Some people may well wonder why American newspapers give to much space in these days of high prices and extremely scarce newsprint to the birth of Princess Elizabeth's child in London. But most newspapermen no doubt suspect that American housewises, if not their husbands and daughters, will find this story of a perfectly normal birth of a perfectly healthy child destined to play as impuritant role in the future of the world. I welcome relief to all the bickerings of the United Nations conference, to the strikes and riots connected with labor-management relations, and to the scandal, divorce and crime which daily finds its way into the columns of the press.

Fate Of China

Sympathizers with Nationalist China find little cheer in the recent war news from that country. The defeat in Manchuria seems to be of disastrous proportions. The map of areas control shows that the Communists have excellent prospects of reaching the banks of the Yangtze, not just at one or two points but in force and over a wide region. It is conceivable that they might then be able to lay sufficient cratic structure (and they are guns along the valley to deny the use of the river to Nationalist commerce from Shanghai to Hankow or beyond This would be a new disaster.

On the more hopeful side, China is huge, and old, and patient. The very bigness of it in large measure determined All oblinary notices, eards of thanks, resolutions and notices of the finability of the Japanese to conquer it. As far as military operations are concerned, the Japanese armies in China were far larger, more highly trained, and much better equipped and Newspaper Represented than the Communist armies. The Japanese held much more of China than the Communists so far have taken, yet they could not penetrate the inland bastions to which the Chinese forces withdrew. One of the most beautiful comets observed in many years, say astronomers, has been sweeping through the heavens in recent days, giving our earth-bound creatures in many areas something to look at and a tale to pass along to their grandchildren. Those who espouse the belief that Communism will blow up in due course because of its undemomany) have received plenty of encouragement for this view in the efforts of the 58-nation Social Committee of the United Nations Assembly in Paris to draw up & charter of human rights.
Progress in writing this all-im-

The efforts of the Muscothe rights of the individual and In order to understand the sigwe recognize the structure of present day Communism. A lot of peo ple have the mistaken idea that of long ago which laid down a humanitarian code of one for all and all for one. There is small remunism and the original brand. The current so-called Commun-

ism is Bolshevism. It is a cold blooded philosophy of totalitarian dietatorship in which the individual is wholly subservient to the state - a cog in a machine. It is an ism which expands by strong-arm aggression

That is the background for the maneuvers of Soviet Delegate Alexei Paylov in the Social Committee .. and he has fought doggedly for the totalitarian code For example, he sought to delete freedom of religion from the derally this aroused hot opposition among the democracies, to whom freedom of religion is a cherished right. And the draft resolution as finally adopted provides that "everyone must be guaranteed freedom of thought, conscience and religion." Pavlov would have limited this to freedom of thought.

The Russian position in this argument about religion is easy to understand. One of the cardinal teneta of Bolaheviam is that religion is the dope of the masses and must be destroyed. The reason is obvious: a religious person can't subscribe to the evils of aggression and totalitarianism. Hitler followed similar line with his totalitarian Nazism. He tried his best to detroy religion in Germany.

Another hot fight has been was freedoms was adopted with the Soviet bloc voting solidly against
