## UN Organizes Aid For Congo Town Cut Off By Reds

LEOPOLDVILLE (UPI) -United Nations officials today organized help for the small Congolese town of Gungu, which is besieged by Communist-led terrorists and running low on food and ammunition.

BAILEY

BETTLE

POP

PRICILLA'S

 $\mathcal{H}$ 

Gungu, about 280 miles southeast of the capital, is in Kwilu Province, where guerrilla bands have attacked towns and mission stations in the past month. But no missionaries were believed to be in the besleged town. The last American missionary working in an area endangered by the terrorist

bands, Miss Mae Clark, 55, of Myeradale, Pa., was rescued by UN helicoper Saturday.

Miss Clark had refused to leave her orphanage at Kalanganda unless the 19 African orphans in her care could be rescued, too. But the terrorists refused to allow the children to leave the area and officials finally persuaded Miss Clark to go.

The orphange is just north of Idiofa, one of the centers terrorists activity. The ol guerrillas, led by Pekingtrained Pierre Mulele, a white missionaries from the area they control.

## At New High WINTER PARK - Regis

trations in the Rollins College School of General Studies reached an all-time high when Director George Saute reported 922 registrations for semester IB.

Thirty-four classes were offered for the current semester which began this week and continues through March 12. Half of the offered courses are being taught at the Winter Park High School, the remainder being offered on the Rollins campus.

Director Saute revealed that the previous record registration for the Rollins adult education program came during the first semester of the current academic year. At this time, 688 registrations were recorded.

During the first session of the Rollins School of General Studies, in the fall of 1961, there were 247 registrations. "During each following semester," stated Saute, "we have continued to record amazing progress as is evidenced by registrations re-

ceived for semester 18." Semester 2B in the Rollins College School of General Studies will begin March 30 and continue through May 21.

### Degrees

Mark master and past master degrees will be conferred on a group of candidates by he Reyal Arch Masons at 7:30 p.m. Wednesday at Masonie Temple.

in the next 60 days:

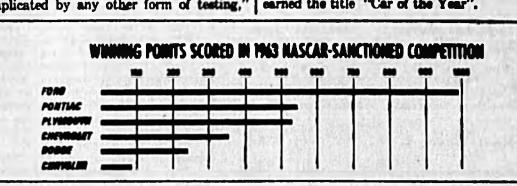

Motor Trend magazine's coveted "Car of the Year" award was won this year not by declared. just one car, but by the whole Ford line -Ford, Fairlane, Falcon, and Thunderbird. Singled out for special tribute was Ford's unique concept of total performance - a blend of power and acceleration, handling, balance and cornering ability, strong braking, and tireless durability -- as proved in competitive | Motor Trend. And victories from coast to coast.

Motor Trend's citation also saluted the part Ford's racing program has played in the development of total performance. "Rallies, endurance runs and racing . . . cannot be duplicated by any other form of testing,"

Motor Trend's editor The full story of how the Motor Trend editors analyzed and evaluated the cars

can be found in the February issue of the full meaning of

total performance can be found at your Ford Dealer's! Step in and test-drive a '64 Ford, Fairlane, Falcon or Thunderbird. See for yourself why Ford earned the title "Car of the Year".

The Solid, Silent, '64 Super Torque Ford

### "The Year of the Test Drive" The "Car of the Year" award salutes Ford's

total performance. But the term total performance is just words until you take a new '64 Ford, Fairlane, Falcon, or Thunderbird out on the road!

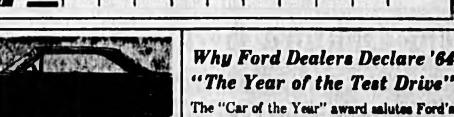

These cars are such a change from the past that you will recognize it immediately when you drive them. So come in. Take a test drive. Let the cars speak for the maeloos. They'll show you a brand of total performance that's totally new!

cal fitness.

really aiming for.

Margaret Chase Smith won't be elected president of the United States. She hasn't even a chance for the Republican nomination: No one knows this better than the senator herself.

That she will do neither of these things cannot be laid entirely to male bullheadedness and egotism. It will also be because of the prejudice of women toward their own kind, their apathy toward politics, their too frequent retreat back to the kitchen after their mothers and grandmothers (some of them prepared to give their lives for the cause) won the right to vote 44 years ago.

Mrs. Smith was probably not re-ferring to this directly when she said challengingly, "Because of the compelling reasons against my run-ning, I have decided I shall."

The compelling reasons, of course, are tradition and male control of the party machinery. Even if Senator Smith were a man, there would be other factors giving pause: She is 66; she comes from a small state with few delegates; she has no great national following.

But she has also made it clear that she is running in order to smash the fallacy that a woman should not, by the very laws of nature, be pres-ident. She has sounded a clarion call to her own sex, and it is the re-sponse of women, not men, that will decide whether the idea is failacious or not. This could put women in much

**5** directions

You may want to own stock with the aim of building a second income. Or to give your money a chance to increase as the years fly by. Whatever your goal, here are 5 directions to help you stay on the track:

First, give careful thought to the broker you chanse. At a Member Firm of the New York Stock Exchange you'll have the help of a broker who, when he was registered, had to meet Exchange standards. Though Member Firms may differ in many ways, they are all subject to the Exchange's rules and regulation

You'll be wise to be candid with him about your resources and ambitions. For the investing route you take depends upon where you hope to go. And you're more likely to get there when your investments enugly fit your goals. He can help you with your decisions—but don't expect to find a crystal ball on his desk.

Second, weigh the risk against the reward. Some companies have prospered greatly and their shareowners have benefited -sometimes handsomely-from their growth. But other com-panies have found the going rougher, perhaps making no profit, paying no dividends. Keep is mind, too, that stock prices, like other prices, fluctuate for many reasons.

Third, consult your pecketbeek. Are your living expenses amply cared for? Have you made proper provision for emergencies? Do you still have funds left over? Then you may be ready to consider making some of your dollars work as bard for you as you worked for them-through investment in good stock.

Fourth, shways distinguish between fact and rumor. When tips and rumors have no basis in fact, they can cost you dearly. Ask your Member Firm broker to help you check earnings and dividend records, sales trends and other imporrmation. And inquire about the relative safety and stability of bonds.

Fifth, suid for a copy of "DEVIDENDS OVER THE YEARS," The coupon below will bring you, free, the records of more than 500 stocks that have paid cash dividends each year for 25 years or more. It also tells about the Monthly Investment Plan through which you can start acquiring stock by investing ing with an little as \$40 every three months (\$3.06 a week). Send the coupon today.

quintet.

The following is a letter from John A. Russell, 2030 Magnolia Ave., Sanford, with reference to a matter he wishes to call to the attention of Florida boaters.

"The following paragraph is taken from a booklet entitled "Safe Boating in Florida" and published by the State Board of Conservation.

"It states: Revenue received from pleasure boat registration fees, except for \$2.50 allowed the state from each fee for boats in excess of 12 feet long for administrative expense, is distributed among the various counties on the basis of the number of registered boats in each county. Two thirds of the boating registration fee allotment distributed to a county is earmarked for the county school bcard and one third for the county's general fund. Surplus funds in the state's share go to the outdoor recreation program for improvement of boating facilities.

When the registration law was first imposed on Florida's boaters, it was generally assumed to be a good thing since the registration fees were supposed to be used to improve boating facilities. In this boaters opinion, Florida's waterways and facilities, except for those privately owned, are generally in worse shape than before the registration law was enacted.

"Many waterways are in dire need of clearing out, channel markers have rotted away and have not been replaced, ramps and trailer parking facilities are lacking in quantity and quality and are overcrowded, major ramps are without lights for the convenience of those coming in after dark or leaving before dawn, and many ramps are without a dock to tie your boat to while you tour the parking area for a place to leave your car and trailer.

"After reading the foregoing paragraph for Safe Boating it is easy to see why these conditions exist, despite the enoromus "take" from boat registration fees. From each registration over 12 feet, \$2.50 goes to the state for "administrative expenses" (WOWI), and surplus funds from the administrative expenses is all that is used for the betterment of boating facilities. But to really top it off, two thirds of the money allotted to the counties goes to the insatiable school boards.

"Fellow boaters, this is grossly unfair. We are being raked over the coals, and it is time for a change. We already pay plenty in taxes associated with our sport. Gasoline taxes, sales taxes, a federal excise tax on trailer accessories, and a license tag for our trailers, to name a few.

"If the school boards need more money, it should come from all the citizens. No minority group, such as owners of boats, should be forced to pay more than the public as a whole.

"I feel that boat registration fees should be reduced to a more reasonable level, and that all funds, outside of absolutely necessary administrative expenses (surely no more than 50 cents per registration) should be spent for the benefit of those paying this tax . . . the boaters.
