American Business RE-DISCOVERS the ADVANCING SOUTH

OPULATION and Prosperity are trending Southward.

Business, ever alert to steady, significant mass-movements, is nowadays looking below the Mason-Dixon line for its greatest Gains.

The impetus has but begun. The relatively great strides already made will be looked upon during the next few years as "low level" figures.

This is not a "boom" condition emphatically not! It is the logical, inevitable, response to a fundamental sectional supremacy that, frankly, has been a bit slow in gaining recognition.

The South is solid! It acts and reacts a little cautiously, perhaps, but when it moves it "stays put".

Its ascendancy, then, has been gradual—not hectic—and having its foundation in Soil Superiority will live on forever.

The South has just started upward!

In the area pictured above live 31,193,840 people.

As a group, they are more prosperous today than ever before. Their future outlook is brighter than that which faces the citizenry in any other section of the country.

Manufacturers, sales managers, business economists, advertising agents—students of the flow of merchandise—this is the time to tell the South—and sell the South.

Advertising in Southern Newspapers moves the bulk of merchandise sold in this section. Southerners take their newspapers seriously, read them thoroughly and respond to their appeal.

Capable space-buyers have long realized that the most effective and cheapest method of reaching the majority of Southern buyers is **through the newspapers**.

The combined circulations in these Southern States, for example, of the outputs of two of the largest magazine publishing houses is slightly over a million and a half.

The combined newspaper circulations in this same area reaches one out of every six persons; there is practically a newspaper in every home.

Sales prospects are perhaps more easily reachable in the South than in any other section of the nation. Not alone is it easy to get to prospects; but advertising space is relatively low-priced.

You can cover the entire South with a smaller outlay than would be required to reach any other area of like population, and when once sold, we repeat, the South stays sold.

Southern publishers are ever alert to aid manufacturers and advertisers in obtaining adequate distribution to justify advertising investments. Correspondence to that end is invited.

Plan your Fall campaigns so as to gain and grow with the South. Ask any recognized Advertising Agency for facts and figures.

261,000 Square Yards of Concrete Streets in De Land

> De Land, Florida, began to pave for permanence in 1923, when it awarded a contract for 120,000 equare yards of concrete streets.

When present contracts are impleted De Land will have a tal of 405,270 square yards of the finest looking pavement you will find anywhere.

The taxpayers know that maintenance is built into this aristocrat of pavements.

That is because the firm, rigid, unyielding strength of concrete withstands indefinitely the heaviest traffic.

And these are some of the reasons why more than 1,000 cities and towns laid concrete streets in 1925.

FRIDAY

Sept. 17

We began this business thirteen years ago with an idea. That idea was VOLUME. We knew good and well the necessary thing to do toget volume was to give the people more for their dollar than our competi tors were giving them. Without a doubt we have done this from the inception of the business. Our big chain of 24 stores today is the outgrowth and stands as a monument to this idea from which we will never depart. The bigger we get the more you are going to get for your money-it is our policy.
