

BASE BALL THIS WEEK

Palatka-Sanford
Palatka was here Monday and Tuesday to try conclusions with Sanford as to who was who when it came to playing ball.

Burleson occupied the pulpit for the Sanford class, and was ably assisted by Professor Hudson, who took in his delivery with the greatest of pleasure.

Palatka announced Mansel as their patron saint for the pinnacle in the lot, and Mr. White was invited to be his receiving partner back of the plate.

In the first inning honors were even—each club scored one run. In the second it was just the same, only a little different, each club made a score that sounded like a round hole in the earth.

George Fox umpired the game. The attendance was not overly large, but the enthusiastic fans were in evidence as they usually are.

Tuesday was an ideal day for ball playing, with an overcast sky and just air enough stirring to be noticeable. Dry grounds added to natural conditions aided much toward building high the expectations of lovers of the sport of witnessing a classy game.

In the fifth Palatka seemed to think it was time to make a balloon ascension and made it, not coming to earth again until the close of the sixth. During the two innings Sanford had by good playing on their part and unpardonable errors on the part of Palatka, made six runs, and the jig was up.

From the standpoint of good ball playing it was a dismal failure on Palatka's part. Walker, their pitcher, worked hard and faithfully, but the support he received was headenish.

Of all the dampfoolishness that ever rose up to torment mankind the base ball crank who loses his head over a five cent game is the worst.

Orlando-Sanford
Yes, they were here yesterday, horse, foot and dragons—also by the train load—all bent on one mission and that was to see a good game of ball.

The players of both teams were in good trim and eager for the fray. You could see it imprinted on their faces and in their actions. Orlando had come to give Sanford a drubbing, but they had tacked Capt. Bridges' bunch of ball tossers before and knew they would not have a walkover, especially with the Captain on the firing line.

The Sanford bunch had seen Lord Nelson's Trafalgar signal floating in the base ball breeze with Sanford substituted for England—"Sanford expects every man to do his duty,"—and they gave heed to it. And what they did to that Orlando bunch was a plenty and to spare and then some.

And the Sanford fans and players—well they were tickled to death. Just to think that Orlando had come up with colors flying and went back hugging one dear little lonesome run. Dreadful, wasn't it, Mable? Look whichever way they would they ran up against "Lucky Sanford" which, together with the yells of the fans and bells of rooters made them think that pandemonium had indeed broke loose and that they were nearing the end of their journey.

Score by innings: 1 2 3 4 5 6 7 8 9 R H So
Sanford 1 0 1 0 0 2 0 0 1-4 3 14
Orlando 1 0 0 0 0 0 0 0 1-1 4 14

Batteries—Sanford, Bridges, Bowers; Orlando, Biscoe, Myers.

Good Gravy
Taken From the Reporter-Star Almanac
The ninth has come, one man is down. The game seems good as won. And then four singles in a row. And Sanford scores two runs.

It Pays to Advertise
The following was received this week from C. Fred Ward, regarding a local ad placed one week in The Herald: "Please stop my cow advertisement, as it has sold me out. Send bill, including subscription to paper. It is all to the good."

A. E. HILL Hardware and Farm Implements

LUCAS PAINTS

Used in Uncle Sam's Paint Shop

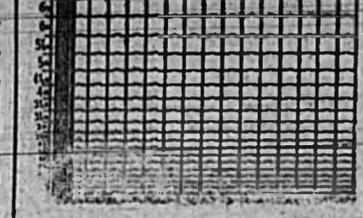

During the past year the U. S. Navy has consumed 691,000 pounds of LUCAS WHITE PAINT and 278,700 pounds of LUCAS COLORS, sufficient to produce more than 100,000 gallons of paint, equivalent to 50 carloads of 200,000 gallons each, and which would make a train more than one-half mile long.

In Uncle Sam's service, as in everybody else's, LUCAS PRODUCTS have an unbroken record for satisfactory results.

WE HANDLE THE ABOVE EXCLUSIVELY IN SANFORD

PITTSBURG PERFECT Best Fence Made

NO DEARER THAN THE POOR KIND

For Field, Farm, Ranch, Lawns, Corn Cribs and Poultry

Will stand ordinary as well as hard usage

Will not sag in Summer's heat nor break in the cold of Winter

Are made of the best materials and have stays that cannot slip

Do not require an expert to erect, and are low priced

WELL DRILLING

We have the largest and best equipped plant for driving wells in this section of the country and are prepared to fill all orders promptly. Our machinery is up-to-date and our workmen are skilled in the work.

Those contemplating putting in wells would serve their best interests by consulting us and learning prices before making contracts.

An Ordinance To amend Section 171 of Chapter 12 of the ordinances of the City of Sanford, Florida, of 1892 entitled "Fire Limits and Building Restrictions."

Section 171. No person or persons or corporation or corporations or individuals, their agents, employees or others for or on account of such corporations or individuals shall build, contract or enlarge, or repair in any wise or authorize the construction, enlargement or repair of any frame of wooden building or structures or any tent or booth, or in any wise alter or repair such building as aforesaid, upon or remove any such building, structure, tent, booth, or upon any lot or parcels of land within the following limits, that is to say, beginning on the south side of Fifth street and the west side of the alley east of Sanford avenue, thence running north on the city limits in the waters of Lake Monroe; thence following said city limits in Lake Monroe to the east side of Elm avenue, thence south on said Elm avenue to Third street, thence east on the north side of Third street to alley between Palmceto and Sanford avenues, thence south along said alley to south side of Fifth street, thence east to point of beginning.

Notice Of Application For Tax Deed Under Section 8 of Chapter 4888, Laws of Florida

Notice is hereby given that A. E. Sjolom of Lake Mary, Fla., purchaser of Tax Deed No. 400 dated the 3rd day of June, A. D. 1907, has filed said certificate in my office, and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property situated in Orange county, Florida, to-wit: W 1/4 of S W 1/4 of S 1/2 of Lot 2 of S 1/2 of Lot 3, Sec. 9, T. 20, S. R. 30 E. - 25 acres. The said land being assessed at the date of the issuance of said certificate in the name of Drawdy & Parramore. Unless said certificate shall be returned according to law, tax deed will issue thereon on the 17th day of August, A. D. 1909. Witness my official signature and seal this 16th day of July, A. D. 1909. B. M. ROBERTS, Clerk Circuit Court Orange County, Fla.

THE SANFORD HERALD

IN SANFORD—Life is Worth Living

Number 50

SANFORD, FLORIDA, FRIDAY, JULY 30, 1909

First Year

A NEW STEAMSHIP LINE

Proposed Run From Savannah To Sanford

NEW LINE WILL START AT ONCE

Will Ply Inside Route Touching Many of the Larger Cities Along the Way

The following interesting article appeared in Monday's Times-Union regarding a new steamship service which is to be inaugurated between this city and Savannah:

The new line will develop the inland waterway territory between Savannah and Jacksonville and the establishment of such a line will no doubt meet with the approval of all who are interested in the development of this section.

The steamer which will, if the line is established, be put on the run, is the paddle wheeler Annie G., with a speed of twelve miles an hour. She has a draft of six feet and could be easily handled in the inside route and, at the same time, it is learned that the steamer could make the trip outside, if necessary.

Several days ago it was announced that the Annie G. had sailed from Savannah with freight for Brunswick, Fernandina and Jacksonville, but, this, however, was an error, as the steamer stopped at Fernandina.

It is believed by well informed marine men that the line will be established at an early date between Savannah and Sanford, and that the patronage will be such as to encourage the promoters from the start.

A dispatch sent out from Savannah regarding the proposed line, is as follows: "An option has been secured on a steamer, which is 175 feet long and has 800 horse power engines. It has a capacity of carrying about 3,000 packages of freight and from 300 to 500 passengers. It would make the run between Savannah and Sanford in about eighteen hours and would touch at landings along the St. Johns, including Palatka, Astar and Jacksonville, as well as many others. After leaving Jacksonville, Fernandina, St. Marys, Brunswick and Darien would be touched. The plan of the promoters is that the vessel would make daylight runs first day Sanford to Jacksonville and next day here, reaching here in the afternoon from the latter point. The return would be made on the same schedule.

Well informed steamship and steamboat men believe that the proposition would be a highly paying one from the start, and that in a short time an additional boat would be required. The matter will be given close investigation and it is believed will be made a reality for such a line would be the means of greatly increasing the business of the city."

Eagles Convention in Ocala

That Ocala had been selected as the meeting place for the state convention of the Eagles was announced by President Ditto at a meeting of the Ocala Aerle. The convention will be held August 18-20 for the purpose of organizing a state aerle and considerable business of importance to the order will be transacted at this time.

Delegates from all parts of the state will be in attendance at the convention, which will prove an important event to the city as well as the lodge.

New Laundry Building

J. H. Overman has started a new building on Cypress avenue and Third street and when it is finished he will install a first class laundry. Mr. Overman wishes to inform the public that he has installed the latest improved machinery and will give the patrons the best of service. The new laundry will begin operations about the middle of September.

Notice of Meeting

The business meeting of the Welaka Club was postponed from July 27th to Tuesday, August 3rd. Meeting will be held at the residence of Mrs. Newman at 4:30 p. m. A full attendance is desired.

BASE BALL NEWS THIS WEEK

An Even Break With Palatka Was the Best Our Boys Could Do

From a Sanford standpoint, the game last Friday between Sanford and Orlando was not as interesting as it might have been, and as was the one of the day previous. The crowd was there, the ear-deafening, brain-racking noise was there, but for some reason the home team seemed to run up against a hoodoo about midway of the game and from that on were unable to get from under its influence. Some said it was Jimmie Windham's double-knot pitching, others that it was Jim Harris's cornet solo on the fish horn, while the more sane and sane were inclined to charge it up to his Umps, who seemed in a daze at critical moments, and would sometimes make decisions without seeing the play. Of course, he couldn't help this because he was left handed. Being left handed also caused him to call "strike" when he meant "ball." This peculiarity was somewhat bewildering to the home boys, especially so when they noticed that it manifested itself to their disadvantage each time. The main reason, however, for our defeat was Sanford only received one run while Orlando was given three. That is plain and doesn't need any further explanation; the game won't be played over. Of one thing we are satisfied, every Sanford player did his duty.

First Game at Palatka

Sanford lost the first game of the series at Palatka by a score of 2 to 1. From reports it was a very even game, the hits being the same, each team getting five. Strikeouts were the same, also, Jones for Sanford getting six and Walker for Palatka six.

From the decisions of the umpire it is very evident that Sanford was scheduled not to win under any consideration. At the end of the ninth inning the score was 1 to 1, and Sanford had a good chance to win until a Palatka player tried to score and was out by easily three or four feet. Umpire called it safe, that making the score 2 to 1 in favor of Palatka.

Score by Innings:

	1	2	3	4	5	6	7	8	9	R	H	So
Palatka	0	0	0	0	0	0	0	2	2	5	6	0
Sanford	0	0	0	0	0	0	0	1	1	5	6	0

Batteries—Palatka, Walker and White; Sanford, Jones and Swan.

Sanford Wins Second Game at Palatka

By a score of 3 to 2 Sanford won the second game Wednesday with Palatka. Game was called at the end of the fifth inning owing to a drenching rain.

Godwin occupied the box for Sanford, and this is the second game he has won from Palatka.

Several fans seemed to be just a little disappointed because the Big Boy didn't pitch, but what is the difference, we won anyhow. The Sanford team is very well equipped with pitchers and catchers at present. Swan has made good, and with Hudson we have a pair of backstops who are hard to beat.

Score by Innings:

	1	2	3	4	5	R	H	So
Sanford	0	0	2	0	1	3	3	4
Palatka	0	0	1	1	0	2	4	4

Batteries—Sanford, Godwin and Swan; Palatka, Mansel and White.

Umpires—Licks and Barard.

Base Ball "Dope"

The editor of the Lakeland News recently complained of the numerous unintelligible terms used by reporters in handling the details of a baseball game. The point raised by the News is well taken. Base ball reporters seem to have a language peculiarly their own and unintelligible to the general public even to that part of the general public who understand the game.

When one reads about how one batter "skayed" and another "fled" out or how the pitcher "balked and the batter "walked" or how the pitcher "lugs" the batter "slugs" and the runner "hugs" the (base), is it any wonder that the reader after filling his head with this kind of stuff is heard to timidly inquire: "Who beat?"

Lucky Sanford Pennants

About the prettiest pennant ever made is the new Lucky Sanford recently designed by Paul Weaver. It consists of old English letters in red on a gray ground with a purple ribbon, the pennant tied to a durable bamboo cane. The words Lucky Sanford are an omen of good luck, and Paul Weaver seems to strike the public fancy on everything he originates. The pennants can be seen at The Herald office and everyone should get a pennant for the Orlando games next week. They will make a good souvenir to keep after the ball season is over.

ALL AROUND FLORIDA

The General News of "The Land of Flowers"

CULLED FROM THE STATE PRESS

An Epitome of the Week's Most Important Happenings in the State's Domain.

The 13-year-old son of Mr. and Mrs. M. B. Austin of Tampa was killed last week by coming in contact with a live electric wire. He had been on an errand and in returning home made a short cut through the alley in the rear of the residence, and in some manner came in contact with the wire which was swaying across the alley. His body was discovered by an older brother on his way home later. Three physicians worked over the electrocuted boy without avail; life had gone out.

An excursion train on the A. C. L. was wrecked last week near Kendrick. No one was killed and only a few severely injured. The excursionists were returning to Gainesville from Ocala, where they had been to witness a ball game between the Gainesville and Ocala teams.

Chico Gonzalez is under arrest in Tampa, charged with being the assassin of Alvares in West Tampa last week.

A 11,000 acre land deal was consummated last week. The property belonged to E. L. Lesley and lies on the east shore of Lake Kissimmee and on the south shore of Lake Marion, between Whittier and Turkey Hammock. P. A. Vans Agnew was the purchaser.

The execution of R. H. Owens which was to have taken place in Gainesville last Friday by Gov. Gilchrist recalling the warrant for the execution, on an order from the supreme court.

Detectives Phillips and Higgins have been permanently suspended from the police force of Tampa for conduct unbecoming officers.

Elizabeth M. J. Lindsey has been an inmate of the insane asylum since 1881, yet there is no record to show that she was ever adjudged insane. Her bodily health is good, but mentally she is unimproved. It has lately been discovered that she owns valuable property in Jacksonville.

The American Mahogany Co.'s plant is to be moved from Chicago to Tampa. A location has been secured on Seddon island. The building will be of steel and masonry and will give employment to a considerable number of workmen. To furnish the logs for operating the plant a steamship line will be established between Tampa and Central American points, and the logs will be landed right at the mill. Fine furniture of all descriptions will be made at the plant. Tampa won in competition with Mobile and New Orleans.

The steamship Mascotte plying between Tampa and Havana, has been equipped with wireless telegraph apparatus.

The jury in the Ficcoraita murder case in Tampa failed to agree, and were discharged.

One of the boilers in the Tillman Cypress Co.'s mill at Cedar Key exploded last week, severely injuring several employees. Fortunately, no one was killed.

Daniel Baker, an aged cattle man and orange grower living near Wauchula, died last week. In selling cattle or oranges he always demanded gold in payment. A few days before his death he dug up his treasure, amounting to some \$18,000, which he had buried under his door-step, and sent it to the bank for deposit.

A railroad from Quitman, Ga., to Tallahassee, by way of Monticello, is now spoken of as an assured fact. The South Georgia railway has agreed to lease the road for ten years or more at a guaranteed interest of six per cent net.

It is now claimed that a pre-historic ruin is visible in St. Andrews bay, between J. C. Holly's residence and Dyer's point. A move is on foot to get the Smithsonian institute to look into the matter.

On and after August 1st The Hillsboro State Bank of Plant City will become the First National Bank of Plant City, with a capital of \$50,000. There will be no change in the officers or directors.

W. W. Whilden, a former engineer on the A. C. L., has sued the company for \$48,000 for injuries received while in their employ.

By the fall of an elevator in the Havana Cigar factory in Tampa, Monday, two boys named Fernandez were seriously injured.

FIVE MILLION BOXES OF ORANGES

Estimated Crop Of Fruit That Will Be Marketed This Season

Five million boxes of citrus fruit, selling price to average at least \$1 per box, and the groves looking better today than at any time for the past five years is a prospect and a reality which were responsible for the joy of the thousand orange growers who left our city today after the organization of the Florida Citrus Exchange which came to a successful issue after two enthusiastic meetings yesterday.

A Times representative spent some time interviewing several growers from all sections of the state and a composite reduction of their expressions is found in the above statements.

"The crop this year," said a conservative grower, "will run over five million boxes. The buyers will claim seven million boxes in an endeavor to beat down prices. Some authority places the crop at six million boxes, but five million is a safe and sane deduction. This figure will be the basis on which prices will be made.

"As to prices," he continued, "I am certain that with the marketing of our product by the Citrus Exchange that we will do as good as \$1 per box if not better. I would not be surprised to see an average of \$1.20 per box. I understand that the buyers in DeSoto county who offered fifty cents per box some weeks ago, money payable on delivery are now offering seventy-five cents per box cash in advance.

This is the highest price ever offered at this season of the year by the buyers and the cash proviso would certainly have looked good to us last season. If the Citrus Exchange before its organization could raise prices twenty-five cents per box you can depend upon it that \$1 per box oranges are in sight. Just think, on a five million box basis this twenty-five cent raise means to the growers of Florida \$1,250,000. In plain language, the Citrus Exchange made for the growers of Florida a million and a quarter before its charter was received."—Tampa Times.

Stetson College of Law

The Stetson College of Law at DeLand, Florida, was organized in 1900, and has since done distinguished service for the legal education of Florida boys. A great many of the graduates of this department are holding places of distinction in the legal profession in Florida. Among these are an acting United States district attorney, a number of county prosecuting attorneys, county judges, municipal judges, and young men eminently successful as counsellors and attorneys.

The Stetson College of Law has the finest law library, with one exception, in the state of Florida. The institution has expended thousands of dollars in building up this library of legal references, and young men who take their law course at Stetson are given an opportunity to learn how to use a law library.

A glance at the faculty list in the new law bulletin will be sufficient evidence that the university authorities are determined to increase and strengthen the teaching force from year to year in the law school, and to keep this department of the university to the forefront among the law schools of the country.

Requests for law school announcements should be addressed to Stetson University, DeLand, Florida.

Pre-Cooling Plant For Sanford

Sanford, Fla., July 22.—Sanford is going to have a pre-cooling plant. It will be built after the style of those of California, which are said to be the finest system known. There is not a point in the State where a pre-cooling plant will be of more service than at this point and negotiations are already in progress to form a company and obtain suitable location for the buildings, that is of easy access to all the railroads.—Produce News.

Rogero Poisoned

Owing to being poisoned by the coloring from baseball-stocking, Harry Rogero is laid up and unable to make the trip with the boys this week. His many friends are sorry to hear of this, and trust he will be in condition to help take a fall out of Orlando next week. Rogero is quite a favorite among the fans here, as his pitching has been all to the good.

More Houses Needed

The same old story is being made this summer in regard to residences in spite of the fact that some fifty new ones are being built. There are people here every day wanting houses and none to be had. Sanford needs a few capitalists that will build several dozen new houses to provide for the new people coming in every day.

TRACTION EXTENSION

Sanford Traction Company will Complete Line

WILL BUILD ROAD TO ORLANDO

Giving to Orange County One of the Very Best Traction Lines in the State

Sanford's citizens are very much pleased to hear from Manager A. P. Connelly that orders for material for the completion of the Sanford Traction Company's track from the intersection of Florida avenue and First street to a connection with the rails of the Sanford & Everglades railway have been placed and that work will be begun within two weeks and will be pushed to completion ahead of the paving to be laid on Sanford avenue.

Mr. Connelly advises that after inspection of the different classes of motor cars and testing them thoroughly, the Sanford Traction Company has selected the kind of cars they will use and placed orders therefor, so that we may expect to have the cars built and ready for service by the time the link is completed between First street and the Sanford & Everglades rails.

The Sanford Traction Company will then start operations with the five miles of track of the two roads and the Sanford & Everglades railroad will be extended two or three miles further, making the total line in operation within the next ninety days, seven or eight miles. With this mileage constructed and in operation it will take but a short time to complete the line to Orlando, which is the full intention of parties interested.

Details of the proposed route will be given in The Herald in a few weeks, and will prove interesting to every citizen of Orange county, as this traction line will do more for the development of the county than any movement that has been inaugurated. The line will probably be extended from Orlando to Kissimmee on the west and from Sanford to the East Coast, thus giving the inhabitants of the interior counties the benefit of rapid transit to either coast, and the long delays now experienced by travellers seeking points on the coast will be eliminated. The promoters of this line are all home people, and the patrons of the road can rest assured that their interests will be protected, and the best of service will be guaranteed.

Building a Floating Pavilion

Sanford is growing in population so rapidly that old pursuits and pleasures do not suffice for the present needs and the need for more amusements is becoming apparent every day. John Ingraham is the first to recognize this need, and is constructing a floating pavillion that ought to prove a grand success. The pavillion is constructed upon a barge and the first floor can be used for dancing and other amusements. On the roof a guard rail will be extended and the passengers can sit down and enjoy the ride, or go below and join the merry throng. The pavillion will be 22x80 feet and being strongly built will carry about 200 passengers. If a suitable park can be built along the lake shore some place where the people could spend several hours, the crowd could be transported on this barge in perfect safety. It can easily be towed to any part of the lake and should enjoy a good patronage. Mr. Ingraham will also equip the boat to serve the passengers with meals and fresh fish out of the lake would prove a most toothsome dish after a trip across the water. The craft will be ready for the first run about September first.

Needs The Herald

The following was received from T. L. Pitt formerly of this city and now residing in Memphis:

"Let The Herald come regular as it is always a welcome guest. Sometimes during the long, hot nights here I sigh for a zephyr from Lake Monroe. I have not lost interest in Sanford in any degree, and am glad to note that she is still on the road to better things. Success to Sanford and The Herald; success of either means the life of the other. Yours truly,

T. L. Pitt.

Lincoln Head Cents

Distribution of the new one cent piece bearing the Lincoln head instead of the Indian head, will begin August 2. The Philadelphia and San Francisco mints are rushing the new coinage in anticipation of an unusual demand. There are at present in circulation more than \$16,000,000 worth of the Indian head cents.

CURBSTONE GLEANINGS

A Budget of Opinion "Just Between You and Me"

EVEN THE GATE POST NOT IN IT

"A Chief is Among Ye Taking Notes, and Faith, He'll Prent 'Em"—So Says Saunterer.

A newspaper is not altogether published to tell the people what they would like to know, but has to give much of its space to telling them what they ought to know.—Greely.

Special Correspondence to The Herald.

"Don't you hear that gentle rustle, where the corn is standing high. That ranges from a chuckle clear to satisfaction's sigh—Sort of satisfaction's whisper to the wind that's passing by? Don't you hear?"

Yes, of course, just what may cause it would be pretty hard to say. But there's surely something doing when the corn is getting gay. And just now it keeps on getting somewhat gayer every day—That's quite clear.

Indeed, it's not unlikely 'tis because we've had some rain. And the sun is getting busy in his July way again. While the mercury is showing a much more ambitious strain—And it's hot.

Do you hear that gentle whisper of the green blades waving high? It's just the corn that's telling, 'twixt a chuckle and a sigh. How it's busy rustling now to fool the experts by and by. That's just what!"

While talking to Frederic Rand the other day some interesting data concerning this section in the earlier days was elicited. Mr. Rand, representing the Florida Land and Colonization Co., laid out the towns of Sanford, Kissimmee, and Clermont, and for the past twenty years has been engaged in settling up the affairs of this company. They controlled thousands of acres in Florida and many other states and their holdings totaled up in the millions. The great freeze crippled the company in Florida, and the death of the different stockholders finally left Mr. Rand to dispose of the vast holdings according to his judgment. Mr. Rand is of a retiring disposition and never speaks of his achievements, but some of his experiences in the early days, when the history of this section was young in the making would be interesting reading. As an instance of the fluctuation in property values several years ago Mr. Rand, in disposing of city property, sold a lot in Sanford for two dollars. Needing this same lot the other day for a factory site, he bought it back and had to pay seven hundred and fifty dollars for it. Thus from prosperity to poverty and up to prosperity again, Mr. Rand has watched the state of Florida for many years, having lands in every part of the state, and seeing the rise and fall, even as the ticker announces the rise and fall of stocks. Like every other citizen, Mr. Rand has great faith in Sanford's future and prosperity.

Since writing about base ball last week several of my whilom friends have approached me on the subject with blood in their eye and demanded why I should score them for becoming fanatics. Far be it from The Saunterer to score any lover of ball—that is real, good, clean ball—and when a man becomes foolish over it, and can afford to neglect everything and make a practice of following up the game, talk baseball, sleep baseball, eat baseball, and live baseball, all right. It is him to the bughouse, and I for one will bid him a fond farewell as he takes the train for the summer resort at Chattahoochee. What I do kick against is the insane desire of some people to attempt to get their face in every game, give their opinions to the umpire, bullyrag the players, and otherwise deport themselves unbecomingly gentlemen. There is nothing to it. If you go out to a game looking for trouble, you are more than apt to find it, and the guy who chases around with a chip on his shoulder should be escorted to the gate by the police before the game starts. Be a gentleman, no matter how painful!

Some of the boys who attended the Ocala-Orlando game this week report a fistyuff battle between Pounds and one of the Ocala players. When they had finished fighting, the Orlando police stopped the mill, which was a noble act on their part. It seems that some ball players are too pugnacious to indulge in a friendly game of ball, and as I have before stated such cattle should be ruled off the diamond. These little scraps are getting too frequent, and if some of the boys had rather fight than play they ought to get in a barn some place and fight it out. The spectator who pays his money to see a ball game is getting very tired of this foolishness and if the Orlando police force cannot stop it, the management ought to appoint a special force of peace makers.

One of the prettiest sights in Sanford is the view down Park avenue toward the lake since the street has been widened all the way and the fountain has been placed in position. The crystal water splashing all day long as the cascade of sparkling fluid fall back in the basin with

the blue waters of the lake as a background is a picture that would grace the canvas of an artist. Now if the lake front could be cleaned up, and the old boat hulks and weeds removed the picture would be complete. Our lake front, the most valuable asset of the city, receives less attention than any other part. Some day the front will be bulk-headed and a driveway constructed and then Lake Monroe will come into her own. The position of Sanford is a most desirable one and many other cities would give a cool million of dollars to have Lake Monroe and the St. Johns river at their very doors. Probably in our case familiarity has bred contempt or the gifts provided by Nature are not appreciated.

When out in California, I learned this about Japanese dentists: A dentist from the land of cherry blossoms does not frighten his patient with an array of steel instruments. All his operations in tooth drawing are performed by the forefinger and thumb of one hand. The skill necessary to do this is acquired by long practice, but when it is obtained the operator is able to extract half a dozen teeth in about half a minute, without once taking his fingers from the patient's mouth. The dentists education commences with the pulling out of pegs which have been pressed into soft wood; it ends with the drawing of hard pegs which have been driven into an oak plank with a mallet.

I am glad to note that the few people who did not at first favor bonding the city for improvements are heartily in accord with the movement. The new brick streets that are being constructed are proof sufficient that every cent so expended will return to the city an hundred fold. In fact the new streets are the greatest asset a city could have, and as the work progresses the visitor to the city is impressed at once with the thought that Sanford is the greatest city of its size in Florida. Any money spent for such improvements is well spent.

Florida has the finest sea coast and beach in the world and people who go north in the summer time to get cool are throwing away an opportunity that virtually lies at their very doors. Hosts of Sanford people are taking advantage of the beach this year, and the other day Mayor Lake remarked to me that he never enjoyed an outing so much as he did a few days spent at Daytona Beach. It is certainly the greatest place for the little folks that can be found anywhere, and a vacation spent there makes strong, healthy children.

I see that Sanford is to have a steamship line from Savannah, and this means that our city will soon rank among the larger cities of the South as a basing point for shipments of all kinds. Sanford has long occupied a prominent position on the St. Johns river, being at the head of navigation, and now the large steamship lines are recognizing the importance of this city, and the next few years will witness several new lines coming to this city from Savannah and Baltimore.

Why don't they fix that fountain in the city park? Of all the blots upon the landscape this is about the worst. Filled with old trash and continually overflowing, this fountain has been the source of displeasure to the public. Better dig it up and make a flower bed out of it. Another suggestion regarding this park is that the walks be filled with clay taken from the street and make a good dry path for the public.

CLAUDE L'ENGLE IS A CANDIDATE

Has Ambition To Become A United States Senator

After a stay of two days here getting out printed matter for his campaign Mr. Claude L'Engle left Saturday evening for Jacksonville. Mr. L'Engle will start immediately on a tour of the state in behalf of his candidacy for the United States Senate. He has decided to oppose Senator Talliaferro and will spend the next several months stumping the state.

In discussing his campaign with a Record representative he said he intends to demonstrate to the satisfaction of the people of Florida that a poor man can run in the primary. He will start tomorrow from Pensacola on a railroad tour of the state and will spend two and a half months traveling by rail, distributing his literature and meeting as many voters as possible. He expects to follow the railroad trip with an automobile tour, or rather with three automobile tours of the state, covering 9,000 miles in the auto. He visited several auto manufacturers recently while north and arranged with one concern to supply him with an automobile and machinist for this trip absolutely free of charge, his only expense being subsistence for the mechanic and the fuel consumed by the auto. The manufacturer expects to be repaid by the advertising the machine will receive from the novel trip. Mr. L'Engle stated that he would start at the Florida line in the vicinity of Pensacola in the auto on Oct. 1st and intends to spend six months on the road, traveling day and night as occasion demands. He will carry literature in the car with him and will distribute the same wherever he finds a voter. He intends to dash into towns and run the machine to the most conspicuous spots, thereby having a big advantage over the speakers who will be anchored to stationary platforms. He contends that the machine will attract crowds wherever it stops and his audience will assemble without expense to him. He has figured that he will travel fifty miles a day and will have ample time for his treble tour of the state.

He will stop at farm houses and make the acquaintance of every voter, practically making a house to house campaign in the country, presumably kissing the babies and winning the parents to his political views. He intends to tack up his campaign literature himself, thus saving another big item of expense.

Mr. L'Engle is known from one end of Florida to the other and he has many admirers among certain factions. He is energetic and original and his candidacy will inject some ginger and electricity into the campaign.—St. Augustine Record.

About The Citrus Exchange

To the Editor of The Herald:
The citizens of Lucky Sanford do not seem to have the enthusiasm in the organization of the Florida Citrus Exchange as is shown in all other sections of South Florida which can hardly be expected as that section of Orange county was harder hit in the disaster of a few years ago when the orange industry throughout that section was nearly destroyed, but that should not cause them to hold aloof from supporting the organization that will not only benefit the fruit growers of the state but will benefit every other industry and every individual in the state, the merchant, the mechanic, those of every profession, and especially the real estate agent, for the revival of the fruit industry placed on a profitable basis will be the best advertisement and will bring more permanent settlers to the state than any other mode of advertisement that can be conceived of. When the home seekers who visit this state, so admirably adapted by climatic conditions to fruit culture—the most alluring industry in the world—and find a protection to the industry, they are captured at once and become citizens of this favored country and climate, not equalled on earth. Of course, the new conditions will antagonize dishonest vipers, who have grown rich through their dishonest dealings with the fruit growers and now realize that they have killed the goose that laid the golden eggs for them. They must take their medicine now as the result. The organization of the Citrus Exchange will be the channel through which many thousands of hard earned dollars will be returned to the industrious fruit growers which will be put in circulation among every class of people residing in the state, instead of lining the pockets of thieves and robbers as has been the case for the past several years. I have had faith for some time that the farmers and fruit growers must see the advantages of an organization, but conditions have brought it about much sooner than I expected to see it, and now as things are coming our way and the possibilities of this most wonderful state are rapidly becoming better known to the people of the United States and the world at large, it is not too much to expect that the population of this favored State of Florida will be nearly if not quite doubled within the next ten years. It is the united effort of the present population that will accomplish this great work, that will induce settlers to abandon the old trail in the land of disasters, blizzards, floods and many other disagreeable and unhealthy conditions, and make their future homes in this most delightful climate on God's great earth and where man can feel that life is worth living and comfort and happiness reign supreme. —N. H. Fogg, Altamonte Springs, Fla., July 26th, 1909.

Settle The Crate Question Now.

To the Editor of The Herald:
Please allow me space in your columns to again call the attention of our celery and vegetable growers here to the importance of settling the crate question. The Sanford Celery Union will be a factor in the marketing of the next crop, and we wish to be on record as no disturbing element, but for the good of all concerned. At a recent meeting of the union the crate question was discussed and the 10x20x24, our former standard, was adopted. We believe this crate to be the choice of the buying trade, and as we have no complaint as to its carrying by refrigeration, we feel satisfied with it, hence the action in making it our standard. Another important matter that should be looked after is the increase in the minimum load to Eastern markets. The minimum up to the present to Eastern markets has been 300 crates. I am informed that it has been increased to 350 by the railroads, which will work an unjust hardship on our growers. I beg to suggest that we get together at once and take the matter before the Interstate Commerce Commission, as this will mean many thousand dollars to growers of this community. I wish to call the attention of our people to the recent organizations of the citrus growers throughout the state, though late in awakening to the actual necessity of organizing the growers on a sane business principle, they have at last taken a step in the right direction, which if carried out will make citrus growing once more profitable and pleasant. There never was a more truthful saying than "United we stand, divided we fall,"

and it will apply to every branch of trade, yet it is so hard for farmers as a rule to realize it. I wish to go on record now, begging every farmer to connect himself with some one or another of the marketing agencies here, in order that we can get better distribution, and not glut any one market. It is our salvation. I wish to warn those who are contemplating large crops, on small capital, to diversify your crops. Don't overcrop yourself. Raise what you can look after as it should be safely. Raise fine stuff and not so much inferior stuff that is only fit for overloading the market, or hurting those that are striving to keep at the top. We have the finest lands in the world to grow almost anything that is fit to grow, so don't let it be said that for lack of a little horse sense, that any of us should fail to realize what rightfully belongs to us. The Union is stronger than it ever was. Now that it is so, it was predicted that it would go like others to pieces. I see no reason why truck growers can't organize as well as any other class of people; they certainly need protection even more than any other class of producers, in that what we depend on is at a rule luxuries and not necessities. This being the case does it not stand to reason that we need to put it within reach of the trade that demands our kind of produce? There are some important things that we should not overlook, but think of while we dig ditches and roots and sweat at fixing seed beds, etc.

K. R. MURRELL,
President Sanford Celery Union.

About The Public School

In the interest of the school children of today, who will be the men and women of the future, the suggestion is made that the citizens of Sanford divide their attention and interest and do not let themselves forget that it will not be very long before the beginning of school. So far it does not seem that anything tangible has been done toward adding to our school building, or providing larger or more comfortable rooms for the little tots than the old building used last term. In seeking your own pleasure, in encouraging athletic sports; do not forget your duty to the helpless children in your midst. By your interest, enthusiasm and support, encourage and help those who have the matter in charge and whose duty it is to meet this emergency arising from our inadequate school building. If the citizens of Sanford, men, women and children, were as united in their interest and enthusiasm on the subject of mental culture and character—building as they are about base ball a glorious era could soon dawn for us. And if they were as jealous in trying to aid the cause of education, in providing the buildings and means for training the minds and upbuilding the characters of the children of Sanford as they are in securing experts for the base ball team it would not be many decades before we should have a race of intellectual giants, as the minds and hearts of children are so responsive to love, care and training, that the results in the future will amply repay every effort made in their behalf now. —A MOTHER.

CAN SUPPLY CUT FLOWERS

Sanford People Do Not Need To Send Out Of City
There was a period in the history of Sanford when it was difficult to obtain cut flowers for different occasions and orders for flowers were all sent to out of town caterers. Recognizing the need of a good business of this kind in Sanford, L. H. Temple several months ago became the agent for one of the large city florists and is now prepared to furnish cut flowers and plants on short notice. He is also putting out some choice roses and other flowers at his residence on Oak avenue and can furnish plants to any one desiring them. Mr. Temple will embark in the business upon a large scale in the early fall and can supply the people of Sanford with anything in this line. Just now he has some real good snaps in plants and shrubs and this is the time to plant them.

Michigan Celery Is Poor

Philadelphia, July 22.—As far as the local market is concerned Michigan celery is proving a poor sale. Fancy stock would sell well at 25 to 35c a bunch were there any here, but what is offered is poor. It lacks the quality that celery has to have to move during the hot months and buyers at this time of year do not take it readily.

Although receipts of York state celery were rather liberal last week, light arrivals only are reported now. The demand is good and what is coming sells well at 35 to 50c a bunch. The quality is only fair, but better than the Michigan. From best reports from the well posted dealers the movement from York state will be light until about the first of August.—New York Packer.

Gas and Electric Fixtures

We carry the combination fixtures, also a full line of gas fixtures, brackets, etc. Gas stoves and ranges. The Free day only. RE CO.

TAKE IT IN TIME

Just as Scores of Sanford People Have

Waiting doesn't pay. If you neglect the aching back, Urinary troubles, diabetes, surely follow. Doan's Kidney Pills relieve back-ache, Cure every kidney ill. Sanford citizens endorse them. Mrs. W. R. Pell, Third St., Sanford, Fla., says: "I am pleased to recommend Doan's Kidney Pills in return for the good they did me. I suffered from backache a great deal and at times was so lame I could scarcely turn in bed and it was difficult for me to dress myself. Whenever I stooped, sharp pains darted through my body, especially in my kidneys. I also had some trouble with too frequent urination. After I had used several remedies with only slight benefit, I heard of Doan's Kidney Pills and procured a box. They brought me the desired relief and I am now able to rest well, am free from pain and lameness and feel better in every way." For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

BUILDING A GREATER SANFORD

Florida is probably the fastest growing state in the symposium of sister states that unite in making America the greatest country on the globe.

Many years ago the stream of home-seekers and prospectors was diverted toward Florida and the state bade fair to eclipse all others in prosperity and wealth. The freeze that killed the orange trees killed the hopes and ambitions of many good citizens. Numbers moved out of the state but those of staunch heart and an abiding faith in Florida stayed here and bulled anew upon the ruins wrought by the great calamity. In this section, one of the greatest in the orange belt, the people quickly demonstrated that there were riches to be obtained from the soil other than oranges and from a small beginning the raising of vegetables was fostered until today Sanford section is the greatest in the United States. The stories of wealth to be derived from the great sub-irrigated district has permeated every nook and corner of the civilized world and the rapid increase in population has naturally forced Sanford to the front as one of the leading cities of the State. Being a city already built at the time of the freeze Sanford at the present time does not strike the visitor as a boom city, the growth in the past few years being slow but sure and in the business district but few buildings being erected.

The country surrounding being the lodestone that attracted the new people naturally grew faster than the city proper and in the rush for celery lands the city property was neglected. Like all farming sections, however, the city so situated was forced to grow being backed by a substantial increase in business of every kind. The growers built good homes near each others upon their farms and the celery delta ere long took on the appearance of a straggling city for miles on either side of Sanford proper. This situation called for transportation facilities and last season the Sanford & Everglades Railway Co. was formed of home people who early recognized the fact that a railroad with interurban features would soon prove a paying venture. The road will soon be finished to Cameron City and thence to Orlando and Kissimmee and from a small belt line as first proposed is destined to become one of the best traction lines in the south. The steamship companies are recognizing Sanford as a basing point and a new line will soon be in operation from Savannah to Sanford. The progressive citizens are also on the qui-vive to keep pace with other improvements and the city is having over three miles of brick streets constructed, factories being built, several wholesale houses are anxious to locate here and take advantage of the superior shipping facilities and in a few years the city that at one period was pronounced dead will be the liveliest of the live.

A new electric light plant being installed promises to give the city a better appearance at night and in every way Sanford is being transformed as though touched by the hand of the magician.

So great has been the demand for vegetable lands that there is only a small portion left in the hands of the real estate men for sale, and the march for new lands is getting further from the city each month. In time the celery delta will be a vast network of farms, inhabited by prosperous and happy people, and in the center of this vast industry will be Sanford, a city of beautiful homes and thriving industries. The good work of improvements must not lag. Every requirement of a Greater Sanford must be met. More streets and sewers, a larger school building, a better lake front, better buildings, a Commercial Club, and numbers of other improvements should be made, and let there be no dissenting voice to retard the onward march. Today is opportunity and it may never knock at your door again. "There is a tide in the affairs of man which taken at the flood leads on to fortune."

TRADING ON SANFORD'S REPUTATION

Our attention was directed to an advertisement this week of the Prosper Colony in this county in which the names of a half dozen growers of Sanford and their statements are used. These growers had all made a success at Sanford, and upon being interviewed on the subject had given a HERALD representative the facts and figures. These same statements were published in THE HERALD early this season, and excited such favorable comment that over two hundred copies of the paper were sent to different sections of the North-

The promoters of the Prosper Colony evidently thought they were good and embodied them in a pamphlet descriptive of their lands.

They had no authority to use these statements, and especially when no mention was made of the fact that these large crops had been made at Sanford. While the pamphlet does not state that these gentlemen reside at Taft, the impression is given that such crops were raised there and the public is deceived into believing that at Prosper Colony such crops can be raised, when in fact no such crops of celery and lettuce have ever been raised in the Prosper Colony, and it is doubtful if a flowing well can be obtained on any of this land.

If the promoters of Prosper Colony have such a good proposition as their claims set forth it would not be necessary to deceive the purchaser into the belief that these Sanford growers lived near Taft, and if they really wished to quote the Sanford people, in justice to the public they should have asserted that these crops were grown at Sanford, Florida, and not at Taft. Several of the growers whose names were used have written to the promoter regarding this pamphlet and forbid their names being used in any printed matter of the Prosper Colony. This trading upon Sanford's reputation cannot redound to the credit of Prosper Colony, and in time the purchasers of Florida vegetable lands will get wise to the fact that all is not gold that glitters, and all lands in Florida are not vegetable lands.

BURR'S INIQUITOUS BILL

Under an act passed by the last Legislature, which has just gone into effect, railroads are notifying newspapers with which they have advertising contracts, on the basis of an exchange of transportation therefor, that such contracts will have to be cancelled, says the Tampa Tribune. The result will be that the railroads will greatly reduce their advertising in Florida papers and the loss will fall heaviest on the small weekly papers, which cannot obtain such advertising on a cash basis.

So far as the larger papers are concerned, the exchange proposition was merely a matter of convenience but, with the smaller ones, it will mean a total loss of business in this particular.

Whenever some smart fellow who happens to be elected a member of the Legislature starts in to "reform" things he generally succeeds in imposing an unnecessary burden on those least able to bear it and then flatters himself that he has "done something for the people."

This bit of legislation lacked the merit of a blow to the free press evil, because there have been no newspaper free passes in the state for several years. The system which this law stops simply caused the railroads to be a bit more liberal in their advertising, because they could pay for the same in transportation. Now they will have to pay cash and they will reduce their advertising, it is believed, fully one-half.

The loss falls on the country newspaper, which struggles along in an effort to build up its town and county and which, all too frequently, finds that it has toiled only to the result that some long-earred jackass goes to the Legislature and exerts himself to put the newspaper out of business.—Pensacola News.

THE GOOD OLD SUMMER TIME

Many people reading in other sections of the country who have never visited southern Florida during the summer months are laboring under the misapprehension that the weather is insufferably hot and enervating during these months. As a matter of fact nothing could be further from the truth. Florida is famous as a winter resort, but it is the deliberate opinion of those who remain here throughout the year that by comparison our summer climate is superior to our winter climate, and that as this fact becomes generally known the state will become more famous and popular as a summer than as a winter resort for tourists and pleasure seekers.

It is true that we have "apella" of warm weather, but prostrations from excessive heat never occur here—as they do by hundreds throughout the summer in many other sections of the country. And nearly every night is cool enough to insure sound, refreshing sleep. Those who must spend the summer in southern Florida do not deserve the pity—but to the contrary the envy—of the residents of other sections of the country.—Tampa Times.

THE LIMIT

The funny little flips and the happy little hits between Orlando and Sanford, and the slummy little slams between the two "H's" who run the newspaper end of the business and the natural little rivalry between the boys who toss the ball and swing the willow are all well enough and no particular harm done. But some sort of quietus should be put upon the open and dangerous betting indulged in the game because of it.

The game is a noble sport. There is more real sport, excitement and pleasure

In it for the American people than all the golf, cricket and polo bunched together. It is essentially the summer relaxation of our people here in Florida and nothing should be permitted to run amuck of its unalloyed enjoyment.

In the case of Sanford and Orlando the betting propensities of certain gentry comes very near the point of rupture. It is far more dangerous than the little rivalry between the teams or the towns and if it comes to the point where the rank betting or the games should cease, we believe somebody's foot should be put down on the gambling. If indeed somebody's foot is not also pretty deep in the mire.—Reporter-Star.

The article in last week's Herald regarding the High School extension was not intended as a reflection upon the efforts of the local school board. All of these gentlemen have labored long and faithfully for a suitable annex to the High School building only to have their hopes dashed to the ground by the veto of Governor Gilchrist.

What the Herald wished to convey was that in the issue of bonds for the city a sufficient amount should be voted for the new building and an edifice not only for the present needs but for the future.

Our school attendance was doubled the past school year and at the present increase in population the ratio will probably be in like proportion this year. The building on Palmetto avenue used last year for the primary department and smaller pupils is being remodeled and put in first class shape for the accommodation of the younger pupils. The school board fully alive to the situation is doing all in their power to take care of the large attendance this fall and their efforts are to be commended.

The point THE HERALD takes is that the building of the annex should receive the attention of the tax payers and in the issue of bonds should be paramount.

"The Sanford Herald brags of the cool breezes that come from Lake Monroe. The Herald man should acquaint himself with the salt laden zephyrs that come from the Gulf, blowing strenuously through Apalachicola's whiskers."—Apalachicola Times.

Better cut the whiskers from the face of old Apalach. Whiskers on a town are not exactly au fait and the salt breeze getting entangled thereon will make a bad face.

"A Sanford man was robbed of fifty dollars in Jacksonville last Saturday night. Will these 'Rubes' living in the north end of Orange county never learn to sew their money on the inside of their shirts when they go to a city?"—Kissimmee Gazette.

Good advice from Osceola. It is a cinch they will never rob any one from Kissimmee as it is necessary to have money to be robbed.

No ball games this week and business has been resumed at the same old stand. The fans have been able to sleep again and the horns, bells and other loud noises have been laid on the shelf. Peace reigns supreme.

There is considerable talk being indulged in by our citizens relative to petitioning the city council to so extend the city limits as to incorporate the suburb of Orlando.—Kissimmee Gazette.

Two of the railroad commissioners on a visit to Tampa were forced to walk from the depot to their hotel. Too bad they could not be made to walk from Tampa to Tallahassee.

Two girl bandits held up members of the Glidden Tour near Denver and robbed them. The price of autos will now be raised.

The Sanford Traction Co. will build a road to Orlando.

COUNTY HAPPENINGS

A Budget of Interesting Items From Correspondents

THE EVENTS OF ORANGE COUNTY

Efficient Staff of Reporters Weekly Covers the Territory for The Herald

We invite correspondence on live topics from all sections of the County, also news items of interest. Brevity will insure prompt publication. Articles contrary to the views of the Editor will be published, but abusive and anonymous communications will be rejected. We will not be responsible for opinions expressed by contributors. All communications intended for current issue must be in hand not later than Tuesday p. m. 1—Ed.

The late storm crossing the Gulf gave us several days of cooler, if unsettled weather, but it is generally "hot enough for you!"

L. P. Hagan of Markham is making a flying visit to his old home in Georgia this week.

W. D. Zachary, who recently had the misfortune to crush his foot at the saw mill has returned from a weeks visit to his home in Tallahassee, improved but still considerably disabled.

Mrs. T. E. Wilson of Sylvan Lake is spending some time at the beach.

F. A. Johnson of Markham is on the list, suffering from an attack of malaria.

Our base ball boys went out to Longwood Saturday last and had a game with the celebrated team of that place. They came home for once victorious! Score 10 to 1, and we expect they will be wanting to tackle Sanford next.

GENEVA GLEANINGS

Special Correspondence to The Herald.

Miss Agnes Clark, a popular young lady of Oviedo is visiting friends in Geneva.

The many friends of Mr. and Mrs. Robt. Kell will be sorry to learn that Mr. Kell has severed his connection with Mussewhite & Howard and will shortly return to his farm in Georgia.

"The Saunterer" has no more admiring reader than this correspondent and so much do we agree with him on his opinion of the woman suffrage question that we can't refrain from saying so. Certainly no womanly woman considers the ballot box her sphere. There are, we are sorry to say, some masculine women; surely they are not what God intended they should be. Many women who wish their husbands were different should examine themselves and see if they themselves are doing their full duty.

Mr. and Mrs. Banel have gone on a visit to the parents of the latter in Alabama.

Mrs. B. V. David and children of Cameron City attended the 83rd birthday celebration of their grandmother, Mrs. Elizabeth Prevatt.

Mrs. Emma Proctor is spending a few days with her aunt, Mrs. Geo. Peters.

Mrs. Franklin and son, Paul, of Plant City are visiting Mrs. Freeman Pattishall.

Mrs. I. T. Peters and Mrs. Nicholson are now in Daytona, called there by the illness of their daughter, Mrs. Oscar Nicholson.

Children's Day was fittingly observed at the Methodist church last Sunday night by appropriate songs and recitations by the children, each acquitting himself or herself creditably. The decorations were very pretty indeed. After the program was rendered the pastor, Rev. Hardin, spoke words of encouragement to all and especially to the children.

Quite a jolly crowd went over to Lake Harney Monday last to camp for a week, catch fish and fight mosquitoes. Those going over on Monday were Mr. and Mrs. H. H. Pattishall and children, Mr. Payne Daniel and sisters, Mrs. C. N. Hays and children, Mr. and Mrs. David Speer, and Misses Mamie McLaugh and Agnes Clark.

Others will join the party later in the week.

There will be no preaching at the Baptist church next Sunday, August 1. While this is the regular appointment, the pastor, Rev. E. Lee Smith is engaged in a meeting elsewhere and will preach in Geneva on the third Sunday. Instead, Sunday school will be held at ten o'clock as usual.

LAKE MARY MELANGE

Special Cor. to The Herald.

Rev. J. F. Sundell is spending a week or two in Sanford.

Early Gilbert's mother and a young lady friend of hers have been here the past week to visit Mr. Gilbert, staying with Mrs. J. N. Jernigan while here.

Little Julia Nylun is on the sick list.

Mrs. W. Perdu and Mrs. H. Perdu spent Monday in Sanford shopping and visiting friends.

The Merry Circle met at the usual hour last Saturday at Mrs. O. C. Martin's and spent a very pleasant afternoon.

The new traction line proposed between Kissimmee and Sanford should look for the shortest route combined with the best interest to themselves and to the people around. Between Sanford and Longwood the shortest route would be west of the Atlantic Coast Line and would at the same time go through a section of fine orange groves around Crystal Lake, Lake Mary, West Longwood and a good many others. An eastern route between Sanford and Longwood would go through a part of country sparsely settled and whose people already have benefit of the clay road and partly the Sanford & Everglades Railroad.

ENTERPRISE ETCHINGS

Special Correspondence to The Herald:

The library here is getting quite a nice start. Only a portion of a bookcase was to be purchased, but the company purchased from donated three sections, top and base, thus making a complete case. We have also lately acquired forty-four Little Masterpieces, fiction, science, biography and poetry. Twenty-three volumes of fiction were given last winter, and a few weeks ago it was presented with another lot of books.

Mrs. Geo. H. Count has returned home, after a pleasant two weeks' visit with friends at New Smyrna and Coronado Beach.

Mr. and Mrs. G. A. Duka and Mrs. R. C. Bushnell of DeLand came over on Friday evening. Mrs. Duka visited her friend, Mrs. H. F. Quackenbos, who has been quite ill, and Mrs. Bushnell visited her sisters, Mrs. Bond and Mrs. Scriver, returning home Saturday morning.

Miss Willie Lee Willis has been home on a visit to her parents. She left Wednesday for Bethany where she will teach next winter.

Last Thursday and Friday afternoons Chas. Campbell and party of friends from DeLand came over by auto this far, then took a launch and went to Sanford to witness the ball games.

Sunday afternoon Miss A. Rylans of Orange City was in town calling on friends.

Sunday Mr. and Mrs. C. B. M. Sheppard and friends, Mr. and Mrs. Fulsome and son of Daytona, came over to see Mrs. Sheppard's father, H. F. Quackenbos.

Miss Ida Mae Binford has been visiting friends in Titusville for the last two weeks. She is expected home some time this week.

Mr. and Mrs. John Sauls leave Friday via City of Jacksonville for Jacksonville, thence to New York on the Mohawk to visit their daughter, Miss Ruth, who is nursing at Clifton Springs, and son in Rochester, also other relatives.

Dr. S. Puleston of Sanford has been over daily lately to see Mrs. H. F. Quackenbos, who has been very ill.

Work is progressing on the house of Mrs. Brooks, formerly the Voss House. It is being moved back twenty-five feet from the street, which will greatly improve the appearance.

Miss Eleanor Scriven is visiting friends in Sanford.

FROM MACARONI DELTA

Jesokus society will give a special function at the Hotel de Buster next Saturday in honor of their new president, Mrs. Ephraim Butts.

Deacon Ephraim Bonesett, of the colored Hardshell church, is having his accounts investigated by Rev. Deuteronomy Jones and the trustees as the collection taken up last Sunday for the benefit of the Chinese mission in New York was quite suspiciously small.

Old Bill Hollister planted his saluted mother-in-law last Sunday. There was much weeping and chagrin among the mourners, and Bill is going to erect a seven dollar monument over her immortal remains.

Uncle Billy Pettingill, who runs a two-table restaurant in connection with a one chair barber shop in Cameron City, kicked his red-headed son-in-law, Mose Stucky, out of his shop last Friday for alluding to Uncle Bill's wife as a she-estamont.

Elvira Slocum of Orlando, a sister of Skinny Jane Slocum of our town, is here on a visit. Elvira was adopted into the family of a wealthy Orlando merchant and gets two dollars a week for doing light house work.

Pop Stumon Has A Blaze

Monday morning was enlivened by the alarm of fire being located at the home of J. M. Stumon on Fourth street and Sanford avenue. The fire was extinguished before any damage had been done.

Will Drive Wells

W. E. Holmes & Son are now engaged in the business of driving wells and have just equipped themselves with one of the best outfits for artesian and deep well driving.

FACTORY PRICES at one small profit above actual factory cost. You save \$10 to \$15 middlemen's profits by buying direct of us and have the manufacturer's guarantee behind your bicycle. DO NOT BUY a bicycle or a pair of tires from anyone at any price until you receive our catalogue and learn our unheard of factory prices and remarkable special offers to rider agents.
YOU WILL BE ASTONISHED when you receive our beautiful catalogue and see the bicycles and tire suggestions included at the wonderfully low prices we can make you this year. We sell the highest grade bicycles for less money than any other factory. We are satisfied with \$1.00 profit above factory cost. BICYCLE DEALERS, you can sell our bicycles under your own name plate at double our prices. Orders filled the day received.
SECOND HAND BICYCLES. We do not regularly handle second hand bicycles, but usually have a number on hand taken in trade by our Chicago retail stores. These we clear out promptly at prices ranging from \$3 to \$10. Descriptive bargain lists mailed free. COASTER-BRAKES, single wheels, imported roller chains and pedals, parts, repairs and equipment of all kinds at half the usual retail prices.
\$8.50 HEDGETHORN PUNCTURE-PROOF SELF-HEALING TIRES A SAMPLE PAIR TO INTRODUCE, ONLY \$4.80
The regular retail price of these tires is \$1.50 per pair, but to introduce we will sell you a sample pair for \$4.80 (cash with order \$4.55).
NO MORE TROUBLE FROM PUNCTURES
Nails, Tacks or Glass will not let the air out. Sixty thousand pairs sold last year. Over one hundred thousand pairs now in use.
DESCRIPTION: Made in all sizes. It is lively and easy riding, very durable and lined with a special quality of rubber, which never becomes porous and which closes up small punctures without allowing the air to escape. We have hundreds of letters from satisfied customers stating that their tires have only been pumped up once or twice in a whole season. They wear no more than an ordinary tire, the puncture resisting qualities being given by several layers of this, specially prepared fabric on the tread. The regular price of these tires is \$1.50 per pair, but for advertising purposes we are making a special factory price to the rider of only \$4.80 per pair. All orders shipped same day letter is received. We ship C. O. D. on the rider of only \$4.80 per pair. We are perfectly reliable and money sent to us is as safe as in a bank. If you order a pair of these tires, you will find that they will ride easier, run faster, wear better, last longer and look finer than any tire you have ever used or seen at any price. We know that you will be so well pleased that when you want a bicycle you will give us your order. We want you to send us a trial order at once, hence this remarkable tire offer.
IF YOU NEED TIRES
don't buy any kind at any price until you send for a pair of the special introductory price quoted above; or write for our big Tire and Sundry Catalogue which describes and quotes all makes and kinds of tires at about half the usual prices.
DO NOT WAIT but write us a postal today. DO NOT THINK OF BUYING a bicycle or a pair of tires from anyone until you know the new and wonderful offers we are making. It only costs a postal to learn everything. Write it NOW.

MONUMENT TO DR. CALDWELL

Erected at Guilford Battle Ground, North Carolina

The following interesting article, taken from the Greensboro, N. C., Telegram, will prove interesting to the people of this section. Dr. Caldwell was the great-grandfather of D. A. Caldwell of this city, and the great honor accorded his memory was a fitting tribute to one who had accomplished so much during his life.

"Two handsome monuments were unveiled at Guilford battle ground yesterday—one in memory of Dr. David Caldwell and the other a statue of Clio the muse of history. The unveiling exercises were witnessed by several thousand citizens of this and adjoining counties, who each year, on July 4, pay a visit to this historic and revered spot.

"The monument to Dr. David Caldwell is a massive granite stone placed on a granite base, which rests on a massive foundation stone. On the face of the monument is the inscription: 'Dr. David Caldwell, born 1724—died 1824.' On the four sides of the base are the words: 'Preacher, Teacher, Physician, Patriot.' This monument is on the south side of the road leading east from the main entrance to the battlefield, and is about two hundred yards from the railroad crossing.

"The other monument, the Muse of History, is just across the road from the president's cottage. This is a bronze figure representing Clio, the Muse of History, resting on a massive granite block some six feet in height, this resting on a granite base. The foundation weighs several tons. On the north side of the monument is inscribed on a bronze plate the following, composed by the president of the battle ground company:

*As sinking silently tonight
Noon fades insensibly,
So truth's fair phase assumes the haze
And hush of history.
But lesser lights relieve the dark,
Dumb dreariness of night,
And o'er the past historians cast
At least a stellar light.*

—Joseph M. Morehead.
"The day was a perfect one. There was a continuous stream of people going to and from the famous old battlefield, and it would be impossible to give an estimate as to the number of people who roamed over the field during the day. A large number came in from the surrounding country, and each wagon transported a well-filled basket. After the unveiling exercises the crowd gathered in the grove and enjoyed dinner.

"Promptly at 10:30 o'clock the procession left the president's cottage and headed by the Gibsonville band, which made music for the occasion, proceeded to the pavilion, where the dedicatory addresses were made—Dr. C. Alphonzo Smith and Rev. Melton Clark being the speakers of the occasion. "Mr. R. D. Douglas was master of ceremonies, and he first introduced Rev. J. W. Goodman, who led in prayer. Mr. Douglas then presented Dr. Smith, who he said, was too well known to need an introduction.

"Dr. Smith spoke for about 45 minutes and the address was heard with much interest by all. The speaker's theme was, broadly speaking, that a nation must find in its past its heritage for the future, and the relative importance of history. He spoke of the several Greek statues, and the part each had played. He said that the Greek idea of a statue was that it gave an outward sign of inward and lasting truths. Dr. Smith said that the stability of this nation will be measured in a sense by the measure of the nation's gratitude to our forefathers.

"Turning his thoughts to the battle of Guilford Court House, the speaker stated that not everyone had gotten the correct impression as to the result of this great struggle. He said that any man who does have the correct view of the battle and does not feel proud of the heroes who fell there, is unworthy of his citizenship. He read several passages from letters written by men who fought in the battle in which they gave their conclusions as to its fruits. The speaker also spoke of the great work done by the battle ground company in preserving the historic spot, and declared that the battlefield would one day prove to be a stepping stone toward the more perfect unity of the nation.

Concluding, Dr. Smith said that the men who fought and the men who wrought are builders of history. He then in words fitting and appropriate dedicated the Clio monument.

"Mr. Douglas then introduced Rev. Melton Clark, who made the dedicatory address for the unveiling of the monument to Dr. Caldwell.

"Rev. Mr. Clark discussed the life of Dr. Caldwell with rare insight and in a way which was very gratifying to the descendants of Dr. Caldwell who were present. His address afforded all present some most helpful and inspiring information touching the great revolutionary character whose life he was describing.

"He said that it might seem strange that on a battlefield a monument should be erected to a man who was a non-combatant. But with all the circumstances known it would be plain that it was entirely ap-

propriate. For while Dr. Caldwell never fired a musket or drew a sword, he exercised a profound influence on those who did engage in warfare. He spoke of the early life of the distinguished educator and of his ministry, serving Buffalo and Alamance churches for sixty years, later his starting a school for the benefit of the young men of the community, later as a physician traveling around the community administering to the suffering of the citizens, and lastly as a statesman. While Dr. Caldwell did not give up the ministry or the profession of a physician, he still taught men and instilled in them the fire of patriotism that so nobly stood the test on Guilford battlefield. The illustrious man also followed the armies around administering unto the suffering and praying with the dying.

"Concluding, Rev. Mr. Clark stated that while Dr. Caldwell did not fight, the patriotism shown by him was fully as great as was shown by the bravest of the American heroes.

"After the addresses, the procession headed by the band, marched to the monuments and they were unveiled. The monuments were draped with large American flags, the flag being drawn from the Clio statue by Misses Mary Fry and Frances Beall. The procession then proceeded to the Caldwell monument where Miss Adelaide Vee Noppen and Miss Marion Jones, great-great-grandchildren of Dr. Caldwell, did the unveiling.

"The ceremony of the unveiling was very impressive, the young girls in spotless white, the brilliantly colored flags, the spectators massed around, and the massive monuments forming a picture that will long linger in the memory of all who witnessed it."

FLYING MACHINE TRIUMPHS

Makes Trip From France to England in Record Time

Louis Bleriot, who performed the feat of crossing the English Channel in his aeroplane Sunday, left the French shore at 4:30 a. m. and descended gracefully in North Fall meadow behind Dover castle at 4:53. Bleriot looked little the worse for his hazardous trip. He was taken in an automobile to Lord Warden hotel, and was greeted enthusiastically.

A French torpedo boat destroyer followed the aeroplane but was soon left far behind. Although the start was made in calm weather, there was a strong breeze at the time of the descent. By his trip across the channel Bleriot wins the special prize of \$5,000 offered by the London Daily Mail.

In describing his remarkable flight, Bleriot modestly said I rose in the air and pointed directly for Dover. After about ten minutes I was out of sight of land, and had left the warship well behind. For a few minutes I could not see either coast nor the boat. I tried to keep at an average height of 250 feet. The machine dipped toward water several times. I estimated that the propellers were going 1200 to 1400 revolutions per minute. The first objects I saw were ships off the English coast. Then observed a great deal. I veered to the southwest of Dover castle and then saw friends flourishing a flag in a valley suitable for a landing. I made two circles while lessening my speed, then dived down, but came in contact with the ground sooner than I expected. Both the machine and myself were badly shaken up.

Bleriot's wife arrived on the destroyer, and embracing him, wept for joy. The mayor and other Dover officials called early to welcome the first man to cross the channel in an aeroplane.

Very early in the morning a wireless message from Calais was received at Dover saying that Bleriot would start in a few minutes, but before the sleeping populace had time to get the news and dress the Frenchman had landed. The townspeople of Dover, who had been waiting and watching for three weeks to witness this great feat, were caught napping, so also, the photographers and cinematographers, who had planned to get several views of the event. It had been arranged to notify the people by blowing of steam whistles,

but on account of the gale which had prevailed for several hours no one thought of Bleriot's coming at such a time, and the operators were away from their posts, hence the expected notice was not given. The sailors on the ships were the first to discover the flyer. They heard the buzzing of the motor some two minutes before the aeroplane came in sight. Then what looked like a big white butterfly glided over their heads faster than any railroad train and soon landed some mile or more from Dover castle.

Dressing as they went, people rushed to the landing place. Customs officers and police were soon on the ground. The services of the latter were needed to check the curio hunters who were tearing the machine to pieces. The city officials got Bleriot's consent, and erected a tent over the machine and charged sixpence admission, the proceeds from which were quite large and were donated to the hospital and police funds.

Much surprise was manifest at the smallness of the machine. It is scarcely twenty feet across the wings, and its weight about 400 pounds. The motor is 25-horse power.

STATE LAW ON FIRE PROTECTION

Public School Buildings Must be Properly Equipped for Safety

Among other laws passed by the last legislature we note one in particular that we consider an especially good one. For the benefit of the public we reproduce this law in full:

CHAPTER 5937—(No. 68)

An act requiring proper fire protection for teachers and students of public schools. Prescribing the means for such protection and prescribing penalties for not constructing, introducing and maintaining the means for such protection.

Be it enacted by the legislature of the state of Florida:

Section 1. That all public school buildings within the state of Florida of two or more stories in height, the story or stories of which shall be used for public school purposes, shall be provided with adequate stairways or fireescapes for egress in case of fire.

Section 2. The number of such stairways or fireescapes, and their location, material and construction, shall be as designated and prescribed by the Board of Public Instruction of the county in which said school building or buildings shall be located.

Section 3. The Board of Public Instruction of each of the counties of the state of Florida shall, on or before October 1, 1909, or as soon thereafter as may be practicable, have constructed the stairways or fireescapes hereinbefore described, and shall at all times keep, or have the same kept, in perfect order.

Section 4. That all the outer doors of any public school building, where there shall be two or more rooms, shall be so hung that when they are opened they will swing to the outside.

Section 5. The Board of Public Instruction for the several counties of the state of Florida shall on or before October 1, 1909, or as soon thereafter as may be practicable, have the doors of said school buildings changed, if necessary to comply with the provisions of section four of this act.

Section 6. The Superintendent of Public Instruction of the state of Florida shall, on or before October 1, 1909, or as soon thereafter as may be practicable, formulate and prescribe tactics of instruction for fire drills for all of the public schools of the State of Florida, and each teacher teaching in such school shall be provided with a copy of such tactics and it shall be the duty of each and every one of such teachers to instruct the students of their respective schools in such fire drills as prescribed by the State Superintendent of Public Instruction.

Section 7. Any teacher or officer mentioned in this act who shall fail or refuse to comply with the provisions hereof shall be removed from his position or office.

Section 8. This act shall take effect from its passage and approval by the Governor.

Approved June 4, 1909.

DEATH OF THE WORLD.

When Water Disappears and Air Gits Too Thin to Breathe.

The age of the earth is placed by some at 500,000,000 years, by others 100,000,000 years, and still others of later time place it at 10,000,000 years.

Other planets go through the same process. The reason that other planets differ so much from the earth is that they are in so much earlier or later stages of existence.

Newton surmised, although he could give no reason for it, that the earth would lose all its water and become perfectly dry.

As the earth keeps cooling it will become porous, and great cavities will be formed in the interior, which will take in the water.

At this rate in 6,000,000 years the water will have sunk a mile, and in 15,000,000 the water will have disappeared from the face of the globe.

The nitrogen and oxygen in the atmosphere are also diminishing all the time. It is in an inappreciable degree, but the time will come when the air will be so thin that no creature we know could breathe it and live.

"CREASING" A WILD HORSE.

For One Captured by That Method Fifty Were Killed.

Will C. Barnes, writing in McClure's of the various methods of capturing wild horses in the old days on the plains, says:

"Creasing" was one of their devices. This consisted in shooting a bullet so that it struck the animal on the top of the neck just in front of the withers and about an inch or so deep close to the spinal column.

"One of the best cow ponies I ever owned I bought from a mustanger who had creased him on the plains east of the Pecos river in New Mexico. There was a hole in his neck fully two inches deep and wide, where the ball from the heavy buffalo gun had plowed its way through the flesh just high enough above the spine not to kill and low enough to stun effectually."

India Ink.

In both India and China there are thousands of people who manufacture India ink as a side line to their regular business, working at it in the winter at night and on days when they are not otherwise employed.

They Had Will Power.

I was sitting one morning in a quiet corner at Monte Carlo when two elderly men sat down beside me. One was evidently a Scotchman, and the other, I gathered, was from Yorkshire.

HINTS FOR FARMERS

Rations For the Egg Layers.

One of the best dry mash feeds that can possibly be fed to hens for winter egg production consists of the following: Two hundred pounds good wheat bran, 100 pounds good wheat middlings, 100 pounds good cornmeal, 100 pounds linseed oil meal, 100 pounds gluten meal, 100 pounds beef scrap.

Also for each 100 birds feed two quarts of wheat in the morning and the same at noon and two quarts of shelled corn at 4 o'clock in the evening.

Tankage For Hogs.

The Ohio station in a feeding experiment fed tankage to hogs following cattle. Each lot had seven steers. Lots 1 and 3 received corn, cottonseed meal, stover, mixed hay and slilage. Lots 4 and 6 received the same ration except slilage.

The Weaning Colt.

A close and regular connection between the oats bin and the colt stall is always marked with the best results. If there is any desire to save oats, the older horses had better be skimmed rather than the colts.

How to Control San Jose Scale.

About the best and first scale that should be done with an orchard that is infested with scale is to cut out and remove all the dead and unnecessary wood, says Farm and Fireside.

Feeding Fowls in Winter.

For the best results you must give your fowls warm, dry, comfortable quarters and feed them regularly, giving for breakfast a warm mash, with one ounce of cut bone for each hen.

Pruning Fruit Trees.

In the pruning of fruit trees the object is to obtain the greatest amount of bearing wood arranged in a convenient form. Therefore we prune to obtain a low, open headed yet compact tree.

Warbles in Cattle.

Warbles are also called grubs and wolves, says Hoard's Dairyman. They appear on the back and sometimes on the sides of cattle, causing elevations or bumps resembling small abscesses.

Economical.

"I'd rather walk than eat," confided the sweet girl. "Then we'll have another dance instead of going to that fashionable restaurant," remarked the thrifty swain.

An Ordinance

To amend Section 171 of Chapter 12 of the ordinances of the City of Sanford, Florida, of 1882 entitled "Fire Limits and Building Restrictions."

FIRE LIMITS

Section 171. No person or persons or corporation or corporations or individuals, their agents, employees or others for or on account of such corporations or individuals shall build, contract or enlarge, or repair in any wise or authorize the construction, enlargement or repair of any frame or wooden building or structure or any tent or booth, or in any wise alter or repair such building as aforesaid, upon or remove any such building, structure, tent, booth, or upon any lot or parcels of land within the following limits, that is to say, beginning on the south side of Fifth street and the west side of the alley east of Sanford avenue, thence running north on what would be a continuation of said alley to the city limits in the waters of Lake Monroe; thence following said city limits in Lake Monroe to the east side of Elm avenue, thence south on said Elm avenue to Third street, thence east on the north side of Third street to alley between Palmetto and Sanford avenues, thence south along said alley to south side of Fifth street, thence east to point of beginning.

And any ordinance or parts of ordinances in conflict herewith is hereby repealed.

To Hon. Forrest Lake, Mayor of the City of Sanford: I hereby certify that the above ordinance was duly passed by City Council, City of Sanford, Fla., in session June 26th, 1909.

Approved, MARK L. SCOTT, Clerk. 49-41

NEWS OF THE WORLD

Items of Interest Gleaned From Various Sources

HAPPENINGS DURING THE WEEK

Here the Readers Will Find a Brief Historical Spring Flowing For Hurried Readers

For the second time Galveston and the towns along the Gulf coast have been visited by a disastrous storm. Only for the great seawall that was built after the disastrous flood-storm of a few years ago, the same sad story would have to be repeated of last week's storm which was in the shape of a hurricane and tidal wave. Considerable damage was done in the low-lying sections of the city by the unroofing and flooding of houses. In the smaller settlements along the coast the damage has been great and the loss of human life considerable. The total number of lives reported is 47.

A cloudburst at Duluth, Minn., a few days since, destroyed \$1,500,000 worth of property and caused the loss of three lives. Twenty houses were washed away.

Staunton, Va., has gone dry by twenty majority.

Roo Maya Indians in Mexico are on the war path and have massacred several women and children in the village of San Jose while the men were at work in the fields.

Mt. Korintji in Sumatra, a volcano supposed to be extinct, and in the crater of which a lake had formed, is again in eruption. An earthquake followed the renewed activity of the volcano.

Last week when ordered to proceed to the seat of war in Morocco, a whole battalion of Spanish troops at Barcelona mutined and refused to go. They were disarmed and sent to prison. Spain has quite a war on her hands with the Moors.

Through what is known as the McAdoo tunnel under the Hudson river, connecting New York City with Jersey City, which was opened to the public last week, trains are now run five minutes apart on a schedule of three minutes from Broadway to Jersey City terminal.

Pauline Karper, daughter of the janitor of No. 143 Madison street, New York City, is five years old, weighs 130 pounds, and is three feet nine inches tall. Her mother weighs 116 pounds, and is not more than a foot taller than her big baby. The child is no freak, and is perfectly healthy.

A new cabinet for France has been organized under the leadership of M. Briand and a Socialist.

Associate Professor Chemistry A. C. Mc-B. Ransom of the Alabama Polytechnic Institute, at Auburn, died Saturday. He was one of the best known educators in Alabama.

Louis Bleriot, a Frenchman, successfully crossed the English Channel from Calais to Dover last Sunday in his aeroplane, thereby winning the \$2,800 prize offered by the French Aero club. He has been decorated with the cross of the Legion of Honor.

A Wabnah train plunged into the Missouri river thirty miles from Kansas City last Sunday. Five coaches and the locomotive went down. Two Pullmans and a chair car remained on the track. Undermining of the roadbed by the recent flood was the cause. Six persons were killed.

Having to leave a subway train in New York because he didn't have money with him to pay his fare, President Yoakman of the Rock Island railroad system, returned hastily to his office and said to his secretary: "Go and buy me 1,000 subway tickets, and see that they are put in every pocket of every suit of clothes I have."

July 26 was the 62d anniversary of the establishment of the republic of Liberia in Africa by a colony of American negroes. Henry Clay was president of the association instrumental in locating the colony.

Little Blon, a Sioux chief, will move his people from the Dakotas to Nicaragua, having secured a concession of land from that government. Immediate removal of 100 families will be made.

The Bank of England, the oldest banking house in the world, celebrated its 215th anniversary July 27th. The bank was closed for business, and the 1500 employees had a grand time at the expense of the institution.

On the evening of July 27th Orville Wright, with Lieutenant Frank Lahm as a passenger, made the world's record in his aeroplane remaining in the air one hour and twelve minutes, and made an average of over forty miles an hour.

Moore's Modern Methods

Everyone has heard of Moore's modern methods of bookkeeping and loose-leaf ledger systems. So great has been the demand for these perfect ledgers that The Sanford Herald has decided to keep a full line of these goods, and anyone wishing ledgers, record sheets, contracts, account books, and everything for the office of the business man, should call at The Herald office and get the best.

Trip to Harney Beach

Next Sunday a launch excursion will leave the city dock for Harney Beach, a beautiful resort on Lake Harney. The boats will leave at 8 o'clock in the morning; returning, will leave Harney Beach at 8 o'clock, giving the excursionists the whole day at this delightful spot. There will be a fish dinner at noon, and the fare of one dollar for the round trip, entitles everyone to a dinner. Bring your bathing suits and come prepared to spend a good time. Get your tickets from J. P. Weaver, or get them Sunday morning before the boats leave the city dock.

The Billingsley Orange Box

Elsewhere in this issue is the advertisement of the Ocala Box Co., who manufacture the famous Billingsley Orange Box, the best on the market. The dovetailed joints on the head is an improvement over the ordinary kind and there are other good features that should command the attention of the shippers. The Billingsley can be furnished by the leading manufacturers. If not write to the Ocala Box Co.

Wiring For Electric Lights

Sanford's new electric light plant will soon be installed and you want the work done by a competent and experienced electrician. The work must bear inspection and conform to the regulations prescribed by the Southern Tariff Association. W. A. Parr of this city has had ten years experience in electrical work of all kinds and can wire your house in a satisfactory manner. Everyone should have their house wired at once, to be ready when the current is turned on, and W. A. Parr is now equipped to take your order and fill same at once. You can get him any time at the telephone exchange, or leave orders at Fernald's hardware store

Hardware and Farm Implements

LUCAS PAINTS

Used in Uncle Sam's Paint Shop

During the past year the U. S. Navy has consumed 691,000 pounds of LUCAS WHITE PAINT and 278,700 pounds of LUCAS COLORS, sufficient to produce more than 100,000 gallons of paint, equivalent to 50 carloads of 200,000 gallons each, and which would make a train more than one-half mile long.

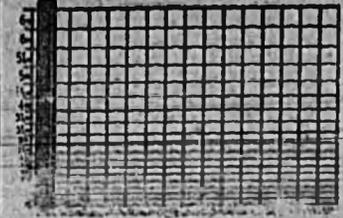

In Uncle Sam's service, as in everybody else's, LUCAS PRODUCTS have an unbroken record for satisfactory results.

WE HANDLE THE ABOVE EXCLUSIVELY IN SANFORD

'PITTSBURG PERFECT'

Best Fence Made

NO DEARER THAN THE POOR KIND

For Field, Farm, Ranch, Lawns, Corn Cribs and Poultry

Will stand ordinary as well as hard usage

THE SANFORD HERALD

IN SANFORD—Life is Worth Living

Number 51

SANFORD, FLORIDA, FRIDAY, AUGUST 6, 1909

First Year

TO BUILD NEW FERRY

Great Need of One Between Orange and Volusia

SEVERAL PLANS ARE PROPOSED

Any of Them Would Greatly Lessen Distance Between Sanford and the East Coast

As the travel from the interior to the East Coast and from the East Coast to points in Orange and Osceola counties increases the need of a shorter route and a better ferry become apparent and the matter is being discussed by individuals and the boards of county commissioners and will likely result in concerted action in regard to a new ferry.

By the present route the distance from Sanford to DeLand is about twenty-nine miles. If the ferry at Beck's Landing on the west side is resumed this distance will be considerably lessened. One feature in favor of a new ferry on the west side would be that of opening up a new road through this section and giving an added impetus to trade, and better facilities for the residents. Others are advocating a large ferryboat propelled by gasoline engines to run from the city dock direct to Enterprise, thus cutting down the distance from Sanford to DeLand from twenty-nine to about thirteen miles, and no new road would need to be built. A toll ferry could be inaugurated on this route, and as many foot passengers from Sanford to Enterprise would use the boat, this plan could prove a profitable one and would establish direct communication with Enterprise and prove a great boon to the people of that little city who are now almost cut off from Sanford and Orange county. These plans are all good and should receive the careful consideration of the citizens of both counties. With the great increase in population a better means of transportation is greatly needed, and plans should be formulated at once and carried out. Should the new traction road go through to the East Coast, a good ferryboat would be the easiest means of getting across the river, and the traction company could be depended upon to join in this enterprise and stand part of the expense. Even if a toll ferry is decided upon, the traveling public would favor better facilities and gladly pay a nominal sum for a shorter and better route. The few miles from the river to Osteen in the present state is to be dreaded by all who are obliged to go that way, and during the rainy season there is no assurance that any automobile can get across this "rough of despond." For the benefit of the public, and the future development of this section, this matter ought to be settled at once.

Palatka's Famous Celery Beds

He was a stranger in Palatka, and as he stood talking with Mr. Fearnside on lower Lemon street last Tuesday he chanced to catch a glimpse of the river, at that time covered from shore to shore with water hyacinths. "What's that growing in that big field over there," said the stranger, pointing to the river. "That," replied Mr. Fearnside looking in the direction indicated, "why that's the famous Palatka celery beds." "There's certainly a fine crop there," said the stranger, "is any of that land for sale?" "Nope, you can't buy it for love nor money," replied Fearnside, "The Palatka News controls it all and won't sell."—Palatka News.

PRETTY HOME WEDDING

At the home of Chas. Kanner on Park avenue last Sunday at 6 o'clock, Miss Pauline Kanner was united in marriage to Mr. Samuel Hershcowitz. The ceremony was performed by Rabbi Steinitz and the rites were carried out according to the Jewish custom.

At high noon the bridal party was entertained at luncheon at the home of K. Kanner.

After the wedding ceremony an elaborate course dinner was served for the guests.

The happy couple left on the midnight train for Jacksonville, Palatka and other points and upon their return will make their future home in Tampa. The bride is the sister of Chas. Kanner of this city, and has resided here for some time prior to her marriage.

The groom is with the Katz department store of Tampa, and has a large circle of friends over the state.

Among the out-of-town guests were Mr. and Mrs. Adam Katz, Mr. and Mrs. J. Bookman, Julius Schuster, Sam Esryck, and Isaac Weiss of Tampa; Mr. and Mrs. D. Solomon and family, Mr. and Mrs. H. Kanner and family, and Miss Rose Rooney of Orlando; Mr. and Mrs. M. Kanner and family and A. Kanner of Mulberry.

A Gentlemanly Bunch

Sanford has not only a bunch of fast ball players, but each one a gentleman as well. Their conduct in Sanford has been above reproach in every respect, and on the road they have been complimented on their actions on the diamond, and especially on their gentlemanly appearance and conduct in hotels. The landlady of the White House in Gainesville says they were the most gentlemanly lot of ball players that she ever had the pleasure of keeping, and she hoped they would win on that account. That is quite a compliment not only to our boys, but the town as well. Well named, for lucky we are in securing a bunch of real ball players and gentlemen, also. A team of this kind is more than a credit to any town, and we feel safe in stating that they have the universal good will of the Sanford people.

Will Shelley Again Injured

Train No. 83 over the Atlantic Coast Line which passed Palatka going south at 11:25 last Monday night was partially wrecked at DeLand Junction later in the night.

While passing a switch a bolt gave way and the rails spread, causing the tender of the engine and the mail car to leave the track.

The engine was in charge of William Shelley, a Palatka boy and he was injured about the shoulder, besides having two ribs fractured. No one else was injured. Mr. Shelley was taken to Sanford where he received medical attention. His injuries are not serious, but painful. The shoulder is the same as was injured in a wreck just south of Longs Station last winter. In fact this is the third wreck in which Mr. Shelley has participated in the past year. It is expected that he will be able to resume his duties in about three weeks.—Palatka News.

After The Railroad Commission

The voters of Florida must do one or two things about the Railroad Commission; abolish it and wipe out the law or elect members who are at least in part, competent to discharge the duties incumbent upon them. As at present constituted it is a very expensive thing to the taxpayers of Florida. Drawing their salaries is about the only thing the members have done.—Volusia County Record.

ALL AROUND FLORIDA

The General News of "The Land of Flowers"

CULLED FROM THE STATE PRESS

An Epitome of the Week's Most Important Happenings in the State's Domain.

For the fifth time since its recent construction and acceptance by the city the new stockade at Tampa was last week the scene of another delivery, six white prisoners making their way to liberty by digging a hole through the brick wall during the absence of the jailor.

Manuel Gonzalez, a young Cuban, committed suicide in Tampa last week by drinking carbolic acid. Family trouble is said to have been the cause.

The general government has set aside Bird and Middle islands on the West Coast for the purpose of expert breeding of birds and hunting thereon is prohibited in future.

Third and fourth class Florida postmasters are to hold their annual convention in Ocala on the 18th and 19th of August.

Key West is to have a special election on the question of issuing bonds for street paving, the amount to be fifteen percent of the full assessed valuation, the limit of the charter.

Orders have been issued by Adjutant General Foster that the state militia will henceforth be known as the National Guard of Florida.

The commissioners of Leon county have passed a resolution favoring bonding the county for \$200,000 for building hard-surfaced roads.

In the recent election Santa Rosa county went dry by about 300 majority.

W. H. Taylor, formerly general passenger agent of the Southern railway, has been transferred from Jacksonville to Denver, Colorado, and made general agent of the passenger and freight departments of the company.

On Sunday the grand stand at the Moncrief race track of the Florida Live Stock Fair Association was burned.

If arrangements now being made by the Chicago Association of Commerce are carried out, through freight cars between Cuba and Chicago will shortly be running on a schedule of seven days without transferring or breaking bulk. Cars will run to Knights Key on the East Coast railway and there run on to an ocean-going ferry and landed at Havana.

A Masonic lodge has been organized in Mascotte.

George R. Foster, one of the oldest and most highly respected citizens of Jacksonville, died at his home in that city Tuesday. He was 78 years of age, and had lived in Jacksonville for nearly half a century.

Crack marksmen from various parts of the state are assembled in St. Augustine this week to participate in the annual shoot. The Taliaferro trophy will be contested for, and marksmen will be selected to represent Florida at the national rifle shoot to be held in Ohio.

Early Tuesday morning fire destroyed three buildings in Fort Meade—Dr. Moody's drug store, Max Auschwitz' jewelry store, Zapp's barber shop, and A. B. Jones' general store. Dr. Moody's and Mr. Jones' stocks are a total loss. The jeweler's stock was saved. The buildings belonged to Mr. Jones, were valued at \$5,000 and insured for \$1,000. His loss on stock was about half covered by insurance.

THE PIANO CONTEST

The Piano Contest is arousing more interest as it draws to a close and greater efforts are being made by the friends of the contestants. This week the Eagles made a spurt and obtained the lead over Miss Stumon who has held the position since the contest opened. From now until the finish some interesting developments can be expected.

Following is the vote for this week:

SANFORD	
Order of Eagles	71,202
Miss Jessie Stumon	66,370
Congregational Church	48,181
Miss Aranka Tolach	42,769
Knights of Pythias	25,273
Miss Annie Higgins	14,357
Miss Maybell Woodburn	9,909
Wetaka Club	3,639
Miss Ada Sienstrom	3,481
Miss Gayle Moore	3,062
Miss Nona Cowan	2,208
Codepen of the World	1,204
Mrs. G. W. Venable	1,068
Baptist Sunday School	693
OUT OF TOWN	
Miss Lillie Lord, Clyde	3,064
Miss Aimea Brooks	508

Eagles' State Convention

The State Aerie of Eagles will hold a convention at Ocala on August 19-20.

Sanford will be represented by W. H. Underwood and Geo. S. Derry, and State Secretary S. Runge. M. P. Lipe and his famous drill team in uniform will also go and demonstrate the initiation drill before the state aerie. About twenty-five members of Celery City Aerie will also attend, and the A. C. L. will make a special rate for the occasion.

Drowned at Maitland

Jacob Wahl was drowned in Lake Charity, near Maitland, last Thursday. On account of the great depth of the lake, the body was not recovered until the next day. Coroner Hugh Allen empanelled a jury and the verdict was accidental drowning. The deceased was about 48 years of age, and had been a resident of Maitland for the past ten years, and was respected by all who knew him. He leaves a wife and several children.

Want The New Road

A petition has been circulated in Daytona during the early part of the week requesting the county commissioners to open up a road between Orange City and the St. Johns river. This road would have the effect of shortening the distance between Daytona and Sanford some seven miles, besides avoiding a lot of difficult travelling as the road is now laid out. The petition was signed by all voters to whom it was presented, the advantages of the new road being so plainly apparent.—Halifax Journal.

Death of Mrs. Barrett

Mrs. J. F. Barrett, wife of J. F. Barrett, died at the residence of her daughter, Mrs. G. B. Pope, on Monday last. Mrs. Barrett was 68 years of age at the time of her death, and had resided in Sanford for a number of years. She was a devout member of the Methodist church and had been for many years.

A husband, three sons and a daughter are left to mourn her loss.

The remains were taken to Bellevue for interment.

Auto Piano at The Pastime

Manager DeCottes has installed one of the famous Auto piano players for the benefit of the public. The Auto piano is the latest and best piano player on the market and is making a great hit everywhere. It is made by the Kohler & Campbell Piano Co., and the John A. Cunningham Co., of Jacksonville, are the distributors for Florida. Anyone wishing to see the Auto piano and hear the wonderful tone of this fine instrument can do so by attending the Pastime Theatre.

By a recent flood in Manchuria, over 1,000 people were drowned and 7,000 houses submerged.

EXPOSE LAND SHARKS

The DeLand News Puts It Up To County Officials

SUPPRESS FAKE LAND SCHEME

Editor Publishes a Circular Letter and Sends It to All Prospective Purchasers of Land

The News continues to receive a great many letters from people who have already bought, or expect to buy, lands in the Bond tract, or elsewhere in Volusia county. As a result of this sale of property, The News has added possibly 100 new subscribers to our mailing lists. We like to receive the subscribers, just as Volusia county in general welcomes new citizens—but we do not blind ourselves to the fact that hundreds of people will come here this fall and go away very disappointed.

The board of county commissioners should make a thorough investigation of this matter, through a special committee and the county attorney. The editor has prepared a circular letter, which he is sending to all enquirers. The circular letter reads as follows:

Office of The News Publishing Company, Printers, DeLand, Florida, (date)

Dear Sir: Your letter of recent date to hand, Volusia county is thriving and prosperous, and our crying need is more citizens. Our lands are productive, when intelligently tilled, and any strong man who has the hardihood can hew his way to success. A great amount of the land in this section is good—will grow anything; but it is not all good. Thousands of acres in Volusia county, as anywhere else on earth, want even sprouta mortgage. I am not in a position to inform you as to the fertility of the soil about which you enquire. I have no doubt a great quantity of it is good, while there may be much that is fit only for cattle range, or possibly swamp.

I would advise you to see for yourself before putting money into land here or anywhere else.

Your ideal of a home may be entirely different from mine. Your ideal may be higher or lower—I am not in position to judge.

We want good, intelligent, law-abiding citizens. We extend to you the welcome hand. We want satisfied citizens only, however. One dissatisfied citizen does more harm in a community than a dozen satisfied families can overcome. Come and see for yourself, and while here call upon me at the office of the News Publishing Company; I shall be glad to render you any service in my power. I am sending you some printed matter descriptive of this section and several sample copies of The News under separate covers.

Cordially yours,
CHRIS. O. CODRINGTON.

In the opinion of the editor, Volusia county is now confronted by the most serious problem ever placed before us. If it is solved correctly and with satisfaction to the purchasers of these lands, the county will boom as never before. If these people are sold lands in Deep Creek or other undrained sections, and are forced to leave here disappointed and cheated, the entire state will receive a black eye from which it will not recover in years.

The board of county commissioners, serving in the capacity of the managers of county affairs, should not dodge this issue—but should enter into it with their whole bodies and souls and minds.

The people are with you, gentlemen. Your duty is plain. At the meeting next Monday call in the managers of the new companies selling these lands, your tax assessor, and the natives who know the country, and find out exactly what is being done.

It is possible, and even probable, that the board will have no legal redress, except, perhaps an appeal to the postal authorities, but a published statement from the board, either to the effect that only good, drainable land is being sold, or that swamp and useless lands are being placed on the market, and disposed of to innocent purchasers, if such is found to be the case, cannot fail to have a good effect.

Thousands of buildings, including the famous Buddhist temple, have been destroyed by a terrible conflagration at Osaka, Japan. A number of lives were also lost. The latest report says 20,000 buildings were destroyed. Beside the temple the banks, stock exchange, museum, government edifices, schools, factories, and other important buildings are included. The territory burned over is more than four miles square. The temple burned was the greatest in the world.

Another escape of prisoners from the Tampa stockade took place Tuesday night. This makes the sixth breakout in a few weeks. Only three prisoners escaped this time.

Type of Car to be Used on the Sanford Traction Line
