Sigsbee had been in poor health for

Sigsbee rose to fame through one of the greatest naval disnators in Amerken history-the "blowing up of the Maine." He was 52 years old at the time; a captain, a veteran of the Civil War, and an inventor of deep-sea espering and sounding apparatus.

Captain Sigabec, commander of the Maine, was ordered to Havana harbor to protect American lives and property during the crisis of the Cuban rebellion against Spain in 1898. As the vessel was on a friendly mission, she was received with the custo-Spanish war ships, and the usual official visits. She was assigned to a special anchorage and placed there by the proper agents of the Spanish government.

The captain had just enclosed the letter in an envelope and started to seal it when a deafening roar sounded seven, through the ship. The great vessel began to list. Groping his way thru (Continued on Page Els)

IN THE RUHR DISTRICT SUBJECT TO CER. DR. L. R. PHILIPS TAIN CONCESSIONS ON THE PART OF FRANCE ACCORDING TO INFORMATION TELLS OF SANFORD

Concessions Appears to Include Withdrawal of French Troops of Occupation and Return of the Expelled German Officials

PARIS, July 19.—The German government through its embassy in London is striving to have the forthcoming British note on reparations convey to the French government Germany's willingness to cense passive resistance in the Ruhr subject to certain concessions on the part of France. This information has reached the French government on what is regarded as unquestionable but unofficial authority.

This concession appears to include first the withdrawal of the French and Belgian troops of occupation with the exception of a mere skeleton of military force which would in a diplomatic sense be invisible. Second, permission for German officials and functionaries expelled from the Ruhr to return to posts restoring local administration of all civic services as existed before January 11th when the occupation began. Third, that the French agree to restore the currency it confiscated. These conditions is declared here would be unacceptable to the French because they are unaccompanied by any definite assurances of guarantees that reparation

of these charges before that charging first degree burglary which is a capital offense under North Carolina

J. A. Campbell, of St. Paul, N. C., answered in the affirmative to the question but when told to stand aside, explained that he was a member of the Klan in reconstruction days, and Judge N. A. Sinclair explained to him that no reference was intended to the former Klan.

SUNDAY SCHOOL CHARACTER BUILDER BAYS PROMINENT BANKERS-ARE MOST IM-PORTANT TO THE CITY

(Continued from page 1) Sunday school, we have better men.' At this point B. F. Whitner was called into the interview, and I submitted to him two questions.

"Mr. Whitner, if the 2,600 white citizens of Sanford who were not in any Sunday school last Sunday were to enter our Sunday schools and remain there, what would be the influence upon Sanford?"

The cashier removed his glasses, held them in his right hand and began pecking the arm of the office chair. After a while he sadi: "Pretty big question. If you could get all these people into Sunday school, it would have a most wonderful influence upon the rising generation. It would be a great safeguard to the morals of the city. Why we would be known all over this land-from one end of the country to the other. People everywhere would say that Sanford had the most carnest, and the most sincere set of citizens in the country. It would attract the citizens we need;; | the very kind we want. I believe that it would be the greatest single achievement for this city to bring these 2 600 into our Sunday schools."

There was one question which I had gone to ank and I was determined to have a candid answer. I said:

"Mr. Whitner, here's my last question: "Which is the greatest asset to this city, the banks or the Sunday Schools?" The cashier did not appear to be daxed, puzzled, or in doubt. Promptly was the reply, "Sunday schools beyond question."

Mr. and Mrs. Reader, why don't we give ourselves seriously to the biggest and the greatest thing which Sanford

A marvelous increase in distribution Sealdsweet Florida Citrus Fruits

This season Sealdsweet Florida grapefruit and oranges have been sold in twenty-five per cent more carlot markets than last year.

Sealdsweet fruits now are distributed in twice as many carlot markets as five years ago; in several times as many as ten years ago.

This increase in our distributing capacity shows that we, the growers who cooperate in the Florida Citrus Exchange, have been fully awake to the importance of expanding markets to take care of increasing production.

First we developed consumer demand for Scaldsweet grapefruit

for years and years carrying on this essential educational effort altogether by ourselves. Next we gradually enlarged our sales force to properly cover the sections of the United States wherein we found potential demand for Florida citrus fruits. Today we are in position to sell in every por-

and oranges by aggressive advertising of the food and health values-

tion of the country which affords a profitable outlet. All this has been accomplished in the face of destructive competition from Florida growers who market through non-cooperative channels. We have sold Scaldsweet for more money than other Florida marketing agencies got for fruits of comparable grade, pack and quality.

We regard our work as little less than marvelous in view of the facts as explained herein. Obviously, however, as the Florida crop of grapefruit and oranges increases in volume, there must be even greater progress in enlarging consumption and extending distribution.

> Why not help us do the job, to your benefit and ours, by working in our ranks rather than against us?

Join the Fierida Citrus Exchange and let your fruit have the benefit of its distribution and selling service. Consult the manager of the nearest association or sub-Exchange or write the business manager at Tamps, Fierida.
