The Primary Purpose of the SANFORDBOND AND MORTGAGE COMPANY Is To Negotiate Buy and Sell Mortgages and Bonds, Make Industrial Loans and To Conduct An Abstract and Title Guaranty Department.

Fred R. Wilson, Attorn.y, Sanford, Florida.

# Sources of Profit

One of the chief sources of profit in the Bond and Mortgage business is the brokerage fee or commission charged when a loan is made in addition to the interest on the loan. This profit may be realized several times within a year on the same amount of capital by selling the loan at a further margin of profit and making the original outlay of capital available for reinvestment.

# Abstract and Title Guaranty Dept.

The Company is chartered and equipped to do an Abstract and Title Guaranty business, having parchased the Seminole Abstract Company, to form a nucleus for this department. This feature alone, properly managed, repres sents a profitable business and will also serve to supplement the mortgage loan department.

Acquired habits of thrift and economy prompt the wise investor to diversity his or her investments on the same theory that it is not wise to put all of ones eggs in one basket. In selecting an investment it is wise to select the best one available at home, where the officers are well known, successful men, who can be counted upon to manage the business honestly, and successfully and particularly where such an investment tends to increase the value of ones other local investments.

An investment in the capital stock of the Sanford Bond and Mortgage Company is based upon numerous mortgages selected by a finance committee, composed of the Presidents of three of the leading banks in Seminole County. Being themselves large holders of its capital stock they are protecting your interests in protecting their own.

It will pay you to make prompt investigation of this exceptional investment opportunity. Satisfactory terms of purchase can be arranged.

# Mortgages

The prevailing interest rate of improved real estate mortgages in Florida is 8 per cent per annum while the rate on the same class of loans in financial centers in the north and east is around 6 per cent, the difference between rates representing a good margin of profit on local mortgages sold in a market where the lower interest rates prevail.

# Bonds

The Company will issue its own mortgage bonds or collateral trust notes from time to time and will later buy and sell municipal, school, county, improvement and other bond is sues. The brokerage fee or margin of profit to the company varies according to the character of the issue.
