# Protect your investment in your MODEL T FORD

THE Ford Motor Company is making a new car, but it is still proud of the Model T. It wants every owner of one of these cars to run

it as long as possible at a minimum of expense. Because of this policy and because of the investment that millions of motorists have in Model T cars, the Ford Motor Company is devoting a large part of its factories to making parts, in order that owners may enjoy uninterrupted service for many years to come.

More than eight million Model T Fords are still in active service, and many of them can be driven for two, three and five years and even longer at small cost.

New fenders, for instance, cost from \$3.50 to \$5 each, with a labor charge of \$1 to \$2.50. Tuning up the motor and replacing commutator case, brush and vibrator points costs only \$1, with a small charge for material. Brake shoes can be installed and emergency brakes equalized for a labor charge of only \$1.25. A labor charge of \$4 to \$5 will cover the overhauling of the front axle, rebushing springs and spring perches, and straightening, aligning and adjusting wheels.

The labor charge for overhauling the average rear axle runs from \$5.75 to \$7. Grinding valves and cleaning carbon can be done for 83 to \$4.

A set of four new pistons costs only \$7 and an installation charge of \$6. For a labor charge of \$20 to \$25 you can have your motor and transmission completely overhauled. Parts are extra-

All of these prices are approximate, of course, because the cost of materials needed will depend on the condition of each car. They show, however, the low cost of putting the Model T Ford in shape for thouands of miles of additional service.

See the nearest Ford dealer, therefore, and have him estimate on the cost of reconditioning your Model T Ford. He will tell you, in advance, exactly how much the complete job will cost.
