

## Seven Persons Die As Big Airship Dives In English Channel

### Six Are Rescued In Accident Said Worst In History Of Britain's Commercial Flying

FOLKESTONE, Eng., June 17.—(INS)—Seven persons, passengers on a cross-channel air liner bound for Paris and Switzerland, were killed today when the plane crashed into the English Channel several miles off Dungeness, on the Sussex coast.

Four other passengers, as well as the pilot and mechanic, escaped with their lives, but some of them suffered injuries in the crash.

Engine trouble was encountered when the plane, a giant twin-motored Handley Page jetliner of the air line called "City of Ottawa," was miles out over the channel, en route to Paris.

The pilot sent out an SOS call, and turned back toward the English shore. He was not able to make it, however, and several minutes after the crash, a trawler nearby towed the plane partly out of the water by means of a rope thrown around its fuselage, but seven of the passengers, trapped in the cabin could not be rescued.

The accident is one of the worst in the history of British commercial aviation.

Hours after the accident had occurred, the company gave out a list of the 11 passengers aboard the plane when it left Croyan this morning, their nationalities were not disclosed at the time, but it is significant, which of them had been rescued.

The passengers were Mr. Malton, Mr. and Mrs. Smith, Miss Hoisinger, Mr. and Mrs. Fleming, Mrs. Nickerson, Mr. Metzger, Miss Blythe, Mrs. Karachi, and Mr. Thompson.

At the same time the Folkestone boat, with its flag flying at half mast, was bringing five survivors and one body into Folkestone harbor. Imperial Airways officials were assisting the American consular agent at all Americans aboard the liner were safe. "Everybody has been rescued," the vice-consul was told. "They will be in Switzerland before night."

R. N. Freatly, a resident of the south coast of England, who witnessed the crash, told the following story: "The plane went into the sea with a terrific crash while traveling at a terrific speed. The machine did not alight, but it floated out as she hit, and became partly submerged.

"I could see a number of passengers climbing out of the cabin into the wings, which protruded well above the surface of the water."

Meeting Saturday in regular session, the Seminole County Board of Public Instruction passed resolutions commending the work of Alex R. Johnson, head of the vocational agriculture department, through whose efforts the department was recently judged the best in the state for efficiency and all-around standing. The resolutions were as follows:

"The Smith-Hughes Agriculture Department of the Seminole High School has been accorded very high recognition by the State Department of Education, and this board feels that this honor has come to us largely as the result of extraordinary efforts and efficiency of Prof. Alex R. Johnson, head of this department, therefore

## ARREST NEARS IN SLAYING OF PRETTY CO-ED

### Net Of Circumstantial Evidence Points To College Instructor As Brutal Murderer

COLUMBUS, O., June 17.—(INS)—Revealing a net of circumstantial evidence, police today said they would either exonerate or lodge a charge of murder against Prof. James M. Snook, veterinary instructor at Ohio State University, in connection with the slaying of Miss Theora K. Hix, 23, pretty medical student whose mutilated body was found on a society shooting range on the eastern outskirts of Columbus.

Prof. Snook, a husband and father, was pictured by police as a sweetest of Miss Hix, daughter of Melvin Hix of Bradenton, Fla., who was known to her classmates and close friends as a latter of men.

Knowing any knowledge of the killing of Miss Hix, who was battered to death with a hammer and slashed with a knife, Snook admitted his friendly relationship with her, saying he shared her affection with H. T. Meyers, a horticultural worker connected with the university. Meyers also is held.

In Prof. Snook's automobile, were found a stained cap, a dash of glove, a hatpin, a woman's umbrella and a hammer of the kind police believe was used to slay Miss Hix. Authorities assert the slayer who slayed her throat apparently had an expert knowledge of anatomy.

For two years Miss Hix worked as office assistant and stenographer for university officials.

Different stories from many sources tending to throw light on the young woman's movements before her death were disclosed by police. A restaurant owner sold the putlock of a light lunch in his cafe about 2:30 o'clock Saturday morning in company with a man whom he identified as Meyers. While the two were eating, the proprietor said, another man who "looked like Prof. Snook" joined them and the three left together.

Two railroad workmen told police they had seen a man and a woman struggling in a secluded spot on the grounds surrounding Fort Hayes, an army depot, about a mile from the place where Miss Hix's body was found.

The man, the workmen said, picked up the woman, threw her over his shoulder and tossed her into a small coupe and drove away. From a handily police learned that Prof. Snook and Miss Hix occupied a cottage near the university as man and wife.

Snook holds a world's title as a pistol shot, having been a member of the American Olympic team.

## Air Officials Plan Plane Routes From Atlanta To Gotham

ATLANTA, June 17.—(INS)—Officials of the Southern Air Transport, Inc., are expected to arrive in Atlanta today or tomorrow to make final arrangements for the opening of an overnight passenger route between New York and Atlanta, to be inaugurated within the next two weeks, according to announcement made by officials of the organization.

The projected route was tried out Friday and Saturday with successful results. A plane, piloted by George Shaley, left Charlotte, N. C. Saturday morning at 9 o'clock, made stops at Atlanta, Montgomery and Mobile, and arrived in New Orleans at 4:30 o'clock Saturday afternoon. Shaley said today that an earlier arrival will probably be made in the Crescent City as soon as final plans are mapped.

## Question Of Airplanes' Safety Will Be Tested In Competitions Tomorrow

### By Homer H. Metz, International News Service Aviation Editor.

NEW YORK, June 17.—Just how safe is airplane transportation? The answer to this question may be provided tomorrow when the first flight tests of the international safety aircraft competition begin at Mitchell Field, L. I.

The competition, sponsored by the Daniel Guggenheim fund for the promotion of aeronautics, offers prizes totaling \$50,000 for the most efficient airplane under special rules the greatest advance in airplane safety without loss of efficiency. First prize will be \$10,000, second, \$5,000, and third, \$2,500. The planes will be entered from England and six from the United States have entered the competition.

The planes will be put through the roughest tests by the time the competition begins. They are expected to be at Mitchell Field. The tests, according to officials of the fund, will be unusually severe.

For instance, it is required that the aircraft must maintain level and controlled flight at a speed not greater than 35 miles an hour and must be able to glide for three minutes with all power switched off at a speed not to exceed 35 miles an hour.

Another provision is that the aircraft must come to a complete stop within 100 feet of the spot where it first touches the ground in landing. Still another requirement is that the aircraft must stop at a steep climb, no such predicament as a stall followed by a nose dive will count.

In addition to these three tests there are six others, each of them designed to prove the maximum degree of safety of which an airplane is capable of possessing.

The chief prize \$100,000 will be awarded to the competitor whose entry wins the highest number of points in four of the nine safety tests.

The six American companies which have entered planes in the competition are the Curtiss Aeroplane and Motor Company; the Schneider-Wendover Associates of Glencoe, Illinois; Charles Ward Hall, Inc., of Buffalo; Herndon Aircraft of Cleveland; J. S. MacLennan, Jr., and Associates of Milwaukee; and the Honner-Walker Aircraft Corporation of Brooklyn.

## Bruton Put On Trial Upon Bigamy Charge

Carl C. Bruton, young white man of Lake Wales, went on trial this morning in Circuit Court on a charge of bigamy, following his indictment recently by the grand jury.

Court convened at 10:30 o'clock and the jury had just been called when the court recess was taken. Milford B. Smith is prosecuting the case and H. S. and W. E. White are counsel for the defendant. The trial attracted a number of spectators.

## BEGIN HONEYMOON

CHICAGO, June 17.—(INS)—Eileen Carver, motion picture producer and director, and his divorced wife, Mary Akin Carver, who remarried yesterday, left today for New York where they will sail Friday on the steamship Majestic for a honeymoon tour of Europe.

## DRY PROTESTS GAIN FORCE BY NEW SLAYING

### Deluge Of Criticisms Being Lodged With Officials—Against Promiscuous Firing

WASHINGTON, June 17.—(INS)—The deluge of criticism and protest which has deluged the prohibition bureau since customs agents shot and killed Henry Virkula, a Minnesota confectioner, a week ago, while in recently motoring with his family, gathered new force today as a result of another killing by dry agents near Philadelphia, N. Y.

Officials declined to comment on the shooting of Arthur Gordon, 22, until a report has been received from the customs authorities that the agents will be censured for the usual government protection when they are brought to trial.

Washington is literally being deluged with letters and telegrams protesting against the promiscuous use of firearms by prohibition agents. Most of them are directed at the treasury and the justice department.

It is probable that President Hoover will take some cognizance of the situation this week. On the President's desk now is a long telegraphic protest from business men of International Falls, Minn., charging the shooting along the border as "a reign of terror" and asking presidential intervention. It is still unanswered.

The number of letters which have reached the treasury and justice departments since the Virkula killing runs into the thousands.

Most of these missives are sarcastic, while others are threatening. Typical of the former class was one, written by a labor union official. It made formal inquiry of the treasury as to "what precautions" should be taken by the officials in this instance.

Not all of the commentators, however, attack the government. A conspicuous exception is the Methodist board of Christian education, which has got out a brochure condemning the recent killings, and declaring that they have been exaggerated by "the hostile press." The brochure takes up the De King shooting at Aurora, the Hanson shooting, the killing of J. M. Kember, a college youth, and finds in each of them the fault of the "dry" agents.

## Development Will Be Begun On Three Big Dam Projects

NASHVILLE, Tenn., June 17.—(INS)—The development of three dam sites in Tennessee will be undertaken by the Holston River company, it was announced today, following the awarding of contracts of necessity and convenience by the Tennessee public utility commission to the power concern Saturday.

The construction of the dams will cost approximately \$35,000,000, it was announced. The project will be located as follows: one 70-foot dam and power plant to generate 21,000 horsepower, six miles north of Kingsport; one 125-foot dam developing 30,000 horsepower and plant developing 25,000 horsepower near Bluff City.

Work must be started 30 days after the federal water commission issues a final permit for the location of the plants. The Holston River Power Company is a subsidiary of the American Cyanamid Company and the actual expenditures for the new development will be made by the parent company.

## Bleese Resolution On Negro Question Causes Senate Row

### De Priest Incident Is Basis Of Tirade Upon Heavers For Recent White House Affair

WASHINGTON, June 17.—(INS)—The action of Mrs. Herbert Hoover in entertaining Mrs. Oscar De Priest, wife of the Chicago negro congressman, caused an uproar in the Senate this afternoon when Senator Bleese (D) of South Carolina sponsored a resolution urging the occupants of the White House to be "careful."

The resolution carried a long bench telling of the activities of negroes in the White House and Republican chiefs made heroic efforts to have it stricken from the congressional record. In the end, Bleese withdrew the resolution as a favor to Senator Hingham (R) of Connecticut, and "not because it might be offensive to the negro race."

The resolution set forth that Mrs. De Priest at the recent White House tea had "sat on Mrs. Hoover's right as her social equal" and that the wives of the attorney general and secretary of the navy had attended. Then the poet was cited describing how negroes were moving through the rooms of the White House, Senator Edge (R) of New Jersey, first raised an objection to the resolution trying to get it expunged from the record. Vice President Curtis said this could be done only by unanimous consent and Bleese immediately objected.

"There's not a word in it that reflects on anybody," said Bleese. "Mrs. Hoover did entertain a negro in the White House. Nobody denies that. The only surprise is that you took the vote in my state and in my state that is what I wanted."

Senator Borah (R) of Idaho and Senator Walsh (D) of Montana, also objected to the wording of the resolution. Borah, however, succeeded where the others failed, a though he condemned it as "obscene and indecent."

"The resolution is so worded it will give offense to hundreds of thousands of our fellow citizens," Hingham said. "Well, if it gives offense to my negro from Connecticut, Bleese re-butted. 'I'm willing to withdraw it but not because it might give offense to the negro race.'"

## Girl, Charged with Slaying Father, Is Held Pending Trial

BRISTOL CITY, N. C., June 15.—(INS)—Accused of her mother's slaying, her mother, "FRO" Davis, an 18-year-old girl today was held in jail pending trial on a murder charge in a swain county court.

The girl was bound over to the higher court at a preliminary hearing Saturday following the finding of the body of her father with three bullet wounds in his head in Cheoah Lake, near here, where the man conducted a ferry boat.

"Do you know who killed your husband?" Mrs. Davis was asked on the stand.

"Yes, Effie," was the woman's response.

The girl is mentally defective, Mrs. Davis testified. She expressed a doubt that her daughter could distinguish right from wrong, and added that the "poor girl doesn't realize that her father is gone."

Mrs. Davis and five others held with the daughter, Effie, in connection with the investigation of the case, were released following the preliminary hearing. The other five, were Mack Davis, son of the slain man, Dixie and Hattie Davis, two daughters, and Flynn Birchfield and Homer Taylor, neighbors.

## YOUNG HOOVER GRADUATES

PALO ALTO, Cal., June 17.—(INS)—Stanford University will become the alma of all the Hoover graduates today. Thirty-one years ago Mrs. Hoover received her degree, the only woman ever to complete the three-year course at Stanford. Three years earlier Herbert Hoover had obtained his A. B. degree in geology at the University. Herbert Jr., following in the parental footsteps, graduated in mining at Stanford in 1925.

## QUAKE RECORDED

WASHINGTON, June 17.—(INS)—A succession of heavy earth tremors was registered on the seismograph of Georgetown University last night. Father Francis Tondorf, the observer, estimated them to have occurred about 7300 miles distance from Washington.

## MOVE TO SIGN UP CELERY ACREAGE IS NEARING GOAL

### 1,000 More Acres Are Needed To Boost The Total To 80 Per Cent

The largest and most enthusiastic meeting of team workers held since the celery advertising campaign was launched took place Saturday night at the Yacht Club, H. J. Lehman, general chairman of the executive committee, presided and reported that if 1,000 additional acres were signed in the Sanford-Oviedo district, the 50 per cent goal would be reached.

E. J. Meyer, in accepting the chairmanship of an intensive drive to be staged this week, with team meetings every evening, declared it was imperative to think of anything else but success.

"The spirit shown here tonight," he said, "convincing that within a week's time we will have the 'thromometer' up to the point where the gross of the country can produce the fact that the advertising campaign is an assured certainty."

S. O. Shihonast, prominent Sanford manufacturer, was present at the meeting, as was H. F. Whitner, well known banker. Both praised the efforts of the workers, told them they were on the right track and spurred them on to renewed efforts, declaring that Sanford was on trial before the world and that this drive simply had to go over the top.

Words of encouragement were added by John Malach, director of the celery association's drive, "I am going down to Lakeland tomorrow to attend a meeting of the board of directors of the state association, and the Sanford-Oviedo delegation is going to tell the folks from down state that we are going to get our 50 per cent total before many days pass by."

A recent addition to the forces of the workers is J. J. Cates, veteran wood side grower. "This means a great deal to every grower in Florida," this advertising campaign," said Mr. Cates, "and it is up to the body of workers to see every single person interested in celery and set him straight if he hasn't already signed up. For my part, I expect to stick with the campaign until it goes over the top."

Recognizing the necessity of living up to the celery acreage in such sections as Winter Garden, Citrusville and Hastings, a committee, headed by G. F. Smith, was appointed to visit such communities.

Another enthusiastic meeting was held this morning at 8 o'clock, at which time prospect celery acreage was outlined. To-day's meeting the largest Sanford-Oviedo delegation that has yet attended a meeting of the state association will leave for Lakeland to meet with growers and shippers from Manatee and Sarasota. In addition to representatives and directors from Sanford, Charles Lee and H. T. Warren will journey to Lakeland to represent the Oviedo growers, who are signing up in greater numbers every day.

"Sanford needs increased many enthusiastic campaigns," concluded H. J. Lehman this morning. "But I am confident this week's campaign in the interests of the celery association will live up to all traditions and will result in the Sanford-Oviedo district surpassing the 80 per cent quota that has been set."

## Religious Rebels Are Reported In Battle

MEXICO CITY, June 17.—(INS)—More than 100 religious rebels were reported to have engaged in an all-day battle with federal troops at Volcano de Colima, state of Colima, on Friday, according to military dispatches which reached here today.

The federal leader, General Eugenio Ortiz, declared in his report that by his victory he had wiped out the last considerable element of the religious rebels active in the central states of Mexico. The federal cavalry was assisted by federal airplanes, led by Colonel Roberto Pardo, which inflicted heavy damage on the "Christians" entrenched lines, the report said.

## St. Louis Cardinals Take First Place But Have Lost Ground On Eastern Jaunt

By Lou Corbin  
 NEW YORK, June 15 (INS)—Although the St. Louis Cardinals are back in first place today, two points ahead of Pittsburgh, they have lost ground on their stand against the eastern clubs, which remain in a close tangle. The percentage of the championship in the league standing is almost exactly what it was two weeks ago, while the three outstanding rivals—the Pirates, Cubs and Giants—each have picked up about 20 points.

A close run over Boston yesterday, 4 to 3, enabled the Cardinals to regain the lead. Yesterday's victory by the 19th runner and pitcher Johnson's relief pitching when Shorrel followed in the ninth saved the game.

The Cardinals finish last the season by losing to Boston yesterday. The McGowan knock-out hit him out of the box for the second day in succession.

Frederick's double gave Brooklyn a 5 to 4 triumph over Cincinnati in the 19th inning after he had pitched 22 of the game with a three-run rally in the ninth.

Winning 10 of their last 12 games and being ground out in the ninth, the Cardinals are still going through. They are still eight games behind the Athletics, who have won 22 of their last 25 games and have won their last five games. Yesterday's victory gave them a 10th victory of the season in winning Cincinnati.

The Cardinals looked like their old selves in an unexpected victory, 4 to 3, over Boston yesterday, when seven errors were made in the game, the Cardinals going to bat with runners on base.

Winning 10 of their last 12 games and being ground out in the ninth, the Cardinals are still going through. They are still eight games behind the Athletics, who have won 22 of their last 25 games and have won their last five games. Yesterday's victory gave them a 10th victory of the season in winning Cincinnati.

## Good States Use Of Uniforms Is Illegal

WASHINGTON, June 15 (INS)—The use of federal uniforms and equipment by national guards of Tennessee doing strike duty, at cotton mills is illegal, Secretary of War Good decided today after an investigation.

Notice to this effect has been sent the Governor of Tennessee. Good investigated the matter after labor leaders complaining that the guardsmen were using regular army equipment issued to the various states for training purposes, while they were on the pay roll of the mill owners.

## TALKIES ATTAIN BIG POPULARITY THROUGH NATION

Approximately 3,000 Theatres Are Equipped With New Device

HOLLYWOOD, June 15 (INS)—Of the 17,000 theatres in the United States showing motion pictures or combining them with vaudeville, approximately 3,000 are wired for sound by means of one or another of the several methods or reproduction. New installations are being made at the rate of 200 each month on an increasing scale.

Industry estimates that at least 5,000 of the best houses in the country will be equipped to show talkies within the year.

Consequently, few pictures are being produced without sound effects or musical accompaniment and most of the studios are working on full dialogue features exclusively.

Even the "die hards" are coming around in answer to the constant urge of public demand.

Charlie Chaplin, well known defender of the "last ditch" in the silent film field, is making small concessions to the "new art" in his latest picture by introducing sound effects in several scenes, and Edna Gurney, staunch supporter of the "harmless silence" of the old practices in screen technique, is including several singing sequences in his filming of Longfellow's "Evangeline," although neither will be graced by dialogue.

In the cellular version of the Acadian love lyric, Dolores Del Rio will sing in French an unpublished chansonette by Marie Antoinette and the theme song, "Evangeline," written by Al Johnson.

The first screen star to sing for a phonograph and over the radio, the Mexican actress has the added distinction to be the first to sing in a foreign tongue for the sound picture.

Song sequences are becoming more popular, at least with the producers. They have not been used long enough as yet to judge the public's reaction, but it will be favorable, film critics believe, as the melodious passages allow scenes time necessary to properly establish their importance without allowing an apparent slowing of tempo.

Many of the major producing companies are going in heavily for musical comedies, operettas, and revues and some of the most famous figures of the stage are being drafted for singing parts.

One of the latest of the vaudeville headlines to desert the footlights for the screen is Ann Greenway, signed by Radio Pictures for featured roles in "Rio Rita" and "Hit the Deck."

Two of the show writers who have left the Alley of Applause for Hollywood are Bert Kalouss and Harry Ruby, who have written many popular song hits, their latest being "The Fizz O'Clock Girl."

## Two Carloads Of Chevrolet Arrive

White Highleyman Inc., Sanford Chevrolet distributor, announced today the arrival of two carloads of machines, with the promise of two more carloads the latter part of the month. S. D. Highleyman, member of the firm, said the demand for Chevrolets in the Florida market is so great that the Florida distributors are experiencing difficulty in obtaining enough machines to meet their needs.

"The Chevrolet Motor Company officials told us that the new factories as well as the old ones are working to capacity to meet the increasing demand," said Mr. Highleyman.

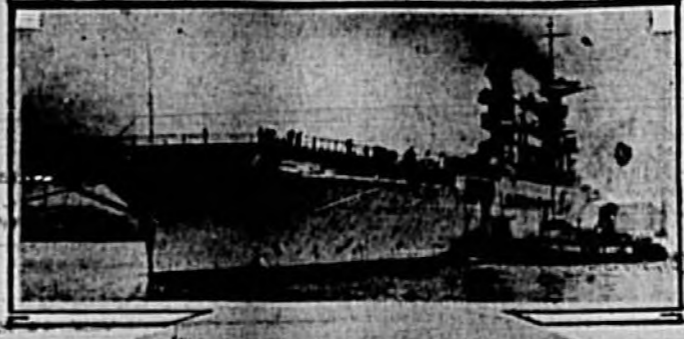

## Shot Fired At Target Picures Infant's Eye

NEW YORK, June 15 (INS)—While shooting at a target in the rear of his home George Jaret fired a bullet which struck 22-month old Thomas Merkel in the left eye while he was in his carriage according to Mrs. Minkie Merkel.

The child was taken to a Brooklyn eye and ear hospital where eye specialists removed the bullet and they hoped to save the sight of the child. Jaret was held in \$2,000 bail on a charge of felonious assault.

## NAVY AEROPLANE CARRIERS HAVE NOVEL SOUND EQUIPMENT

Capital ships of the United States Navy are designed for only twenty minutes of actual battle. For this reason, below decks, in a location selected as the safest on the vessel and the one most protected from possible shell-fire, is the telephone switchboard, the center of the ship's entire nervous system.

The most modern communication equipment ever developed for such use, is now being prepared by the Western Electric Company for installation on the two aeroplane carriers, the Lexington and the Saratoga.

In outward appearance the appliances which will be installed are no different from those in millions of American homes. But actually the difference is great. The cord which connects the telephone to the bell box is specially insulated so that it will be permanently water-proof. The automatic switch-boards, while mechanically the same, have operating parts of non-corrosive metal. Other elements in the communication system have special "protective finishes" and are of the "airtight" type which are installed by the Western Electric Company. Thus, throughout the entire ship—a vessel 800 feet long and 100 feet wide—there is a complete tie-up. No part of the ship is so far from the center as to be out of touch with the rest of the ship.

Another interesting though not entirely new feature is the anti-noise battle telephone. These can be used even in the gun-turrets where the noise is the fiercest or in the engine rooms far down in the hull. They cut out all outside noises and permit the speaker's voice alone to pass over the wire.

Additional facilities for communication and transmission of orders are provided by 250 loud-speaking phones which are of the "airtight" type which are installed by the Western Electric Company. Thus, throughout the entire ship—a vessel 800 feet long and 100 feet wide—there is a complete tie-up. No part of the ship is so far from the center as to be out of touch with the rest of the ship.

## Plans Are Being Laid For Checking Home Run Mania And To Cut Down Salaries

By Davis J. Walsh  
 International News Service  
 SPORTS EDITOR  
 NEW YORK, June 15.—By fast thinking, some of the more agile of our earnest young men may soon be stretching their home runs into two legs, according to the world's most famous ventilator with the rest of the hot air today, the idea being that the cry of home runs (many) has led upon the jaded senses of the club owner.

Anyhow, the National League is holding for its summer meeting in Cincinnati and the tip is that one of the things it proposes to do is to declare a limit on home runs at the Polo Grounds in Philadelphia, at Wrigley Field in Chicago and at Sportsman's Park in St. Louis. Another proposal concerns the cutting of salary rolls in New York, Chicago and Pittsburgh, a movement that is receiving support of New York, Chicago and Pittsburgh. They are for the movement, "bring big men in things like that."

## Quaker Village Not To Be Marred By Inroads Of Building

LONDON, June 15 (INS)—Jordan, the Quaker village in Buckinghamshire, where William Penn-founder of the American State of Pennsylvania, lies buried, is not to have its simple countryside marred by the speculative builder.

A scheme to preserve for all time the rustic beauty of the village and its surrounding country has met with gratifying results. Many Americans contributing large sums to the fund which is to be devoted to purchasing the area.

"Sufficient land already has been acquired in the neighborhood," the famous Meeting House to ensure that Jordan will always remain a secluded village," one of the promoters of the scheme told International News Service.

Last May it was proposed to make a new main road just past the Meeting House. Among those who protested against this were David Lloyd George, Ramsey MacDonald and Lord Hugh Cecil.

For several months the Society of Friends, the famous Quaker body, which has a great interest in the place where the founder of Pennsylvania worshipped as a Quaker, have been busy at work. With the generous help of many Americans, several of whom made a special pilgrimage to Jordan from the United States, and many other sympathizers, sufficient tracts of land surrounding the Meeting House.

## Fox Talking Film "Hearts In Dixie" At Milane Today

When "Hearts in Dixie," Fox Movietone 100 per cent dialogue production, is seen and heard on the screens of the world, it is almost certain that the singing of spirituals and folk-songs will linger in the memories of auditors for a long time.

Particularly will this be true of "Lonesome Road," the strains of which bring the story to a close. It is a masterpiece of its kind. There is an interesting poetic quality to the lyric:

Look down, look down that lonesome road,  
 Hang down yo' head an' cry,  
 The best of friends must part some time,  
 An' why not you an' I?  
 True love, true love, what have I done,  
 That you should treat me so?  
 You caused me to walk and talk with you  
 Like I never done before.

The history of "Lonesome Road" is somewhat vague, Evelyn Cary Williams of Lynchburg, Virginia, who has made extensive researches on the subject of folk songs, was unable to trace the origin of "Lonesome Road" other than to find it was taken down from the singing of Charles Galloway, an uneducated worker on roads in Virginia. It is not unlikely that the song will become widely popularized through its use in the picture, as perhaps, will several others.

"Hearts in Dixie" abounds in spirituals rendered by a mixed chorus of sixty voices and faithfully reproduced on the screen through the medium of Fox Movietone.

## U. S. Observance Of Fathers' Day Began Nineteen Years Ago

(Continue From Page One)  
 character of many of the nation's highest figures. It is the highest honor that a father can receive. It is the highest honor that a father can receive.

Paul W. Chapman, a leader in the banking world and the man whose company recently paid \$2,000,000 for a group of vessels, including the world-famous Leviathan, regards the early influence of his father as one of the prime factors in his success.

"My father taught me to get by on my own efforts," he said. "He taught me to do without things and all that I have acquired and all that I expect to have I owe to my father, to his training and to his inspiration. He was the wisest of men because he taught me to face life without relying on him. That my boyhood was simple, unextravagant and purposeful was not due to my mother's personality, but to my father's principles."

Despite the jokes, the cartoons, and the humorous comments of columnists, Father's Day is now one of the outstanding festive days of the nation and the sons and daughters of America have proven that Father is well entitled to his own distinctive day.

## Murder Charge Is Instituted Against 'Dry' Agent Slayer

INTERNATIONAL FALLS, Minn., June 15 (INS)—After a secret arraignment in the sheriff's office under guard of deputies, border patrolman Eumet J. White was back in the county jail today facing a more serious charge of second degree murder for the killing of Henry Virkula, slain last Saturday as he motored with his family.

Judge J. H. Brown dismissed the second degree manslaughter complaint lodged against White on recommendation of a coroner's jury and, substituting one of second degree murder, increased the prisoners' bond from \$1,500 to \$5,000. The preliminary hearing was set for July 2.

White has been scheduled to (Too Late To Classify.)

A Sweeping Success because it offers Big Car Qualities for only \$745  
 The New Pontiac Big Six is a sweeping success—an even more pronounced success than its famous predecessors. And it owes its success largely to the fact that it offers big car qualities at low prices. Oakland produced this car to enable progressive people to step up in motor car quality without leaving the low-priced field. And the very people for whom it was created have made it an impressive sales success.  
 Pontiac Big Six, \$745 to \$995, f.o.b. Pontiac, Michigan, plus delivery charges. Bumpers, spring covers and Lavejey shock absorbers regular equipment at slight extra cost. General Motors Time Payment Plan available at minimum rate.  
 Consider the delivered price as well as the list price when comparing automobile values. . . Oakland-Pontiac delivered prices include only reasonable charges for handling and for financing when the Time Payment Plan is used.

BIBLE VERSE FOR TODAY

PRAYER—Father, give us thy Holy Spirit that we may reflect and lift up the living Christ in all that we say and do.

Golf

And let the writer or some betray And golfs a round of deep dismay If you possess the strength of will To hold your eager body still, And do not let your shoulder fall, The little ball will travel far, And you can shoot the course in par.

Golf is a simple game. The swing is after all the vital thing. But strange it is and also true, The trick is learned by very few. I'd say of golfers as a whole The thing we lack is self-control; Struggle and practice as we may We cannot make our hands obey.

A bitter rivalry exists Between our hands and arms and wrists, Our strength our mental power declines, Our nerves are fighting 'gainst our brains.

Old habits battle with the new, The hands refuse to follow through, The arms resent the use of clubs, We fight ourselves—that's why we're dumb!

Yesterday was Father's Day. What did you do? Stalk the old man for a dollar to buy him a new necktie.

President Hoover has signed the fairly relief bill. The farmers will get some relief, but they won't get their abundance.

Chicago launches "Drive to Clean up Legitimate Drama"—headline. They ought to clean up some of their illegitimate drama.

Jaxon pays \$18 for 17 ounces of water," says the Jacksonville Journal. He got cheated. Our water bill here in Sanford is seldom as much as that.

A Sanford woman has her pocketbook with one hundred and fifty-five dollars in bills the other day. Who said anything about lack of time?

Both Bryan Owen says she is not thinking of running for the Senate but there are plenty of Floridians who wish she would think about it.

The Times-Union picks up an unusual card of thanks printed by a West Florida woman. "I want to thank those who helped bury my husband," it said.

Something about some people—those who have the least faith in advertising are sometimes the biggest believers in publicity. There's a difference, you know.

The new commitment, "I don't drink" has not yet eliminated the other commitment, "I don't kill." Arthur Brisbane, maybe not, but one might reasonably think so.

It strikes us that the fibers of the yellow bird could have made that getaway very easy if they had wanted to. Trans-Atlantic flying is not what it used to be. New methods have to be devised for securing a maximum amount of publicity.

Sanford County divided its vote when the House passed the six cent gas bill. Mr. Hagan voted in favor of it and Mr. Entwinger voted against it. Six cents seems like a mighty big tax to pay on a gallon of gasoline, but proponents of the bill say that it was the only alternative for the retail sales tax, and you know how our merchants feel about that.

Secretary Hyde continues to insist that whatever bill is rendered in the House, it is rendered by the Federal government, be rendered on a fifty-fifty basis. In other words, that the state match the federal appropriation with similar amount. As long as this attitude is maintained, the growers are out of luck, because the state hasn't any money and if you don't believe it, look over your unpaid tax bills.

Boys' Clubs

Where do all the crooks, gamblers, and thugs in the world come from, one is often inclined to wonder. It is hard to believe that men who will rob from another at the point of a gun, or who will slay each other for the sake of a pint of whiskey, could have mothers and fathers just as the rest of us, and could have at one time been boys who like to romp and play, and who laughed and cried like any other boy.

Yet statistics tell us that most of the characters in gang life grow of underprivileged boys who might have been saved from a career of crime by the proper sort of attention. A recent editorial in the Review of Reviews points out that the Detroit Boys' Club has taken some four thousand kids, some of them from the toughest neighborhoods in the city, and has turned them into wholesome, healthy, ambitious youngsters, who will probably make their mark in the world.

The club was organized in 1926 and the head of it says: "Since that date no boy who has come regularly under the influence of the club has been brought before the juvenile court. One of the largest industrial concerns in the city has offered to take our boys as fast as they can be prepared for it, by training the habits of honesty and concentration on the tasks assigned in our vocational shops. The excesses of this corporation says that the toll imposed by the waste of inefficiency and inattention, with the resulting strikes and large labor turnover, is by far the largest item of loss in production. And throughout this country industries derive a large proportion of labor from the class of men who have come up through a long period of underprivileged boyhood."

The club embraces almost every form of clean healthful amusement. There are swimming pools, gymnasium, boxing rings, and squash courts, places for hockey, and tennis, reading rooms, and shower baths. But what the boys like most, according to the directors, are the means for vocational training. Old automobiles are torn down and rebuilt. Radio making, toy making, carpentry, electrical wiring, mechanical drawing, and airplane building, are all taught and have proved to be subjects in which the boys are most interested.

Just what effect such clubs as this will have on the crime waves of the future is not much in doubt. Most of these boys, if not at the club, would be hanging around some street corner, associating possibly with low characters of the underworld. Such contacts certainly would do them no good and might very possibly lead them to lives of crime. The club takes away this and gives them something worthwhile to do.

Maybe He Isn't Engaged

Whatever the Prince of Wales does is news; and lots of times what he doesn't do is news also. His activities constitute news perhaps not so much because he is heir apparent to the most commodious throne on earth but because he is the world's most eligible bachelor. The marriage of Gene Tunney some time ago and the wedding of Colonel Lindbergh recently have left him without a competitor in the hearts of women.

Last week the hopes and aspirations of countless flappers, who still believe in fairy stories and tales of Prince Charming, were dashed to pieces when it was announced, "unofficially" of course, that the Prince of Wales and the beautiful Princess Ingrid of Sweden were soon to be married. How completely, they all thought, for a prince to marry a princess!

Correspondents explained in great detail why they thought the Prince and Princess were engaged. They had been seen together, it seems, upon more than one occasion. And the prince who is a second cousin of the Princess, recently gave a very exclusive dinner in her honor at Buckingham Palace. The correspondents were no fools. They could tell when a prince was in love just as well as anybody else.

But from officials of the palace word was sent out that this marriage stuff was all bunk, or to put it in their own words, had been grossly exaggerated. The Prince was not planning to marry the Princess and both had been greatly annoyed by the reports. And to strengthen their position and prove to a skeptical world that it was mistaken, the Prince failed to attend a ball given in honor of the Princess by the wife of the Swedish minister.

So after all, maybe his engagement is just a myth. Maybe he's still an eligible bachelor and flappers who like to daydream can continue to believe in fairy stories.

YE OLD-TIME REPORTER

ST. LOUIS POST-DISPATCH

A reader of the Post-Dispatch, who describes himself as an undeviating devotee to the status quo, recently pointed on this page which discussed the addition by a Washington correspondent of the Senate vote on the Leonard appointment as a real achievement. The article at it as having been obtained only through a breach of confidence on the part of some senator or employee, and even when published, was only of passing general interest. This reader also accepts the challenge to name a better piece of newspaper work and cites the identification of the man who attempted to kill Russell Sage as a fine example of the work of the old-time reporter. This event happened some 10 years ago, and because now almost forgotten, it is worth while recalling.

A stranger entered Mr. Sage's office one day and searched a bomb. By some curious freak never understood, the famous financier was not injured but the intruder was blown to smithereens.

GOOD IN EVIL

ORALA STAR

A paragraph reading "There is a little good in evil if you will look for it," that recently appeared in the Florida Times-Union, has been the cause of considerable newspaper comment, mostly of a condemnatory sort. However, there really may be some truth in the statement. It is human nature to condemn anything that we think wrong, though there have been several prominent people who have taken the view that, so far as people are concerned, everyone has some good points. May it not be that the same may be true when it comes to evil per se? Of course if this is the case it must necessarily follow that the opposite is also true, and there is some evil in most good.

One trouble about trying to discuss any such topic as this is to decide what is good and what is evil. A few centuries ago, and even as late as during the life of the last generation of mankind, people were inclined to consider that there was a definite boundary line separating good from evil.

JOHN TEMPLE GRAVES II

"He never sold the truth to serve the hour Nor pattered with eternal God for power."

These lines, posted in giant letters across the hall of the Democratic national convention in 1912, were used with dramatic effect by William Jennings Bryan in opening the speech which made Woodrow Wilson president of the United States in lieu of Champ Clark. Most of us have thought much more of the lines than of the man who wrote them. Poetry for its own sake may be neither news nor editorial but a piece of poetry which effectively stresses any sum up is taken is the very hand-maid of thinking and remembering.

Poetic allusion can be overdone, as a certain distinguished author discovered whose latest book was being praised by a lady. "What did you like best about it?" he asked facetiously. "I think," the lady replied, "I enjoyed most your quotations from Lord Byron."

A police magistrate recently sent a negro chicken thief to jail "under the full of the moon." This sounded like poetry in the judge's mind but he explained that the sentence was so couched because the thief would have difficulty in retaining his possession if he were taken under the full light of the moon.

This colloquial and practical use of the moon will appeal to some of us who are a little weary of purgatory on the more romantic and poetic side. Most of us appreciate the beauty of the heavenly bodies so keenly that we do not enjoy hearing sentimentalists rave about it. When some too expressive companion greets every plane with an "Oh, the moon," or "Ah, the stars!" there is something revolting in us that tempts us to reply, "Damn the moon and stars!"

It is not that we have the mean and start out but that we dislike these fantastic mores. "Heard melodies are sweet, But those unheard are sweeter."

We prefer to take our moon and stars without being interviewed about them. The next time anyone asks you to tell us about the moon and stars we are determined to reply with some interesting and practical statement such as "The moon's pair contains as much nourishment as any well-prepared meal which would cost at least a dollar. It can be eaten in a tenth of the time required for a full meal, thus saving months of time in the course of an average life."

Or "Old you ever stop to think how much nicer it is to ride in a cab and think how much nicer it is to ride in a cab than to walk, then to walk and think how much nicer it is to ride in a cab than to walk?" A practical question of this sort put blank and calling for an answer will spare the moon many indignities.

Anyhow the moon is responsible for more lies and more trouble than any other single phenomenon in the universe. Many a man is bringing home groceries today and putting the cat out at night because he was answering back under a full moon.

Everything on one side of the line, and everything on the other side of the line, according to the best philosophical thought of the present time, however, this is not true. The line separating good and evil is not definite and does not remain the same at all times. Many things that our forefathers considered good, we now condemn, and the things that we now condemn, our forefathers considered good. This change has come about gradually, but steadily, as the result of the passage of time, the improvement and change in modern living, as well as of greater knowledge.

Nearly everyone has heard the story of the old lady who was noted for always having a good word to say about everybody. A person could not be such a reprobat, or have such a notorious reputation for evil but she would call attention to some virtue which she considered he possessed. This habit of always saying good so exaggerated her family that one of them said, "Grandma, I believe you would find something to say good of the devil himself."

With a wee twinkle in her eye the old lady replied gently, "Well dear, he certainly does set us a fine example of perseverance."

May it not be that every evil, no matter how bad, has somewhere concealed within it a speck of good? If we only have the mental and spiritual eyes with which to gild it? May it not at least act as a character builder by giving us something to contend with and overcome? If it does this, can we not truthfully say that it has some good in it?

THE SAD CASE OF SIR ESME NORFOLK VIRGINIA-PILOT

So have America's self-righteous drys pestered the British Ambassador at Washington with their protests against the embassy's importation of wet goods for its own consumption, that Sir Esme Howard has decided to renounce his diplomatic liquor-importing privilege and put the embassy's official functions on a strict mineral water basis. The Chilean Ambassador, Carlos Davila, who crashed the front page a few weeks ago with a completely dry party for the celebrated Mrs. Edward Everett Gann, has also decided to go Anti-Saloon League, having already taken it up with the Santiago government by cable and obtained its benediction. The extent of the British Embassy's renunciation is still somewhat in doubt. According to the report Sir Esme will continue to use wine for his own table, applying the prohibition principle only to formal embassy affairs. It is emphasized in other quarters that the British Ambassador has acted only for himself and that the lesser officials of the embassy staff will be free to do what they please. Some of them it is suggested, will not please. As for the other embassies and legations, there is no sign that Sir Esme's move will prove epidemic. On the contrary, the indications

GO HOME, GENTLEMEN TAMPA TRIBUNE

Our advice to the Legislature is: Go home, gentlemen. (Including, of course, the lady.) Nothing worthwhile is to be gained by prolonging the extra session.

When this extra session convened, it had before it eight measures which required attention. Only eight. It was limited by the Governor's call to these measures—except by two-thirds vote. What has happened? With only eight bills requiring disposition, more than 400 bills have been introduced at this extra session.

Not one of these additional bills is necessary to the well-being of the state or the conduct of its government. Nearly all of them are "study" bills. Many of them propose new bills of taxation which are not demanded and which would be both costly and annoying to the people and bad advertising for the state with the outside world.

The Senate has completed its extra session work. It is merely "marking time." It passed a concurrent resolution to adjourn sine die at noon yesterday. This resolution went to the House and was not acted upon. The House is prolonging the session for what? For no good purpose, and to no worthy result. It is frittering away the state's time on non-essentials. Every day, new tax bills make their appearance. On Tuesday

SEE IT THROUGH TAMPA TIMES

There's absolutely no guessing what the present Florida Legislature is going to do.

During the regular session the senate passed an appropriation bill cutting reductions of various sorts amounting to about a half million dollars. This caused a hopeful feeling upon the part of those who thought that economy in government was to become a reality, instead of something a bit talked about. Since the extra session has been in operation the senate has put something around \$10,000 of this back into the appropriation bill, with that measure not yet made into law. That looks a bit like a rug has slipped, and that there is not to be much economy after all.

Another plunger of hope has shown upon the horizon, however. The house, by a vote of 47 to 4, has passed a bill abolishing the three special assistants to the attorney general, created by the last Legislature or its immediate predecessor. It is most ardently hoped by the people of this state that the people will follow the lead of the house in this matter. These assistant attorney generals have always been useless, unnecessary officials, so far as we have been able to see.

The house is on the right line. The most direct and best way to economy in Florida's affairs is by the abolishment of useless offices and officials. There are numbers of them from assistant attorney general and circuit judges on down the line. They should be done away with.

It may have been that some of these were necessary when they were created. But many of them are worse than unnecessary now. The only sensible thing to do under such circumstances, is to do away with them.

If the legislature will devote a

## Social Calendar

**TUESDAY**  
The Little Theatre Group will meet at 8 P. M. at the Woman's Club house.

**THURSDAY**  
Seminole Chapter Number Two, E. S. will meet at 7:30 P. M. at the Masonic Hall.

## EAST SANFORD

Mr. and Mrs. W. A. Ray are expected to leave for the summer home in Bay, Fla. to spend the remainder of the summer.

Willie Taylor is here from Tampa visiting his grand-parents, Mr. and Mrs. W. A. Rayner, and young Mrs. W. D. Rowe and family.

Mr. and Mrs. G. W. L. Smith and on David, have as their guests Mr. Smith's sister and husband, Mr. and Mrs. J. L. Dred and three children of Buford, Indiana and Miss Mrs. Ruby Shaw and daughter from Atlanta, Ga.

Mrs. Peter Baker and Peter Jr. left Sunday for Cleveland, Ohio to join Mr. Baker who left for that point several weeks ago.

Mrs. Jimmy Thorp is here from Orange, N. J. visiting the home-maker families. Little Miss Helen Stoenmaker will accompany her home for a visit soon.

Mr. and Mrs. Herman Middleton and son, Mrs. Georgia Hart and Mrs. Middleton, spent Sunday at Daytona Beach.

Mrs. Annie Babin and family are here over Sunday from their home on Merritt Island.

Mr. and Mrs. Toyanna of Bear Creek Avenue are moving to St. Petersburg to go into the restaurant business. Mr. Toyanna has been in the farming business here for the past fifteen years. They have made many friends who wish them well in their new venture.

Mrs. C. V. Burgess and son Carl were here from Fort Meade recently to visit the former sister Mrs. R. C. Long. They have now gone to New Martinsville, West Virginia for a visit with relatives.

Miss Helen Vincent left Saturday for her home in Laurens, South Carolina after spending the year at the R. C. Long home on Richmond Avenue.

Mrs. R. C. Long, Mrs. D. L. Long, Mrs. T. M. Dunlap, Mrs. Virginia Roche and Miss Kathleen Long were shopping in Orlando Monday.

Miss Kathleen Long will enter the State College at Tallahassee at the beginning of the new school year.

G. W. L. Smith reports some fine celery cut at Titusville last week at the Indian River Canning and Produce Company's farm where he has charge of the work. Two cars of celery were sold to Chase & Co. for one thousand and fifty dollars each. The company is cutting more celery this week.

Mrs. K. S. Dutton entertained with a farewell dinner on Sunday afternoon at her home, 1012 Magnolia Avenue. Her guests included Mr. and Mrs. D. P. Drummond, Mr. and Mrs. J. C. Benson and Mrs. Mattie G. Pace.

Mr. and Mrs. E. P. Housholder, Mrs. Cassandra Schull, Miss Edna Palmer and Karle Housholder motored to Daytona Beach Sunday where they spent the afternoon.

## Mrs. Sharon Hostess To Club On Saturday

Honoring the members of the Saturday Club, Mrs. J. G. Sharon entertained with a bridge party on Saturday afternoon at her home, 117 West Tenth Street. Several progressions of bridge were enjoyed during the afternoon and high score prize, chiffon silk hose, was awarded to Mrs. E. F. Housholder at the conclusion of the games.

Lavender was the color chosen for refreshments and party appointments. The bridge tables were covered with lavender cloths while other bridge accessories were in lavender. Quantities of dahlias in shades of lavender and purple were arranged in vases and bowls about the rooms where the guests were entertained.

At the tea hour a salad and sweet course, was served by the hostess, assisted by Mrs. Samuel Puleston. Those present were: Mrs. E. F. Housholder, Mrs. W. J. Thigpen, Mrs. D. P. Drummond, Mrs. J. E. Brown, Mrs. S. R. Dighton, Mrs. D. L. Thrasher, Mrs. A. P. Connelly, and Mrs. Samuel Puleston.

## Interesting Lesson Studied By Scientists

"God The Preserver of Man" was the subject of the Lesson-Sermon in the First Church of Christ, Scientist, on Sunday.

The Golden Text was from Deuteronomy 33:27, "The eternal God is thy refuge, and underneath are the everlasting arms."

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Look unto me, and be saved, all the ends of the earth: for I am God, and there is none else" (Isaiah 45:22).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "We shall obey and adore in proportion as we apprehend the divine nature and love Him under-standingly, waiting no more over the responsibility but rejoicing in the affluence of our God. The Christian Science God is universal, eternal, divine Love, which changeth not and causeth no evil, disease, nor death."

Mrs. J. C. Benson is expected to leave Wednesday for Boston, Mass., and Derry, N. H., where she will spend some time. While in Boston she will be the guest of her daughter, Miss Marcia Patterson.

Announcement was made today by J. S. Harvard, manager of Yowell Co., of store-wide dollar days for Wednesday and Thursday morning. An announcement heralding the event appears elsewhere in The Herald today, while tomorrow the concern will use full page space for the listing of values obtainable during the sale.

Mr. Harvard explained that their "Trade Expansion Sale" left many old and broken bits, remnants and so forth, and Dollar Days are being staged to close them out.

Today and tomorrow the merchandise will be grouped, priced and arranged in anticipation of the shoppers who wish to attend the event.

## Yowell Store Plans Dollar Day Bargains

Announcement was made today by J. S. Harvard, manager of Yowell Co., of store-wide dollar days for Wednesday and Thursday morning. ## Personals

S. S. Baumel has returned from a business trip to Gainesville.

Dr. A. W. Knox is spending two weeks in Jacksonville on business.

Mr. and Mrs. H. F. Giovanni and family are visiting relatives in Georgia.

Dr. and Mrs. W. T. Langley and daughter, Margaret, were visitors in Daytona Beach on Sunday.

Mrs. W. B. Zachry, Mrs. Frank L. Miller and Mrs. Harold Vele motored to Orlando Monday afternoon.

Mrs. P. D. Inabinet and son, Tony, returned Sunday from Orangeburg where they spent the past six weeks.

Mrs. Viola Underhill is the house guest of her sister, Mrs. A. M. Flowers, at her home, 915 West First Street.

Dr. R. E. Stevens returned Monday from Jacksonville where he spent Sunday and Monday attending to business interests.

Seth Woodruff of Orlando spent Sunday here as the guest of his brother and sister-in-law, Mr. and Mrs. Frank L. Woodruff, 520 Oak Avenue.

Andrew Caraway and Bob Higleyman left Sunday afternoon by motor for Dallas, Texas where they have accepted a position for the summer months.

Mr. and Mrs. H. R. Stevens, Mrs. L. C. Glisson, Mrs. R. E. Stevens and daughter, Dorothy, and Miss Rebecca Stevens motored to Daytona Beach Sunday afternoon.

Mrs. Carrie Ellis and daughter, Miss Elizabeth Adams, and son, Paul Adams, left Sunday by motor for points in Virginia where they expect to spend the summer.

Mrs. W. M. Thigpen and son, Billy, left Sunday for Washington, D. C. and New York City where they expect to spend a short time before going to points in North Carolina for two months.

Miss Annie Dumas, Miss Johnie Hinson of Greenville and Eustis Peaks and "Skeeter" Sermon formed a party spending Sunday afternoon at Daytona Beach.

Miss Olive Smith and Miss Dorothy Smith, daughters of Mr. and Mrs. G. Bassett Smith, left Sunday morning by motor for Lenoir, N. C. where they will visit friends for some time.

Among those from Sanford spending Sunday at Daytona Beach were: Mr. and Mrs. Calvin Tague, Mr. and Mrs. R. J. Holly Jr. and son, Bobbie, Mr. and Mrs. A. W. Lee and daughter, Caroline, and Misses Marye Murphy of Victoria, Texas, Olive Newman, Frances Dutton, Lenabelle Hagan, Rose LaVerne Hurt, Grace Williams, and Gordon Cherg, W. A. Adams, Harry Woodruff, Robert Dodson, Algernon Speer, Harton Mabry, James Wright, Arthur Zachary, Fred Williams, William Bush, O. K. Goff, and Ralph Woodruff.

## DENIER REPORT

LONDON, June 17.—(INS)—Home Secretary Clynes today officially denied reports from Constantinople that Leon Trotsky, exile former Russian bolshevik leader, has received permission to enter England.

# STEER A STRAIGHT COURSE!

Credit is an actual necessity.... to most individuals.... to most families.... to most businesses!

Hundreds of families right here in Sanford enjoy the comforts of finely furnished homes through the power of credit. If furniture were sold for CASH only—just a few could afford to buy.

Think of the thousands who would die if the doctor demanded his fees in cash! How could the farmer produce his crops without the credit extended him by the hardware merchant?

Tires, gasoline and other motoring necessities are obtainable by millions through the medium of credit. Food, pure water and numerous articles from the drug store are other commodities that credit allows you to use and enjoy when you haven't the money to pay.

Credit is an actual necessity—see that you steer a straight course in utilizing its many advantages—to abuse credit is to abuse and ruin your own character—to suffer when you might have had.... if your credit was good!

*Going away this Summer?*

Before leaving on your vacation this summer, come in to the Business Office and let us explain the advantages of having your telephone placed on a "summer suspension" basis.

Under this plan you are continued as a subscriber, and retain your listing in the telephone directory. The telephone is merely disconnected instead of being removed from your home. When your number is called, the operator reports that your telephone is "temporarily suspended," thus indicating to your friends that you are out of town.

This summer suspension service is available to you at one-half the regular monthly rate.

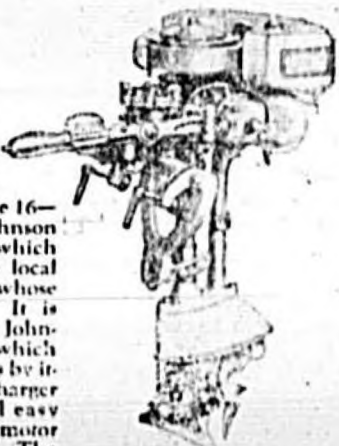

Your telephone service will be resumed promptly when you notify us. A letter or postal will do.

**The Sea Horse 16**

This is the Sea Horse 16—one of the new Johnson Outboard Motors which can be seen at the local Johnson dealer's, whose address is below. It is equipped with new Johnson refinements which have put it in a class by itself. The Release Charger permitting actual easy starting even when motor is flooded or cold. The Underwater Exhaust which has answered the longing of outboard motorists for a motor that would eliminate the noise and fumes of exhaust. The new Rotary Valve permits full gas charges to enter the cylinders at high engine speeds—thus giving the motor greater speed and power. This model Sea Horse is a two-cylinder, Class B motor.

**The Sea Horse 32**

The Sea Horse 32—the King of Outboards. Here is a power plant complete by itself—four cylinder, Class D Johnson Outboard Motor! Nothing in the outboard world can approach it! In addition it has all of the other Sea Horse refinements, including the Release Charger, Underwater Exhaust, Rotary Valve, Detachable Cylinder Heads, Improved Magnets, Circular Disc Crank Arms and Straight Connecting Rods and Offset Cylinders.

**Wow—what a contest!**

It is under way—our great Boys' Contest—which someone's going to win! Boys are flocking in by the dozens to enter their names and start after that prize—a Johnson Sea Horse—the newest and finest outboard motor ever built! It's being donated as first prize in our contest by the local Johnson Motor dealer whose name you see below. Get in the swim now—before it's too late!

Just think of the fun, guys, you can have with such a motor as this! Speeding up and down the river—fishing, swimming, racing, aquaplaning—going anywhere, anytime—like a ball of fire!

**What Is a Sea Horse?**

What is a Sea Horse? It's Johnson's newest and finest outboard motor—and it has speed and power galore! Listen to this—about the new Johnson Release Charger on these babies. It makes starting a Sea Horse as easy as pushing down the starting button on an automobile! Just a twist and she's off! The release charger does the trick—by releasing the compression in one cylinder and supercharging and doubling the spark intensity in the other. So with a greater spark and a supercharge of gas—she's bound to go! Start a Sea Horse cold—start it flooded—start it *always!*

**Just a Sweet Whirl!**

No more roar of explosions or clouds of exhaust gases with the Sea Horses! The

Johnson Underwater Exhaust has fixed all that—by taking the sharp explosions of the exhaust as well as the exhaust gases themselves out through the muffler, under water! All you hear now is the sweet whirl of a smooth running motor!

And speed and power no end! The Johnson Rotary Valve which gives the cylinders a full charge of gas at the highest of engine speeds permits much greater speed and power!

**Here's How to Win One!**

Here's how to win a Sea Horse! The contest is under way! All you have to do is enter and then win more points than anyone else. Points are given for everything. Some of them right away—for entering! Look the Sea Horse over in the window of the Johnson dealer at his address below. Ask all about it and then come around to our place and we will tell you how to enter—and win that Sea Horse! Start today!! Get hot!

Sold In Sanford By

East First Street

**RULES**

**Read 'em Over! Here Are The Rules For Our Great Contest!**

1. The contest will start at midnight Friday June 14 and continue until ten o'clock Saturday night July 13.
2. First prize is a Johnson Sea Horse Outboard Motor, on display in the windows of Hill Hardware Co. Second prize shall be \$5.00 in cash, third prize \$3.00 in cash.
3. The contest is open to any boy or girl in Sanford or Seminole County. You do not have to be a subscriber of The Herald to enter.
4. The prizes winners shall be determined by points. Points will be given for subscriptions to The Sanford Herald, 50 points will be given each entrant as a starter. If entrant turns in new or renewal subscription at time of entering contest, an additional 50 points will be given. Special extra point offers will be made from time to time during the contest.
5. No new or renewal subscription for less than three months or longer than five years accepted.
6. A cash commission of ten per cent on all money turned in by contestants who fail to win a major prize will be paid by The Herald.
7. Now is the time to enter. Don't wait until the last minute, come to The Circulation Department of The Herald and enter your name in the contest. Then enlist the support of your friends and relatives and determine to win the wonderful first prize.
8. Judges of the contest will be announced a week before the contest is to close.

Atlanta Police Kill Man Believed Drunk

ATLANTA, June 17.—(INS)—Dr. Thomas A. Spence, a prominent physician and surgeon, was shot down and killed early today by officers who claimed he was intoxicated, according to police and witnesses. O. M. Morgan, a pathologist, was seriously wounded in the gun battle. The other officer, S. D. Vaughn, was unhurt. The officers said they did not know at which gun caused the death of the physician. J. W. Trout, an employee of the barbeque stand where the gun battle occurred and other witnesses said the physician, dressed in a suit and tie, was carrying two pistols and began firing. The officers returned the fire, they said in their report to headquarters.

POLICE SEEK WOMAN

MEMPHIS, Tenn., June 17.—(INS) Police today were making a search for Mrs. Virginia Hay, wife of a Crockett county man, that was reported missing from her home in Crockett Mills early in the week. James Hay, husband of the woman, who feared she had met with foul play, appealed to police to help in the search.

The apple tree and the rose are in the same botanical family. Sage lives longer but once.

Fair Co-eds Defend University on Rifle Range

A quartet of pretty co-eds who defend the laurels of George Washington University, at Washington, on the rifle range against all feminine marksmen. Left to right: Verna Parsons, Helen Humphreys, Helen Taylor, Captain, and Gene Cavilliers, manager.

SCIENCE SCORES AGAIN IN QUEST OF THE UNKNOWN

Chemist Of Bureau Of Standards Reveals Result Of Probing. By Robert S. Thornburgh (Copyright, 1935, International News Service). WASHINGTON, June 17.—Once more science has triumphed in the never-ending conquest of nature's secrets.

Dr. G. C. Keiss, of the U. S. Bureau of Standards, whose researches led to the discovery of chlorine, the only chemical element ever identified in the United States, has announced that within a short time the spectrum of chlorine would be given to the world for the first time. After seven years' laboratory study Dr. Keiss has succeeded in photographing the lines of the spectrum of chlorine gas, a chemical element whose radiations are of the deep red or invisible red rays length.

From 200 to 3000 wave lengths ranging from 4000 to 10,000 angstrom units (one ten-millionth of a millimeter) were photographed in the chlorine spectrum. A single atom of chlorine contains 17 electrons. The photographic plates registered the light waves, or energy, given off by these electrons when excited to activity. Later in the year Dr. Keiss will be ready to announce the results of the spectrum study of bromine, and next year that of iodine. These three elements have been left on the shelf by scientists all over the world, owing to the fact that all emit the deep red or invisible red radiations, highly difficult to photograph.

About eight years ago Dr. Keiss, in photographing the spectrum of another element, observed strange lines in his plates, the nature of which suggested that they might have been radiations from chlorine. He immediately began the development of a spectroscopic tube which would withstand the chemical effect of chlorine over a sufficiently long period to make photographing the spectrum possible. A 20-hour exposure eventually was used to produce a full-time plate.

The difficulty of the task may be appreciated by the fact that it would require approximately 500,000 atoms of chlorine to cover the leaf of a pin. In the photographing process chlorine was placed in the spectroscope tube and the activity of its atoms excited by a discharge of electricity. This resulted in the formation of the chlorine gas and the presence of many kind of molecules of atoms of this element during the act.

Heretofore the spectra of identified elements, including sodium and potassium, have been actually unknown. In other words, science was without knowledge of the physical composition of these elements, their energy stages or activity.

The discovery of Dr. Keiss will be of great value in spectral chemical analysis, in determining the composition of the composition of the sun and stars, and in a practical way of widespread application in biological and medical science. It was discovered that chlorine atoms contain a central nucleus in which were concentrated 17 positive charges. In addition, electrons of the nucleus were found to be in motion within the spectroscopic tube there were hundreds of millions of the chlorine atoms. The activity of the electrons could be traced over all possible conditions, and in all combinations in which they release energy.

Dr. Keiss' indirect discovery of chlorine was another scientific landmark. He had been photographing the spectrum of elements of elements No. 60 and 62, when he discovered radiations apparently from both of the same wave length. Since two distinct elements could not emit similar radiations the missing element No. 61, a rare earth metal, was identified.

Plane Stowaway, Minus Own Clothes Feted By Parisians

PARIS, June 17. (INS)—Wearing borrowed clothes, but in high spirits and still convinced that he was on the path to Lindberghian fame, Arthur Schreiber, 22-year old Portland, Maine, youth who stowed away in the trans-Atlantic monoplane "Yellow Bird," greeted American and European newsmen in the Hotel Lotti here today. The daring youth, who is being feted by the French nation although he is held responsible for the failure of the "Yellow Bird" to reach Paris on its flight from Old Orchard, Maine, was dressed in clothes loaned him by Armeno Lotti, Jr., sponsor of the flight and radio operator during the trans-Atlantic flight. The garments proved a good fit however, and Schreiber was beaming with self-satisfaction as the army of journalists flocked into the hotel to meet him. Schreiber is staying at the hotel owned and operated by Armeno Lotti, Sr., father of the flight's financial backer.

"Paris is a swell town and France is a grand nation," were Schreiber's first words. "But I'll be glad to get back to the good old U. S. A. and rejoin my family in Portland. Schreiber tried his hand at speaking to some of the French newspapermen at present in their native language. He had some success and explained that he had while awaiting amateur theatricals picked up a smattering of French in his home town.

HOOVER REQUESTS SUM WASHINGTON, June 17. (INS)—President Hoover sent a special message to Congress today, requesting immediate appropriation of \$150,000,000 with which to start off the \$500,000,000 farm relief program, Anticipating his action, the House already was considering the matter when the message reached the Capitol.

FIND CITY AIR IS MENACE TO HUMAN HEALTH

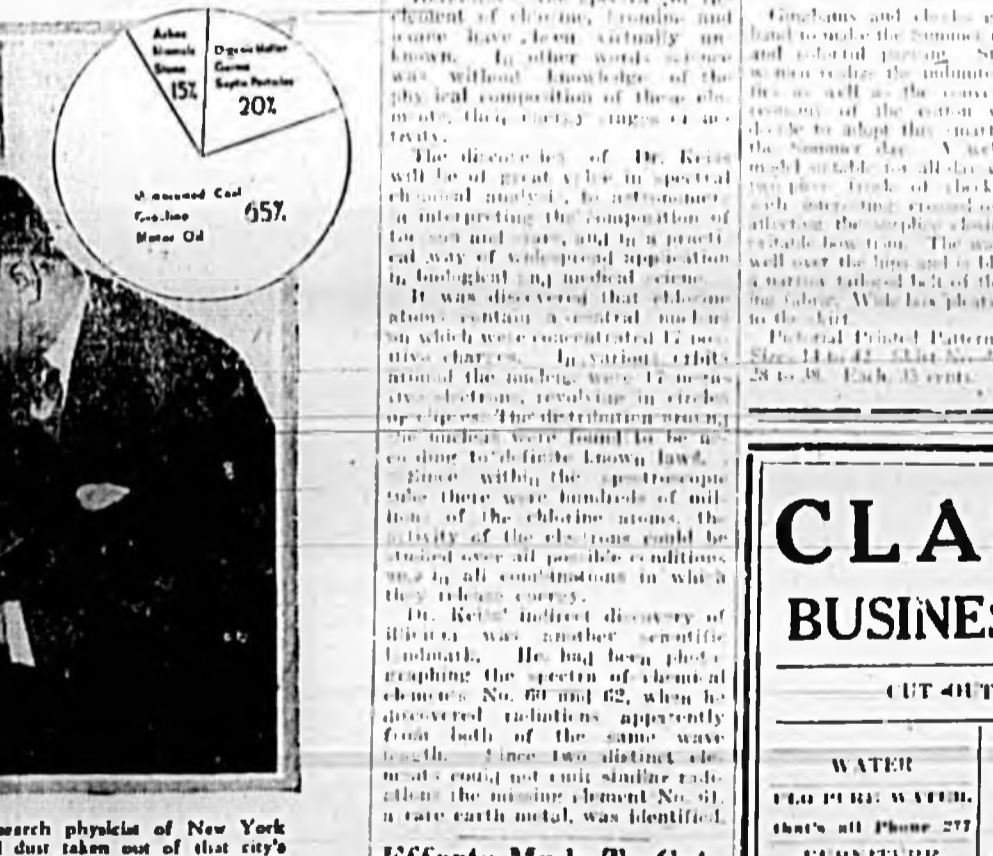

Research Shows 2,300 Tons of Dust and Germs Hover Over Gotham URBAN SKY IS COAL-CELLAR FRESH air is no longer fresh. Dwellers in modern American cities are breathing atmospheres charged with carbon particles, ash, minerals, germs, septic matter and noxious gases that nature never intended human lungs to encounter. So says Professor H. H. Sheldon, noted research physicist at New York University, who has just subjected the air of New York and its contents to laboratory analysis for the Smoke Nuisance Abatement Committee. He calculated that more than 2,300 tons of germ-laden dust and dirt particles is at all times floating over New York.

With the cooperation of physicists of the Carrier Engineering Corporation, Professor Sheldon sampled eleven and a half cubic feet of this foreign matter drawn out of 341,000,000 cubic feet of typical New York air, taken in high over Broadway through the air conditioning plant of one of the great motion picture "cathedrals." With that sample as a basis, the scientist calculated that in the trillion cubic feet of air comprising the lower 200 feet of Manhattan atmosphere there must be 2,300 tons of germ-laden dust and dirt.

Laboratory analysis revealed that 65 per cent of the foreign matter is carbon—unconsumed smoke from coal, gasoline, motor oil, fuel oil and industrial gas. It represents, Professor Sheldon says, sufficient unconsumed fuel to run New York's power and light plants for six hours out of the twenty-four, and makes the sky a veritable coal cellar. It would generate 4,500,000 horsepower. Twenty per cent of the foreign matter in the air comprises germs and organic matter, breeding infections and disease. Appreciable quantities of carbon monoxide, a deadly gas most commonly encountered in the automobile exhaust, as well as sulfur dioxide and trioxide, which

in combination with water form sulphurous and sulphuric acids strong enough to eat through linen, were found mixed with the solid matter. "The laboratory analysis showed also that the twenty per cent germ content is composed of nearly one million pounds of bacteria and organic matter, ranging from the common germs of septic poisoning present on every human and animal skin, to the predatory spirochetes, although the latter are usually dead. "Health and other civic officials are taking strenuous steps to prevent and remedy air pollution just as some 25 years ago they combated pollution of water, but atmospheric conditions in cities have grown steadily worse," says Professor Sheldon, and it seems likely that in the interest of health we will ultimately have to employ means for purifying the air

WHAT'S THE DIRT ON NEW YORK?

Professor H. H. Sheldon, research physicist of New York University, analyzing dirt and dust taken out of that city's atmosphere, and above, a graphic diagram of what he found.

which enters our homes, offices and public gathering places. "So far the theories have progressed furthest in protecting the public in this respect. Air conditioning facilities are also used in factory areas and hospitals, notably in the shoe, rayon, candy and a few other industries, and while in these cases the conditioned air was required in the manufacturing process the employees get the benefit of more healthful conditions. However, office buildings and factories generally have overlooked the importance of clean air, properly conditioned. But the public, as well as health and medical authorities, are beginning to realize its importance, and the immediate future will see big advances made in this direction, with artificial weather in the home as well as the workplace."

House Of Mayor Of London Condemned By City's Council

LONDON, June 17.—(INS)—The Mansion House, the home of London's lord mayor, and the city hall of London, has been condemned by the court of common council of London. The council wishes to have either rebuilt entirely, or removed to another site within the boundary of the city of London. The latter course is recommended but the difficulty lies in the securing of a suitable site. Built nearly 200 years ago, the Mansion House has long been regarded as inconvenient and out of date, and during the past two years, the general purposes committee of the city of London have had under consideration a scheme for its complete internal reconstruction and redecoration. Their inquiry has shown that no reconstruction could make the building adequately fit the needs of the lord mayor—who has to make it his home during his year of office—and at the same time meet the public demands made upon it. Examination has shown that the foundations are satisfactory, despite the presence of undergrounding in the vicinity, but the extent of the site does not provide for sufficient enlargement. What would have been the ideal locality has just been grabbed by a big bank, but the city fathers hope to secure another worthy of the city of London. Michigan has by far the greatest coal line of any state. It takes 60,000 tobacco seeds to make a tablespoonful. South Africa produces 90 per cent of the world's diamonds.
