

SEMINOLE COUNTY FAIR AT SANFORD, FEBRUARY 5th-10th, 1917

PUBLISHED SEMI-WEEKLY THE SANFORD HERALD ON TUESDAYS AND FRIDAYS

IN SANFORD—*Life Is Worth Living*

VOLUME VIII

SANFORD, FLORIDA, FRIDAY, FEBRUARY 2, 1917

NUMBER 48

ALL READY FOR THE FAIR NEXT MONDAY

GROUNDS WILL BE IN FIRST CLASS SHAPE FOR THE EVENT

All ready for the big fair to start Monday.

What would be nice for President Wilson to press the button that would start the Seminole County Fair in the face of many difficulties it was thought advisable to start without his O. K. and he has sent his regards at not being able to start our fair, but hopes to be here next year.

Nevertheless the big Seminole County Fair will open in a blaze of glory next Monday, and while there will not be much doing until Monday evening, the crowds will gather there to see the carnival attractions and the light lights.

On Tuesday the real opening of the fair will take place and the parades and start things moving on the 19th or 20th. The grounds are being put in better shape every day, and Manager Lyman was out this morning at daylight with a force of men tightening up the tent stakes and looking after the various exhibit buildings. The high wind rapped the canvas hard but no damage was done and the tents are in good shape.

Every fairgoer over the road will be in the fair week for two reasons. The wind and there will be a record breaking crowd present.

The exhibits are stacking up in great shape and the fair promises to be one of the best ever held in Sanford. The fair will be a revelation to the many visitors for Sanford the greatest vegetable section in the state and the mammoth displays in that will be worth seeing. The poultry will be another strong point and some fine birds will be seen from this and other counties. There will be plenty of fair and plenty of refreshments and the people who come here will not be disappointed. Rates have been granted on all refreshments.

rooms at once, or leave word with Mr. Lyman, Gen. Mgr. of Fair, and they will call and see you.

Mr. Brumley an Inventor

Besides his many other accomplishments, Mr. L. A. Brumley chairman of the board of county commissioners, celery grower, cotton raiser, and cotton gin promulgator is an inventor and to prove this he has his patent papers at home in his trunk. On January 23rd the patent office at Washington issued to Mr. Brumley letters patent of certain improvements in fertilizer distributors. Mr. Brumley has a machine that will revolutionize the fertilizer distribution, and is one of practical make having all the advantages of other machines combined with the principal feature for which this one is patented, that is the location of the wheels within the vertical plane of the machine, and working on a sliding journal, making the width of the ground covered to be adjustable by merely turning a set screw, and without throwing the whole machine off commission at the time. This machine can also be adjusted to distribute broadcast or in rows, and as much or little as desired. It is said that one man, a mule and this machine will do the work of seven.

In addition to his work with the county he has been engaged writing business for the Hospital Life Insurance Co. This entitles Mr. Follett to attend a banquet to be given in Jacksonville by the leaders of the social life in that city in January. He is also connected with the State of Florida, he having been a member of the Florida House of Representatives.

Mr. Truman G. Fitch, city attorney of that thriving neighboring city of Leesburg was a visitor in Sanford yesterday.

FAIR PROGRAM GIVEN FOR WEEK

KEEP THIS PROGRAM AND PASTE IT IN YOUR HAT

Next Monday is opening day of the Seminole County Fair and in order that every one can keep up with the many varied events the program is published below. Read it carefully and preserve it for future reference.

Monday, Feb. 5.
Informal opening of fair week at 2:30. Carnival attractions and opening of exhibits.

Tuesday, Feb. 6.
Grand Opening Day and Automobile Parade at 2:30. Formal opening address by President C. R. Walker. Prizes awarded to winners of Auto parade Carnival attractions after noon and night.

Wednesday, Feb. 7.
Old Settlers' Day. Address by Hon. J. N. Whitner at 10 a. m. Free ride on Lake Monroe for old settlers at 11 a. m. Carnival attractions day and night.

Thursday, Feb. 8.
Border County Day. Baby Parade at 10 a. m. in Central Park. Awarding of prizes on fruits, vegetables, farm products, jellies, fancy work, etc. Carnival attractions day and night.

Friday, Feb. 9.
Educational Day. Governor Catts will speak at Fair Grounds at 11 a. m. Address of Welcome by President Walker. This will be School Day and the school children will meet Governor Catts at Union station at 10:30 and march to Fair Grounds.

Carnival attractions day and night.

Saturday, Feb. 10.
Field Day. Athletics and riding Tournament. Events start at Fair Grounds at 10 a. m. The athletic will be in charge of Prof. Hutchison of the Sanford High School. Suitable prizes will be given winners. Carnival attractions day and night.

Reg'D. Hunt to Preach Sunday.
Rev. L. D. Hunt will preach again at the Presbyterian church Sunday night at 7 o'clock. The pastor will preach at the morning service and the Sunday school will hold its service at 9:45. Visitors to the city are invited to these services.

Dates of Fairs

South Florida Mid-Winter Fair and Gasparilla Carnival at Tampa February 2-10, 1917.
Seminole County Fair at Sanford, Feb. 5th-10th, 1917.
Osceola County Fair at Kissimmee, Feb. 14th-17th, 1917.
Manatee County Fair at Bradenton, Feb. 20th-23rd, 1917.
Sub-Tropical Mid-Winter Fair at Orlando, February 20th-24th, 1917.

STATE SUES NEW TRUST CO. EAST COAST TAKES HEARD CANAL CO. NATIONAL

ATTORNEY GENERAL WANTS FIVE HUNDRED SHARES OF STOCK TAKEN BY FLORIDA COAL AND CARBON CO.

MAIL GOOD

Jacksonville, Fla., Feb. 1.—The attorney general late yesterday instituted mandamus proceedings against the Florida East Coast Canal Transportation Co. to compel it to maintain its canal leading from Jacksonville to Miami and a writ of mandamus was issued this morning directed against Apopka trustees for the same purpose.

The suit is to be heard on March 1. The attorney general's action is based on the fact that the canal is required by law and to maintain it in this condition.

The suit was brought in the name of Thomas F. West, attorney general, in behalf of the state of Florida, and is regarded as a suit of far-reaching importance since it is an exercise of the power of the state over public service corporations to require them to perform the duties and services they owe to the public.

The suit is especially important to the people of the east coast as this canal was intended to provide a protected inland waterway down the east coast, giving the people of that section safe and inexpensive transportation. The canal company received from the state by legislative grants more than a million acres of land valued at from \$2 to \$5 an acre to assist in the construction of its canal and the state is therefore interested in seeing it perform its duty and maintain a canal so that it may be used by the people and serve the purpose for which it was created.

It is charged in the writ issued that the company has neglected to maintain its canal at the width and depth required by law and is evading and shirking the obligations it owes to the general public and is thereby subjecting the public to great inconvenience and loss, depriving people of transportation intended to be afforded by the canal and defeating in a large measure the intent of the state in aiding in its construction. By the writ issued this morning the company is required to fortify with restore its canal to its original dimensions and thereafter to maintain it as the law requires.

The above despatch will be interesting to Sanford people as we have long contended that the East Coast Canal had never been completed and that it was wrong for that company to endeavor to foist the canal on the government. The canal company has never carried out their contract with the state and the Sanford Board of Trade through the Waterways committee can take credit for exposing the hand of the canal company and bringing the attention of the state to the condition of the canal. The state should hold them strictly to their contract and block any attempts to either sell to the government or take any more state lands until the original contract is carried out. The suits will be watched with more than ordinary interest by the citizens of the central part of the state especially in the St. Johns river territory.

The occasion is in honor of the raising of a fine new United States flag on the grounds of the public school, and all the schools of the county have been invited to attend. There will be other speakers than the Governor also, and music, not only by the school children but by the best procurable band and by the best of local talent which the community can produce. There will be "something doing" all day, from 9 in the morning until late at night, for it is planned to close the day's entertainment with a dance at the town hall to which all are invited.

Nobody need go away hungry for there will be a barbecue in a prominent part of the town. The parade will start at 10 a. m. and one feature of it will be the Living Flag, composed of students from the Mt. Dora school, which received such complimentary mention at the school fair parade last Friday.

Although there will be several prominent visitors, several of whom will take part in the day's exercises, no formal program will be arranged, as it is thought by the committee in charge of that part of the day's plans.

We extend a cordial invitation to all to be present, and are putting forth every effort possible to make arrangements by which visitors may reach out-of-city conveniently from a points.

Come yourself and tell everyone else to come. Mount Dora will welcome you and assure each and every one a grand time. This is a great event, do not miss it.

Methodist Church

Rev. Mr. Hunt, a former pastor of the Sanford Presbyterian church will preach at the Methodist church next Sunday morning at 11 o'clock. Many friends of this good man who followed him here bearing fruit in Sanford since he labored here still feel glad to have him at the pulpit.

In the face of the declaration of the United States nearly a year ago, that relentless submarine warfare would force this country to "sever diplomatic relations" with Germany, the note is accepted as making a break imminent.

It is pointed out, however, that a break in relations would not necessarily be followed by war between those countries.

The German note is a reply to Wilson's peace program as outlined in his recent speech to the senate as delivered formally to Ambassador Gerard at Berlin.

Sanford, afternoon. Count von Bernstorff, German ambassador called at the state department to deliver to Secretary Lansing the translation of the German note.

The Ambassador was with the secretary for a few minutes. He departed hurriedly, looking grave and refused to answer questions.

President Wilson cancelled all engagements and hurried to the White House where he studied the momentous document.

A cloud of deepest anxiety has settled over the White House and State Department.

The next move of the United States is undetermined and it is believed President Wilson may delay action until the official text of the note is received which will probably require forty-eight hours to transmit. The situation is complicated by the fact that the German "Barred Zone" about England and other entente countries became effective at midnight last night and probably a dozen ships of American nationality or loaded with American citizens are on the way to the area of destruction.

At the entente embassies the latest German war move is looked upon as certain to cause a break between the United States and Germany.

At the German embassy the situation is looked upon as gravely critical.

There are strong indications that no diplomatic measures by the United States could deter the submarine plan.

It is believed that before the President takes decisive action he will lay the problem before a joint session of congress.

Two courses are open: First, to recall Ambassador Gerard and hand Ambassador Bernstorff his passport, thus breaking the diplomatic relations; the second, the United States might content itself for the present with a protest.

Senator Tillman, chairman of the naval affairs committee, in an authorized statement said in part: "We should tell the diplomatic representative of the Teutonic governments in Washington to pack and go back to his fellow barbarians at once."

He declared we should back up protection of American citizens with the army and navy.

Among The Theatres

Anita Stewart Stars In New Drama of Russian Life, "The Suspect".

Miss Anita Stewart, the Vitagraph leading ingenue plays the leading role in the new Blue Ribbon Feature, "The Suspect," with that finished touch which has long since proclaimed her an artist in her work.

In this production Miss Stewart is caused to become a Nihilist by the harsh, inhuman treatment to which her family is subjected. Her conflicting emotions are evident to every person in the audience, as she seemingly lives through the years of pain and pleasure.

In two or three "close-ups" in particular, Miss Stewart's facial expressions are worthy of special mention. Her horror, which turns slowly to joy is wonderfully registered by this master artist of the film what has won her way into the hearts of thousands. Lydia Monday.

At the LYRIC MONDAY

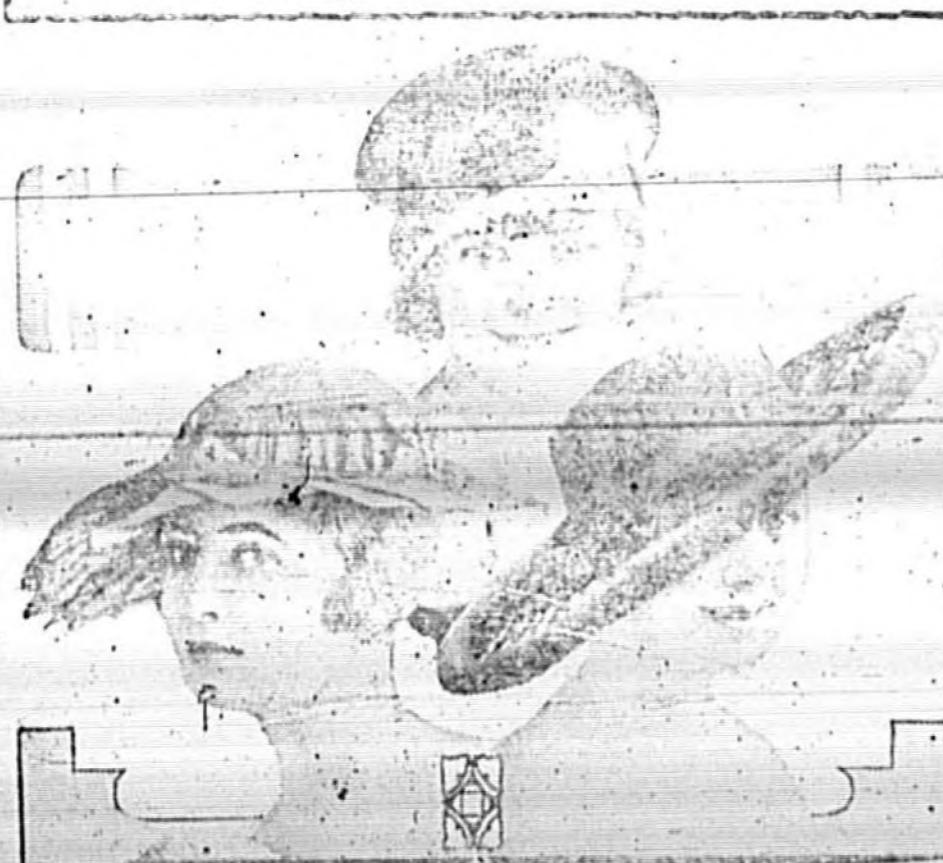

Hunting Scene Interesting Episode in "The Suspect."

The new Vitagraph Blue Ribbon Feature, "The Suspect," contains a great many beautiful and unique scenes. One of the most interesting is the hunting scene. It is far more than the best fox hunt ever seen. Different players are mounted on beautiful steeds with hunting dogs barking at the hounds' heels.

At one place in particular the dogs apparently rush right at the camera and stand there barking and wagging their tails, lifting the cud. A the hunter runs past the dogs.

The photograph of the scene is excellent and adds to the already attractive production which was directed for the Vitagraph Company by S. Ramon Dwyer. Lydia Monday.

The Gorgeous Hat of Midwinter

Midwinter millinery is about to make its exit from fashion's stage. It has made a splendid performance and will be bowed out amid many plaudits for its brilliant triumphs, for it has grown more and more, rich and beautiful as the seasons advanced to its climax. Already demi-seasonal hats of satin are making their appearance, intended to tide over the time between winter and spring. But we shall not turn our backs on the gorgeous hats of midwinter without casting "one longing lingering look behind."

A look will be rewarded with such inspiring headwear as is pictured in the group of hats above; and any one of them is fascinating enough to make one bless the winter season. At the center of the group a hat of heavy blue silk lace is made over a wire frame and lined with silver gauze. The Nattier blue of the lace looks particularly well with moleskin, and the hat has a top crown of this fur. There are medallions in the pattern of the lace, about the side crown and every other one is covered with a medallion of fur.

At the left a hat of satin is covered with a delicate net and lace of gold. The lace extends beyond the ribbon in the brim. There are three clusters of

Lost Valuables Strangely Found.

A New York hotel man told this experience: Visiting Bridgeport, he went down the bay one afternoon, and seating himself on a rock, took out the water with his cane. A loose fitting diamond ring fell from his finger and disappeared. The next morning at low tide he again visited the spot, but without much hope. Upon the very edge of a rock, at that tide high dry, lay the ring. If it had fallen a sixteenth of an inch farther out, it would have gone down in ten feet of water.

Making the Best of It.

Marjorie had a red-and-yellow clown suit given her and thought it would be great fun to surprise mamma and papa, but her big brother put the suit on and got ahead of her, so Marjorie put it on a yearful time for several minutes, when she came to me and said: "Mamma, won't you please forget the color?" thinking she might get surprised as she went running to the Tribune.

Brightens Metal.

When the curtain rings and pole ends grow discolored and black they quickly brighten up and show most of their original luster if they are boiled in vinegar for a short time.

Bible Widely Distributed.

Within a hundred years more than a hundred million copies of the Bible have been distributed.

Department of the Interior U. S. Land Office at Gainesville, Fla.

Mr. G. R. Lee, Commissioner of the Florida State Land Department, has submitted to the Interior secretary a bill to increase the amount of land available for homesteading under the Homestead Act. It is estimated that the amount of land available for homesteading under the act will be increased by January 1.

Front View of the House

See front view of the house shown here. It is a gabled roof house with a porch on the front entrance. It has a central entrance door and two windows on either side. The roof is steeply pitched with a small chimney on the left side.

BUOY TRAVELS 3,300 MILES

Navy Charts the Roving Course of Nantucket Shoals' Whistling Device.

Washington.—The roving voyage of a whistling buoy has just been written into the maritime records by the United States bureau of lighthouses and its courses charted by the hydrographic office of the navy in the interest of science.

Nantucket shoals' whistling buoy, stationed off the Massachusetts coast to mark the location of the Nantucket shoals lightship, began its wanderings on January 20, 1916, and with its siren constantly sounding a dolorous warning to mariners continued its voyage for a year and seven months.

It was recovered August 16, 1916, in good condition approximately 275 miles northwest of Bermuda by the French cruiser Marselline, towed into Bermuda and since has been turned over to the United States government by the Bermudian authorities. The buoy is again ready for service, after overhauling at New York.

Hydrographers estimate the buoy has traveled at least 3,300 miles.

GETS THE TALLEST CHIMNEY

Towering Pipe 567 Feet High Built in Japan Under Direction of American Engineers.

Tokyo.—Japan will have the tallest chimney in the world. Down on the east coast of Kyushu in the little village of Sagashimaki, 15 miles from Beppu, the great stack which when completed will be 12 feet higher than the Washington monument, is gradually building under the superintendence of American engineers and when finished will reach 567 feet up in the sky.

This towering pile is constructed for the Kumaoka-Mining company, which is building a new copper smelter.

The foundation is placed on the top of a hill which rises 120 feet above the level of the sea. From the seaside, counting the altitude of the cliff, there will be an almost straight rise of about 1,000 feet to the summit of the stack. The chimney is expected to be completed by January 1.

The present highest chimney in the world is at Great Falls, Mont., at a smelter works. Its height is said to be 506 feet.

HELPS TUBERCULOSIS FUND

Lillian Emerson, a nine-year-old North Carolina girl who has danced before Princess Victoria in London and her ghosts, Diwali Queen Mother Alexandra, the dancer-queen of Russia, Dowager Queen Amalia of Portugal and King Manuel of Portugal was the principal entertainer at a recent entertainment in Washington for the benefit of a fund to prevent the spread of tuberculosis in France.

WORRY DOESN'T PAY, ASSERTS UNCLE SAM

Washington, D. C.—The public health service, which has been gathering statistics on nervous diseases and their tendency to shorten life, has issued a bulletin against worrying.

"So far as is known," the bulletin says, "no bird ever tried to build more nests than its neighbor; no fox ever frayed because he had only one hole in which to hide; no squirrel ever died of anxiety 'lest he should not lay by enough nuts for two winters.' Instead of one, and no dog ever lost any sleep over the fact that he did not have enough bones laid aside for his declining years."

HIS EYESIGHT COMES BACK

Vision Is Suddenly Restored to Texas Man Who Had Been Blind.

Brownwood, Tex.—Full eyesight was suddenly restored to Mr. Lawson of May, this county, a few days ago, as he was walking down the street. One eye had been blind for a number of years and a short while ago he lost the sight of the other eye when a bit of wood struck him in it.

On the recommendation of physicians he had the injured eye removed and the one that had been blind for years operated upon.

The operation brought very little relief as he could hardly see at all, but while he was walking down the street a number of days afterward, the full sight of that eye came to him suddenly and he can now see a distance of 200 yards from him without difficulty.

Cluny Lace From China.

Cluny lace, the most widely serviceable durable and practical of hand-made edgings and insertions for general use where something worth while is desired, now comes from China. It is made there at lower rates than in Europe. The Chinese lace is known as Chee Foo, from the place from which it comes.

Ten Acre Tracts Unimproved Celery Land

In M. M. Smith subdivision now ready for sale. Some of the finest land in the Sanford Famous Trucking region.

MISSOURI HENHOUSE FOR AVERAGE FLOCK

OPEN FRONT BUILDING INURES FRESH AIR.

By H. D. REMSEIG, M. A., Architect
The Missouri henhouse, recently designed by the poultry department of the University of Missouri, college of agriculture, to meet the demands of a flock of such size as to keep up with the average farm flock, and to adapt it to Missouri conditions, is a good example of a simple, effective, and inexpensive house being the most economical to construct and affording a maximum amount of space. The ridge of the roof runs north and south, the roof sloping north and south, the roof being on equal spans; the eaves are five feet at the eaves. It is 11 feet high at the peak. The south end contains a door in the center and a window 2 by 6 feet on each side of the door. These windows are placed high enough to afford a 10-inch opening beneath one foot above the floor and extending the entire length each side of the door. This opening is covered with wire screen which keeps the birds in and the sparrows out.

Light.
On the east and west sides are two windows each 2 feet high and 3 feet wide. On the north end next to the door is a single 8 by 16-inch glass window. An arrangement which admits light from all directions has been provided because the light is so distributed that there are no dark corners, the light coming from the door, the window, the roof, and from the ground.

The greatest objection to the hen house is in that direction where she scratches. In consequence, there is a gradual movement of the litter toward the back end of the house. When light comes from only one direction there is a tendency to accumulate dirt in the corner.

The roofs should be level at the back; 4 feet high, 14 inches from the wall, 32 inches apart, and made of 2-by-8s with rounded corners. Posts two inches in diameter, if firmly placed, will serve the purpose nearly as well. Eight inches beneath the posts is placed a drop-out platform, which keeps the floor clean and dry. This floor space available for the persons. Underneath the platform are placed the nests. There should be eight inches of roofing space for each bird and one nest for every six or seven birds.

Tears and Laughter.
God made both tears and laughter, and both for kind purposes; for as laughter enables mirth and surprise to breathe freely, so tears enable sorrow to vent itself patiently.—Leigh Hunt.

TRIP TO THE EVERGLADES

Engineer Williams Writes About The Big Drainage Problem

Lake Okeechobee, Jan. 25, 1917

Mr. R. J. Holly, Sanford, Fla.:

Dear Sir—I am on Lake Okeechobee, returning to West Palm Beach from a trip given by the Board of Trade of West Palm Beach and the Drainage Association to the members of the Florida Drainage Association, who attended the fourth annual meeting January 22 and 23.

I regret that those in Sanford and Seminole county who were interested in drainage work were not at this meeting as it has been by far the best meeting the association has ever held, and the trip through the Everglades to Lake Okeechobee, and across the lake to Moore Haven has been the best educational trip that I have ever taken.

The addresses at the meeting Monday and Tuesday were excellent and being made by some of the ablest men we have in our country were of great value to those in attendance. The programs were excellent but I have not time nor paper to dwell on these addresses. They were such as to interest any one who is interested in the development of Florida.

Trip to the Everglades

On Wednesday morning promptly at 7 o'clock we met at the West Palm Beach Board of Trade headquarters and were taken by auto to Lake Clark, which is some three or four miles from the city. Here we boarded a boat and commenced our trip to Moore Haven. Each man was given a map of the Everglades Drainage District showing location of canals, the relative elevation of different parts of the Glades and the elevation of water at different points.

The route we took was by way of the West Palm Beach Canal which is 100 feet wide, 42 miles long and 10 feet deep. Lake Clark, where we commenced our trip is at present 13 feet about the Atlantic Ocean. It is connected to Lake Worth which is 17 feet above sea level. Dr. George T. Ladd, State Surveyor and geologist, accompanied us to control the water. Plans are being prepared for a lock to be placed in this canal so that boats can pass from Lake Worth to the West Palm Beach Canal.

Leaving Lake Clark we entered low, flat woods country, traversing same for 10 miles when we entered the Everglades proper. The Everglades through which we passed was a great flat country covered with saw grass as far as the eye could reach. While the country through which we passed was apparently level we could note that the banks of the canal which were barely visible at Lake Clark increased in height as we approached Lake Okeechobee to 4 feet. We also noted that there was a current toward the ocean and on consulting our maps found that Lake Okeechobee has an elevation of 17 ft. above sea level, giving the canal at present a fall of 4 ft. from Lake Okeechobee to Lake Clark.

Lake Okeechobee has been lowered 4 feet and is sufficiently low for the drainage of the land adjacent to the lake. Locks are to be placed in the canals so that the water at all points in the Glades can be kept approximately 3.5 ft. below the surface.

This drainage of the Everglades is a big project, but no one after taking this trip will doubt the possibility of it, and will readily see that there is plenty of fall to drain it by gravitation.

The soil in the Everglades is muck from 2 to 12 ft. deep, but in very few places less than 6 or 7 ft. deep, underlain by sand, marl and rock. One cannot help being impressed with the fertility of it.

Entering Lake Okeechobee one sees a vast expanse of clear fresh water, so great that the eye cannot see across it. This water is pleasant to the taste and a very good drinking water. Here we saw the sun apparently go down in the lake.

Arriving at Moore Haven, which is on the southeasterly side of the lake at 8:30 p. m. we received a hearty welcome from the citizens.

Moore Haven is a town fourteen months old of some 500 people who are engaged in farming the unclaimed land. Eighteen hundred acres are now under cultivation and the first crop looked fine. Here we saw celery, lettuce, Irish potatoes, eggplant, beans, sugar cane, cabbage, and several varieties of grasses, including alfalfa being grown.

N. A. Colbert, formerly of Sanford was among the citizens of this booming town and his knowledge of trudging is in evidence. A large acreage has been planted to Irish potato. While some tract is grown the prevailing opinion at Moore Haven is that the land should be used for general farming and staple crops.

A congenial party and delightful weather has made this a delightful

trip, as well as a profitable one from an educational standpoint.

The Florida Drainage Association has 150 members, of which 60 were present at the meeting. More interest should be taken in this Association and its work and I know of no better way to secure more interest than by securing additional members. There should be fifteen to twenty-five members in Sanford alone and all that is necessary to become a member of the association is to send Benj. Getzoff, West Palm Beach, Fla., \$1.00, for which each one will receive all publications of the Association, which are worth considerably more than the price of membership, and one can keep posted on the drainage work going on in the state.

In conclusion too much praise cannot be given the West Palm Beach Board of Trade for the reception given the visitors.

Yours very truly,
Fred Williams.

TAUGHT TO ROB MEN

FOR SALE

For Sale or Exchange—Reading Standard Motorcycle, equipped with Bosch magneto, Prestolite tank and headlight, Firestone tires, etc., \$50.00 cash, or will trade for small motor-boat in good condition. S. K. Guernsey, Orlando, Fla. 46-6tp

For Sale on West Side 100 acres, 7½ tiled and farmed to 500, with 3 flowing wells. One good loading station. Seven roads, all with bath room and hot water. Long time. Enquire V. Herald Office. 44-Fri-5tp

For Sale—Wholesale catching and shipping fish business, with boats and launches. C. L. Vincent, 46-4tp

EVEN THE GATE POST NOT IN IT

A CHURCH IN AMONG YE TAKING NOTES AND FAITH,
"HURT THEM NOT" SO SAITH HAUNTER.

Sanford is a church going town more hotel accommodations here than the many new and handsome there are many visitors at present churches being erected throughout and next year when we have the new hotel hotel there will be many church members if anything would think this matter over seriously and from every angle. When you take stock of yourself there is really no valid reason why you should not go to church at least once in Sunday. No sin of my acquaintance is as bad as the Lord's Day that he can't forgive those who are desirous where not go to church or to Sunday school. There is a good place in Elkhart to go back there again and again. It may be weeks before you get back again seriously. If you are beaten down and your roads broken away. This church is a comfortable place to meet and make the business arrangements. The young people to meet with others have wanted talking about various subjects. Hospitality, good company and good advice was always a feature in the church. And it is now. Our old church is still here. It may not be large but it is well known. We have the same opportunities for health and wealth that we had then. The best is past and gone but the young ones have some good advice to give them that they are willing to give.

BETTER LIVESTOCK

It was discussed at Meeting of the State Association and Institute Earth of Florida's ability to produce livestock for export. Was the theme prevailing throughout the entire meeting of the State Livestock Association and Livestock Institute.

The livestock situation in the state was discussed from every angle. Plans were made for future activity: members of the past and the present exposed; but every paper read in address made up the general theme that Florida can grow everything needed in the state, and Florida State College for Women to have sold out for export.

The fifth annual meeting was held at 10 a. m. March 2. The main sub-

jects were: the enforcement of the law and some times collected so that the smuggling of this pure work will not run out and the good work will be stopped.

PREPARE TO FIGHT H. C. of L.

That is an Object of the Housekeepers' Short Course at State Col-

lege.

All women of the state are interested in reducing the high cost of living. So they will be interested in the "Housekeepers' Short Course in Home Economics announced by Florida State College for Women to be held at the College from February 21 to March 3. The course will be economy in food and in

clothing, and other subjects.

I have gone out among the best people and find his credit high and reputation of the best.

If Mr. Perry establishes his school he will make it one that will be a credit to the town.

With best good wishes,

Yours truly,

C. D. Leffler.

And this is another one from the former secretary of the Miami Chamber of Commerce.

January 27, 1917.

Mr. R. J. Holly, Sanford, Fla.

My Dear Mr. Holly:

You may recall our meeting at the time of the Florida Press Association convention at Miami. I was at that

time the managing secretary of the Miami Chamber-of-Commerce.

I note with much interest that Mr. Alton H. Perry of the Pan American College of Commerce of this city is organizing a business college in Sanford. Mr. Perry stands exceedingly well in Miami, both as a business man and as an educator. We feel that his college is a very valuable institution for Miami and is an important factor in the business life of the city. I am entirely confident that any college with which he is con-

Not Dull'd by Age.
They still relish in Chicago and the West a witicism of George Ade's enunciating at a Christmas dinner in the early nineties.

A very pretty young lady said to Mr. Ade at this dinner:

"What do you think of our school of decoration—holly leaves over lapels?"

"Well, to be frank," the bachelor replied, "I'd just as soon sit in the mistletoe over yon—"

Looking Ahead.

"Here's my I.O.U. for ten thousand dollars!"

"But you only borrowed five thousand."

"That's all right! If I don't pay, you'll have to take me home."

"Well, Puck."

—
The bachelors replied, "I'd just as

A Personal Statement

To the Citizens of Seminole County:
I wish to let you know that I have been here since 1901 training business men and women in the most efficient way.

Our school is open during the winter months and we have a class every day except Saturday.

We have a large number of students, mostly men, coming to us from all parts of the country and from many foreign countries.

Our courses are designed to fit into any business or profession.

Our courses are conducted in a simple and easy way, making them accessible to everyone.
