What Is There Available To Fulfill Youngsters' Natural Adventures?

Listening to some of the evening living vide not only the adventures but the mat room entertainment, from time to time, brings about a word or two that has real meaning.

A few words from one of the disserta_ tions Sunday night, which probably weren't absorbed by many, has such an exception. ally outstanding thought, especially during this era when juvenile delinquency is one of the topmost items for controversial subjects, they bear repeating.

'If you cheat a child out of his natural adventures he will create his own."-Have you heard this before?

Our zest for modernization and the science fiction age has certainly done a little cheating on the children of today. - around us. Looking back through the decades is easy for so many as they remember the natural edventures of their childhood - hunting, looking and listening to Europe, talking fishing, romping through uncluttered fields. The summertime jaunts along the streams and brooks, natural rivers and lakes pro-

What are the natural adventures for

Could it be television, the mechanical machines for calculation, can it be super sonic sound, a trip to mars or the moon, whirlwind jaunts around the world before

We must admit that the science fiction age is here-the development of the earth's

Then what do we have to fulfill the "na. A provoking thought-and a serious one as modernization continues to develop

Polio Shot Baby

The parents of a two_year old Florida the second." girl recently told a newspaper: "We intend_ ed to have our Judy vaccinated agtinst polio from the time she was one. But whenever we made plans to see the doctor, Judy had a cold or something happened to postpone the visit. Last summer she contracted polio. Now she needs a crutch and a brace on one

A Texas mother made this statement, "I saw two of my three tots lamed by polio after I had put off having them vaccinated. My advice to other parents is: Don't make the same mistake I did."

Two out of every five cases of paraly. tic polio recorded by the National Founda. tion for Infantile Paralysis are children under age five. And nothing is more pitiful than a child disabled at the very beginning

How soon should an infant get his vaccination? The man who knows best is Dr. Jonas Salk, who developed the polio vaccine. His answer is: "Give the first injection at three months. The second should follow two to six weeks later. Two shots are good, but for maximum efficiency and effective. ness a third is needed seven months after

Get in the fine-car swim at the low Ford price!

mante a femorie concernition in the of 21 feed models for 1957

There's no need to pay a "fancy price" to enjoy fine-car luxury. Ford is lowest priced of the low-price three, yet offers values you'd expect only in cars costing far more!

To start with, you can easily pay twice the money, and not find lines that can hold a candle to Ford's for lowness, loveliness, or just plain

But step Inside. That's when you'll find the

real evidence of Ford's quality! And, on the way in, note that Ford offers door checks that hold doors open in either of two positions - for easy entrance or exit. A little thing. Then, inside, notice how com-

But, in a fine car, why not? fortable those plush, foam-rubber seats are They'll stay that way. And on long trips. For they re-scientifically contoured over non-sai: springs Your rear-seat passengers are treated extra kindly, too-with spring assists to help their open and close the doors-with the most leg room in Ford's field!

place Ford really shows its stuff! Ford delivers its famous V-8 power smooth as a whisper. That's because only Ford takes the pains to electronically balance each engine

Fine cers are smooth-and that's another

while running under its own power. Not even the makers of the most costly cars go this far to bring you super smooth performance Ford rides fine car smooth and quiet, two tou can thank the new "Innerl'ord" for that. Ford, for instance, has a swept-back front suspension that actually "rolls

ford's year springs automatically adjust to give the right ride for every road. And Ford keeps things quiet, with the most sound insu-

Fine cars are built to stay solid, So's Ford !

Ford has the only frame in its field to make use of rugged tubular steel beams. No car at the price offers so many roof-strengthening bearns. Expensive cars wen't built of thicker body steel or with sounder engineering skill. Then, of course, in Fool you can have all the power assists and other conveniences found in fine cars. And they cost far less in Ford. Yes sir! In every feature, every part, Ford is the fine car at half the fine-car price. Come in and see!

Get in on the fun and savings now In the new kind of
