., at the home of Mrs. D. A. Kelly, corner French avenue and Fourth street, and all housekeepers in that neighborhood interested in this subject are invited to attend.

Wiley M. Fletcher Berry, Emergency Home-Dem. Agt. 64-2tp

Seminole Chapter, A. R. C.
With Seminole County Chapter, American Red Cross, the month of March has been one of progress and achievement, and the women of the chapter have given loyal, faithful service, i. e., the few who are at work, but each succeeding month marks a greater degree of interest, enthusiasm and a larger number of workers enrolled.

The auxiliaries Altamonte, Geneva, Longwood, Chuluota and East Sanford are doing a splendid work not only in the making of garments but in raising funds with which to buy materials.

Geneva has a colored auxiliary. Sanford also has a colored auxiliary in Georgetown and now that their young men are leaving for the front there is no doubt that they too will become an active factor in this glorious work for humanity in which millions are engaged, both the white and colored people of America. The making of hospital garments and surgical dressings brings one in closer touch with the boys at the front and the need is so great. Report comes from abroad that only one third of America's allotment of surgical dressings have been made and that too when there are such earnest, tremendous forces at work. Again we

call on the women of Sanford, there are so many who are inactive, to join the surgical dressings classes at the local Red Cross headquarters that are being conducted by Mrs. Geo. H. Fernald, supervisor of surgical dressings, and a graduate instructor. On April 1st a class for Monday afternoons was instituted for the benefit of those who desire to make surgical dressings but are unable to attend the morning classes. Sanford should make 2,000 dressings a week, as a matter of fact there were 1680 pieces made within six weeks. The work room forces at headquarters are on the job regularly, turning out from five to over six hundred garments and articles each month. This includes the work done by auxiliaries. The Geneva auxiliary confines its activities to surgical dressings and sends a box regularly every month. The inspection committee inspected and passed 623 hospital garments and supplies in March, which was followed by the same number being packed and shipped by the shipping committee. The last box contained a complete, dainty layette, for a Belgian baby, the gift of the Auction Bridge Club. Donations from the Woman's Club, include five dollars from the Music Department and ten dollars from the Welfare Department, both of which were much appreciated.

Altamonte's March donation was \$130.55, Longwood gave \$19.50. From donations which include also entertainments to raise money and membership dues aggregate for March \$199.00, added to all this 159 pieces of clothing were collected for the Belgians and French.

The Red Cross Society Circus is being pushed vigorously and promises to be a delightfully entertaining and successful event.

Red Cross Dues
Annual dues are payable in April and all the months of the year following, but it is earnestly requested that as many as can will pay their dues even though having joined as late as September. Mrs. R. A. Terheun, secretary, will send membership certificates upon receipt of dues.

Spring Campaign Pledges
There are many pledges made at the time of the Spring War Fund Campaign last June that have not yet been cancelled. Payment in part or full of these pledges at this time will be much appreciated.

Mrs. R. A. Terheun, Secy. Seminole Co. Chapter, A. R. C.

Glass in Bread
New York, April 1. Warning to the public "to be most careful in the future when eating bread, rolls, cakes and pastry," because "jagged bits of glass have been found in flour, bread and bread wrappers," was issued by the Federal food board here today.

The warning added that "complaints of this character have been sufficiently frequent to warrant the board in publishing this warning, much as it dislikes to be put in the position of seeming to alarm our people."

According to the board no organized attempt to work injury by placing glass in bread has been found, but such acts are attributed to malicious persons engaged in the bakeries and factories affected.

"Housewives should examine bread after it has been cut and made ready for the table," says the warning. "Where bread is baked in the home the flour should be thoroughly sifted for foreign substances. Owners of bakeries and those handling flour and substitutes used in baking are asked to have rigid inspection made before the commodities leave shipping rooms in bulk or manufactured form."

GENEVA
Mrs. Palmer of Bridge End attended the Red Cross meeting last week.

Mrs. Chas. Brumley of St. Augustine is visiting her sister, Mrs. Endor Curlett.

Mr. and Mrs. John Nicholson left last Wednesday for Georgia after spending the winter with their sister, Mrs. R. G. Nicholson.

The cattle men of Geneva are busy this week operating the dipping vat.

A pleasant day was spent last Tuesday on the creek, by Mr. and Mrs. Geo. Peters, Mr. and Mrs. Robert Morris, Mr. and Mrs. Gresham, Mr. and Mrs. Nicholson and Mrs. Adams.

The Red Cross will have a social evening at the town hall next Monday.

Mr. and Mrs. Curlett, Miss Emma Eichner and Mrs. Chas. Brumley motored to Orlando last Monday.

The Geneva people are hoping the Board of Trade or whoever it may concern will again take up the subject of a mail route between Sanford and Geneva.

SEMINOLE CO. SELECTS GO

White and Colored Soldiers Who Will Win The War For America

Our boys continue to go and many watched them with saddened hearts last Friday afternoon as 7 white boys and 37 colored left this city for the training camps there to make ready to go across and whip the bunch of war mad fanatics who are seeking in vain to conquer the world. There were many fetes in honor of the boys who were to leave and the colored population of Sanford made a great occasion out of the going of the first draft from the colored boys of Seminole. They had the uniformed knights and the band and all the school children to escort them to the station and it was a great farewell. The white boys left on the first train for Camp Jackson and the colored contingent waited for the special from Tampa that was loaded down with the colored selects that were to go to Camp Devan at Ayer, Mass. At the depot the colored selects were addressed by Clerk of the Court E. A. Douglass and Sheriff E. E. Brady who are on the Board and by S. E. Thomas, Dr. Jerry, Rev. Brewer and several others and were then escorted to their train by friends and relatives. That the Seminole selects will make good in a foregone conclusion and they left with the conviction that the friends at home will stand by them even though the waters of the ocean may roll between them. The following were in the contingent leaving Friday:

White
Fred Axel Sjobom, Lake Mary Fla.; Oscar Milton Zittrower-Sanford, Fla.; Bruce Clouser, Maitland, Fla.; Robert Bertram Hawkins, R. F. D., Maitland, Fla.; Thomas Jefferson Parrish, Geneva, Fla.; Carl Mims Farwelle.

Colored
Julius Scott, Oviedo, Fla.; Lem Youdell, R. F. D., Sanford, Fla.; Julius Huff, 919 Willow Ave., Sanford, Fla.; George Stevens, Altamonte Springs, Fla.; Sam Brooks, Geneva, Fla.; Warren Crump, Chuluota, Fla.; Ledworth Brown, 811 Hickory, Sanford, Fla.; Joe Summons, Sanford Ave., Sanford, Fla.; Oscar Middleton, 312 Fifth St., Sanford; John Sanders, 7099 Willow Ave., Sanford, Fla.; Harold Grant, 416 E. Third St., Sanford, Fla.; Ellis Blair, Altamonte-Springs, Fla.; Eddie Brown, 208 Bay, Sanford; Preston Cole, Sanford; John Henry McKellat, Geneva; Sidney Barno, 407 E. 3rd, Sanford; Willie Curry Cummings, Goldsboro; Ernest Paramore, 117 Fifth St., Sanford; Roger Whitted, Lake Monroe, Fla.; Willie Anderson, Rand's Siding, Sanford; Joseph Reed, 810 Hickory Ave., Sanford; Alexander Aitch, 415 Cypress, Sanford; Will Bias, Geneva, Fla.; Nathaniel Gilmore, R. F. D., Sanford; Walter Edward Murray, Goldsboro, Sanford; Muehlon Wiley, Oviedo, Fla.; Samuel Brown, Geneva, Fla.; Frank L. Burgess, Chuluota, Fla.; Clarence Chappell, 507 E. Second St., Sanford, Fla.; Mathew Hickson, W. First St., Sanford; Marion Ford, Sixth St., Sanford; Archie Oxendine, Oviedo; William Royster, R. F. D., Sanford; Leon Tyson, Third St., Sanford; Isaac Wilson, Goldsboro, Sanford, Fla.; James Ashe, Geneva, Fla.; Warren Davis, Geneva, Fla.

Auto Accident
An automobile accident which might easily have been more serious happened on Sunday afternoon when one of the front wheels of the car belonging to L.L. Taylor came off and threw the car and the occupants into the ditch.

The most seriously injured was Mrs. Taylor who sustained a cut on the face from the broken wind shield which required several stitches. The other occupants of the car escaped with only a few bruises.

New Overland Agent
Mr. H. L. Haight has obtained the agency for Seminole county for the Overland car and will open a sales room in the near future.

Mr. Haight, who has made his home in Altamonte Springs for several years is a good salesman and is familiar with the Overland and will no doubt do well with this car which has at 4 days been popular in this county.

To Remove Smoke Stains.
This suggestion will be beneficial to housewives who have not the convenience of electricity or the modern gas fixtures. Frequently the ceiling above an old-fashioned gas jet becomes discolored from smoke and heat. The discoloration may be removed if a layer of starch and water is applied with a piece of flannel. After the mixture has dried it should be brushed lightly with a brush. No stain or mark will remain.

Queen's Contest

Much Interest Being Taken in This Exciting Event of the Circus

The queen's contest is causing considerable excitement and when this issue appears on the streets showing the standing of the various contestants there will be a rush for the ballot boxes by those who are backing their favorites in this contest to decide who is the most popular young lady in Sanford. The queen will be queen of the Red Cross Circus and will also receive a beautiful diamond ring. Those who fail to get the first prize will be honored by having been in the contest and they will also receive fine prizes so that each and every contestant should strive to get as many votes as possible, for the prizes are worth the trouble and time. In fact no such prizes have ever been given in this or any other city for a contest of this kind and a glance into the window of Henry McLaughlin will convince any one of this fact.

While the contest is only beginning it behooves the candidates to keep busy and the standing of the girls today will have nothing to do with the standing next Friday, for many of their friends are waiting to see the result today before dumping in many hundreds of votes to bring up the average of their favorite.

This contest is also for the Red Cross and every penny goes to help some of the wounded boys "over there" so that the young ladies and those that give to them are helping in this great cause. The following is the standing of the girls up to date:

Name	Votes
May Thrasher	697
Ethel Henry	352
Florence Henry	555
Agnes Dumas	117
Dorothy Rumph	108
Helen Hand	124
Frances Chappell	104
Muriel Harrold	125
Fern Ward	466
Virginia Brady	101
Frances Gonzales	150
Bertha Macey	141
Elizabeth Stafford	1275
Maude Leach	116
Macey Laing	102
Claire Cameron	101

What Service Is.
The most blessed of human endeavors in service—the service that educates and builds and makes this old world a better and happier place in which to live and work. Service is the spirit of the hour. It blesses him that gives and him that gets; it is the brotherhood of man in business; it is the helping hand extended unselfishly; it is bread cast upon the waters; it is a way of helping oneself by helping each other. The best that can be said of any man is this: "He served others that they might better serve themselves."—Burker.

Tricks of Worms.
Mystery in animals, "hitherto an unsolved mystery," is explained in the North American Review by Hudson Maxton. When a bird is about to attack a worm he looks at the worm, trying to ascertain whether the worm is a food worm or a puff-blower. The mental process of the bird is transferred to the nervous system of the worm, who, now aware of the fact that the bird would hesitate to attack him if he were a puff-blower, proceeds to imitate the puff-blower.

Long-Distance Talkings.
Eighteen miles is said to be the longest distance on record at which a man's voice has been heard. This occurred in the Grand Canyon of the Colorado, where one man, shouting the name "Bob" at one end, was plainly heard at the other end, which is 18 miles away. It is recorded that at Gibraltar the human voice has been heard at a distance of ten miles.

Use Language Carefully.
Men should not say more about their neighbors in their absence than they would say to them if they were present. This is safe from a standpoint of future tranquillity and it is sound ethics. The same holds true with writing communications for publication. Whatever cannot be said over your signature should not be said at all.—Exchange.

Worth Knowing.
He who always receives and never gives acquires, as a matter of course, a narrow, contracted, selfish character. His soul has no expansion, no benevolence, no elevation of aim. He learns to feel and think and care only for himself.

Concrete Railroad Tie.
Italian steam and street railroads are experimenting with a concrete tie that rocks slightly, affording uniform elasticity and a more perfect alignment of track than wooden ties.

YOU'LL BE SO PROUD
of the hat you select from our collection of beautiful millinery that you will want to carry it home yourself to make sure you get the right one. The hats shown here are a urely dreams of beauty and becomingness. Come and see them and you'll wonder why the prices are not higher. Special showing of children's hats next week.

IN SOCIETY'S DOMAIN
HAPPENINGS OF INTEREST IN AND AROUND SANFORD

Goodspeed—Elder
The home of Mr. and Mrs. P. M. Elder on Oak avenue was the scene of a pretty home wedding on Sunday at high noon, when their daughter, Nellie Leola was united in marriage to Mr. Ralph Goodspeed of Jacksonville.

Rev. Hillburn, pastor of the Methodist church performed the ceremony, which was witnessed by only members of the immediate family on account of the recent death of the groom's father.

The rooms of the residence were beautifully decorated in cut flowers and ferns.

The bride wore a blue taffeta coat suit and carried a bouquet of white bride roses.

Immediately after the ceremony Mr. and Mrs. Goodspeed left for Jacksonville where they will make their future home.

The bridal party included Mrs. Claude Herndon, pianist, and Camilla Puleston and Alice Elder, heralds of the bride.

Mrs. R. S. Keelor and Mrs. Norma McLaughlin who are spending this week in Leesburg were guests of Mrs. B. F. Watts Wednesday afternoon for tea at Mt. Dora. The party were Mr. and Mrs. B. F. Watts, Mr. and Mrs. Charles Nichols, Mrs. J. J. Stover, Mr. McDougal, Mrs. A. B. Eford, Mrs. R. S. Keelor and Mrs. Norma McLaughlin.

Mrs. Thomas Albert Neal will leave tomorrow for Jacksonville where she will attend the Easter dance at the Yacht Club. While there she will be a guest of Mrs. Richard P. Marks at her home in Riverside.

Mrs. J. J. Stoyer entertained very informally at bridge Thursday afternoon at her attractive home on Main street for Mrs. R. S. Keelor and Mrs. McLaughlin of Sanford who are spending this week in Leesburg.

Mrs. E. E. Brady and daughter of Sanford, Conn., who have been visitors in the city for several weeks left Saturday for St. Augustine where they will remain several days before returning home.

Mr. and Mrs. Charles Mooney Hand announce the marriage of their daughter, Charlotte Eleanor to Mr. Sherman Melvin Eloyed Saturday, March 30th at the Holy Cross Episcopal church.

Robert Merriwether of Camp Wheeler arrived Saturday on a five days furlough. While here he will be a guest of Mr. and Mrs. Charley Merriwether at their home on Celery avenue.

Mrs. Henry Dickins arrived yesterday from St. Petersburg and will remain in the city for several weeks. While here she will be a guest at the Hotel Carnes.

Friends of Mrs. L. R. Philips will be glad to know that she is rapidly improving after a prolonged illness at her home on Park avenue.

Charles Whitner, representing the Armour Fertilizer Co. of Jacksonville was in the city yesterday.

Judge E. F. Housholder left today for Jacksonville where he will remain several days on business.

A. R. Haile of Jacksonville was a visitor in the city yesterday.

A. H. Morgan of Daytona spent a few hours in the city yesterday.

Excuse Me
Will be presented April 5 at the High School Auditorium by the graduating class. Hume Rumph and Roby Laing who have so often delighted Sanford audiences will play prominent parts and the whole will be a master production.

Robert Stetson gets a job on a big daily on condition that he makes good with a big sensation story in three days. John Harding who has it in for him plans a big fake sensa-

tion to get him in wrong, but as usual complications set in and thereby hangs the tale. But see for yourself this exceptionally rapid and exciting comedy.

CAST OF CHARACTERS
Robert Stetson, an ambitious young newspaper man.....Roby Laing
John Harding, who has it in for him.....Hume Rumph
Aloysius Dalrymple, bug house on butterlies.....Watson McAlexander
Pinkerton Bean, something in the pill line.....Clifford Walker
Elaine Stetson-Harding, Robert's sister.....Rosamond Radford
Narcissus O'Keefe, Dalrymple's fiancée in "movie" line.....Alice Vaughn
Martha Winthrop, a neighbor of Mrs. Harding's.....Fern Ward
Alice Lindsay
another.....Edna Chittenden
Dora Atherton
another.....Zeta Davison
Katie, made in Ireland.....Muriel Rhodes
High School Auditorium, April 5, 8:15 p. m. Admission 25 cents.

Lumber Preservative.
It has recently been discovered that gum lumber when immersed in pure gummied spirits of turpentine lasts many years longer when exposed to open air. The usual method of treating the lumber is to give it three coatings and allow it to thoroughly dry after each one.

SHERMAN'S DOTS

THE DOTS SOMEWHERE IN FRANCE.
By Clifford Leon Sherman.

Dear Folks:—They found out at the hospital that my leg was not broken and I was greatly relieved. The next morning after my arrival I wanted to go down to the pier and see the boys, but I found I couldn't walk very well. Outside of the hospital was a French soldier in a wheel chair. He had the funniest whiskers I ever saw. But I am never going to laugh at a Frenchman's whiskers. He turned out to be a dandy fellow, and when he learned that I wanted to go to the pier he loaned me his SAMMY.

To complete the picture, draw a line from dot 1 to dot 2, then from dot 2 to dot 3, and so on.

(Copyright, 1917, by The Bell Syndicate, Inc.)

very skilled and quick at a monotonous job.

The pay is that prevailing in the town in which they work and arranged with the French authorities. One of the great advantages of employing French women is, in addition to their quickness and skill, the fact that they live close at hand, thus saving the need for importing English people for unskilled work.

The French woman's labor has one characteristic that is recognized by the military employer. It is a little erratic. Six francs a day is the usual pay, and if a woman does not choose to work a consecutive number of days she stays away, and no one says anything. They are also a mobile labor, and if a group decide to move elsewhere owing to air raids and other causes, they depart with all their goods and chattels. Always they please themselves in purely personal matters while remaining on the best of terms with their employers. Of their strict honesty I heard constant praise.

TELLS GHASTLY TALE

Inhuman Germans Described by Holy City Refugees.

Great Suffering Among Population of Jerusalem After Germans Took Control.

Denver, Colo.—Stories of the frightful experiences suffered by residents of Jerusalem previous to the capture of the Holy City by British forces under General Allenby were told here by Miss Cella Molnestein, who, with her mother, fled from the torture inflicted by Turkish soldiers and German officers there several months ago.

Miss Molnestein and her mother were among 800 refugees who escaped from Jerusalem while thousands were starving within the gates of the ancient city.

"There was agonizing suffering among the civil population of Jerusalem after the Germans took control of that city," said the youthful refugee. "Hundreds died of starvation when food, imported for the inhabitants of the stricken city, was seized by military authorities and diverted to the soldiers. Our friends fell dead about us like flies. Scores of young girls sold their souls to the German soldiers in return for food."

It took five months for Miss Molnestein and her mother to reach Denver after leaving Jerusalem.

"We witnessed the most heart-rending scenes while traveling through Austria," the girl declared, "where roads were filled with cripples and food was so scarce that the peasants refused to sell even small portions at fabulous prices offered by the travelers."

MRS. ROYALL C. JOHNSON

Mrs. Royall C. Johnson, wife of the South Dakota congressman who has enlisted as a private in the National army. She will remain in Washington with her two sons, aged eleven and nine years, while her husband is in training at Camp Meade.

JUST A REINCARNATED BIRD

If You Feel an Exhilarating Desire to Soar Among Clouds, That Is Your Sphere.

Los Angeles.—If you are an aviator or feel an exhilarating desire to soar among the clouds you are a reincarnated bird and your natural sphere is in the air, according to Mrs. Leon H. Mumford, well-known actress here. She says many men and women have bird souls and that a reincarnated snake could never be at home off the ground.

Mrs. Mumford, known to her friends as "Dottie," made her first flight at Long Island several years ago. She

is planning to desert the stage for the airplane. "The reason is," she explained, "when I am in the air I feel as if I had gotten home after a long absence."

BREAKS COIN MAKING RECORD

Denver Mint Works Night and Day to Meet the Demand for Small Coins.

Denver.—The Denver government mint is working day and night to meet the demand for pennies and other small coins caused by the "odd" change necessary in the payment of the new war taxes. Exactly 10,000,000 pieces were coined during November. This was a record-breaker for the Denver mint. The superintendent said today the record for December is the greatest in the history of the mint. Excepting December, 65,300,800 coins were minted in 1917, the largest in denomination being 50-cent pieces.

ALL HAVE THEIR UNDER-DOGS

Good Reasons Why People's Sympathies Are With the Fellow Who Is Temporarily Down.

Our sympathies naturally travel the line of likes—that is, the things we feel in ourselves, we feel in others. We applaud the under-dog, because we so often have been the under-dog. We like to lift the other fellow up when he is down, because we also have been down. Sympathy starts at home—or else it isn't sympathy.

Your periodic moods of failure and disappointment are your under-dogs. So, instead of walking past these under-dogs of yours and casting no sympathy their way, pause to give them your heart and your hope, and soon the picture and fact will be your over-dogs—your victories and your genuine achievements.

No under-dogs can possibly appeal in importance to the under-dogs of your daily experience.

Perhaps you will applaud alone the under-dogs of your personal glooms and shadows, but what of it? As Lowell says: "Daily, with souls that cringe and plot, we sinners climb and know it not." What difference, what odds, so long as over your "manhood bend the skies?"

Courageously cheer the under-dogs of your experiences and stay proudly by them until their fight becomes a factor of your kingship.—George Matthew Adams, in Good Housekeeping.

GLASS STAINED BY X-RAYS

Experiments Have Shown These Products the Same Effect as the Light of the Sun.

It is well known that glass exposed for long to sunlight acquires a violet tint. In very old houses the windows facing south are often distinctly violet. Experiments recently made in the laboratories of the General Electric company at Schenectady with X-rays prove that these can be used to dye glass in many colors, principally an amethystine violet and an amber yellow, but also green and bright yellow.

These colors, according to Mr. Rosenthal, who conducted the experiments, are due to modifications of the physical structure of the glass and not to chemical alterations. The color can be made to penetrate to any desired depth, from a mere surface tint to complete coloration of the entire substance. And the same method can be applied to tinting porcelain, enamel and precious stones.

An interesting and important fact about this glass that has been colored by long exposure to X-rays is that it becomes impervious to the radiations that have transformed it. Thus it can be used as a protection against the glare of the sun or the snow and against the X-rays themselves.

Russia and the United States.

The old autocratic government of Russia was always particularly friendly to the United States. During the Revolutionary war Russia offered to mediate for peace and her offer was accepted by the United States but declined by Great Britain. Russia was one of the first governments to recognize the independence of the United States and continued to show her good will by making treaties of amity and commerce with the United States. Several of our early presidents in their messages referred to "the continued friendship of Russia." In 1823, Russia proposed a friendly adjustment through diplomatic channels of the boundary line between American and Russian possessions in the Northwest, and President Monroe authorized the United States minister to Russia to attend to the matter. In doing so he said: "The government of the United States has been desirous by this friendly proceeding to manifest the great value which they have invariably attached to the friendship of Russia and their solicitude to cultivate the best understanding with that government."

Love in Fishdom.

This is no "fish" story as the term is usually referred to, but it is a story about fish. Jim Foster, student of fish affairs, vouches for its authenticity. Jim has a collection of big live fish in a small aquarium in a downtown restaurant and for 12 hours every night he watches them perform.

In the morning—say, it's amusing to watch them yawn and stretch themselves.—Detroit Free Press.

How Would You Tie a Camel?

Because of its peculiar swaying motion in walking the camel has been called the "ship of the desert." This title may also have some reference to the extreme stupidity and passivity of the animal, which submits to great loads, which it will often carry for days at a time without stopping for food or drink, with no more urging than a ship would require from the hands of its pilot, says the Popular Science Monthly. The manner in which the drivers hobble the camels when they stop for a rest is interesting. They do not depend upon stakes driven in the deep, yielding sand, but simply double back and tie one of the fore-legs of the animal, so that it can't down or rise up, but cannot move from the spot.

HOLD LIBERTY BONDS

People Urged to Retain Them as Permanent Investment.

Government Discourages Practice of Merchants in Accepting Them in Exchange for Merchandise.

United States treasury officials are seeking to discourage the practice followed by many merchants throughout the country of offering to accept Liberty bonds of the first and second issues at par, and in some cases at a premium, in exchange for merchandise. They hold that such practice defeats the primary object of the sale of the bonds, discouraging the general thrift movement and increasing expenditures, thus depriving the government of labor and material needed for war purposes.

"While I have no doubt that merchants are actuated by patriotic motives," said Secretary of the Treasury McAdoo, in a statement given out through the federal reserve banks, "I am sure that they have failed to consider the effect which the acceptance of their offers has upon the situation. We are making the strongest effort to have these government bonds purchased for permanent investment by the people at large, to be paid for out of the past and future savings of those who buy them. Purchases thus made not only result in providing funds for the uses of the government, but they also effect a conservation of labor and material.

"When the bonds are exchanged for merchandise, the primary object of their sale is defeated, discouraging thrift and increasing expenditure. In addition to this, such bonds, when taken in exchange for merchandise, must in most cases be immediately sold in the open market. This naturally tends to depress the market price of the issue and makes it less easy to sell future issues at the same rate."

Secretary McAdoo believes that the merchants of the country, upon a more careful consideration of the subject, will discontinue their efforts to sell merchandise and take Liberty bonds in payment for it.

CONVICTS KEEP THEIR WORD

Warden Liberates 40 of Them for Holiday, and All Return to the Prison.

Rahway, N. J.—Warden Frank Moore of the state reformatory experimented during the holiday in permitting prisoners, after receiving their ward of honor to return, to spend Christmas at home.

He liberated 40 of them and they all returned within the agreed time. "Harry the Buster," who is clever at jail deliveries, was one of the forty. Another was a young man who took a large turkey home to his mother. His friends made him good-bys as he left Christmas night, believing his story of having business elsewhere. They did not know.

FRENCH WOMEN IN 1,000 TASKS

Girls Help in Mending of 30,000 Pairs of Soldiers' Boots a Week.

DO ALL KINDS OF LABOR

Old and Young Rendering Good Service in the War Industries—Only 30 Per Cent of Waste is Ever Salvaged.

Paris.—French women, old and young, are nobly performing their tasks in war industries, thousands working in all kinds of industries within the bound of German guns. They are praised for their intelligence and industry, from the little girl from the lycées to the old woman who has come back to work because she wants to see the Boche punished for what he did to France in 1870.

The French workers formerly had been lacemakers, and a few of them fisher girls. Of the former there were a few who were the children or grandchildren of English people from the great English lace centers at Nottingham, who had settled in France many years before and been absorbed into the life of the French people.

In the salvage centers at an ordnance base I saw them working in the biggest boot repair shop in the world, where 30,000 pairs of boots are repaired a week; and here I saw old uppers cut into disks, which in their turn were made into boot leaces. These salvaged boots, swept up from the debris at the front, emerge finally in three classes: 1, those that can be used again by men at the front, and are often preferred to new, as they are softer in wear; 2, those for men on the lines of

communication; and, 3, for prisoners and colored laborers.

Only 30 Per Cent Salvaged.

While I was going round these repairing shops I noticed an American officer being taken round also, and heard his clerone giving him information on the importance of salvage—all of which he was carefully noting. There were Frenchwomen cleaning old web and leather equipment by revolving brushes; French girls sorting salvaged ammunition, the "empties" being sold to the French government; there were girls washing discarded haversacks, cleaning rifles, picking through masses of horseshoes to see if there was any wear left in them; there were girls sorting out old helmets and picking the few good ones to be washed, sandpapered and "camouflaged." All of these things had been swept up from the debris of the recent fighting. Yet only 30 per cent of waste is ever salvaged from this fighting line.

They were repairing and riveting spurs; they were making wooden sticks for Watson's signaling fans; they were sharpening blades of horse-clippers; they were repairing wheels and cleaning the bolts and hubs of the wheels, and doing a thousand other curious routine things. Most of them sang at their work ribald little French songs, which occasionally changed to the doleful "Marseillaise" when they saw a stranger near them. Industry means happiness in France, where all who cut must work, even the dogs.

In the textile factory there were girls handling over five tons a day of old tents; others were repairing them upstairs at the rate of hundreds a week. They cut out disks for signaling, and the tubs for soldiers' greentents; they were making up the parcels that go in Tommy's greentent pocket, buttons, thread, etc., each one at a great table having her share in the process.

Help in Clerical Work.

There are French girls also helping in the clerical section of ordnance, working side by side with W. A. A. C.'s, filing papers, though they know no English, by numbers, and becoming
