We are sorry to learn of the transfer of Joe Maren-tette to the Howell Theater in Palatka. We will miss his daily calls at our office as he stopped by on his way to the bank. We will miss his cheery greetings and his bub-bling enthusiasm as we discussed one civic project or nother.

For Joe has been heart and soul behind every progres-ive movement since he came to this city 14 years ago. He has belonged to the various civic organizations, has gorked on numerous Chamber of Commerce committees, has diligently attended meetings, both here and out of town where matters of importance to Sanford were being handled. Throughout all this time he has been full of ideas for his community's growth. He has never let an opportunity pass for giving it good publicity through various news reel organizations. He has always been ready with a sug-gestion, a plan, or a program, which might bring more people to Sanford or help huild a bigger town, and when placed in charge of a committee, he has worked unitringly until the job was dones.

passed in the State for the quality of i's entertainment ind regularly draws patrons to Sanford from Winter Park. Orlando, and even more distant points.

We for one wish him success and all joy and happiness in his new field and hope that his work will not be so con-fining as to keep him from dropping in on us frequently in the future. In saying this we believe we are expressing he sentiment of the great majority of the people of Sanford.

#### The Axis Grows

Benito Mussolini must feel terribly proud of himself for the success he has made as a modern hero at arms. First, he picks a fight with the little ill-prepared semibarbaric nation of Ethlopia and with bombs from the air and armored cars and tanks on the ground finally triumphs over the spears and arrows of his opponents. Now proudly

beating his chest, he launches the invasion of Albania. Long be it said to the credit of the Albanians, they fought back. When the first boatload of Italians landed at Durazzo, they were greeted with a burst of rifle fire that sent them scampering back to their ships leaving half

busses which their grandfathers handed down to them, but like the mountaineers of our own country are every ready to use them and shoot straight.

ades every ready to use them and shoot straight. The is very likely that Mussolini is not conquering this little country of Albania to acquire more lands for his bursting population, but for strategic reasons. It controls the outlet of the Adriatic. It provides easy access to Greece and the other Balkan countries. It completes the encirclement of Yugoslavia, now on the inside of the nut-did cracker much as Czechoslovakia after the seizure of the outer of the cempany.
