Well, it takes a long time for some bills to pass or be killed. Meanwhile, a home owner can sell a house at any price he wants. And the scarcity of housing needles sellers to make advantage of the situation and charge inflated prices.

Forgotten Man

One trouble with the theory that buying power can be increased merely by boosting wages is that it forgets the man who doesn't live by wages-

The only effect be feels is the higher prices that sudden wage boosts help bring about.

A large portion of our people do me live by wages. Farmers are a good example. So are doctors, dentists, lawyers and those who run small shops and stores-

Even more seriously affected are people; the ministers, thachers and government employes of all kinds—and the millions of mon and women living on insurance benefits, pensions or life.

Their buying power doesn't go up-it goes

As a matter of fact, the rising prices that follow peneral mage increases tend to out up even the gains that wage corners soon to him made These things are important to consider in con-

Even at present price ceilings manufacturers might make some money, at least keep from losing it, but under present laws, if they do make any they have to give it to the government. This is a short-sighted policy on the part of those manufacturers who are following it, but short-sightedness is a common human fault.
