

Stars And Stripes Rise Over Tokyo

WHILE OLD GLORY RISES TO THE TOP OF THE STAFF over the U.S. embassy in Tokyo where General MacArthur has established his headquarters, troops of the Seventh Regiment, the Cavalry Division—the first to enter Tokyo—stand at attention. The flag—the famous one that flew over the White House in Washington on Pearl Harbor day and afterward was hoisted above Canadian cities, Rome and Berlin. It also waved from the masthead of the U.S.S. Missouri when the surrender papers were signed. Signal Corps Radiophoto (International) unposed.

CAUGHT IN A MOMENT OF RELAXATION is Cpl. Jimmy Stewart, U. S. Army Air Corps, now on leave, playing a duet with his mother at the family piano in her home in Indiana, Pa. Widely popular as a movie star, Stewart entered the army as a private. He expects to return to his film career upon his release from the U.S. Air Corps. (International)

IN THE SEVENTH annual beauty-contest for married women held at Palisades Park, N. J., Mrs. Peggy Payne of Atlanta, Ga., was selected from 130 contestants from all parts of the country as "Mrs. America, 1945". Mrs. Payne was chosen as "Miss Atlanta" for the Atlantic City beauty pageant, but was disqualified when it was discovered she was married. (International)

ORDERED TO SURRENDER ITS SHIPS—remains of the once mighty Jap navy ride at anchor in the Kure Naval base, Japan. A low flying plane made this pictorial record of some of the destroyers and destroyer-escorts as they came in. The Kure base, it was noted, had been given a terrific blasting by B-29 bombers. (International)

Atoms in an ordinary kit-stove emit enough invisible infrared rays to permit the taking of photographs of nearby objects in total darkness with a photographic film sensitive to the rays.

When canning remember personal cleanliness is important. Clothing should be immaculate and hands and forearms should be washed thoroughly with soap and water before beginning preparation of food.

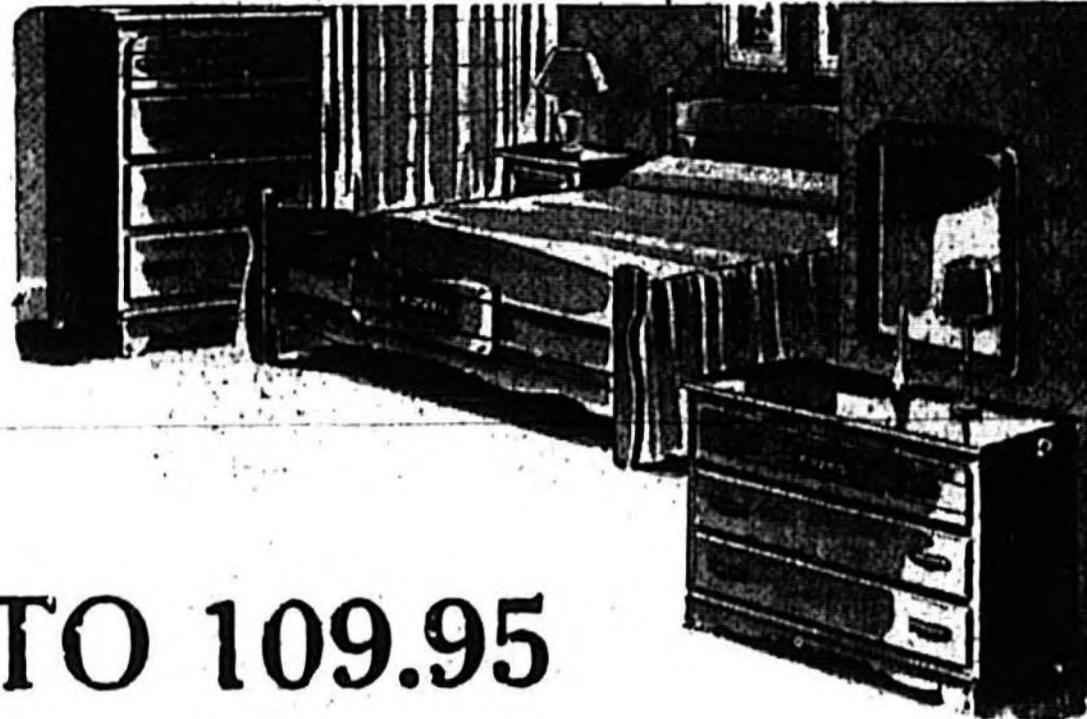

Relatives and friends who want to see a soldier on furlough go to his house instead of expecting the reverse. It only takes an evening out of his stay to visit you, but his evenings are limited.

Auto Strike Spreads With Crisis Looming

CIO Union Demands 30 Percent Wage Hike And Prepares For Strike Of 500,000

Detroit, Sept. 17. (AP)—More than 70,000 workers were idle in the Detroit area today as the huge automotive industry and powerful United Automobile Workers (UAW) Union headed for a showdown on union demands for a general 30 per cent wage increase.

Strikes, and layoffs, idled 70,000 workers in Detroit and 10,000 in nearby Windsor, Ont., while NAW-CIO leaders went ahead with plans for a possible strike vote affecting 500,000 throughout the nation's auto plants.

Striking Kelsey-Hayes workers refused yesterday to heed the call of their union executives and resume production of vital automotive parts.

Thus the gigantic automotive industry started a new reconversion work week with strikes and shut-downs making 80,000 men and women idle in the Detroit area, and the threat of strikes involving some 500,000 more over the nation.

The CIO United Automobile Workers has pledged \$4,000,000—virtually all its resources—to a fight for an industry wide 30 percent wage increase.

Of auto parts, Ford has already closed, blaming lack of vital parts. General Motors has been served notice that the union will call on the NLRB to conduct a strike vote, and Chrysler waits on the outcome of a voter meeting called for next Sunday which will determine whether a similar vote will be sought.

Only 250 of the 4,000 Kelsey-Hayes workers, on a "wildcat" strike demanding the raising of three workers attended mass meeting Sunday presided over by Percy Llewellyn, administrator for the UAW who was appointed by the UAW executive board.

Situation Unfavorable

"The situation looks unfavorable, but my job is to stay and try to get the workers back," declared Llewellyn.

Llewellyn, who said he was well-received by the strikers, told a press conference that he recommended return to work, but that the meeting took no action on his recommendation.

In the meantime the local's bargaining committee was reported to have recommended that the strike be continued and the local was said to have approved.

The meeting, regular monthly session of the local, was held in private. It was orderly.

Llewellyn indicated he did not know when steps the UAW-CIO might take next. He said no plans were made for another meeting of the strikers, who have been off the job since Aug. 23.

The closing of the Kelsey-Hayes plant was held chiefly responsible for the decision of Ford to send 50,000 workers home for lack of brake and wheel parts.

The background of the strike, a comparatively small but vital one in the troubled labor picture, was the ejection from the plant of two company foremen last April.

Charlie Rae, Died At Home Saturday

Charlie Rae, 45, died at his home in Ginderell early Saturday morning. He had been in ill health for the past three years. He had lived here for the past seven years. He was born Jan. 20, 1900, in Chandler, Okla.

Mr. Rae is survived by the widow, Mrs. Arthur Rae of Sanford, two daughters, Velma Christine and Mary Myrtle Rae of Sanford; one son, Edwin Charles Rae of Sanford; and one sister, Mrs. Jack Roberts living in Ginderell.

Funeral services for Mr. Rae will be held at 8:00 o'clock Tuesday afternoon at the Erickson Funeral Home with the Rev. W. P. Brooks officiating. Interment will be in Evergreen Cemetery.

Active pallbearers will be Henry Schumaker, Henry Foster, Bart Wright, Jim Cassidy, Harlie Starren and S.H. Ernest.

CITY BRIEFS

Sanford Lodge No. 62 F and A.M. will meet Tuesday evening at 8:00 o'clock in the Masonic Temple when the Fellowcraft Degree will be conferred. All Masons and Fellowcraft Masons are invited to attend.

Corporation income taxes collected by states more than tripled between 1939 and 1944, reaching \$480,000,000 in 1944.

Sanford Rides Out Storm With Little Damage

Over Seven Inches Of Rain Fell In One Day As Wind Reaches 50 M.P.H.

Sanford emerged this morning with minor damage after a thorough drenching from rain and buffeting from hurricane winds Sunday, but growers in the vicinity have undoubtedly sustained heavy losses in celery, seed beds and other crops due to the almost universal flooding of the farm area. No injuries were reported by the police or sheriff's office.

According to County Agent C. R. Dawson, the entire crop appears to be a total loss and everything done so far will have to be done again in his opinion.

Rainfall was heavy amounting to 10 inches as compared with 6.1 inches in the storm last year, failing to be 10.7 inches.

However, this time the rain fell within a much shorter period of time and the ground was already saturated by recent rains. This caused the heavy flooding of certain low areas. The barometric reading was 29.94 at 1:10 P. M. Sunday there rose. Wind velocity up to 50 miles an hour was recorded at the Sanford Naval Air Station when the reading was taken in the afternoon.

Wind gusts of 50 miles an hour would probably be sufficient which fall within a short time.

However, the heavy rain and wind would probably be much better than the heavy rain and wind which occurred in 1944.

Wind gusts of 50 miles an hour would probably be sufficient which fall within a short time.

Wind gusts of 50 miles an hour would probably be sufficient which fall within a short time.

Burglar Picks On Fraiser Sex To His Sorrow

Intruder, After Scuffle, Learns Mom's A Good Runner

NEW YORK CITY, Sept. 17, (Special)—A burglar just makes Mrs. Pauline Carbone mad and when she's mad there's no holding her. She found one in her bedroom when she returned about 1:25 P.M. from marketing to her home on the second floor of 4502 Eighth Avenue, Brooklyn.

Mrs. Carbone, a slender woman of 33, had suspected something was wrong when the sound of the apartment doorajar. She knew she had locked it and she knew that her children, Margaret, 13, and Edward Jr., 16, were at school. Nevertheless, the intruder took her by surprise when she entered her bedroom.

He clapped a hand over her mouth, grabbed her by the shoulder and flung her against the wall with such force that she fell to the floor. He jumped over

her and ran out.

Nothing daunted, Mrs. Carbone scrambled up and ran after him, screaming for help. John Serino, an employee of the Navy Clothing Depot, who lives in the house, was on the stairs leading to the third floor and joined her. A man was racing toward Seventh Avenue and Forty-fifth Street when they emerged. They pointed and yelled, and a dozen men and women fell behind as they raced after him.

Serino and Mrs. Carbone kept well in the lead and gained gradually on the fugitive. They overtook him at Seventh Avenue, a block and a half from the house and leaped upon him, bringing him to the ground. Serino sat on him. Other pursuers came up and some one in the group telephoned the police.

Detectives James Tedesco and Elwood Louer took the prisoner to the Fourth Avenue police station. He said he was Joe Vielkind, thirty-five, of 231 Second Avenue. Margaret and Mrs. Carbone was making a terrible mistake. He hadn't been near her apartment, he said. Mrs. Carbone was sure he was the man she had encountered in her bedroom, however, and Vielkind, according to the police acknowledged that he had served two terms for burglary. This time he was charged

ed with assault as well as burglary.

A pillow case, stuffed with clothing and silver, was found ready for removal in Mrs. Carbone's apartment, but nothing was missing. Mrs. Carbone's husband, a mailman, had told the New York telephone company, but was proud of her exploit, but would have been pretty anxious if he'd known what she was up to. Her daughter's pride was unaltered.

"Mom's a good runner," said Margaret, "and wiry. She could handle him all right."

HINTS TO HOUSEWIVES

Weekly from Home Demonstration Specialists, Tallahassee.

COOKING VEGETABLES

The following material should be followed before vegetables are given to cook has added support from recent research at the Alabama and Michigan Experiment Stations.

At the Alabama Station, turnip greens, put on to cook in about their own weight of cold water and cooked 30 minutes from the time boiling began, held only about a third of their original vitamin C, but those put into boiling water and boiled for

length of time held three-fourths of their C. Likewise, asparagus and green beans, cooked by these two methods, retained much more C when started in boiling water.

The Michigan Station reports that plunging greens into boiling water saves more C than cooking with only the water that clings to the leaves. Chard and beet tops were tested.

Chard, cooked about 22 minutes in a covered pot with the water set on the left on the leaves after washing, held only 5 to 8 percent of its C, but beet greens only 16 to 17 percent. But when the greens were plunged into rapidly boiling water, they cooked to the same tenderness in 7 to 8 minutes, and the chard held 12 to 26 percent of its original C, the beet greens 25 to 35 percent.

The shorter cooking time probably still was the reason for the greater saving of C, the scientists believe.

RURAL COMMON SENSE

By Spuds Johnson

WINTER COVER CROP EXPANSION IS GOOD SIGN OF PROGRESS

Projects for Florida having the largest acreage of blue lupine during the coming winter that it has had since this great soil-building crop was first tried about a decade ago are indeed encouraging, for it is believed that the soil must be given a chance to "come back" after producing a market crop.

Seed production in Florida, as well as in Georgia and Alabama, this year reached a record high, and blue lupine will be planted on thousands of acres which have not known the crop before.

Its great production of green growth to be returned to the soil and the comparatively short time required for this production have convinced many farmers that it is a winter cover crop which is parallel in the northern and western parts of the state. Of course, it is primarily a crop to be turned back to the land, as it is slightly toxic and not suitable for grazing, so it does not serve the same purposes which oats and a few other winter cover crops serve.

For the specific purpose of building and enriching the soil, however, it is the best winter cover crop that has been developed thus far in Florida.

The anticipated expansion of acreage of blue lupine, oats, and other winter cover crops is a striking indication that farmers are looking more closely and with greater concern than ever to their land—to the importance of enriching and maintaining it so it will continue productive.

Football's Ace Trouble Shooter Is Seldom In News

By JIMMY JORDAN

AP Newsfeatures

CHICAGO — The name of football's ace trouble shooter seldom hits the sports pages, but his presence is literally felt each Sunday Saturday or Sunday on the gridiron.

He is Hugh (Shorty) Ray, the rules expert Stowatch in hand,

this small modest mechanical drawing teacher attends as many football games as he can—high school, college and professional.

The strictest of rules are observed

and strictest of penalties are imposed for officiating in particular that any other one man.

In fact, many experts concede

that Shorty actually did more to save the game during the 1939

to 20 years when football was under a cloud of mounting

expansion, outlawed rules, bpha

and officiating and druggy con-

tests.

Outraged Eckerson

Had it not been for that stop-

watch, Ray's greatest claim to

fame might have been the fact

he beat the great Walter Eckers-

on in a 100-yard dash more than

40 years ago when he was a

student at the University of Min-

nesota.

Now he makes no claim to

glory at all. Without false

modesty, he claims his part in

the evolution of football from a

bruising—and slow, small-

score—sport to its present pre-

cision type of play. But he is the

man who organized the Athleti-

cians Association, instituted

rules, interpretation clinics, and

invited the famous "play situa-

tion book."

At present, he draws up the

National Football League code

annually, making whatever

changes are necessary, and is

the author of the high school

code.

He's the part the stopwatch

played. Ray found that in many

instances officials were taking

too much time recognizing the

ball and getting it into play

action. He found that field judges

had not accurately timing the

30 seconds allowed to put the ball in play with the time often

running over 35 seconds.

He also determined, and proved,

that an inanimate forward +

not a loss to the passing team.

That was not from his tim-

ing, but from his recognition of

the ball and getting it into play

action. He found that field judges

had not accurately timing the

30 seconds allowed to put the ball in play with the time often

running over 35 seconds.

Labor Conditions On Farms Are Said Becoming Worse

LAKELAND, Sept. 17. (Special) Farm labor conditions in Florida for the coming year threaten to become the worst since the war began, according to Lamonte Gray, manager of the Florida Vegetable Committee. The crisis has been brought to a head, he said, by the fact that war prisoners are being shipped home at a rapid rate, and the legislation for importation of foreign workers expires Dec. 31.

With no assurance that there will be sufficient experienced domestic workers to replace them during the coming season.

The federal government is requesting that American farmers maintain the high level of wartime food production for another crop year. Mr. Gray said the Department of Agriculture fears that only a few of those released from the armed services and war work will turn to agriculture for employment during the Florida season. This fear is borne out by recent studies of the work preferences of returning soldiers. Also, many of those who have worked in war plants will live on unemployment compensation rather than accept farm employment at wages lower than they have been receiving.

A large part of Florida vegetable production would have been lost during the war years if prisoners and foreign laborers had not assisted in planting and harvesting operations. Present indications are that those experienced workers may be sent back to their homes before sufficient domestic workers can be trained to replace them. Food producers face faced with the threat of a labor shortage during a year when prices will probably be below wartime levels. Thus they face the alternative of either reducing their acreage or facing serious financial losses."

Representatives of national farm agencies and of commodity groups will meet in Washington on Sept. 21 to discuss plans for meeting this emergency. Mr.

Gray said. He has proposed a plan for application nationwide which already has been endorsed in principle by the vegetable and citrus growers groups in California, and which will be the basis for the Washington discussion. The program will be presented to the directors of the Vegetable Committee at its meeting in Lakeland on Sept. 26.

The plan provides for setting up a "service" agency with the Department of Agriculture for the recruitment through the nation of an adequate supply of experienced workers in harvesting, packing, and processing, and to route them to areas where they are needed. It is proposed that this service be administered by the Labor Branch of USDA rather than a federal labor agency; the acceptance of employment and hiring will be entirely voluntary upon the part of both farmer and worker, and that the problem of allocating in given areas housing, work requirements, compensation, medical care, etc., be determined and handled at state and county levels. The agency could immediately begin to bring foreign workers to the United States as fast as they could be replaced by experienced domestic workers.

The program aims to provide agriculture with the experienced labor supply essential to production of improved products at lower unit cost, and to assure farm workers a maximum of employment opportunities. Mr. Gray said. While the workers would be located and routed by the federal agency, policies would be determined at the farm level and coordinated by a state agency or by any federal department.
