English Beauty Weds

Hon. Mrs. Evelyn Fitzgerald of England was one of the most beautiful brides of the winter season, her wedding being a great social event. She was Helen Drury, daughter of Maj. Gen. Drury and sister of Lady Beverbrook.

Magnet Removes Iron From Workman's Eye

BERLIN, Jan. 12.—An iron splinter, one millimeter long, was recently removed from the eye of a locksmith with the aid of a gigantic magnet. The splinter had been in the patient's eye for three months before it could be located. Eleven sittings, during each of which the splinter, which was located in a remote corner of the eye, was brought forward a little farther, were necessary to complete the operation.

Dr. Paderborn, the oculist in charge, was particularly concerned about removing the splinter, as the locksmith had lost one eye thirty years ago through a similar mishap. The experiment with the magnet was regarded as one having little prospects of success, but it seemed to be the only alternative to complete blindness.

Late Health Methods Applied to Holy Land

JERUSALEM, Jan. 12.—That Palestine, the land of many diseases, can become a land of health, was the sermon preached during "Health Week" introduced into this country by an American organization. The lessons of health were taught by word of mouth through lectures in schools, synagogues and churches. They were made real by slides and motion pictures, and were popularized by specially prepared leaflets and articles in the Hebrew and Arabic press. The campaign was carried to practically every town of any size and to numerous Arab villages and Jewish agricultural settlements.

Proposed by Dr. Simon Tannenbaum of New York, Palestine director of the Hadassah Medical Organization, whose hospitals and sanitary activities are supported

Expert Declares State Is Almost Free From Goiter

TALLAHASSEE, Jan. 12.—A study of Florida soils and vegetables may be made sometime in the near future to determine their iodine content. Dr. R. M. Harper, geographer and student of plant life who has compiled several volumes for the State Geological Survey on vegetation of Florida, has interested himself in the subject. In studying the matter he has discovered that this state is practically free of goiter, which is caused by the lack of iodine in water and foods found in different parts of the country.

Prevalence of goiter varies greatly in different parts of the world, from almost none along the seashore to nearly the whole population in some parts of the Alps and Himalayas. It was shown by medical examination of soldiers during the World War that in the United States, it is confined chiefly to the northern half of the United States, away from the coast, and is most prevalent around the Great Lakes and west shore thereof, where in some communities as many as 25 per cent of the population (especially young women) have it according to Dr. Harper.

In some communities where goiter is prevalent iodine in suitable quantities is artificially added to the city water supplies. In a pamphlet recently received at the office of the state geologist, a professor at the University of Minnesota has published his determination of the amount of iodine in public water supplies in different parts of the country. He found that where it amounts to less than 22 parts in 100 billion there is danger of goiter, while a higher concentration seemed to make it safe in that respect.

He had only one sample of water from Florida, that from Miami, which was found to be on the safe side, though by only a small margin.

JAPAN COLONIZING WASTE LAND

TOKIO, Jan. 12.—The government is making a strong effort to colonize and develop the waste lands of Hokkaido Island for the 40,000 to 50,000 government employees who will be let out by the first of the year under the retrenchment plan. These men are to be given a substantial bonus upon discharge, and the promoters of the idea believe it will be sufficient to enable them to make a good start on land allotments. About 240 families will be sent to Hokkaido this year and 400 next year under government aid.

by the Women's Zionist Organization of America, "Health Week" ranked gained the interest of leaders of the Jewish, Christian and Moslem communities and the unofficial support of the Palestine government. The week was divided into five days—Hygiene Day, Baby Day, Food Day, Microbe Day and Recreation Day.

Defies Leaders

Major Thornton Mills, pastor of New England, Congregational Church, Chicago, is defying efforts of his church council to remove him from his pulpit. He incurred the council's displeasure by his alleged "radicalism." He made soap-box orators and other liberals just as welcome as those communicants who were paying pew rent, it is charged.

TAMPA GAINS \$16,000,000

TAMPA, Jan. 10.—A gain of \$16,000,000 in the cash value of real estate sales in Tampa during 1924 was shown over the preceding year, it is estimated on the basis of documentary stamp sales by the internal revenue office here. The stamp sales in 1924 totaled \$74,500 as against \$58,400 for 1923. Basing estimates on the required \$1 stamp tax for every \$1,000, the figures show roughly that real estate sold here last year was valued at \$74,000,000.

Beaten and Robbed

MIAMI, Jan. 10.—Martin Downey, 45, beaten into a semi-consciousness with lighted kerosene lamp last night at his home near the city limits by two unknown assailants who robbed him of \$400 according to a report made to the police this morning.

50 Cross Word Puzzles

\$1.35 Postpaid
A complete book of 50 puzzles bound with attractive hard cover, including a Venus Pencil. The Rage of the Day!
Spend evenings profitably by improving your mind. Instructive-educational. These cross word puzzles

will add countless words to your vocabulary. Order NOW and be convinced! Send your order at once. The first volume will surely make you a fan and get you ready for the next series. Send money order, express or cashier's draft. We will ship COD if you desire and charge you the postage.
SPECIAL OFFER.—We will send, postpaid Series 1—2—3 \$1.00

Armour's
BIG CROP Fertilizers
"Make Every Acre Do Its Best"
The many big crops of the fruit and fancy vegetables grown with Armour's BIG CROP fertilizers are our best advertisement. Actual field results clearly prove their superior crop-making ability. Only high grade materials of known value enter into their composition. The plant-food is balanced to suit the needs of the particular crop for which it is intended. They can be depended upon to grow big crops if big crops are possible.

FOR CITRUS AND VEGETABLE CROP
The Armour BIG CROP line is complete. It includes formulas and analyses to suit every Florida crop and soil. Among the four types of BIG CROP citrus mixtures there is one especially adapted to the fall needs of your grove. And there's a BIG CROP vegetable fertilizer to satisfy every need of your soil and crop. Descriptive booklet free on request.

RADICALS CLAIM FRENCH EVIDENCE IN CASES FALSE

Secret Documents That Caused Chamber of Press and Ultimate Government Action Is Forgery of Party Enemies

PARIS, Jan. 13.—Supposedly secret documents that fell into the hands of the French press and provoked insistent demands that the government take repressive measures against Bolshevik agitators in France have been declared to be forgeries by the official Bolshevik organ, Humanite, but such papers as the Temps and Liberté, which have published some of the documents in detail, insist that they are genuine. They appear in many respects to accord perfectly with the recently increased activities of Bolshevik organizations.

The principal document, which sets forth the general plan of propaganda and proselyting, begins with a census blank that all members of the party are called upon to fill out, sign and turn in to their respective groups; this slip gives the central organization means of immediately reaching every member of the party and of watching and controlling his acts. Then follows an outline of the composition of the "cellules d'entreprise" or "cells of industries." These "cells" are organizations set up in every workshop where Communists are employed. They are intended to serve as agents for conversion of their fellow workmen to the Bolshevik cause, and to make it possible to obtain immediate action in every industry and trade or profession when the word is given by the central organization.

The duties of the "cells" are to report the movements of all Communists; to obtain complete information as to the resources, habits, weaknesses, politics and religion of their employers; to locate all stocks of arms and ammunition and generally to supply the central organization with such information as will give it every possible hold on the bourgeois class. There is provision for the reorganization of the party by Jan. 1, 1925, and the establishment of new Communist groups in Paris as well as in the provinces. It is set forth also that the party must intensify and develop its action among the labor unions, and endeavor to give a more important place to women in the revolutionary movement. Work among the peasants is not to be neglected, and the calling of a peasant Communist congress is set for January. Peasant soviets are to be organized.

The activities of Communists in the colonies are prescribed in paragraph which says "the party will undertake a vigorous propaganda by French imperialism and will organize them with a view to their liberation; it will call toward the middle of 1925 a congress of colonial peoples to that effect."

The details of organization provided for agitation among foreign workers in France, and in the army, and intensified revolutionary agitation in the parliamentary group of the party under the supervision of a member of the party who is not a deputy and who will act as secretary for the Communist group in the Chamber of Deputies.

Continuing the document says that the present political situation in France is extremely favorable to Communist propaganda, and charges every member of the party with the obligation of bringing in one new member.

ORANGE LIGHTS PROPOSED

ORLANDO, Jan. 13.—A unique scheme for lighting Orlando has been suggested to the chamber of commerce and has been taken under consideration. With the suggestion was submitted designs for new clothes to be used, which would be made of frosted or transparent glass of orange so they would be easy on the eyes. At the top would be a small metal cap representing a slice of an orange.

BEGIN BRIDGE SOON

BRADENTON, Jan. 13.—J. F. Reynolds, chief engineer of construction of the Bradenton-Palmetto bridge across the Manatee river, announces that work on the fifteen dollar street will begin on Jan. 13. Assembling crews now are engaged in making ready to start building simultaneously at both ends of the bridge.

SCHOOL ENROLMENT BIG

TAMPA, Jan. 13.—Hillsborough county and Tampa schools have an enrollment this season of more than 23,000 pupils who are taught by 677 teachers.

IS YOUR CHILD THIN AND WEAK?

Cod Liver Oil in Sugar Coated Tablets Puts on Flesh and Builds Them Up.

In just a few days—quicker than you ever dreamt of—these wonderful health building, flesh making tablets called McCoy's Cod Liver Oil Compound Tablets will start to help any thin, underweight little one.

After sickness and where results are suspected they are especially valuable. No need to give him any more nasty Cod Liver Oil—these tablets are made to take the place of that good, but all smelling, stomach upsetting oil, and they surely do it.

A very sickly child age 9, gained 12 pounds in 7 months. Ask Howler Pharmacy or any druggist for McCoy's Cod Liver Oil Compound Tablets—the original and genuine—as easy to take as candy and 60 tablets, 60 cents.

"The Vamp" Wins In Soap Sculpture Competition

Judges in Art Center Competition Give Brenda Putnam First Prize Over Six Hundred Other Entries

THE winning work of a soap sculpture competition, which was held in New York, when Brenda Putnam's "The Vamp" carried off the first prize of \$250, offered by Prater & Gamble, Mrs. Ripley Hitchcock, president of the Art Center, which conducted the contest, is shown in the picture with Miss Putnam, prize winner, and "The Vamp" in the foreground. The second prize of \$150, was

won by Margaret Postgate for her "Elephant," and the third prize of \$100, went to "Itabit" by Simon Moselle. About 600 pieces from all over the country were entered in the contest, including portraits, figures, animals, and even abstract ideas. Miss Putnam, a noted New York sculptor, who has won many other prizes and medals, says: "Carving in soap has been an inspiration to me, because it has shown me how far I had gotten

from sculpturing. I think it will also be an inspiration to other sculptors. Everybody cannot afford to experiment in marble, nor have they the strength to handle the heavy blocks, but everyone can try to develop sculpture ability in soap. Other cities may have a chance to see the most interesting pieces entered in the contest, as arrangements are being made to exhibit them in leading museums throughout the country.

Vanity Of Flappers Brings Prosperity To English Mills

LONDON, Jan. 13.—The little shop girls of Ireland are responsible for a boom in the artificial silk trade that is one of the bright spots in the business life of these isles.

The manufacturers of a new process of weaving artificial silk materials, an industry started long before the war, are now banking fat dividends because the girls in the shops and offices, and even schools, are no longer content to wear the cotton stockings and cotton blouses which they displayed before and throughout the war. That aptitude for style changing which in America could make and unmake flapper fashions overnight, moves slower in England, and a year or so ago the English girls found that much of their standing was based upon silk stockings.

The manufacturers of the artificial silk trade then reopened their mills, closed by post war dormancy, and have kept the factories working overtime producing stockings, blouses and other similar articles. The artificial silk trade has grown until now most of the long established woolen and cotton spinning firms are producing artificial silk of some sort. Machinery for making artificial silk garments and novelties is being invented and marketed daily.

The industry has spread also to India, where artificial silk shawls, headresses and cloths are being produced with even a more luxurious gloss and feathery softness than real silk.

Results That Last

Proven by Sanford People

Thousands of kidney sufferers have tried remedy after remedy with only temporary benefit. That's mighty discouraging. But one kidney remedy has earned a reputation for lasting results and there's plenty of proof right here in Sanford.

Read this experience of one who used Doan's Pills years ago and now makes her endorsement even stronger. Mrs. W. F. Leavitt, 317 W. Third Street, Sanford, says: "Sharp pains shot through my back and there was a dull ache across my kidneys all the time. I had to take to bed, as I couldn't be on my feet. I suffered from terrible headaches. Doan's Pills cured me."

The above statement was given March 19, 1918 and on Feb. 2, 1922, Mrs. Leavitt added: "I haven't needed a kidney remedy since Doan's cured me. 60c at all dealers. Foster-McBurn Co., Mfrs., Buffalo, N. Y."

Rhodes Scholars Increase In Number

LONDON, Jan. 13.—The statement for the academic year 1923-1924, issued by the Rhodes Trust in connection with the Rhodes Scholarships, shows that during the year 64 Rhodes scholars took up their scholarships for the first time.

The number actually in residence for either the whole year or part of the academic year was 220, those from the United States numbering 111 and those from the British empire 109. The academic year 1924-1925 starts with 180 scholars in residence.

Notice is given that the value of the scholarship has been increased for the present by the addition of an annual bonus of \$250 which the holder must be prepared to supplement with another \$250 a year.

New Smyrna—Corporate limits of city to be definitely extended to Atlantic ocean beach.

Prussian Prisoners Made Comfortable

BERLIN, Jan. 13.—Prussian prisoners are now making the life of well-behaved prisoners much easier, and endeavoring to lead prisoners back to normal life by modifying their punishment to the same degree that they show themselves worthy of confidence.

The hair of prisoners is no longer shaved off, and light rooms decorated with flowering plants are given to wrongdoers who behave themselves and are industrious. They are also given better food. Imprisonment in darkened rooms has been abandoned entirely. Working hours are reduced from ten to nine daily in the case of men who show an inclination to study, and conduct themselves in an orderly manner when not at work.

Stuart—37,000 acre tract in Palm Beach county, along line of new Florida Western & Northern Railroad, to be developed.

Hamburg Humorist Flays Nationalities

HAMBURG, Jan. 13.—A column conductor on the Hamburg Correspondent has compiled a number of opinions about the salient characteristics of men of different nationalities. Here are some of them: "One American is a silent drinker. Two organize a limited company, and three enact the prohibition of alcohol." "One Englishman is an eccentric creature. Two organize an athletic contest, and three make a great nation." "One German is a pedant. Two found a brewery, and three make war."

"One Italian is a syndicalist. Two make a love tragedy and three march against Rome." "One Russian represents a variety of political parties."

Lake Worth—Proposed improvements on Hypoluxo Island to cost \$85,000.

Bradenton—\$783,000 bond issue voted for civic improvements.

SULPHUR IS BEST TO CLEAR SKIN

Any breaking out or skin irritation on face, neck or body is overcome quickest by applying Mentho-Sulphur says a noted specialist. Because of its germ destroying properties, nothing has ever been found to take the place of this sulphur preparation that instantly brings relief from itching, burning and irritation. Mentho-Sulphur heals eczema right up, leaving the skin clear and smooth. It seldom fails to relieve the torment or disfigurement. A little jar of Rowley Mentho-Sulphur may be obtained at any drug store. It is used like cold cream.

Germans In South Africa Are Keen On Old Holdings

PETOWN, Jan. 12.—Germans scheming to win back their lands in South Africa, and according to Dr. Fogarty, Anglican bishop of Damaraland, South-West Africa, will virtually be restored to their certain political proposals. The Mail's correspondent notes the bishop as saying: General Hertzog, the prime minister, accedes to the request of Germans for entire self government; and we have a legislative council composed of elected members, and safely say that every member of the house will be a German. The event it is easy to imagine things being pulled in Berlin, the result would be equivalent to the South-West Africa back German people."

German properties in the Transvaal, West Africa, were put up for auction recently and fetched \$1,125,000. Protest was made at the beginning of the sale and the lands should not be allowed to revert to German owners, the auctioneer said that the enemy subjects would be taken to bid. The bulk, however, was taken by British subscribers, although he had them for speculation, he did intend to resell them to Germany.

City wharf on Rex property being improved at \$9,750.98.

Site on Banana Avenue selected for erection of \$3,000 hotel.

\$142,000 bond issue for extension of waterworks sewer system.

She May Be Queen!

Heretofore some society girl in silk and furs has been chosen queen of San Francisco's Mardi Gras. But it may be different this year. Constance White, a telephone operator, has been chosen by a committee of business men to compete with the social lights for the queenship.

Tiny Filipino Is Worst Of Citrus Diseases Curable At Age Of Fifty Declares Specialist

MANILA, Jan. 13.—Diki Diki, diminutive chieftain of the Island of North Ubian, Sulu, after many disappointments in love, has finally won the affections of Ajaratol, also a Iliputian, and the wedding will take place shortly at Jolo capital of the province.

Diki Diki, who is the most important man of the island, is just 36½ inches in height while his fiancée is three inches shorter.

Ajaratol who lives on the Island of Usada, ten miles from North Ubian, is 1 year old and has had many suitors for her hand. Diki Diki, however, in spite of his 50 years, has won over all his competitors. Maharaja Kiram, Diki Diki's chief rival for the affections of Ajaratol is to be best man at the wedding and Imam Ovil, another rival, is to perform the Mohammedan ceremony. The granddaughter of Hadji Butu, the most influential Moro, is to be bridesmaid.

Some time ago when the public school authorities gathered in all children of school age, Diki Diki was caught in the net. It was several months before his real age was discovered and he was released from school attendance. He declined, however, to quit school and is now an ardent pupil in the second grade at the age of 50.

Daytona — Florida East Coast Railroad completes construction of passenger station.

Tampa—Bond issue of \$3,500,000 proposed for improvements in northeastern section of city.

GAINESVILLE, Jan. 13.—"Just about the worst diseases of citrus fruit can be controlled if the correct procedure is followed. These diseases are melanose and stem-end rot. The procedure calls for pruning in winter, before the spring flush of growth; and spraying with 3-3-50 bordeaux mixture (plus oil) from ten to twenty days after the blossoms have dropped."

This, in brief, is what O. F. Burger, plant pathologist of the Florida Experiment Station, has to say about how to control these troublesome diseases of citrus fruit. Discussing the subject, he says further:

Winter is the dormant season, or the most nearly dormant season, in the citrus grove, and those months are the time when pruning should be done. Pruning in spring after the sap has started rising to the limbs and leaves—after growth has started—should never be practiced, advises this disease specialist.

After this first measure has been taken, put away the pruning knives and saws and wait for the time when the second measure is in order. This measure is spraying with 3-3-50 bordeaux mixture which has been mixed with an equal amount of spraying oil. This spraying should be done from ten to twenty days after the blossoms have dropped. And one application is sufficient, unless there is a very heavy bloom in June. In this case, spray then ten to twenty days after the blossoms drop. That would mean that under no circumstances are more than two spraying applications necessary.

Born In Different Years

Twin brothers, but born in different months and different years. That's what these two Amarillo (Tex) boys can tell the world when they grow up. The nurse is shown holding James Ray Daniel in her right arm and Thomas Rex Daniel in the left arm. James Ray was born at 9:45 p. m., Dec. 31; Thomas Rex was born at 1:40 a. m., Jan. 1. Each weighed 7 1/2 pounds at birth. The father, a barber, now has something to talk to his customers about besides racing and baseball.

Plant City—Work to start on \$30,000 street improvement program.

Tampa—Plans completed for construction of two city bridges; aggregate cost \$700,000.

Okeechobee—State Road No. 8 to be widened between Kissimmee River and Lake Annie.

Winter Haven—Sub-division of Leonard property under way.

German Stamps War Period Collector's Album

BERLIN, Jan. 13.—Every variety of postage stamps that was issued by German states or German federal government on view at a postage stamp held here this month in connection with the seventy-fifth anniversary of the issuance of German stamps and the fiftieth anniversary of the founding of the Universal Postal Union.

The fair was devoted exclusively to German philately. The volume of the World War foundress in the numerous charges of Belgian, French, Rumanian, Russian and other areas, and the surcharge British, French and Belgian offices on stamps of the German colonies.

There was eloquent testimony to the conditions of the inflation period by the infinite variety of new issues and surcharged issues that succeeded each other almost before the ink was dry. Some exhibitors made a specialty of collecting the temporary stamps of military internment camps, such as Ruhleben, during World War. Others collected in Germany but the registration stamps of German cities. One collector seems to have spent a lifetime discovering the delicate differences of color in certain stamps, such as the 1½ shilling violet of Hamburg of 1864.

Tampa—Building permits issued during 1924 totaled \$460,836, compared with \$230,123 last year.

Clearwater—Good headway in making improving local harbor.

PERCY WENDELL MAY BE CHOSEN HARVARD COACH

Former All-American Fullback and Recently Coach at Williams College Reported As Likely Fisher's Successor

CAMBRIDGE, Mass., Jan. 13.—The report that Percy Wendell, former all-American fullback, recently coach at Williams and now under contract with Leigh university, would be sought as head coach at Harvard for the 1925 season, was circulated late Monday after Fred W. Moore, graduate treasurer of athletics, had denied that Charles D. Dally, former Harvard and Army quarterback, had been selected for the position by the graduate advisory football committee. While no official statement was forthcoming, as to the status of Robert T. Fisher, head coach of the Crimson for six years, it was generally accepted in Harvard athletic circles that the Fisher regime was over and that a new coaching administration would be inaugurated with the next football season.

Members of the advisory football committee, whose meeting in Boston last night gave rise to the rumors of Dally's selection, maintained silence today. Well informed members of the Harvard athletic association admitted, however, that there was a strong desire to obtain Wendell's services.

Wendell who made a record as coach during his four years at Williams, has signed a contract to coach Leigh eleven for three years. This contract calls for \$10,000 a year, it is understood. When Wendell accepted the offer, it was with the understanding that he could be released if called by Harvard, according to reports published at the time.

Fisher refused Monday to confirm or deny reports that he had resigned. Fisher, who was captain of Harvard's 1911 team, succeeded Percy Doughton as head coach in 1919. In terms won their objective aim with Yale in that year, and free following, but met with crushing defeat in 1923 and 1924.

To Toss Horse Shoes for \$5,000 in Prizes

LAKE WORTH, Jan. 13.—Cash prizes and trophies valued at \$5,000 will be awarded winners in a second straight tournament to be held here by the National Horse Shoe Pitchers' association, according to Al Michler, president. The event will be held Feb. 10-24. A much larger gathering is expected than participated last year when the tournament lasted only five days. Cash amounting to \$10,000 will be given in prizes, while the trophies will amount to \$30,000 and a \$500 bonus the national association.

Immunity Dies Slowly In German Plants

BERLIN, Jan. 13.—Of the various interallied missions which have been functioning in Germany since the end of the war, there is one of the least upon which position are not eagerly sought. This is the Military Commission of Control, whose duty it is to probe Germany's military activities and see that no arms are being manufactured beyond the limits provided by the Treaty of Versailles. There have been many official incidents when official visits were made to fortresses and ammunition plants.

Since the commission began its work in 1919 some 993 official visits have been paid to quarters connected one way or another with a German army. As the coming of the commission members is now to the German officials at least 48 hours in advance, the residents in the district where the inspection is to take place are nearly always menacingly assembled, and the police are to be called to disperse the intruders who often threaten to do foreigners bodily harm.

Americans Become Flyers In Europe

WASHINGTON, Jan. 13.—Aericians develop a penchant for flying when they get to Europe, according to Lieutenant John P. Zapf, of the United States service, who has just returned from a 6,000 mile air trip through Europe studying development of a commercial aeronautics.

During the summer weeks 1,000 passengers leave London to visit Paris, and the majority are American tourists. More than 35,000 Americans have flown between British and French capitals, flying from four to eight hours the trip, and avoiding the turbulent English channel which has used many a traveler to lose his life for the sea.

German Artists Get Rental on Paintings

MUNICH, Jan. 13.—German artists have devised a novel way of raising a little money while prospective purchasers of their paintings are making up their minds. Through a central organization they will loan their pictures, at a fee, to individuals and societies.

Ski-Golf, Latest in Sport

Leave it to the ladies fair to introduce the latest innovations. Here we have Miss Kay Clark of New York City playing a round of golf at Poland Springs, Me., on her skis. The fad has gone over big at Poland Springs, Me., and Lake Placid, New York, where there is always plenty of snow for ski-golf. Despite the rather awkward stance made necessary because of the use of skis, some surprisingly low scores have been made. The lady, Francis Rogan, is also similarly equipped and follows Miss Clark with ease.

Phantom Finn Will Race In Chicago And New York City During This Week

NEW YORK, Jan. 13.—Panvo Nurmi will put his remarkable speed and stamina to its greatest tests this week when on successive nights he will attempt to lower seven world indoor records in two races at New York and Chicago. Twice before, at the Olympics, and again a week ago at Madison Square Garden, the phantom Finn demonstrated his ability to run two record-breaking races within less than two hours of each other. Even these performances, however, will be eclipsed if he is successful in equalling any records here Thursday night, taking a 21 our train ride to Chicago and then racing to victory, and new records again there Friday night against Jule Ray and other stars.

Nurmi is slated to run 3,000 metres or slightly less than two miles at Madison Square Garden Thursday in connection with the national junior indoor championships. On his way to the finishes he will be clocked at the mile and a half mile and three-quarters marks. At Chicago he will run a mile and three-quarters and be clocked also at the mile, mile and a quarter and a half and a half mile.

REGULATES FLYING

MIAMI, Jan. 13.—An emergency ordinance has been passed by the city council of Miami Beach making it unlawful for any aircraft excepting balloons to come within 1,000 feet of the ground at Miami Beach. It also provided that no aircraft could land within 1,500 feet of where a crowd is congregated.

Fort Pierce—New Building Projects

Fort Pierce—New building projects include \$50,000 hotel, \$20,000 apartment house and 20 new dwellings.

Calles' Son

President Plutarco Elias Calles of Mexico. This is Adolfo E. Calles, son of the President. He has been visiting in the United States. This picture was taken in San Antonio, Texas, following his first airplane flight. He enjoyed it immensely.

George Gibson New Coach For Chicago Succeeding Dugey

CHICAGO, Jan. 13.—George Gibson, veteran catcher and former pilot of the Pittsburgh Pirates, Monday became coach of the Chicago Cubs, succeeding Oscar Dugey, who was unconditionally released.

Gibson, a student of the old school started his baseball career with the Buffalo club in 1903. He joined the pirates in 1904, remaining for eleven years. While with the Pittsburgh club he established a major league record for catching consecutive games. This record 150 games stood until Ray Schalk of the White Sox took the honor by backstopping in 151 contests.

Gibson went to the New York Giants in 1917 and 1918, but was sent to Montreal the following year. Pittsburgh claimed Gibson as manager in 1920 but in 1922 he was succeeded by William McKechnie. The new coach the following season coached the Washington Senators under the management of Donnie Bush. Last season Gibson spent his time hunting and fishing.

Johnson Or Lane May Become New Owner of The Vernon Franchise

LOS ANGELES, Jan. 13.—Reports that H. W. Lane, former owner of the Salt Lake club of the Pacific Coast Baseball League, and Walter Johnson, veteran pitcher of the Washington club of the American League, were bidding against each other for the Vernon club franchise were in circulation here Monday. These reports were coincident with a session of directors of the coast league to discuss a 1925 playing schedule and other league matters.

Lane, while denying he held an option on the Vernon club, said either he or Johnson would get the franchise, according to the highest bid made.

The club owners and directors voted to play a post-season "little world series" with the American Association.

Miami—1924 building operations in Miami and Miami Beach totaled \$25,000,000. Census gained 440 per cent from 1910 to 1921, and 300 per cent from 1920 to 1924.

Its coolness and mellow "body" are a revelation to pipe smokers

Back about 1870, James N. Wellman developed a secret tobacco process which won instant and widespread favor. It yielded a fuller-bodied richness, mildness and fragrance which just seemed to "go" with a pipe. No one else ever knew his secret until we acquired "Wellman's Method" and by its means made "Granger Rough Cut"
