

Dr. Harold Hume Brought Azaleas To Florida In 1908

GAINESVILLE, Feb. 2 (Spec.)—The story of how the Azalea came to Florida 40 years ago is a story of a man who likes to do things that can't be done!

At one time the colorful and profuse azalea was rarely found in Florida, but, and only in 1908, when Dr. H. Harold Hume, professor of Agriculture and Dean of the College of Agriculture at the University of Florida, brought them into the state, were they seen in quantity as a garden shrub south of the Charleston, South Carolina area.

As it has turned out, they liked the sandy, acid soil and the temperature of north and central Florida and decided to stay.

On considering the possibility of introducing azaleas into the state, Dr. Hume was told that it couldn't be done. That decided it; and Dr. Hume, who loves a challenge, started to work.

Shortly after the Easter season of 1908, he visited a florist in Jacksonville and found some azalea odds and ends left from the season's trade. "They will be of little use to you," the florist informed him.

"Box them and send them to me," Dr. Hume replied. That was the beginning of his azalea hobby which has continued to the present day.

Starting the task of propagating and finding species, Dr. Hume was led to the Tea Gardens in Summerville, South Carolina, where Dr. Charles U. Shepard had brought together a large collection the most part of which was imported from Europe.

From approximately 20 oriental evergreen species and 20 types native to the United States, which lose their leaves in the winter, literally hundreds of variations have been developed by breeding and seedlings.

In his two books, "Azaleas California" and "Azaleas, Kinds and Culture," Dr. Hume offers tried and growing advice to azalea lovers.

Requirements for successful cultivation are simple, Dr. Hume says. Essentially are good drainage, well-drained soil containing organic matter, plenty of water, and protection against insects. By taking cuttings in July and August and setting them in the sand with good drainage and abundant watering, they will root.

When questioned about the possibility of azalea growth in the south portion of the state, Dr. Hume explained that it is doubtful they would thrive because of the warmer climate and the amount of lime in the soil there.

Thus, the Azalea, formerly a native of China and Japan, has found a new home in Florida's sandy soil. Its brilliant hues of lavender, orange, pink, white, salmon and variegated shades are now generously sprinkled in spring gardens throughout the North and Central areas.

The noted ornamental has become one of the most popular and prolific garden and florist shrub in Florida, all because of a man who likes to do things that can't be done.

State Budget Hike

Continued From Page One

Unemployment Compensation agencies in the state against which the claimant is filing his claim. The function of each local office is to take a complete claim concerning as much detailed information as is necessary and required and to forward this information to the state against which the claim is filed in order that that state may make a determination as to whether or not the claim is payable.

There are many reasons why individual claimants come to Florida. Some come seeking employment which they do not find in the area of the state to which they migrate. Others come to enjoy the climatic conditions of the state during the times when they are unemployed due to various circumstances in their home state. It may very well be that their unemployment is a result of a seasonal or other shutdown in the industry in which they are normally employed in their home state.

It is emphasized, however, that the actual determination as to whether the claimant should or should not be paid is made by the home state of the claimant which has knowledge of the circumstances relating to the industry in which the claimant is normally engaged.

Chairman Barnes further pointed out that this problem is not peculiar to Miami although in Miami there is the largest concentration of agent state claimants.

Other areas with sizeable out-of-state claim loads include St. Petersburg, Tampa, Sarasota, Ft. Myers, West Palm Beach, Ft. Lauderdale, and Ft. Pierce.

Special attention has been focused upon the Miami area because the very large number of New York residents who file claims through the out-of-state office in Miami. In fact, the volume has reached such proportions that the officials of the New York and Florida agencies jointly agreed that this load could best be handled by having several employees of the New York agency actually located in the Miami office for the purpose of interviewing claimants and making determinations as to whether they would be paid under the provisions of the New York law.

U. S. production of boller helmets now is about four times the rate in pre-war years.

Wintery Weather

(Continued From Page One) ions of dollars—\$30,000,000 in California alone.

The livestock loss still is undetermined and probably will not be known until spring, the period saving the thousands of cattle and sheep which were snowbound on the Western range land by January blizzard still is not finished.

Neither is the huge task of being related to the thousands of ruined ranches and homes. The damage to the ranches and homes is not counting the losses.

Some communities in the more isolated areas were isolated for days, some for weeks. Ranches with huge herds driven miles all travel over hundreds of miles, the Dakotas, Nebraska, Montana, Wyoming, Colorado, Nevada, Utah and Idaho.

The federal government joined with the western blizzard states in the relief and rescue work. Planes and heavy moving equipment moved in. Bulldozers and snow plows opened the now blocked highways and secondary roads.

Most stockmen believed the accurate livestock loss will not be determined until the spring thaw.

But all agree the toll is heavy. In Wyoming, out of an estimated 775,000 cattle and 1,000,000 sheep, the estimated losses run from \$10,000,000 to \$60,000,000 and 100,000 head.

NO. 118

State Budget Tops Income By \$19,689,189

Still To Be Considered Are Requests For Money By Universities, Schools

TALLAHASSEE, Feb. 3 (AP)—A budget of \$14,880 a year for the state board of education's new office of coordinator of higher education was approved. It calls for a salary of \$8,000 a year for coordinator Collier English, \$3,000 for a secretary and \$3,500 expenses.

TALLAHASSEE, Feb. 3 (AP)—The cabinet, studying state budgetary requirements for the next two years, already has recommended tapping the general fund for \$19,689,189 more than will be available from present revenue sources.

However, all indications are that the Cabinet will go back over departmental requests and do some more cutting before sending the budget to the Legislature.

After weeks of hearings the Board has approved budgets totaling \$173,689,109, after trimming requests by \$4,503,632, and the job is far from complete.

Still to be considered are re-

quests for increased millions to operate the University of Florida, Florida State University and Florida A. and M. college for negroes. Budget Director Homer Graham has estimated present tax sources and unexpended balances will provide only about \$154,000,000 to meet general state expenses during the next two years.

In addition to budgets for agencies that get their money from general revenue, the Cabinet has approved those of several self-sustaining departments and boards.

The beverage Department yesterday was allowed \$8,080,710 to operate its collection and enforcement machinery, and the Motor Vehicle Department was allowed \$8,000,000.

Both totals are in excess of funds spent in the current biennium but expenditures are limited by law to a percentage of collections and all surplus is turned into escrow for road repair.

Probable Sites For City Swimming Pool Are Discussed

Probable sites for a municipal swimming pool were discussed at a meeting held last night at the City Hall by a committee headed by John Ivey and appointed by the City Commission to aid in the selection of a site. About 20 citizens were present.

The two sites under consideration are in Fort Marion Park, in the undeveloped section immediately west of the Mayfair Inn, or in the tract east of Seminole High School at French Avenue and Eighteenth Street, and Mr. Ivey this morning.

H. E. Morris, principal of the High School, pointed out to the committee the advantages of locating the pool near the high school where life saving courses could be taught as part of the educational program, and expressed the opinion that the pool would be much more use to citizens if located there.

No opinion as to the most acceptable site had yet been offered by the Committee, said Mr. Ivey this morning. Before the meeting (Continued on Page Sixteen)

New Busses To Serve Sanford And Vicinity

S. A. Allen, owner of the Yellow Cab Company, is shown above, third from right, with a group of Sanford business men, who were invited to take the first ride on his new busses. Bus service for Sanford and vicinity was resumed on Tuesday for the first time since the war. Present schedules include trips to the Municipal Airport and to Lake Monroe from the downtown area. Additional

schedules will be announced Monday. From left to right are W. V. Bitting, W. Gordon Dean, Jack Morrison, Mayor Andrew Carraway, R. L. Dean, John Ivey, City Commissioner John Krider, Mr. Allen, W. A. Morrison and Edward Higgins, manager of Seminole County Chamber of Commerce.

Nearly All Of Nation Continues To Remain Cold

New Blizzard Threatens To Halt Haylift For Nevada Stock

By ASSOCIATED PRESS
Temperatures continued below normal over virtually all of the country today but they were moderating in the Gulf and Great Plains States.

There was more below zero weather in the Dakotas, Montana, Minnesota, and Wisconsin today, but readings were not as low as yesterday. The mercury touched around minus 20 in some parts of the cold belt and dropped to 23 at Grand Forks, N. D., for one of the lowest marks. It also was near and below zero in some parts of Northern New England.

Some warning was reported in Southern States but there were many sections reporting sub-freezing temperatures. Southern Florida continued having mild weather with a high of 77 at Miami yesterday. There were a few wet spots. Rain fell in Texas and Oklahoma. Eastern Kansas had a freezing drizzle and light snow fall in Eastern Minnesota and Northern Wisconsin.

Motorists Warned Of Passing Halted Busses By Sheriff

The importance of the State law requiring all motorists to stop before passing school buses was emphasized today by Sheriff Perry Merri who revealed that he arrested three persons yesterday and three persons last week for disobeying this law.

So far, the Sheriff said, he and his deputies have been concentrating their efforts on the Orlando highway where compliants against reckless driving have been excessive and where 22 arrests for passing school buses have been made in the past two months, but they expect to extend their safety drive to other areas in the near future.

Most of the arrests which have been made so far are among local people who should know better, he said. We have stopped a number of visitors from other states, he added, but in most cases we have let them go with a severe warning. They have similar laws in their own states and should know better than to pass a school bus loading or unloading passengers in this state.

"All motor vehicles are required by law to come to a full stop," he said "and only before passing a school bus which is engaged in transporting school children, and going in the same direction, but also before passing when going in the opposite direction."

The State Road Department, at the request of the Chamber group, has placed signs at main highway intersections leading to the community, pointed out the way to Lake Mary, Mr. Bell reported. He also reported that O. E. Fouraker, county commissioner, has started plans for improvement of Lake Mary roads and drainage projects.

Following the meeting, a group of Lake Mary musicians rendered several selections. Cakes and soft drinks were sold by 4-H girls to provide funds for their projects and \$12 was received.

DUSTY BOOTS

The Dusty Boots Riding Association will hold a business meeting yesterday and breakers damaged the superstructure. The Coast Guard was afloat near Daytona Beach. Surface craft from the Coast Guard station there and a plane from St. Petersburg searched the area for the two men.

The cruiser went aground late yesterday and breakers damaged the superstructure. The Coast Guard said the craft was saved ashore by coast guard activities.

Navy To Lay Up 72 Ships And Cut 30,000 Men To Meet New Budget

WASHINGTON, Feb. 3 (AP)—The Navy said today it will have to lay up 72 ships, including 15 tankers, fitting vessels, and cut its strength by 30,000 men to meet Pres. Truman's 1950 budget.

Secretary of the Navy Sullivan and three Essex-class carriers, nine light cruisers and three anti-submarine aircrafts have been picked for reduction.

In a letter to the chairman of the Appropriations Committee, Sullivan said the Navy plans to start reduction at once.

In addition to the cuts in ship and men, Sullivan said the Navy must reduce air strength by a small percentage—some 400 planes out of more than 30,000—and shut down a dozen small air stations.

And he said "a general reduction in the scale of activity at Naval shore establishments supporting the fleet, including employment levels at Naval shipyards," will be necessary.

The secretary said the cost of making the cutbacks must be met out of this year's money. He referred to such expenses as the cost of preparing ships for layup and the administrative chores of the personnel cut.

Paying such costs out of 1949, the secretary wrote, will leave next year's cash intact to carry full 1950 strength throughout the year.

Under the President's \$15,000,000 military budget for the next fiscal year, the Navy was given \$4,800,000,000. This year it had nearly \$5,100,000,000.

Sullivan said the following cutback would be made in manpower: Navy enlisted strength, 21,700 Marine Corps, enlisted, 6,605 Navy and Marine officers, 1,195. He listed the following ships for the mothball fleet:

The carriers Princeton, Antioch, and Tarawa; The light cruiser (Continued on Page Eight)

Mindzenty Says He Is Partly Guilty Of Charges

Catholic Admits Trying To Make Peace With Communists

BUDAPEST, Feb. 3 (AP)—Last Cardinal Mindszenty told Hungarian people's court today of guilty, having committed the gravity of those deeds I am charged with.

The cardinal's former secretary, Rev. Endre Ziski, also pleaded partly guilty but said he only followed orders of his superiors.

Mindszenty and six others or bonds tried on charges of treason, spying and black market dealing.

Mindszenty is the first Roman Catholic Cardinal ever to be tried by a civil court.

As the trial opened, Mindszenty acknowledged that he wrote a letter offering to work for peace between the Communist-dominated government and the Roman Catholic Church, if his trial was put off.

The letter and the cardinal, after 16 days of continuous meditation, wanted to share in a reconciliation between the church and the state. He offered to withdraw "for a while" from his Cardinal's office and promised not to oppose the cause of peace between Hungary and the Vatican. He has been in jail since Dec. 27.

The cardinal and six other defendants are charged with plotting against the present government, plotting to restore the Habsburg monarchy, espionage and dealing in black market currencies.

Later the Japanese wantonly burned residential sections. Manila was second only to Stalingrad and Warsaw in destruction.

"The new buildings and reconstructed roads in the city only emphasize the magnitude of the destruction," commented the Manila Chronicle today.

LOSERS LIFE SAVINGS
HUNTINGTON, W. Va., Feb. 3 (AP)—Mrs. Otto Wilson lost her life savings, estimated between \$10,000 and \$12,000 in cash and \$6,000 in bonds, at a movie last night.

The woman told police she had carried the money in her purse "for a long time" and that she just couldn't believe "there were people in the world who would steal a person's life savings."

Mrs. Wilson said she missed the purse when she got up to leave the theater.

(Continued on Page Eight)

GEORGIA BUDGET
ATLANTA, Feb. 3 (AP)—The Georgia Senate approved a budget totaling \$108,540,026 today. The bill now returns to the house for concurrence.

A bill to legalize horse and dog racing, estimated to yield \$18,000,000 in revenue for the state and cities, was introduced in the senate today.

China Given Little Chance To Get Peace

ECA Closes Offices In Peiping, Tientsin As Reds Take Supplies And Food

NANKING, Feb. 3 (AP)—The chances of acting President Li Tsung Jen's ghost government for national peace and sustained American economic aid were none too bright today.

Li was given almost no chance of arranging a truce with the Communists. At best he might succeed in securing Nanking, Shanghai, Hankow and the lower Yangtze river valley. If he does, American I.A.V. aid is likely to withdraw. Others in Red held Peiping and Tientsin are closed now.

Li's government is scattered and ineffective. He is almost alone here. His absent officers headed for Canton, where they are supposed to reopen for business on Saturday. But Li plans to hang on here, maybe even taking everything on a flight to the Communists to begin the peace.

Even the staff of the Canton government is uncertain. Kwangming Governor Han Yu and Li Chang, who was quoted in press dispatches today as saying he had no formal notification, the government would be shifted there.

Southern Bloc Says President Will Not Push Civil Rights

Board Agrees To Probe Railroad Labor Dispute

Fact Finding Panel To Make Second Effort At Settlement

CHICAGO, Feb. 3 (AP)—A railroad spokesman said today members of a presidential fact finding panel have agreed to make a second effort to settle a wage and hour dispute between the railroads and 1,000,000 non-operating work ers.

Daniel L. Loomis, chairman of the carriers' negotiating committee, said the presidential board, headed by Dr. William N. Emerson, will meet with representatives of the railroads and the 16 unions in Chicago Monday.

Loomis and George E. lengthy of St. Louis, chairman of the unions' negotiating committee, announced yesterday they had reached a stalemate. They said both sides had agreed to ask further help of the three-man fact finding panel.

Loomis said members of the presidential panel agreed to return to Chicago "for the purpose of interpreting and clarifying the recommendations" made to President Truman Dec. 17, 1946.

In addition to Loomis,

Hints To Housewives

FOR GOOD COOKING
Many a housewife has an eager interest in collecting new recipes. Some surveys indicate that the average housewife is more interested in new recipes than in the basic principals of cookery for the foundation recipes developed from them. Yet, a knowledge of these relatively few foundations may make her a better cook than a whole library of cookbooks and recipe clippings, according to cookery scientists of the U. S. Department of Agriculture.

Any cook with imagination can develop innumerable new dishes or using left-overs. And to this

from the simple basic recipes without leaning heavily on cookbooks, helpful as these may be in suggestion variations. In feeding the family on a budget, where skillful use of all left-overs is important, cookbooks may be less helpful than the cook's own knowledge of how to use what she has according to good cookery principals. Even if she takes time to leaf through all her books, she may not find a recipe that just fits that half cup of meat, bit of cheese, or other left-over on hand.

From the simple basic recipe for white sauce, hundreds of "new" sauces have been developed, any of which help in stretching foods or using left-overs. And to this

basic sauce chopped hard-cooked eggs and a little lemon juice for an egg sauce for fish. Put in chopped green pepper, onion or parsley for extra color or flavor. Add cheese to the white sauce for a cheese sauce. In place of some of the fat in the recipe, use peanut butter for a peanut flavored sauce. All the various go back to the simple principles of combining and adding fat, flour, and liquid into a smooth sauce of the right thickness.

Again, a vast number of hot breads have come from the standard recipe for baking powder biscuits. Add to that recipe chopped nuts, grated cheese, grated orange rind, egg or a little sweetening—and there's a different biscuit for the family.

"Once familiar with the basic principles of recipes, you are set to take it from there," the cookery scientists say.

STILL ON JOB
NEW YORK—(AP)—Lou Trudel, former star of the Cleveland Barons in the American Hockey League, who often lit the goal lamp during his playing career, is now performing the same chore away from the ice. He is goal judge in his home town of Springfield, Mass., and ignites the red light when other AHL players score in the practice games.

Again, a vast number of hot breads have come from the standard recipe for baking powder biscuits. Add to that recipe chopped nuts, grated cheese, grated orange rind, egg or a little sweetening—and there's a different biscuit for the family.

"Once familiar with the basic principles of recipes, you are set to take it from there," the cookery scientists say.

Marlow Says Demo Party Does Not Compare With Reds

WASHINGTON, Feb. 3—(UPI)—If American scientists and editors were doing what Russian scientists and editors have been doing, they'd be telling Americans something like this:

Americans invented the bow-and-arrow, the pyramids, the Roman chariot, the wheel, the horse, sex, daytime, thunder and lightning, and old age.

Russian scientists and editors have told their people: Russians flew the first airplane, and Russians were first with the telephone, radio, electric lighting, the parachute, steamship engines, and a Russian was playing around with a lightning rod before Ben Franklin.

If the American Democratic Party were like the Russian Communist Party, it would have its own newspaper and be attacking Broadway drama critics with:

"You are a gang of Hamanellidaceous, anti-American deflationists, bent upon nugatory evaluations, opaque to the circumstantiality of the American character, and full of endocrinetic constructions."

"You have had the crudinity to doubt that Americans are always heroes and always are vicious. Besides, that you have a bad habit of quoting Shakespeare."

Pravda, official paper of the Communist Party in Russia, has just opened up on Russia's theater critics with a front-page attack which said:

"An anti-patriotic group of vestiges from bourgeois esthetics has formed in theatrical circles."

The paper said such critics must be wiped out of the field of art and it called them a few names: "Anti-patriotic parasites," "nesting,izing monetarites," "bearers of palpable cosmopolitanism," and "useless mullers" and prattlers of "inflated self-opinions," full of "heretical connivance."

Pravda complained the critics openly objected to seeing Soviet heroes in Russian plays always victorious.

And some of these critics, said Pravda, had the gall to compare present-day Russian plays with the old Russian classics, giving the editors the better of it.

And if the American politicians on the Democratic National Committee, which runs the Democratic Party, were like the Communist politicians on their party's central committee, they'd call in American songwriters and composers and tell them:

"The trend away from capitalist ideology toward Socialism must be reversed. The latest concoction, 'Slow Boat To China,' is an abysmal distortion of capitalism's ability to produce nothing but fast boats to China."

"Further, to restore the American people to proper recognition of the blessings of capitalism, you henceforth must represent the American price system as the underlying philosophy of American ideology."

"Therefore, all songs written in the next five years shall be called 'I Found A Million Dollar Baby,' 'The Five-And-Ten Cent Store.' Either that, or return to old folk songs like 'Oh Dem Golden Slippers.'

The Communist Party's central committee has called for more em-

Rural Common Sense

By Spuds Johnson

CLAY ELECTRIC CO-OP SHOWS HOW GROUP CAN OBTAIN GOOD RESULTS

When folks in the country get together with each other for their own good and for their neighbors' good, they usually succeed in accomplishing what they set out to do.

A striking example of what people can do when they work together is the Clay Rural Electric Cooperative. Two thousand five hundred persons, the great majority of whom were from farms, attended the recent annual meeting of the cooperative to hear reports of their officials, to pass on matters pertaining to the organization, and to review with pride the growth and success of the cooperative.

Most of the cooperative members live out in the country where they at one time did not have electric power, and the primary reason they have it now is the assistance they obtained from the Rural Electrification Administration, and their willingness to work together to obtain it. Not everyone who wants power from the cooperative has it yet, but more than 6,000 farm families are getting power from it and the cooperative is working as rapidly as possible to extend its service to all who need it.

The Clay Electric Cooperative started 10 years ago with less than 1,000 members and with farm families in only three counties receiving its service; early 1949 finds the co-op with more than 6,000 miles of lines in operation. And it is going ahead now with plans to extend its production of power to extend its service to more farm families in the 11 county area.

Of course, there are numerous other cooperatives that have done much for their members, and there are many other examples of country folks working together for their own good and the good of their group, but the Clay co-op is an unusually good example of such concerted action and effort. As a result of their work and cooperation the member of the Clay organization have obtained something that makes their homes more comfortable, makes them healthier, and makes them far more efficient in their farm and home activities than they would be without electric power.

When folks cooperate, they usually get things done.

STANDING IN THE MIDDLE of scores of mounted carvings of various subjects, artist Jose Maas is pictured in a San Francisco, Calif., art gallery as he holds up a painting entitled, "Angel of the Cross." The painting, believed part of his stolen from the Catholic Church in Mexico during the years 1924-28, when property of the church was nationalized, are estimated at more than \$100,000. Colored Churches

By Shubie M. H. Church

Before I had opened at the usual hour at 11 A. M. with the usual team of 11, Mr. W. E. Delong, presently serving as a lieutenant in Company "A," 187th Glider Infantry Regiment, Camp Crawford, Holland, Japan, was recently promoted to that grade from private.

Pfc. Delong is a son of Mr. Louise Delong, of Ft. L. Stanton. He entered the Army in December 1946 and received his basic training at Fort Bragg, N. C. Upon completion of basic training, he volunteered for the Airborne, and took jump training at the Airborne Training Center at Fort Benning, Ga., winning his coveted "Wings & Boots." The distinction of every paratrooper. He made his overseas duty with the 101st Airborne Division, occupying the rugged northern island group of Okinawa.

When folks cooperate, they usually get things done.

group caption, were prepared to teach the lesson of the coming Subversive Propaganda through McLean, Virginia, in preparation for the election.

At 11:30 A. M. the first meeting was held in the auditorium of the Washington Convention Center, and the meeting was opened with a short program.

Evening sessions were conducted with McLean, Virginia, in preparation for the election.

At noon P. M. the service opened with a partial session. The Pastoral of J. P. Barnes delivered a stirring sermon from the Subversive Propaganda of the Problem.

Evening sessions were conducted under the same conditions.
