WHAT SIDNEY J. CATTS FEARS

It isn't what Joe Earman, editor and publisher of the Palm Beach Post, has already said about Sidney J. Catts, that caused Catts to write the threatening bombastic letter about going to Palm Beach with a double-barrel shot gun to kill him if he does it again. It is the fear that Earman will "dig down into my files," and make. "some interesting reading" about Catts in the immediate future.

Catts knows that if any man in Florida has the "goods on him" it is Joe Earman. He knows that if any man can damn him, it is Joe Earman. He knows that if there is any man who will be believed by the people it is Joe Earman. The letter then, with the threat of the shot gun and "fourteen buckshot in each barrel," is a great big Cattesque attempt to bluff a man who has no, more fear of him and his "shot gun" than others had of him and his "trusty inkstand."

There was once a boy who climbed a tree after a pole cat, not knowing what it was. As he neared the top the pole cat defended itself. The lottle fellow went right on, crying, but mad, saying, "Oh, dog gone you, I know what's the matter with you. You're scared." And he got that skunk .-- Tampa Tribune.

"THE N. A. F. T. A. O. C. LIED"

man" who gave the assistant secretary of the negro advancement association the "information" in the letter above, did not give it to the Federal District Attorney. He knew it was a lie when he wrote it to White.

In the light of the investigation by the Federal Department of Justice, The Tribune reaffims its conclusion of November 18th:

"The N. A. F. T. A. O. C. P. lied!" -Tampa Tribune.

#### LAKE ASHBY MAY GET **BIG TOURIST HOTEL**

A big tourist hotel may be erected on the bank of Lake Ashby in the near future, with splendid golf links in close proximity, if plans now being considered by F. R. Dennis and associates are carried out.

Mr. Dennis recently purchased the former holdings of the Indian Springs Land Company and has been here for several weeks looking over the property and making preparations for putting the tracts on the market. A number of tracts have been sold since the land came into his possession and several new residents of the Samsula section have been gained as a result. A number of additional families will come during this winter and still more

plan to come within the next year. Mr. Dennis is much pleased with

tion and co-operation.

Miss Turney has here Wednesday looking over the field and organizing her force here. She is the active field agent and holds a high honorary rank in the Confederate Navy organization. The county committee, suggested by her, will be: L. F. Chapman, chairman; Elywyn Thomas, Harry Katz, J. Davidson, with honorary members of Mesdames Edgar Lewis and Dan McCarty and the Rev. C. F. Reade. There are COO of the Confederate Navy now living, and probably 300

Said certificate embraces the following described property situated in Seminole County, Florida, to-wit: NW 1-4 of NW 1-4 of Sec. 9, Twp. 20 S, Rge. 32 E., 40 acres more or less. The said land being assessed at the date of the issuance of such certificate in the name of J. H. Brice.

Also Tax Certificate No. 186, dated the 6th day of July, A. D. 1914,

As the Fall Season is drawing to a close and new plans and arrangements are bcing made for the coming year, we invite you to place your account in our hands. None of us can intelligently prophesy as to what the coming year really holds in store; but a friendly connection with a strong bank is the best security against the uncertainties of the future.

Tribune published this editorial para- large tractors from the tractor plant thinned out, the veterans of the Spangraph:

advancement of colored people, head- the tract! quarters in 'Bosting,' announced that, N. A. F. T. A. O. C. P. lied!"

On December 11th The Tribune received a letter from Walter F. White, assistant secretary of the national association for the advancement of colored people, 70 Fifth avenue, New graph)

substantiated statement the facts will be planted there this winter .which were proven by a careful investigation which I made at Ococe a few hours after the lynching. My information was secured from white people who boasted of their participation in the mob.

"May I quote one of these 'Gentlemen' of Ococe who states in a letter I have before me-'After the polls closed a number of armed men went to his (Mose Norman's) house, without a warrant and without an authority of law as is claimed by those approving their action, to arrest this negro. Two white men were shot in the negro's back yard. From that time on for three days, the community ran riot. I do not believe it will ever be known how many negroes were killed. Every negro home, school house, church and lodge room in that community was burned. In some instances, with women and children oc- | cupying the house and thus burned to death."

At the demand of this association the Federal department of justice ordered Federal District Attorney Herbert S. Phillips of Tampa to make an investigation and report on the Ocoee incident.

In The Tribune of Saturday morning Federal District Attorney Phillips said: "My investigation of the Ococe rate

> New Smyrna News. TO BUILD HOME IN FLORIDA FOR MEN

CONFEDERATE NAVY

A home for the Navy Men of the Confederacy, to cost at least \$150,000 and to be located in Florida at a place to be selected later, is the program of the Southern States, which is being worked out under the direction of Admiral A. O. Wright, the only surviving the Sabbath a day of arrest .- Noradmiral of the Confederacy, and Miss Theodore Turney of Nashville and New York. The headquarters of the committee is the Aragon Hotel, Jacksonville.

The general plan is to build the home by popular subscription and support it by the legislatures of the several states. The legislatures of eleven of the thirteen states interested have agreed to do their part and it is expected that the consent of the other two will be secured as soon as they meet.

The location of the home will be decided on when the plans are well under way. A citizen of Fort Pierce has offered this place as a proper site and the offer is made under advisement. Should Fort Pierce be considered favorably, the people of the town will be called together for consulta-

DEATH OF A. B. ALLEN.

Mr. A. B. Allen, for several years resident of Sanford and Master Car builder of the South Florida Railroad when owned by H. P. Plant, died in December 14th.

Mr. Allen was 81 years of age at the time of his death, was a man of life had held important positions in his chosen lnie of work. Starting as a young man in the Vermont Central car shops, he steadily went forward in the first place in that organization, and then was selected to do all of the car construction work upon a new road from McCombs City, Miss., to New Orleans. He then became Master Car Builder of the C. B. & Q. Railroad, one of the great trunk ily will be at the Hotel Valdez for the lines of the middle west. After some years in their service, he came to

Sanford and became Master Phr Sidney Chase returns from school Builder of the South Florida Railroad for several years, under the adminiseration of James E. Ingraham.

Mr. Allen was the inventor of the Allen-Vanleu Grain Door, which is in general use throughout the grain belt for the rapid loading and unloading of grain. He also invented at the special request of Mr. Plant the Balance Temperature Fruit and Vegetable car. Mr. Allen spent a long and useful life in railroad work. He leaves two daughters, one Mrs. Grace B. Williams, well known in Sanford, and Mrs. William T. Blaine, who has resided in New York City for a number of years, although married in Sanford.

#### THE SANFORD DAILY HERALD, MONDAY, DECEMBER 20, 1920

#### BROKE HEART OF SCIENTIST FLETCHER'S VIEWS ON

Learned Man, Victim of Thoughtiese Practical Joke, Proved Unable to Live it Down.

What is believed to be the greatest hoax in the history of science was played over a century ago by students of Prof. Bartholomaeus; Adam Beringer, holder of the chair of natural philosophy at the University of Wurzberg. He was keenly interested in fossil remains, and was the leader in the great group that held them to be a sort of divine joke, placed in the earth by God to test human faith. Students designed a score or more of fossils from clay representing the most absurd beasts their imaginations could conceive, and hid them in the ground in a spot where the old paleontologist was known to frequently dig. He discovered them and accepted them as real, and when a little later the students hid other designs, showing stars and suns and even inscriptions in Hebrew, Syrian and Babylonian, West Baldwin, Maine, on Tuesday, the old man was delighted and was sure he had proven his grounds. He began a book of immense size, and written in Latin, in which he gravely origin. The shout of laughter that went up when the book was issued broke the old man's heart, and he died after spending every cent he had in an effort to recall the book. What made the joke more serious was the faith with which many learned men accepted the thing at first, Beringer's reputation up to this time being high in the world of science.

#### STORING WORDS IN MEMORY

What may Be Described as Mental Photography is Especially Valuable to Theatrical People.

The photographic memory is found most frequently in actors and actresses, who have to study a variety of parts in a very short time. After a time, these people form a habit of getting a mental photograph of the words. They look at the page, read the lines, and then, shutting their eyes, endeavor to "see" the words, It is a habit which, once formed, is quickly developed. The present writer once "crammed" a part of forty-five pages in a single day by the aid of this natural photography.

It may be said at once that not everybody can acquire this species of memory. Only those possessed of great powers 'of concentration can achieve the results described. But. providing that a person has anything in order that the producers may of this gift, he can build un it will serve him to an all lted degree.

FARMER AND CONSUMER GETTING CLOSER TOGETHER

WASHINGTON, Dec. 18 .- When the senate was today considering the bill for bringing about a closer connection between the producer of farm products and the consumer temarks "About 1915, I think it was, some

of us favored an amendment to the appropriation bill coming from the committee on postoffices and post roads, providing for an initial appropriation of \$10,000 and authorizing the postoffice department to make experiments and investigations into the question how best to promote direct dealings between the producer and the consumer. They did make that investigation. That was not only in the interest of the producer but 1 it was also in the interest of the consumer, and that includes pretty nearly everybody. Sohe suggestion is made about this being class legislation. Everyone is interested in the subject not only the farmer.

R

"That appropriation led to experiments, and finally other appropriations were made in subsequent bills, and that work continued. The postoffice department was putting into use trucks and other means for carrving products from the farm directly to the producer, and it was proving an immense success and a great advantage to the public generally, both the consumer and the producer. But in the last posto?4ce appropriation bill in another branch, of the legislative department of the government, that item was stricken out entirely so that we no longer have that means which was provid for the benefit of the public gener ly in the distribution of farm pr ucts.

I believe that I am correct in at ing that the item providing for development of facilities for prom ing direct dealings between the p ducer and the consumer was strick out of the last postoffice departme appropriation bill, or was not put in it when the bill originated at other end of the capitol, and the fore that whole cort has fallen the ground. It means all the great necessity for this kind of legislat

fine character, and throughout his set forth his proofs of the divine

Quite a number of Sanford's college set have received invitations to two holiday dances to be given in Orlando which they are locking forward to with a great deal of pleasure. One to be given at the Rosalind Club Christmas eve by Mr. and Mrs. J. C. Jones for their two daughters, Miss Jones and Miss Vivian Jones. The other to be given at the Country Club by Mr. and Mrs. Nixon Butt on the evening of December 27th for Miss Mallie Slight and Miss Sarah Slight.

#### T. N. T.

The T. N. T. met Friday with Mrs. J. L. Hart at her home on West First street.

A most pleasant afternoon was had and a large number of members were present.

Delicious refreshments were served.

CHRISTMAS PROGRAMS AT PRI-MARY SCHOOL

The Christmas programs at the three primary schools were most interesting and largely attended last Friday morning.

Each program gave first a part that told of Santa Claus and then the Christ Idea was presented. The programs were very well arranged and clearly presented with great credit to the teachers.

At the Grammar School the third and fourth grades'gave their program cept that thin skirt. No wonder she play it, took umbrage and for the entire school and their parents. It, too, followed the same outline but on a larger scale. The carols were especially beautiful.

During the morning the school presented a gift of silver to Miss Miller, the principal, whose wedding is to be an event of the holidays.

In each room the children had Christmas trees where they had a great deal of fun and pleasure over any. And, by the way, the word in- to the ladies' hearts. Y the gifts that were exchanged.

KINDERGARTEN CHRISTMAS Sanford has one little school that few know about yet it is quite deserving of mention. Little Misses Carmetta Barber and Ruth Henry are teachers of quite a unique kindergarten, which is not a play one, but a real school.

The Christmas program last Friday was delightful with a real Santa and a Christmas tree.

The work the children have done is very good indeed and the little teachers have quite a bit to be proud of.

is a good old town, filled with nice people. And Sanford is getting bigger and better all the time. One of the things that is making Sanford grow is the patronizing of the home merchants. People can find just what they want at home without going abroad for it and every time they spend a dollar with a home merchant that is just that much more they have helped Sanford, because Sanford merchants spend their money at home.

#### JACKSONVILLE EXPECTS MANY CONFIDENCE MEN

Warnings.

JACKSONVILLE, Dec. 18 .- Many confidence men are now in this city and more are expected to be here within a short time. It is believed that the gang intends making this their headquarters for the season, but the chamber of commerce is determined to break up the operations of the gangs, as far at least as Jacksonville is concerned, and will send out warnings to other cities of the state.

The emissaries of these bands of organized criminals have been at work for some time "fixing" in various quarters and expect to operate without much, if any, hindrance, here as well as in other cities.

A number of written communications have been received by the chamber of commerce furnishing important information of the plans of the confidence workers for the winter, the latest of these having been received yesterday. This was signed by a man ish.

of their "prospects."

Warnings were gotten out today and A. D. 1920. and sent to the civic organizations in Orlando, Sanford, Kissimmee, Bartow, Ocala, New Smyrna and other points where it is thought likely that 215-6tc.

confidence men may be intending to carry on operations. Jacksonville police have been active during the last Chamber of Commerce to Send out week in rounding up suspects, and > total of eleven arrests have been made by Detectives Hurlburt and Shirmans

> CHRISTMAS TAGS, SEALS, STAMPS

# 3,500,000 CHILDREN FACING STARVATION

Vast Relief Effort Launched by Eight Leading American Organizations to Avert Tragedy.

The most spontaneous as well as the largest consolidation of effort in the history of American relief and charitable organizations has grown out of the disaster which threatens 3,500,000 European children this winter. To the headquarters of every agency that dispenses American mercy overseas has come one steady cry for mouths past; the children, most helpless and blameless sufferers in the track of war, will perish by the thousands before next harvest unless America saves them! When Dr. Livingston Farrand, chairman of the Central Committee of the American Red Cross, returned from a recent trip abroad, his report throbbed with the need of the children. From the feeding-stations of the American Relief Administration throughout east- "N ern and central Europe came letters, cables, pleas of every sort. The Protestant churches sent investigators into after-war conditions and every report breathed the impending tragedy of starving and diseased children. Protestant, Catholic and Jewish, the child life of Europe is threatened with heartrending misery.

The European Rellef Council, with Herbert Hoover as chairman and the whole power of American charitable thought and effort behind it, has been formed. It consists of Edgar Rickard, representing the American Relief \$ Administration; Dr. Livingston Far- \$ rand, representing the American Red |s Cross; Felix Warburg, representing the Jewish Joint Distribution Committee; Wilbur K. Thomas, representing the American Friends' Service Committee; James A. Flaherty, represent- \$ ing the Knights of Celumbus; Dr. C. S V. Hibbard, representing the Young S\_ Men's Christian Association; Miss Sarah S. Lyon, representing the Young Women's Christian Association; Dr. Arthur Brown, representing the Federal Council of Churches.

raise \$58,000,000, in an appeal centering at the Christmas holidays, to the end that the situation regarding child life may be met. In every town and community of the nation, it is hoped, local committees, representing all the co-operating agencies will be formed to secure the vitally necessary funds. Of the amount sought, \$28,000,000 will be used for basic food. For every one of these American dullars the local governments and communities aided will furnish two dollars, in the form of transportation, labor, guards, clerical help, cash contributions and such food supplies as are locally obtainable. No children receive the free food ezcept after medical tests showing them to be seriously under-nourished. The reraining \$10,000,000 of the fund is just as urgently needed for medical service to the children. The European Relief Council will do

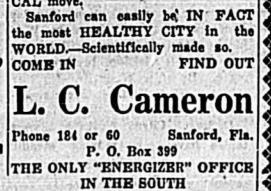

much more than effect economies in the raising of the childsaving fund. It will, with the inspecting forces of eight great agencies, keep a constant eye on the administration of America's pauperization.

Irrigation began in Texas many years before the lands embraced within its boundaries became a part of the United. States, years before those same lands made up what was known as the Lone Star republic, writes James R. Preddy in the American-Forestry Magazine.

To bring the time down to a more tangible date, the first irrigation work was done-according to traditionwhen the Pueblo Indians constructed the peculiar ditches about El Paso and the Pecos country, which authorities of today claim were built for irri-gation purposes. Another tradition coming out of the past tells that these ditches were built by the Yuma Indlans when they were driven westward by the Comanches and Apaches, and not by the Pueblos.

When Coronado, the roving erplorer, opened this country to the Spanlards he found well-worked irrigation systems among the Indians; this was in 1540 when he was pushing toward the north. The practice of irrigation was continued under the Franciscan fathers, who constructed the five mission ditches that were found near the present city of San Antonio. Even under Mexican rule the work did not stop, and grants by the Mexican government often read as follows:

"In the name of the Mexican nation, grants him one day of water with its corresponding labor of land."

### FROM LOWLY TOIL TO FAME

Edwin Dallin, Ranked as Great Sculptor, Was Once Wheelbarrow Boy in Mine in Utah.

One of America's greatest sculptors, Edwin Dallin, was once a wheelbarrow boy in a mine in Utah, where he tolled all day for less than a dollar. The miners uncovered a stratum of white clay one morning, and Dallin, forgetting his work, sat down and began to model a likeness of one of the workmen. So lifelike was it that his teacher, when he returned to school In the fall, sent it and some of his drawings to a state fair being held in Salt Lake City. A rich mine owner had his attention called to the little clay bust and he offered to furnish the boy transportation to Boston where he could enter an art school. The boy worked long and hard, and

by the time he was twenty-one he had a studio of his own, the Detroit News recalls. He went to Paris shortly afterward and began a series of Indian poses, using the Indians from the Buffalo Bill show at that time in France. His first masterplece, "The Signal of Peace," was finished at that time and he was recognized thereafter as one of the world's greatest sculptors. His "Ann Hutchinson," made for the Boston state house; "The Medicine Man" in Fairmount park, Philadelphia, and the great golden angel on the Mormon temple in Salt Lake City are among his best known works. Formerly Our Superiors. She was angry about the bill-in-sisted she had paid it. The credit man stood listening attentively, attempting at intervals to break in on her flow of conversation. "You men want to understand right now that you can't hoodwink the women any longer," she blurted. "Little things like this-like sending out statements for bills already paid-won't get you a thing. It won't get you a thing." "Yes, madam, but I-" "And bear that in mind, will you? The old days are done. Women are men's equals now."

CHILDREN STAGGERS

3,500,000 Facing Starvation Can **Only Be Saved by America's Response to Joint Appeal.** 

It is utterly impossible for one who has not actually seen the misery of the early Autumn in Europe to visualize what the children of the Eastern and Central portions of the continent face this winter. To say that 8,500,000 children have no alternative to starvation or death from disease except American aid, is startling, but independent observers by the score and careful scientific surveys of the economic and crop conditions overseas brand the figure as conservative.

In Poland, for instance, where 1,308, 000 youngsters last year subsisted al most entirely on the one free Ameri can meal a day that they received, con ditions as winter closes down, are worse than ever before. The Bolshe vik invasion stripped large portions of the country of all grain. Professor Polish government, after an exhaustive survey, has reported that only forty per cent is available of the food neces sary to carry the population through the winter.

In the city of Vienna tests conducted in the American Relief Administration food kitchens showed that 52 per cent of the children between the ages of 6 and 14 were "seriously under-nourished." Thirty-three per cent were markedly under-nourished, 11 per cent were slightly subnormal and only 4 per cent approached the state of a normal American child. The Ameri au Rellet Administration is feeding 800,00 Austrian children every day now, and there is no chance of dimunition of need before nex harvest.

The spectacle of the medical needs of Europe's children is equally ap palling. Estimates reaching the Amer-Ican Red Cross .s to needs for medical service in the destitute areas this winter include : Old Avstria-Hungary, 750,-000; new Poland, 1,500,6.0; Czecho-Roumania, 100,000. In the Iscal year of 1919-20 the Red Cross has reached with the vcritable gift of life 1,500,000 children in the affected areas. Tuberculosis is prevalent to a terriffic degree Five children out of seven in the city of Warsaw, for instance, have been found to be tubercular. Typhus is widespread; rickets, the right-hand of under-nourishment is almost universai and cholera lifts its grim head constantly in one place and another. The Buropean Rellef Council, com prising the American Relief Adminis tration, the American Red Cross, the American Frierds' Service Committee (Quakers), the Jewish Joint Distribu tion Camiltee, the Federal Council of the Churches of Christ in America, the Knights of Columbus, the Y. M C. A and the Y. W. C. A., seeks \$33, 000,000 with which to meet the situa: tion. It has estimated that at least \$23,000,000 must be had for food and \$10,000,000 for medical service to averi absolute disaster amor ; the threa ened children. Checks may be sent to your local committee or to Franklin K. Lane. treasurer European Rellef Council, 41 Brondway, New York, or to the Child Feeding Fund, Lic iry Digest, New York City.

Two Atomic Theories. An atom is a part so small as not to be divisible. It is an ultimate particle of matter. Two opinions, directly opposite to each other, have long had currency with regard to the constituent particles of material things; the one, that matter is composed of an assemblage of minute particles, or atoms, incapable of further division; the other, that there is no limit to its divisibility, the smallest conceiv-

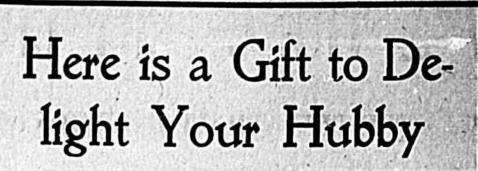

able particle still consisting of an infinity of parts. The first of these theories, which is commonly distinguished by the name of atomic philosophy, was originated in Greece by Leucippus; it was supported by Democritus and subsequently improved by Epicurus and his disciples. The Epicureans professed to account for the erigin and formation of all things by supposing that these atoms were endued with gravity and motion, and thus came together into the different organized bodies.

Whence Electric Lamps Come. A little consideration of the materials that enter into the making of lamps would be a revelation to the large majority of electric lamp users. California, Colorado, Nevada and South Dakota lead in the production of tungsten ore, the important materi-E. D. Durand, Food Advisor to the al of which the filament of the modern electric lamp is made.

First, there is the filament of tungsten, then the glass bulb into which enter silica, soda, nitre from Chile, potash, manganese from Russia, arsenic, borax, feldspar, lead, aluminum, cryolite from Greenland, cobalt from Canada. The base of the lamp is made of copper and zinc from Utah and Missouri, while the basing cement is a mixture of marble dust from Vermont, whiting from Ohio, shellac from India and plas regin from Georgia.

#### Wonderful is Human Skin.

The human skin, which forms a protective covering over the whole of the body, consists of two layers, an outer one and an inner one. The epidermis, or outer skin, is so constructed that no moisture from outside can penetrate it so long as the skin itself is not torn or cut. At the same time the pores of the skin are so formed that the sweat is freely Slovakia, 200,000; Serbia, 150,000, and discharged through the skin, thus ventilating the body and keeping it at an even temperature. If someone could invent a material possessing the properties of the human skin, a material which would keep out all molsture, however heavy the down-

is Capital's Best Speller. Frank B. Willis, Ohio's successor to Warren G. Harding in the United States senate, qualified as Washington's champion speller during his term bee at the Willard hotel, with the nation's famous statesmen and rising young journalists as contenders for first honors. Senator Miles Poindexter of Washington, then, like Willis, a member of the house, stood to the end, groggy but dogged. "Ogee" was the word on which he finally went down. He thought it meant something like "ouch" and he couldn't define it nor spell it. Willis' years at Ada had taught him much, among other things how to spell "ogee." He bowled Poindexter out and stood alone.-Gus . Karger in the Cincinnati Times-

Relief in Pictures. Following an idea which first dereloped in France, pictures have been printed which, when viewed through spectacles, appear in stereoscopic relief. 'The object pictured is first photographed from two points like an ordinary stereoscopic view. Then the two pictures are printed in two complementary colors nearly but not quite overlapping. The glasses of the viewing spectacles are also of complementary colors corresponding to those used in the printing, and when the picture is seen through these gisases, it stands forth with startling appear-P nnce of solidity.

"ENERGIZER" WHAT IT DOES.

It successfully treats anemia, rheumatism, paralysis, dyspepsia, obesity, neuralgia, constipution, sciatica, writer's cramps, liver diseases, varicose veins, muscular contractions, joint affections, sprains and deformities, faulty circulation or nutrition, spinal congestion, disease of the nervous system, sleeplessness, Bright's disease, diabetes and high blood pressure, even after all other means have failed.
