AND that is not.only a well-known Sotch expression, but is literal$y$, absolutely and fundamentally true.

And how true it is that all who in the early days-when Miami did not present the assurance that it does today from an investment standpoint-invested the "mickels" and now enjoy the "muckels"!

The remarkable part of it all is that these opportunities have not all grone by. And, it is also remarkable that the opportunities of today surpass the opportunities of yesterday.

And for every additional dollar necessary now, as compared with the amount of money necessary two or three years ago, there is the added compensation of greater assured profits and absolute security, by virtue of today's tremendous invested wealth in the Greater Miami area-by virtue of today's remarkable increase in railroad and steamship transportation facilities, and by today's assur:unce of Miami's continued growth.

And today, the "MICKELS" that you will place in carefully selected investment in the Greater Miami area will bring to you the "MUCKELS" of tomorrow.

We suggest that you look over the entire Greater Miami area-analyze it-study it carefully-give due consideration as to strategic location-desirable environment -relation to Biscayne Bay-improvement

The first question usually asked by any conserm ative man who contemplates an investment is" $W$ ho is back of the enterprise?"-whose are the guiding hands responsible for the success of the project? And, if the records of such men are unknown or shadowed by the slightest cloud of doubt as to their ability and reliability, most likely the investment will be declined. And rightly so.

The investment in Mount Plymouth will eventually amount to several millions. If you are as carefui with your own money as you expect others to be in whose hands it is placed, you want to know something of the character standing and financial worth of the men composing the directorate.
The directors of Mount Plymouth Corpcration are amon the most prominent in business, social and fina cial circles of Orlando and Orange County. Not only have they been suc. cessful in the management of their own affairs, but each of them are connected, either actively or in an advisory ca pacity, with some of the most substantial and successful in dustries in the state.

Not only that, but in presenting this development project to the public the committee in charge of publicity has been cautioned most stringently that no statements shall be made concerning Mount Plymouth or its future development that is not substantiated by absolute facts.
