FRANK CLARK NOT CANDIDATE FOR GOVERNOR

Write to Osceola Friend Will Run For Congress.

(By The Associated Press) OCALA, Sept. 28.—Congressman Frank Clark, in a letter to Robert R. Rogers of this city, his personal friend, made known his intention to withdraw from the gubernatorial race and seek re-election to congress from the second district. R. A. Green of Starke is the only announced opponent in that race.

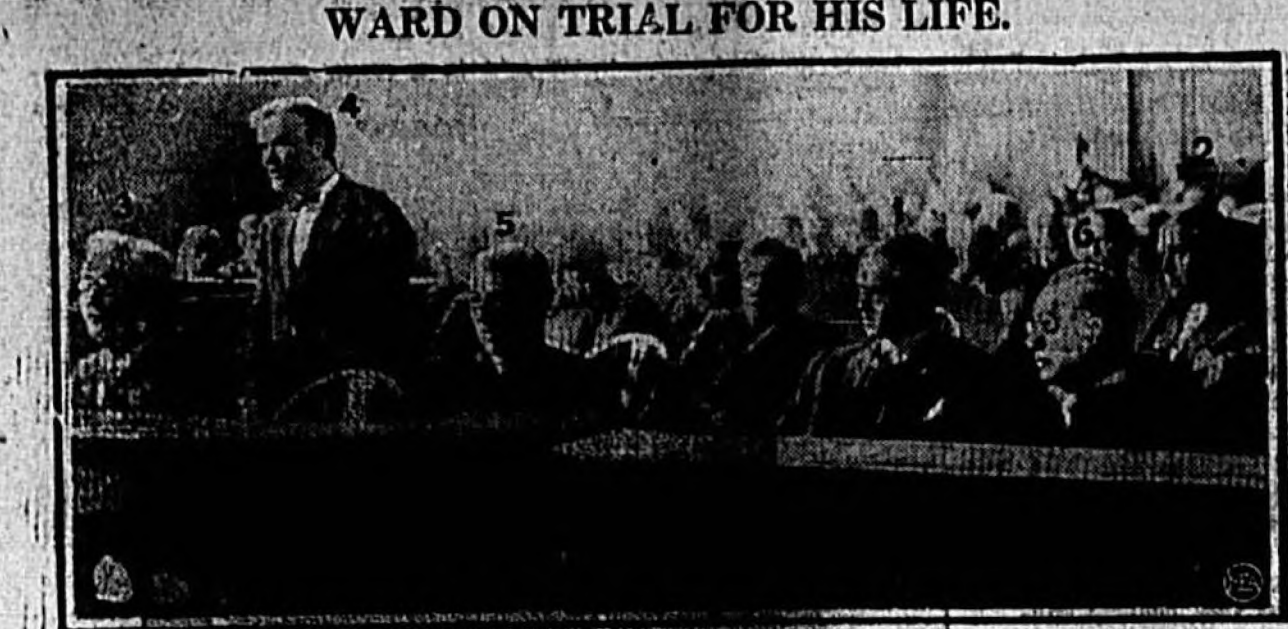

RAILROADS DROP FIGHT FOR THREE HOOP CITRUS BOX

JACKSONVILLE, Sept. 28.—The southeastern railroads today agreed to withdraw their request to the southeastern traffic association that that organization investigate whether it was advisable to change the present tariff so that boxes containing citrus fruits would have to be strapped with three hoops or the rates would be increased 20 percent, it was announced last night by C. E. Stewart manager of the Florida Citrus Exchange.

About 150 citrus growers from all parts of Florida and fifty representatives of southeastern railroads spent yesterday in arguments over the request, the meeting having been called by the Southeastern Traffic Association.

Better co-operation between railroads and shippers will result from the meeting, according to the belief expressed by Mr. Stewart.

Churchwell & Company are making special prices on shoes today and this is the time to buy them. All ladies and men's shoes at greatly reduced prices and you can make money by saving it at Churchwell's. Special prices in every department of this big store Saturday.

After many months of legal conflict, Ralph Ward, son of the millionaire baker, goes on trial at White Plains, N. Y., for first degree murder for the shooting of Clarence Peters, ex-sailor, Ralph Ward (2), his brother, was his only relative in court. Others are Isaac N. Mills (3), Ward attorney; Thos. J. O'Neill (4), special prosecutor; Allan R. Campbell (5) and E. M. Babenold (6); Ward attorneys.

REV. DR. WEIGLE THE BIG TENT MEETING.

ONLY DULL COURT MATTERS FOR OKLAHOMA BIG FIGHT CASE TO SUPREME COURT

Legislators and Governor Walton Have Shot Their Bolt.

NO EXCITEMENT About Big War On Ku Klux and Impeachment Proceedings.

(By The Associated Press) ENID, Sept. 28.—Local unit Oklahoma National Guards came home this morning from Oklahoma City where they have been on duty since the entire state was placed under martial law by Governor Walton. Organization demobilized and officers and men have gone to their homes.

OKLAHOMA CITY, Sept. 28.—The pyrotechnics that have kept Oklahoma aflame since Governor J. C. Walton opened his war on the Ku Klux Klan and the state legislators in turn instituted a drive to impeach the executive, began to fade out tonight with a long dull court battle in prospect.

The first move to test in the courts the legality of the special session of the lower house of the legislature, called by members who held it is their right to investigate the official acts of Governor Walton, was taken in state district court here late today. Sixty-seven house members applied for a temporary injunction restraining Adjutant General B. H. Markham and all members of the Oklahoma National Guard from interfering with meetings of the house.

No order was issued by the court during the brief proceeding and by agreement hearing on the petition was set for next Tuesday before Judge J. I. Phelps.

Meanwhile, the house members who gathered here yesterday and attempted to convene, only to be dispersed by military authorities acting under instructions from the governor, began to leave for their homes.

A pledge was signed by the legislators that should the courts finally decide they have authority to meet as an impeachment body, they will convene upon call of Representative W. D. McBees of Stephens county, one of the leaders of the "rebel" legislators.

No further attempt will be made to convene, it was agreed, until the issue is decided in the state supreme court, and then there remains the possibility that the case will go to the United States supreme court. A temporary injunction, if granted by the district court, will be made the basis for another attempt to assemble, the legislators decided.

Expressing satisfaction with the situation, Governor Walton declared

CREEKS SWELL INTO RIVERS IN WYOMING

Sheridan Is Flooded By Goose Creek Today

(By The Associated Press) SHERIDAN, Wyo., Sept. 28.—Swollen by terrific rains the waters of Big Goose and Little Goose creeks left their banks today and dashed over wide sections of Sheridan. Scores of residents in the river bottom sections prepared to move to places of safety. Water one to three feet deep in various sections of town.

STATE COMPTROLLER SENDS OUT LIST OF STOLEN AUTOMOBILES

TALLAHASSEE, Fla., Sept. 28.—The state comptroller is sending out his first list of stolen automobiles and motor vehicles published under provisions of the Florida Motor Vehicle "Anti-Theft Law." It covers twenty-one vehicles, twenty of which are automobiles, both trucks and passenger cars, and one motorcycle.

AVOCADO TRADE MIAMI TO CALIFORNIA IS ESTABLISHED

MIAMI, Sept. 28.—The first carload of avocados ever to be shipped from Miami to California will go forward today. The shipment is being made by Hamilton Michelson and Company. The avocados are of the Trapp banded variety and were grown in Dade county.

BURLINGTON TRAIN INTO RAGING TORRENT OF CREEK FORTY PASSENGERS DEAD

Ordinary Dry Creek Was Swollen Into Raging Torrent ALL DROWNED Engine Was Across-But Slipped Back Into The Water

(By The Associated Press) CASPER, Wyo., Sept. 28.—Burlington passenger train number 30 bound for Denver which plunged into Cole Creek early last night went into a raging torrent, causing loss of life estimated early this morning at approximately forty persons. The roar of water over the cars in the stream could be heard for three miles. What ordinarily is a dry creek during the summer was suddenly swollen into a torrent by heavy rains yesterday about 9 o'clock the Denver train swept around a curve and plunged into the stream. Apparently the engine got clear across the culvert before it gave away under the weight of the train then slipped back into the water killing the engineer and fireman.

Forty lives lost was the lowest estimate. Other estimates mounted as high as one hundred. Telegraph operator at Casper, who took part in the rescue work said he believed 100 to be dead. Track walker had inspected the culvert one hour before the train was due and reported it all right, but water was rising. About wreck police PPKVAVTI SHRDUSHR stone's throw from the scene of the wreck the creek empties into Platte river, which is a mile wide nearby. One of the lightest ticket sales in years was reported here by Burlington railroad officials and it is believed final check will not show more than 70 missing. The rising waters of the stream handicapped rescue work and no bodies recovered up to daylight. All rescue work had to be temporarily halted at 2 o'clock this morning when it began snowing.

REVOLUTION IS PUT DOWN IN BULGARIA

(By The Associated Press) SOFIA, Sept. 28.—The city of Ferdinandovo is occupied today by government forces. The communist revolutionary element thus lost their last center resistance. Occupation was made possible by the capture of Berkowitza Wednesday. This successfully opening the way to Ferdinandovo.

PARIS, Sept. 28.—A Havas dispatch from Vienna says it is rumored there the republic has been declared in Turkey. No confirmation of the rumor from any direct source.

SOBIA, Sept. 28.—Fifty Soviet Republics established by communists in various towns have been put down in the past few days by government troops, according to official reports.

CHASE SCORES FLORIDA EAST COAST TACTICS

Says Road Holds Pistol at Citrus Industry's Head.

JACKSONVILLE, Fla., Sept. 28.—Charges that the Florida East Coast railway is standing "with a pistol to the head of the citrus industry of Florida," when it demands either three strap citrus boxes or an alternative of a 20 per cent penalty for violation of the present regulations, based on inspection at the destination, were made Wednesday morning by Joshua C. Chase, president of the Chase and Company, fruit shippers of Jacksonville, in the hearing of the Florida citrus men before the Southern Freight Association of Atlanta, representing all the railroads south of the Ohio river and west of the Potomac.

Though the Atlantic Coast Line railroad and the Seaboard Air Line concurred in the proposal which emanated from the F. E. C., rapid fire and bitter questions alone forced from E. W. Kirkland of that road, the admission that the Florida East Coast system was father of the idea.

During the entire morning session little was accomplished but much wrangling was in evidence, though railroad officials were evidently willing to forego the demand for the three strap box when the shippers made plain their attitude that it would be penalizing the innocent for the tariff and packing infractions of the guilty.

The rock on which the conference is built is on whether the penalty assessment should be based on inspection at point of origin or destination, the shippers making it plain that they considered a big percentage of the breakage as resulting from either "rotten equipment," "rough handling" or the bad loading and unloading of the railroads themselves when cars had to be transferred.

The shippers maintained the Orlando shippers two years ago contains the agreement that the railroads would enforce the packing regulation by inspection at point of origin and refusal to accept packages which violated the regulation.

COUNTY DEMONSTRATION AGENTS CLOSE MEETING HELD IN GAINESVILLE

GAINESVILLE, Fla., Sept. 28.—County demonstration agents closed a week's conference here Saturday, at which they studied and discussed every phase of farm work in Florida, and sought solutions for problems that face the farmers.

C. I. Chambers, of the United States department of agriculture, told the agents that a definite program at the beginning, constant encouragement on the part of the agents themselves and assistance of influential club members would result in the greatest success in club organization work.

SLIGHT BLAZE IN JUSTICE BUILDING IN CAPITAL CITY

WASHINGTON, Sept. 28.—The fire department was called out last night to fight a blaze on the fifth floor of the department of justice building.

The blaze was of minor importance and was quickly extinguished.

AT HOME.
O, when I am safe in my sylvan home,
I mock at the pride of Greece and Rome;
And when I am stretched beneath the pines
When the evening star so holy shines,
I laugh at the lore and pride of man,
At the Sophists' schools, and the learned clan;
For what are they all in their high conceit,
When man in the bush with God may meet.
—Emerson.

J. F. Ward of Jacksonville was among the visitors here yesterday transacting business.

Robert Jenkins spent the week-end in Tampa, where he was the guest of friends.

Miss Esther Miller and Mrs. B. W. Herndon, returned last evening from Jacksonville after a short visit.

Edgeton Patterson, of Tallahassee, arrived here recently and has accepted a position here with the Seminole County Bank.

Mrs. Raymond Key and baby, who are spending the summer at Daytona Beach, were in the city yesterday for the day.

Mrs. E. A. Herndon, and Miss Esther Miller are guests of the Seminole hotel, while spending a few days in Jacksonville.—Times-Union.

Mr. and Mrs. B. J. Mays of Tampa, arrived in the City Substantial yesterday and are at the Montezuma for a brief stay.

Mrs. Margaret Barnes and Miss Margaret Hart have returned from a visit with friends in Jacksonville.—Orlando Sentinel.

Miss Virginia Smith has returned home after spending the summer at various points in the east, and has resumed her work with the Red Cross.

Mrs. S. P. Buttolph, of Columbus, Ga., is the charming guest of her son and his wife, Mr. and Mrs. Lyman Buttolph at their home on Magnolia avenue.

N. H. Garner has returned home after a pleasant visit in Atlanta, where he was the guest of friends. He also visited his brother in North Carolina.

Among the business visitors in the city yesterday, was William Weber, of Tampa, who made his headquarters at the Montezuma while here attending business.

L. C. Ray, a prominent business man of Dunedin, is in the city for a few days attending to business. While here he is registered at the Montezuma.

Alfred Robson, of Orlando, was in the city yesterday to see his wife, who has been ill at the home of his parents, Dr. and Mrs. J. N. Robson, on Park avenue.

Mr. and Mrs. Mahlon Wright announce the birth of a son, Tuesday, September twenty-fifth, at their home on Celery avenue. The little lad has been named John Cullen.

Miss Katherine Byrd, of Indianapolis, Ind., who has been the attractive guest of Mrs. Benjamin Whitner, Jr., for the past week leaves tomorrow for Tampa, where she will visit friends.

Mrs. W. E. Watson returned home last evening after a most delightful visit with her parents, Dr. and Mrs. Keeler, at East Orange, N. J. They also enjoyed an extensive tour through Pennsylvania, and New York.

Dr. W. D. Gardner, who has been spending part of each week in Orlando during the summer, wishes to announce that he will discontinue these hours and will be at his office in the Welaka every day from now on.

Dr. C. F. Breeden and James Waldwin, of Anderson, S. C., who are touring the East Coast and West Coast and will also visit Cuba, are the guests of the former's sister, Mrs. J. N. Robson, at her home on Park avenue.

Bertram Shepard left today for Spartanburg, S. C., where he will spend a few days as the guest of Dr. and Mrs. E. W. Shepard, going from there to Atlanta, where he will resume his studies at the Atlanta Dental College.

Mr. and Mrs. A. F. McAllister have returned from Winter Haven, where they were called by the illness and death of the former's brother, W. H. McAllister. Mr. McAllister will be remembered by many people in Sanford, when he lived here a number of years, holding the position of paymaster for the Southern Florida Railroad, going from here to Cincinnati, Ohio, where he was treasurer of the Ohio Traction Co. Three years ago he moved to Winter Haven to regain his health. Mr. and Mrs. McAllister were accompanied home by Miss Elizabeth Long of Jacksonville.

DONALDSON-WHIDDEN.
A very interesting and surprising wedding was quietly solemnized in the presence of a few friends at the First Baptist parsonage Wednesday evening, when Miss Mary Whidden and Mr. Clarence Donaldson were happily united in Holy bonds of wedlock. Miss Whidden is a charming and beloved young lady coming here from Gardner, Florida. Mr. Donaldson, formerly of Opps, Alabama, is an efficient employee of the Atlantic Coast Line railroad, having located here a year ago. The young people left immediately after the ceremony for their future home at Lake Mary. Their many friends join in wishing them a very happy and long wedded life.

MISCELLANEOUS SHOWER.
One of the most delightful pre-nuptial affairs with which Miss Clara Millen is being honored, was that of yesterday afternoon, when Mrs. Henry Nickel entertained at a miscellaneous shower, at her on Hughey street, from four to six o'clock.

The large living and dining rooms and library, were converted into a veritable bower, with quantities of Spanish Love vines, baskets and vases of double pink hibiscus and roses, together with potted plants.

The guests were greeted upon their arrival by Mrs. Nickel and ushered into the dining room, where delicious fruit punch was dispensed throughout the afternoon by Mrs. Dwight Babbitt, Mrs. Porter Pitts and Mrs. Hoffmann.

Much merriment was caused by the dressing of clothes pins as brides and grooms. The prize for the best dressed bride, was won by Mrs. Forrest Gatchel, who was given a rose pottery flower bowl. Mrs. Glenn had the best dressed groom and was given a lovely wall vase. After this contest, a word contest was indulged in, the object being to make as many words as possible out of the words, "Millen-Borland." The prize for this, a bouquet of pink roses, went to Miss Essie Whittle.

Following these contests, the honoree was asked to remove her laundry from the clothes line as a shower was due. She was then ushered into the library, where she found the room filled with clothes lines filled with mysterious packages fastened to the lines with bride and groom clothes pins. Then opening the packages, Miss Millen found that they contained many beautiful gifts of silver, linen, cut glass and other articles for her future home.

Late in the afternoon, the hostess assisted by Mesdames Pitts and Hoffmann served pink and white brick cream, angel food and salted nuts and candies. In the cake, were dainty rosebuds to be used as favors.

Miss Millen was a picture of loveliness wearing a most becoming frock of cocoa brown of crepe satin, with trimmings of pleated panels edged with self colored lace. Her hat was a picture model of black velvet and silver lace.

This affair was one of exceptional enjoyments to the many guests and is one of a series with which this popular bride-elect is being honored.

About sixty guests attended this charming event.

Millionaire is driving a taxi in Chicago. Takes more than one million to satisfy some people.

ARRIVALS AT THE HOTEL VALDEZ.

A. E. Waller, N. Y. City; W. O. Smith, Moultrie, Ga.; R. L. Housley, Atlanta, Ga.; F. Martin, Jacksonville; C. Marcus, Tampa; H. Cruze, N. Y. City; Mrs. H. H. Baughan, Lakeland; W. Sullivan, Perry, Fla.; J. A. Hollingsworth, Perry, Fla.; H. C. Van Horse, Philadelphia, Pa.; H. W. Roberts, Atlanta, Ga.; Chas. Klotz, Jacksonville; E. E. Huguley, Atlanta, Ga.; W. A. Downey, Washington, D. C.; Edw. P. Pfaff, Jacksonville; Wm. A. Gatlin, Jacksonville; N. E. Sprowl, Savannah, Ga.

BOYS' ATTENTION

Any boy wishing to make a little spending money, might well get in touch with the County Agent. Some five thousand Boll Weevils are needed by the State Plant Board, for experimental purposes, and twenty-five cents per hundred will be paid for collecting them. Any one wishing to take advantage of this offer should immediately get in touch with the County Agent, as the collecting must be done on Saturday, Sept. 29th.

LOCALS

N. E. Sprowl, of Savannah, Ga., is a business visitor to Sanford, making his headquarters at the Valdez.

O. Marcus, of Tampa, is registered at the Valdez while in the City Substantial on business.

It would doubtless be the end of a beautiful friendship if Henry Ford attempted to answer Thomas Edison's questionnaire.—Life.

W. Sullivan and J. A. Hollingsworth of Perry Fla., are stopping for a few days at the Valdez while in Sanford on business.

Mrs. H. H. Baughan is registered at the Valdez en route to her home in Lakeland after a two weeks visit with friends in Miami, Fla.

R. C. Horaley, with the C. B. Davis Barber's Supply Co., is a business visitor to Sanford, stopping at the Valdez.

Nearly fifty per cent of the registrations at the local hotels are from northern states. The tourist are moving south a month earlier than last year.

W. G. Smith of Moultrie, Ga., representing the Cheafer Tailoring Co., Cinn. O., is registered at the Valdez. Mr. Smith will be in Sanford several days displaying his line of high grade tailored suits.

J. H. McLean of Geneva was in the city today circulating with his many friends. His family has been at Coronado Beach for several months but will be home again after this week.

Edw. P. Pfaff, of Jacksonville, material supply agent to the Hutton Engineering and Contracting Co., is in Sanford for a few days. Mr. Pfaff is getting data on new supplies and material needed for the third contract the twas recently awarded this company for new city streets. He is a guest of the Valdez.

Yowell & Company have an advertisement in this issue calling attention to the big Friday and Saturday sale of ladies ready-to-wear, coats and suits and the gingham dresses and aprons—the latter going at 96 cents! Go to Yowell's Two-Day Sale tomorrow and Saturday and see how far your dollars will go.

MARKET REPORT

(By The Associated Press)
CHICAGO, Sept. 27.—Opening prices: Wheat December 105 1-2 to 3-4; ay 110 1-4 to 3-8; corn December 71 7-8 to 72; oats December 42 1-8 to 1-4.
NEW ORLEANS.—Cotton eleven o'clock call: Oct 27.88; Dec. 27.78.

Today is the last day of the Thursday half holiday for the year of 1923. It has been a source of pleasure and recreation of all the employees of the various stores but now that it is over they will all be glad to get back to a business basis again with every day in the week being a full day and the stores open all the time.

Miss Mildred Simmons has returned from ma trip to Chicago and other points where she studied piano and has again taken up her duties as teacher of piano at the Baptist Temple studio. Miss Simmons has an advertisement in the Business and Professional columns of the Herald calling your attention to the opening of the fall term of her studio.

M. B. Hutton gave a dinner party at the Valdez Hotel last night to Mr. and Mrs. R. J. Holly, Mr. and Mrs. Reg Holly and Mr. and Mrs. John McNamara. Manager Falck had one of his finest menus and the dinner was pronounced one of the finest ever. Mr. Hutton expects to leave today for Tallahassee where he has a big paving contract and he will probably be absent from Sanford for several weeks.

RUNAWAY HORSE CAUSES EXCITEMENT

A runaway horse caused considerable excitement about two o'clock today by coming down Park avenue and swinging into First street jamming several automobiles and finally the horse breaking loose from the wagon and making for the lake. The idea of a horse being on the street at all was a sight and a runaway horse was enough to cause people to sit up and take notice. A small negro boy was in the wagon when the horse started to run but was soon lost in the shuffle as the wagon was going to fast for him to ride and he left it early in the flight.

NOTICE—"Exide" first cost is low. Before putting your new battery in your car get the new price of the "Exide" and compare it with the price of an ordinary battery. Ray Bros., Phone 548. 9-22-25-27-29

FOR CONSTIPATION

Black-Draught Recommended by an Arkansas Farmer Who Has Used It, When Needed, for 25 Years.

Hatfield, Ark.—Mr. G. W. Parson, a well-known farmer on Route 1, this place, says: "I keep Black-Draught in my house all the time. It is the best all-around medicine I have ever found for the liver and for constipation. We began using it 25 or more years ago and have used it whenever needed since. I have never found any other medicine as good for constipation, and that was what I suffered with till I began using Black-Draught. Black-Draught corrected this condition, and now we use it for the liver and for indigestion—a tight and sluggish feeling after meals, for bad taste in the mouth and sour stomach."

"My wife uses it for headache and biliousness. It sets on our shell and we don't let it get out. It has been a great help to us. I believe a great deal of sickness is caused by hurried eating and constipation, and Black-Draught, if taken right, will correct this condition." Get *Theodor's*, the original and only genuine Black-Draught powdered liver medicine. Sold everywhere. NC-78

SEMINOLE COUNTY GROVE AND FARM NEWS NOTES

B. F. WHITNER, JR., COUNTY AGENT

On Saturday the County Agent can be found in his office in the basement of the Court House. At any other time he may be reached through the office of the Chamber of Commerce. Leave all calls there.

BOYS, ATTENTION

Five thousand Boll Weevils are needed by the State Plant Board, for experimental purposes, and twenty-five spending money, might well get in cents per hundred will be paid for

collecting them. Any one wishing to take advantage of this offer should immediately get in touch with the County Agent, as the collecting must be done on Saturday, Sept. 29th.

TESTS TO BE CARRIED ON AT SANFORD, THIS WINTER

The State Plant Board, realizing that Seminole county raises considerable cotton, will conduct boll weevil hibernation tests here during the coming winter. There will be five cages made of wire screening, placed in the heavy woods on Mr. Rossiter's place, on Celery avenue. In each of these cages will be placed 1,000 live and apparently healthy boll weevils. Twice a month a representative of the plant board will come to Sanford to examine these cages and to determine the percentage of weevils that will survive the winter here, and also the dates when they go into hibernation, and when they come out again in the spring. The cages have arrived and will be set up October 1 and will be watched closely thereafter. Sanford is further south than at any point at which similar investigations have been carried on, and those engaged in the study of this pest are awaiting with interest the results of the experiment here.

DAIRY NOTES.

Mr. Ed Biggers has made arrangements through the county agent to secure a pure bred Jersey bull calf from the herd of the Florida Experiment Station at Gainesville. This is a move in the right direction and Mr. Biggers should be commended and congratulated. The authorities at Gainesville are doing all they can to better the dairy industry of the state, and as they are able they like to place good animals with good dairymen at very nominal cost.

CHEMICALS WILL CONTROL NEMATODES IN SEEDBED

Treat Seedbeds to Kill this Destructive Pest.

The most destructive seedbed pests in the South are the little nematode worms that cause root-rot. They attack nearly all truck crops, and it is particularly important that they be kept out of the seedbed for three reasons.

First, the young plants are not able to stand their attacks as well as older ones. After the plants have developed larger root systems they can withstand attacks by the worms and produce a fairly good crop. Second, the worms are not nearly so active during the cooler months of the year, and if young plants can be carried through the fall on nematode-free soil, they may make a satisfactory growth when set in infested fields. Third, if seedbeds are infested the worms will be carried to the field, which will become completely infested.

It is usually the best plan to make the seedbed on newly cleared land. But some truckers do not have new land, and when this is true, the worms in the soil may be killed by the use of chemicals. A double treatment with sodium cyanide and sulphate of ammonia is most effective for this purpose, according to Prof. J. R. Watson of the Florida Experiment Station.

Sodium cyanide at the rate of 600 pounds to the acre should be dissolved in water and poured over the ground. The irrigation water is then turned on and the bed thoroughly saturated to a depth of 18 inches. Immediately following, this apply sulphate of ammonia dissolved in water at the rate of 900 pounds to the acre.

The ammonium sulphate reacts upon the cyanide forming hydrocyanic acid gas which kills the worms. If the beds can be covered with an airtight material, such as tarred building paper or sheet roofing, much more effective results will be obtained.

As both sodium cyanide and ammonium sulphate are rich in nitrogen, acid phosphate and potash will be the only other fertilizers required on the seedbed. Two or three weeks should elapse between the treating of the bed and the planting of the seed.

For further information on seedbed treatment request a copy of Bulletin 159, Florida Experiment Station, Gainesville.

DON'T LET CHICKENS EAT SOUR FEED; MAY CAUSE STOMACH POISONING

Some people sometimes have ptomaine poisoning, they sometime depending on their eating certain infected food. But this trouble is not confined to man. Chickens often have it, if fed or allowed to eat any and all sour or decayed food. Symptoms of this disorder are darkened combs, drooping wings and feathers, and relaxed nerves which cause the birds to stagger and lose control of their head and neck.

R. C. Blake, instructor of poultry husbandry at the Florida College of

Agriculture, says that mid-summer is the season when this trouble is most prevalent. He says that it has been wrongly called chicken cholera, although genuine fowl cholera is rare in this country.

The condition of the grain and mash in the hoppers may be considered the cause of ptomaine poisoning. Grain that gets wet and is then allowed to stand in the hot sun quickly ferments. A chicken that eats such sour grain usually becomes seriously ill with death following.

Prevention is the best cure. Keep the dry-mash hoppers clean. Do not let any unclean grain to spoil, and do not feed sour and moldy feed. Once a bird is affected there is no positive cure. However, if the symptoms are recognized in the early stages, gives 1 teaspoon of castor oil to each sick bird. This may help some.

CUT COVER CROPS NOW: PRECAUTION AGAINST PUMPKIN BUG DAMAGE

You may pay the price with decayed citrus fruit, if you do not take the necessary precautions to prevent the ravages of the pumpkin bug, is the warning to citrus growers of J. R. Watson, entomologist of the Florida Experiment Station.

To prevent the presence of these bugs, it is advisable to cut the cover crops in or near the grove, Professor Watson goes on to say. "And the crops should be cut by the middle

of September. If they have not been cut, or have not been cut closely, the bugs may succeed in getting a foothold in the trees.

The bugs injure the fruit by puncturing the rind and sucking the juice. The fruit is utterly ruined for shipping purposes, as decay invariably sets in at the puncture and the fruit soon drops from the trees.

The Southern Green stink bug, or the pumpkin bug, is the principal insect that does damage of this nature. It breeds on legumes, particularly cowpeas and beggarweed. Cutting such crops by the middle of September, before the last brood has developed wings, means that the young will perish before they can reach other feeding grounds, grounds which often are the fruit on the trees.

In cutting the cover crops it is best to cut around the trees first, (Let the man with the scythe precede the mower.) This tends to drive the bugs away from the trees, giving them farther to travel to get to the trees.

Later in the year—say, late in October—any bugs that are found on the trees can be shaken off, caught in a canvass spread beneath, and poured into a kerosene and water mixture.

Double Braking Efficiency Buick Four-Wheel Brakes

Buick four-wheel brakes, because they double the braking surface brought into action, increase the braking efficiency of the car practically 100 per cent.

The action is simple, positive and rapid. A slight pressure on the service pedal (the method of operation is unchanged) and all four wheels are retarded—the car is quickly, smoothly and safely brought to a stop. With these proved Buick four-wheel brakes a stop is made in a much shorter distance with a minimum of skidding danger.

Obtaining braking friction at four contacts with the road increases the braking power and lessens the wear on each brake lining and each tire.

The 1924 Buick models, with four-wheel brakes, a more powerful engine, beautiful new bodies and numerous other advanced features fully exemplify the Buick policy of incorporating every improvement that will give greater safety, comfort and satisfaction to the owner.

EAST SANFORD

Mrs. C. L. Flowers will entertain the Methodist Ladies Circle No. 4 of Celery avenue at her attractive home on Celery avenue on Thursday p. m. at 3:30. All the ladies are welcome.

A gathering of Methodist ladies and neighbors were held at the H. H. Chappell home on Thursday last to make plans for the coming revival at the First Methodist church; also prayer meeting was held.

Mrs. Camp is at home again with her daughter, Mrs. W. L. Henley on Celery avenue after several months spent in Atlanta, where she was called by the serious illness of her brother.

Mr. and Mrs. Lloyd Hoak and baby and Mrs. Hoak's mother arrived in Cameron City Tuesday in their car having come from Illinois. Mr. Hoak was a resident of Cameron City several years ago.

Mrs. C. C. Morris' and 'little' son, Robert, have returned to their home in West Palm Beach after a month's visit with Mrs. W. R. Guerry and family.

The social at Moore's Station church was a very pleasant social affair last Wednesday evening. A number of faces not seen in a number of years, who use to be regular attendants were Mrs. C. C. Morris of West Palm Beach, who had not been present before in 8 years and Miss Maud Cameron, who recently returned from five years residence in Tampa, and Mr. and Mrs. J. E. Hickson, who had not been present before since their removal to the West Side.

Robert Grier is at home from the southern part of the state where he has been for several weeks helping to install a lighting system plant.

Mrs. Annie Brown Sawyer and little daughter Iris, are here from Orlando spending the week as guests of Mrs. J. E. McCalland.

Mr. and Mrs. R. C. Long and daughters Gretchen and Kathleen, are expected home Saturday from several months stay at New Martinsville, West Virginia. They will make the trip home in their car the same as they went north.

I. E. Estridge went to Kissimmee Saturday to join Mrs. Estridge and the children, returning home Sunday. Mrs. Estridge had visited her mother in Oxford and sister in Kissimmee.

Some of the gates of East Side farmers were placarded Monday morning with cards on which wage scales were printed and signed by four K. K. K. Instead of three K's as per Ku Klux Klan. They were on the same style as the cards posted last season on the same subject.

The electric light poles have been placed on Beardall avenue up to the Moore's Station road and on around on Cameron avenue to Celery avenue. Pretty soon every one will be all lit up.

Mrs. C. E. Chorpensing was hostess last Thursday afternoon to several little girls who had been invited to help celebrate her daughter Alys 18th birthday anniversary. After a merry time playing games the children were seated at the dining table which was decorated with bouquets of roses, salted nuts, candies and big dishes of ice cream were greatly enjoyed by the little guests. There were some very attractive gifts given, showing the popularity of the little hostess. Those attending the party were Nezie Stone, Elma Singletary, Elsieur Cameron, Dorothy Boyce, Marlen Haynes, Beatrice Blodson, Anna Marcel Blodson, Margaret Squire, Wilma Squire and Elwin Squire, Mrs. B. H. Squire and Miss Helen Chorpensing.

assisted in the entertaining. Mrs. A. Company, Mrs. D. C. Howard and Mrs. J. C. Eullworth were invited in for the refreshment hour.

UPSALLA AND GRAPEVILLE

The children are all anxious for school to begin Monday.

Mr. and Mrs. Whitehead and children of Sanford spent Sunday the 16th, here in Grapeville, with Mr. and Mrs. Henderson.

Rev. O. O. Eckardt of Elverson will preach in the Lutheran church next Sunday but generally he expects to be here on the fourth Sunday.

Mrs. Barney Beck and Mrs. Jack Vaughan have both been on the sick list this past week but are better now. Dr. Denton says that Mrs. Vaughan's trouble comes from high blood pressure.

Mr. and Mrs. E. F. Lundquist and children and the wife's father, August Swanson spent Sunday at Coronado Beach.

Emil Magnuson left on Monday for Miami to oversee setting up stoves for the smoke process for coloring the early oranges for Chase & Co.

Mrs. J. E. Lundquist returned home Sunday evening from Jacksonville where she has been visiting for five months at the home of her son, Aaron and wife. While there she had her teeth extracted and a new set made. She was not feeling well enough to make the trip to see her brother at Savannah as she had planned. The children are all glad to have Grandma back.

Rev. Wahlberg and Mr. Carson's family of Monroe were Sunday visitors at the home of Mr. and Mrs. John Borell on Sunday.

Mr. and Mrs. E. W. Lundquist and two children and Mrs. Bergquist were Sunday afternoon callers at the home of his brother, Hilmer and wife.

We were glad also to see Grandma Bergquist out to Sunday school, also Eric Lundquist and Hallman Hill. Bro. Clark stopped in on his way back from Sorrento and Paola and says he will be with us next Sunday and also the following one. He held the communion service at Lake Mary in the evening.

Standing Back of Your Mousetraps

A shoe manufacturer whose store in New York City is in a rather out-of-the-way locality recently called the attention of the reading public to these familiar lines

"If a man can write a better book, preach a better sermon, or make a better mousetrap than his neighbor, though he build his house in the woods, the world will make a beaten path to his door."

For many years people have beaten a path to this shoe manufacturer's door. He has proved the truth of this famous aphorism.

And where did he publish this quotation which he applies with such pride to his business?

Why, in an advertisement, to be sure—for this manufac-

turer is a consistent and regular advertiser, and when he has anything to say, he says it through his advertising. It may fairly be assumed that he would not look for a thriving business in the best of mousetraps, or shoes, if people were not told about them as people expect to be told—through advertising.

Of course, people do find out which are the best mousetraps, the best shoes, the best tires; best breakfast foods, and buy them in preference to others.

And people today are pretty well aware that when a manufacturer puts Advertising back of the things he makes, he is telling the world that the path to his door is a broad highway.

NAW COMES THE WELL-KNOWN FOOTBALL SEASON

Bob Holly of the Sanford Herald agrees with us in estimating boys. Bob has two boys, both improvements on their daddy, who hasn't got over being a boy himself, so he can give expert evidence—Ocala Star.

And now a Jacksonville man has discovered that the pulp made from the water hyacinth is impervious to fire. We always knew that the water hyacinth was impervious to everything—even to our efforts at extermination.

Editor Bob Holly of the Sanford Herald has been taking a vacation and spending it within easy walking distance of the Celery City. Perhaps that's the best way to take a vacation, but shoes are still high.—Daytona Journal.

The Plant City Courier has just celebrated its fortieth birthday. It should have been a silver wedding or golden wedding or something of the sort for while Editor Prewett is not forty years of age his excellent paper is that old and it shows that the Courier is a real paper to have survived the storms so long. Any newspaper that reaches the forty year mark is entitled to the respect and esteem of the community in which it is published and also to the respect of all the newspapers of the state. And the Courier is getting better every day in every way.

The Methodist church will have a revival here for the next ten days or two weeks and are bringing a fine preacher and wonderful singer to make the revival what it should be—a revival of soul saving. All the churches should join in the services and make it a revival in every sense of the word. Let us all be Methodists for the next ten days and help to make this revival one of the best in the history of Sanford. If the various churches would join together more in these services the Christian religion would have a stronger hold on the people of the earth.

If we were a member of the Polk county board of commissioners we sure would send the commissioners of Seminole county a nice diplomatic note for their "thoughtfulness" in

placing that galvanized sign up near the county line just far enough over in Seminole so that it hides the words on the attractive Polk county arch from the view of the traveling public. Yes, it was very thoughtful.—Lakeland Star-Telegram. We don't know what you are talking about but suppose you do. However, it is news to us to know that Seminole and Polk counties join anywhere on the map or otherwise and it would be impossible for our sign to slip over into Polk county—and where have we any signs?

Remember as you go along that tourists are the crop for Sanford and we should be doing all we can to get them here. A big tourist hotel, a bigger and better playground, athletic field, golf links, boat basin, boulevard, better homes, apartment houses, everything and anything that will make life pleasant for the visitors should be done here and then invite them to come. The tourist crop is the best crop in Florida.

CROWDED COLLEGES

The colleges are jammed again, worse than ever. The demand for higher education exceeds the supply. Teaching forces, equipment, classroom space and living accommodations all are inadequate.

Vast sums are poured into colleges and universities to provide better facilities. Salaries are raised to attract more teachers to that field. But it takes time to meet the situation; and meanwhile, the crowd keeps on pouring in.

For the present, many colleges are driven to limit the number of admissions, after the manner of our national immigration plan. That protects them from being overwhelmed, but it is not a lasting solution. State universities and big city colleges find it harder to draw the line, and

their classes grow larger and larger, to the disadvantage of the students, who receive less individual attention.

What is to be done about it? Surely this tremendous demand for a good education is in itself so desirable that every possible means should be taken to satisfy it. If it means bigger colleges, very well. If it means multiplication of colleges—which is probably the better way—very well. The essential thing is not to discourage the ambitious boys and girls hungry for learning, or deprive the country of the future benefits that will come from giving them what they want.—Pensacola News.

CROSSING BRIDGES.

If you are one of those dubious creatures, who are always fearing that some imaginary danger will befall you, or if you are skeptical of your ability to succeed in a contemplated venture, you had best save the energy you are wasting upon these things for the time when you will need it most.

Trouble, in some form or other, usually comes in the lives of all of us, and the day may arrive when you will have some important decision to make. Being a Doubting Thomas will never get you anywhere. If you have within you the ability to make good, you will eventually arrive at the goal of your ambition—if you are optimistic. Take a chance. It pays to see the bright side of things, and you have but one life to live, anyway.

Going about looking for some dire calamity to happen you are but throwing a monkey wrench into the cog of your existence. You are impairing your prospects to win.

There are many pitfalls for us to overcome in the struggle to success. Many pitfalls await the unwary to take him from his chosen path. Avoid pessimism. Life's road is a rocky one, and crossing bridges before we come to them makes it the harder to travel.—Fort Myers Press.

CO-OPERATION ESSENTIAL FOR UPBUILDING OF COMMUNITY

There is not a city of any consequence in the state of Florida today that gained its prominence by any other methods than through co-operation on the part of its citizens. Let your memory bring to mind those towns which have failed to advance with the progressive cities of Florida, and you will at once recognize that the failure for the advancements of those cities lies in the fact that there is friction among the citizens of the community and a lack of co-ordination of purposes, or the population has assumed a lutheric condition incident to the earlier period of its state.

The history of every city making rapid and substantial growth will show conclusively that it came about through the united and enthusiastic work of its people. It is true of Eustis; it is without an exception true of other cities. A coterie of business men and enthusiastic individuals have made Eustis blossom as the rose. Just a few years ago the city was an ideal stopping place for those seeking rest and recreation, with just enough business during the winter season to tide the population through the summer and until the return of the tourists in the fall. How different during the past two years. The merchants now enjoy a business, in many instances, greater

than during the winter season, and the town has developed from a swaddling little village into a city unrivaled, for the amount of business transacted and its development, by any city of similar population in the state of Florida or elsewhere. The continued growth of Eustis will be in proportion to the energy exerted and co-operation of its citizenship.—Eustis Lake Region.

FROM OTHER SANCTUMS

A MESSAGE OF THE TEACHERS

Teachers of the public schools, custodians of our most treasured possessions, we salute you. Above all people in the world, we honor you. We have selected you out of the many millions to confer on you a sacred trust. Your responsibilities and your privileges are greater than those of the preacher, the doctor, the lawyer, of any class or any profession. Next to parenthood, teacherhood is the most sacred calling.

We are placing in your hands materials more plastic and impressionable than the clay in the hands of the potter. In many instances, because of our ignorance, it has become marred and disfigured, but you, who are so skilled, can correct some of our mistakes. From this material we are looking to you to turn out a citizenship rich in ideals and competent to outstep the world from the maze of perplexities and the tangle of absurdities into which we and generations before us have allowed it to sink.

For hundreds of years men and women have bowed to the god of material success. The man with money has been exalted and held up as an example of success. We have praised his virtues and ignored his vices. The manner in which he has acquired his money has often been winked at. We have held up as an ideal of success the man who, overcoming all obstacles, has accumulated millions. If it has been come by dishonestly, we—society—has accepted as full expiation his donations to colleges and libraries and charities.

For this reason, the aspirations for something higher than dollar chasing which have been born in the hearts of many, have been ruthlessly crushed. The love of money and the greed for it have been the motives that have filled our world with slums and crime and strikes and starvation and revolution.

Statesmen meet one day to discuss plans for achieving world peace and next the next in private conferences to discuss plans for building up the munitions market. Ofttimes they talk of peace when they are hoping that there will be a war somewhere that they may fill their coffers. Prizes are offered for providing for world peace, but these plans will be ineffectual and worthless unless you, teachers, and we, parents, set about to establish a new standard of values. We must learn that success does not mean the accumulation of stocks and bonds and houses and lands. We must learn that real success consists in what we are and not what we have in the bank. What we hold in

our hearts and heads should be expressed in establishing our value.

The world is sick to death of war. It is sick of crime, of pestilence, of injustice and of misery. We are looking to you, you five million teachers, to inculcate in your students a different idea of success from that which we and the generation before us have held, a different standard of value from those we now hold, and a feeling of sympathy and brotherhood with peoples throughout the world.

Shall this glorious experiment which we have called Democracy succeed? That rests with you.—Times Union.

BETTER MARRIAGE LAWS WOULD REDUCE DIVORCE

The hodge-podge of existing laws concerning marriage and divorce produces more unhappiness than any other cause, according to State Senator Archibald McNeil, Jr., of Connecticut, who would introduce a measure in congress providing for a uniform divorce law throughout the United States. Mr. McNeil holds this far more important than tariff or other political issues and believes that there should be a national uniform marriage and divorce law.

Constance Binney presents an interesting divorce situation in "A Bill of Divorcement," the Associated Exhibitors special feature today at the Milne theater. It shows the neces-

sity for a law permitting divorce in the case of hopeless insanity, and the wrong done the children of a person who has inherited a strain of insanity. An interesting fact is that the fictitious case of "A Bill of Divorcement," written by Clemence Dane, has a parallel in real life. Mrs. Norman C. Rutherford, of London, having appealed, without avail, to the law and the public to release her from her crazed husband.

AS SEEN BY POPULAR MECHANICS MAGAZINE

Air Chamber Saves Divers Stricken at Work

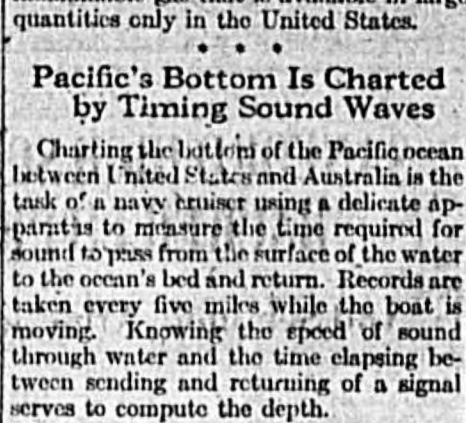

As a first-aid appliance to save the lives of divers stricken at their work, a large feel tank, in which they are placed, is

filled with compressed air to break up and drive out bubbles of gas that cause them to become paralyzed or unconscious. The pressure is started at 30 pounds and increased or decreased as the patient needs it. Even though a constant supply of air is pumped below to a diver at work, the great weight of the water and too long periods unrefreshed frequently overcome him, making quick action necessary to prevent his death.

Pacific's Bottom Is Charted by Timing Sound Waves

Charting the bottom of the Pacific ocean between United States and Australia is the task of a navy cruiser using a delicate apparatus to measure the time required for sound to pass from the surface of the water to the ocean's bed and return. Records are taken every five miles while the boat is moving. Knowing the speed of sound through water and the time elapsing between sending and returning of a signal serves to compute the depth.

Safety Seat Prevents Falls While Washing Windows

For preventing falls while washing windows in the home, a safety seat has been made which swings on two chains attached to hooks in the window frames. A strap stretched between the chains supports the worker's back in comfort, at the same time

Basket on Pole Hives Bees Safely

A Wisconsin beekeeper, whose general farm work allows very little time for capturing the swarms that escape his apiary, has found the method illustrated both easy and quick. The device used for the work,

he claims, has saved him many hours of labor as well as numerous painful stings. The device is simple to make. It consists of a circular rim and a supporting fork made of 1/4-in. iron rod, and a cone-shaped screen-wire basket attached to the rim as shown. A stout cane fishpole is used for a handle.

When the bees swarm, they usually alight in one of the trees of the orchard, and often at such a height that it is almost impossible to capture them. As soon as the swarm is located and fairly settled, the basket is raised under the swarm and shaken so that most of the bees will drop into it. Of course, many bees escape but they will return to the swarm and cluster on the outside of the basket. When all is quiet again, the basket is lowered in front of an empty hive and the bees are induced to enter their new home.

It takes 61 days' work a year to pay the taxes of every producer in the United States, it is estimated. In 1921, taxes consumed 16.7 of all value produced in this country.

INTENSE INTEREST IN WORLD SERIES

NEW YORK, Sept. 27.—Interest in the coming world's series has not slackened because of the prospect that the same teams, the New York Yankees and Giants, will battle for baseball supremacy for the third successive year if advance ticket applications pouring into the offices of both clubs can be taken as proof.

SANFORD HIGH SCHOOL'S STELLAR BACKFIELD PROVES TO BE TOO MUCH

And Seminole Athletic Club Was Swamped Under 13 to 0.

Yesterday afternoon on Hood Field, Sanford High School's pigskin warriors played their first regularly scheduled game of the '23 season with the Seminole Athletic Club and emerged with a 13 to 0. An outstanding feature of the game was the two field goals by the Sanford High crew, especially considering the threatening weather and winds which usually make securing of points by this means a hard task.

The Seminole Athletic crew won toss and elected to receive the kickoff. Peck kicked to the fifteen yard line where the ball was received and returned by Purden who advanced about ten yards and then the game was on full blast. It was a see-saw back and forth until Bach, High quarterback intercepted a forward pass made by Purden to left end. Bach was 'downed' on the forty yard line and from whence the High crew pushed and fought until the ball was on the twenty-five yard line where he kicked a goal for three points. This was the only scoring made during this quarter.

About the middle of the second quarter the S. A. C. crew punted to Lewiskey who made a twenty yard return before being downed. During the time that S. H. S. held the ball on the third down Lewiskey made a long end run which netted six yards, and put the ball for first down. On first down this time E. Moye failed to gain over right guard. Second down E. Moye made six yards on run around left end. Moye also on the third down made four yards for another first down. This had put the ball on the twenty-five yard line where Bach made the second field goal of the day. The first and only touchdown came during the last three minutes of this quarter when the S. A. C. lost the ball on a fumble to S. H. S., recovered by Whitfield, right guard for S. H. S. This was on the fifteen yard line and on the first down, Lewiskey passed to McLucas, who scored the touch down making the score 12 to 0. This was made higher moment later when Peck kicked for point. This was the last scoring made during the entire game and this was also the last time the Sanford High crew came within twenty yards of the S. A. C. goal.

The second half, though not marked with any scoring was filled full of exciting plays as the Seminole Athletic Club turned loose with their aerial work which came pretty near meaning touch downs several times only for the fast work of High's safety man Bach. During the last quarter the S. A. C. came their nearest to scoring when Purden began his beautiful forward passes, two of which were caught by Bach dangerously near the High School goal line. Both teams were making passes which caused the lines to be thrown back and forth rather hurriedly. When the final whistle blew both teams were in midfield fighting hard. The Bach brothers, one on each of the teams were starting all round. The youngest of these two brothers was responsible for six of Sanford's High's points and his brilliant head-work and generalship brought his team through to a victory that was hardly expected to be so great because of the great weight of the opposing team. Coach Wilkinson is proud of the way his Back and Yellow line conducted themselves during the game and feels that they can do still better with High School teams this season. The victory over the S. A. C. was a great one due to the fact that this team is composed of some of the heaviest of football players and at the same time many of them have been college players.

The score by quarters: S. A. C. 0 0 0 0—0 S. H. S. 3 10 0 0—13 Much credit is due the S. A. C. as these fellows gave up much of their valuable time to put out a team that would and did give the High School boys a real tussle before they opened the season with other school teams. Johnny Meisch had a real bunch of footballers on the field yesterday and gave S. H. S. the hardest struggle they will have this year. The line-up as follows: S. H. S. McLucas, Right End. Hunter; Moye, Right Tackle. Whitfield, Right Guard. Joe Meisch, Center. John Meisch, Left Guard. Monroe; Flowers, Left Tackle. Thompson; Wilson, Left End. Gordon; Bach, Quarter. Tillis; Peck, Right Half. Tyler; Lewiskey, Left Half. P. Bach; E. Moye, Fullback. Substitutions, Russell for Wilson, Adams for McLucas, Dodson substituted for Thompson, Bender for Purden, Aycock for Monroe, Marshall for Gordon, Whittle for Dubose.

CELERY SEED

"All the kids were yellin' and the girls were cheering and the boys were fighting hard."

Sing that to the tune of Humoresque and maybe you'll get the general drift of the football game yesterday afternoon!

Talk about a real surenuff football game—that was SOME game that the Seminole Athletic and Coach Wilkinson's high school gridlers played yesterday afternoon down on Hood Field!

Yep and we were there too—and so was about everybody else that could get there. Yasum—some pretty football was pulled off on that little field yesterday.

Of course you couldn't expect to see Harvard and Yale stunts pulled off, but considering that this was the first game that either of these teams had played this year it was a swell exhibition of a pigskin battle.

And the pigskin was treated rough too!

Take it from us—that ole football was treated pretty badly by both teams—but that's all in the game!

Those High school fellows were certainly playing championship football too. If they will improve a little in handling the ball and lay off the fumbling stuff a little they'll make the state championship race a tight affair!

Now right here—not because we'll forget it later, we won't anyhow—but we want to tell you about that little fellow Bach that holds the quarterback position for the S. H. S. Squad. That bird is a Real football player. He is a good broken runner, good passer, fast runner and above all uses his head. That counts a whole lot in football and this "11" is lucky in possessing a fellow like him.

And the others are not without mention—Ed Moye hits that line like a locomotive hits a Flyver and has only one fault which we are sure he will improve in the next game—and that is fumbling. But listen here wasn't that ball wet? We believe Ed just struck a little bad luck which caused him to make fumbles—anyhow he wasn't the only one!

Lewiskey and Peck just "natchelly" can hit that line, too! These fellows showed that they had the necessary push yesterday when they plowed through the S. A. C. lines for big gains.

The S. A. C. had a first rate backfield and in our opinion this crew would have put up a much tighter battle if they had had the same amount of time and equipment to practice with as the High school boys did.

Frank Purden is some punter, we'll say—and as a kickoff man he is hard to beat! His punts were largely responsible for the S. A. C. warriors staving off much possible scoring by the other side.

And summing the situation up we'll say that that was a swell game and we'd tell you more but we got so excited watching the battle that we forgot to write it down.

Never bellow like a cow while out hunting. Some hunter may take you for a cow and shoot you.

Health is Wealth. Health is one of the greatest things your family can possess. It brings happiness and success. But health must be safe-guarded by good wholesome foods that are prepared from the purest ingredients. This is especially true of bakings. If they are not properly raised, we all know that they are not easily digested. Many times when self-rising flour is used in place of good plain flour and dependable baking powder—the results are flat, soggy and heavy foods. Don't take chances! Use a reliable brand of baking powder and plain flour. Then you will be sure of healthful bakings that are easily digested. Remember, science has never found anything to take the place of the tried and tested method of using plain flour and good baking powder in preparing bakings. Millions of housewives now know by actual experience that many preparations that are claimed to take their place are worthless and dangerous to health. There is no comparison. Calumet, the Economy Baking Powder, is known to be one sure and positive aid to successful bakings that are always pure, sweet and wholesome. That's the reason its sales are 2 1/2 times as much as any other brand. PACKED IN TIN —KEEPS STRENGTH IN

QUALITY GRAPEFRUIT SUPERIOR TO LAST YEAR'S SHIPMENTS ARE MADE

Palmetto, Fla., Sept. 28.—Quality of grapefruit grown in this section is superior to last year's growth, it was shown in the first shipment for the north, made this week. W. E. Lee, who operates a packing plant here, says the prices will be fair, despite the larger crop. Eleven carloads went out in the first consignment.

AIR MAIL SERVICE BOUGHT BY JACKSONVILLE

JACKSONVILLE, Fla., Sept. 28.—Steps to obtain air mail service for this city will be the chief consideration of a committee that will be appointed by the chamber of commerce here within a few days. The matter was placed before the chamber a few days ago by Postmaster Herbert E. Ross and Y. O. Brown, assistant postmaster, who favored the idea.

CAN BE PROUD OF DESCENT

Granddaughter of Daniel Boone De-livered to Be Only Living Relative.

So far as known, the only living descendant of Daniel Boone is Mrs. C. F. McCutchan, eighty-two years old, who has been a resident of Prairie Lea, Tex., for many years. Mrs. McCutchan is a great-granddaughter of the famous frontiersman. She was born in St. Charles, Mo., December 21, 1840. Her parents were Mr. and Mrs. John Wesley Bryan, who moved to Texas and settled in Paris in 1845. Mrs. McCutchan's grandmother was Jemima Boone, who had a thrilling experience with Indians when she was a girl. Along with Betsy and Frances Callaway, she was captured by a hostile band of Redskins July 14, 1776. As soon as news of their capture spread through the neighborhood, Daniel Boone organized a party and went on the trail of the Indians. They came upon the savages four days later and after a hard fight rescued the three girls. One of the members of the rescuing party was John Callaway, and it was he who married Jemima Boone a few years later. Daniel Boone died at their home in 1820.

Mrs. McCutchan still has in her possession many antique household and family relics that came down to her from the early days.

HOW TO KILL ANTS

GAINESVILLE, Fla., Sept. 23.—If you don't like the ants that dig and tear up things around your place, kill 'em. That's the advice of Prof. J. R. Watson, entomologist of the Florida Experiment Station. He says it can be done in this way:

Dissolve an ounce of cyanide in two quarts of water. With a cane or other stick punch a hole a foot or more deep in the center of the hill. Pour into it a few fluid ounces of the solution. As soon as the liquid has soaked away, cover up the hole with dirt and tramp the surface solid. The gas given off will find its way throughout the ant-hills and will kill all the ants and pupae (hatching ants). It is best to do this in early morning or at night when all the ants are at home.

"This substance must be handled carefully as it is one of the most powerful poisons, either inhaled or swallowed, or if gotten into sores or broken places in the flesh or skin."

When a bad cold meets a good disposition the bad cold wins.

Is your face your fortune? That is why so many men feel cheap when they need a shave.

VOLUSIA COUNTY TO BUY TWO BRIDGES ACROSS ST. JOHNS

DeLand, Sept. 27.—It is expected that Volusia county will buy the Croy's Bluff and Monroe highway bridges over the St. Johns river from the bridge companies and take possession of both on October 1.

The board of county commissioners held special sessions Saturday and Monday nights, when Chairman Ben D. Thursby had a resolution ready to offer which would authorize the county to buy both of these bridges and take possession October 1. Due to the absence of Commissioner W. C. Jackson, who is in Miami, action, however, was deferred until such time as he returns, when it is expected that a special meeting will be called and the resolution adopted.

In the meantime Attorney W. H. Gardiner was empowered to have the \$75,000 in time warrants printed and ready for delivery as quickly as possible. These warrants were authorized under a special act during the last session of the legislature and will be the method of payment to the bridge companies. The companies have agreed upon the time warrants being placed in escrow, to turn over possession of the bridges to the county and the time warrants would then be delivered to the companies as soon as the title had been passed upon and delivered.

The price of \$75,000 is that set by the bridge companies on May 16, this year, when the matter first became one of public interest.

One of the first acts of the commissioners, upon taking possession of these bridges which connect DeLand with Sanford on the south and Umatilla and Eustis on the east, is expected to be a reduction of 50 per cent in the tolls charged. They plan to make the bridges absolutely free to the public as soon as tolls collected amount to a sufficient sum to liquidate the cost of the bridges and approaches to same, which will be improved at once.

SEND YOUR CHILD TO SCHOOL

The laws of the State of Florida must be obeyed. If your child is between the ages of seven and sixteen, inclusive, and has not graduated from the eighth grade, he must attend school unless legally exempted. If cause for exemption exists, claim for exemption, supported by affidavit, must be filed with the county superintendent at once.

THE PERILS OF RHEUMATISM

The Disease That Cripples and Kills. Quickest Way to Get Well is Through New Prescription Containing Seventeen Ingredients That Renew Every Part of Body.

Rheumatism may be caused by any number of things, and this is why it is so hard to cure. If we knew what caused any particular case of rheumatism, it could be promptly arrested. Any remedy that merely relieves the pain is not sufficient. The only sure way to relief is through a thorough systemic treatment that will reach every part of the body and all the vital organs. Then you are sure to reach the cause without guessing.

This complete treatment is found only in a prescription called Re-Cu-Ma, which contains seventeen well known and thoroughly tested medicines, so skillfully compounded that each one performs its function on the various parts of the body perfectly and harmoniously.

This remarkable prescription starts right to work on the blood, taking out the rheumatic pains and removing pimples and skin blemishes, relieves constipation, cleanses the kidneys and puts your entire system to rights, thoroughly acting upon the colon, which, according to Prof. Metchnikoff of the Pasteur Institute, Paris, is the direct cause of all our aches and pains. In addition, Re-Cu-Ma starts the liver to work naturally and pleasantly without gripping or purging, gives you a digestion that enables you to eat anything you like without bad after effects and you sleep like a log. Re-Cu-Ma is a scientific prescription that revives, renews and regenerates your vital organs so that you feel constantly full of pep and ambition. Re-Cu-Ma is sold and recommended by the Union Pharmacy and other good drug stores.—Adv.

LOGICAL

Hubby—Darling, my income has dropped so this last year, that I won't have to pay any income tax. Wifey—Oh, good! Now you can afford to give me the money you had to pay for the old tax last year.

X-RAY FOR TESTING STEEL

X-rays, which have hitherto been used chiefly for finding out conditions in the human body, are now to be used, according to the experts, in examining steel and timber. One obvious application is examining metal castings for blowholes and other defects that cannot be revealed by external inspection and that yet may seriously impair the strength of the casting. Rough analysis of different steel is also feasible. Since different metals vary in the resistance they offer to the penetration of the rays, according to their atomic weight, it becomes possible to distinguish different alloys by the X-rays. The method has its limitations, because the rays penetrate only about four inches into ordinary steel and still less into special alloy steels.—Washington Star.

FAMOUS LONDON STONE

The London stone is a stone said to have been placed by the Romans in Cannon street, London, in 15 R. C.; and removed to the opposite side of the way in 1742. In 1798, it was built into the south wall of St. Swinton's church, where it still remains. It is said to be a fragment of the central milliarium, or milestone, of London, from which were measured distances on the highroads that radiated from it. According to tradition, it was brought from Troy by Brutus, and laid by him as the foundation-stone of the city. In 1450, Jack Cade struck London stone with his staff, exclaiming as he did so, "Now is Mortimer lord of this city!"

A PARAGON

"What is your aim, your ambition?" "To be as good as the fellow my wife says she could have married if it hadn't been for me."

HER POINTED VIEW

Roggio—Don't you think society is an empty thing? Miss Keen—I think there are lots of empty things in society.—Boston Transcript.
