

The Red Cross Campaign Great Success

STATE MARKETING BUREAU CREATED BY LEGISLATURE EFFECTIVE JULY FIRST

Farmers Must Co-operate to Make New Law Success

The law to create a State Marketing Bureau will become effective July 1, and plans are under way to put it into operation. To enact a law is one thing, but to fully carry out its intention is another. That there is need of a public system of marketing there is no shadow of doubt. To make it a success will require most consistent and earnest cooperation of all interests.

Without cooperation how can the farmer—acting individually—increase his profits and save for his own part of the present wasteful cost of distributing the products of his farm? Can he alone by improving the quality and appearance of his products obtain a price ample to pay him for the increased cost?

An illustration as to the point is seen in an investigation undertaken some time ago by the U. S. Department of agriculture in reference to the egg industry. It was estimated from the findings that the country produced \$300,000,000 worth of eggs annually, but at least 15 per cent or \$45,000,000 was lost through improper or careless methods of handling before the eggs left the farm. Eggs laid in dirty nests, on the ground, in any old place, will not keep as well as those laid in clean, dry nests. Eggs left to stand in the sun begin at once to deteriorate in quality if they do not actually spoil. Dirty and under sized eggs are poor sellers. The food supply of the country and the profits of the farmer must naturally suffer by such methods. To avoid these conditions requires the utmost care on the part of the producer.

Now to the point. To get results and show the benefit and need of cooperation the Department concentrated its efforts in one state, Kansas. A campaign of education was inaugurated, various cooperative associations were organized, producers and buyers worked in harmony, care was given to production, eggs were graded and topped the market in quality and price, and shipments are now being made by train loads. What is being done with eggs in Kansas can be done in Florida with eggs as well as other products of the farm.

Florida is an agricultural state. Large results are possible here on limited areas as obtain in few other states. Farming can be made profitable, but it is not possible unless there is a successful and contented rural population with farm raised boys and girls retained at home. The young folks can be kept there if they are given recognition and made to feel their responsibility and given a share in the proceeds. The boys and girls are needed on the farm to keep the minds of parents young and their spirits sweet. They are needed there to combine and make better from experience the greatest and most important business on earth. By all means let the farmer be led to properly estimate his high and honorable place in the community. Our own Washington was more enamored of the farm than the tented field, and pronounced agriculture "the most healthy, the most useful, and the most noble employment of man." A sterling and virile rural population cannot exist unless the farms are owned by those who operate them, and the operators will not own the farms unless farming pays.

A problem confronting America is the coming of millions from alien lands, a problem to be intensified when the war closes, coming from countries where energy is now carrying forward many forms of industry and destruction at a high pitch, but when peace comes there will be a diabolical taking of stock, and under the dull burden of taxes, eyes will be turned to this most favored land. Many of these new comers of other tongues will become tenants and adapt themselves to conditions un-

der which they developed. A tenantry class is a peasant class, living in conditions not unlike the slums of the great cities. Such possibilities must be resisted by every known means. An educational campaign to show that farming is a profession, and has its duties and rights to be protected and encouraged will be justified for generations to come.

The results of the investigation of the census of 1910, showed the distribution of the cost of American farm products, of thirteen billions of dollars, in percentage on the basis of 100, was as follows:

Received by farmers	16.1
Received by railroads	3.8
Legitimate expense of selling	9.2
Waste in selling	12.0
Profits of dealers	28.9

The waste that year in selling was a billion and a half, or \$17.00 per capita—or five times the assessed valuation in Florida and combined with quick profits of dealers for handling runs quite to the amount received by the original producers for their year's work. Cooperation in America is limited, for various reasons, but in the main because of the American farmer's spirit of going it alone, of distrust in each other, and to the fact that corporations by organization have gotten control in large part of handling and distributing food products.

Marketing bureaus are in operation in a number of American states, and as farmers cooperate they profit by it. The farmers of Florida must get together on this marketing proposition. Its plans and purposes will soon be made public. The members of the Farmers' Union of the state and nation are solidly back of it. Let every farmer of the state get behind it. The finding of a market is not all. It means that the farmer must produce staple crops and those crops must be properly graded and packed. It means system and organization along the whole line, from seed selection to the standardization of all products of garden, grove, field and range.

The fact before the farmers of Florida is to think, study and practice cooperation. Success in banking, manufacturing and merchandising rests upon cooperation and system. The message of the marketing bureau is that the country people of Florida must either get together for their own interest and benefit. The secret of success is in united efficiency, wherein specialization is set over against generalization and concentration over against disorder and looseness. That is the practical thing—and nothing is wholesome and enduring that is not practical.

That the stricken world is anxious is heard in the cry from the cities, government offices, from ships and army fronts, that "the war will be won or lost by the farmers." If the farmers get together and keep together in cooperation, as is the case with armies, navies and other forms of business, there will be no question as to their permanent ascendancy and supremacy in having a full say so in all of the affairs of commerce and government.

W. A. McRae, com. agriculture

Cults Is Healed

We have been honored with the acquaintance and friendship of several governors of Florida, and we knew all of them well enough to know that none of them thought it necessary to uphold the dignity of his position by carrying a concealed weapon in his hip pocket while discharging the people's business in the executive office.—Lakeland Telegram.

Proud Papa Privett

J. C. Privett, state child labor inspector is keeping busy handing out cigars today, the generosity being attendant of the arrival of a new heir at the Privett home, 276 Talleyrand avenue. The youngster arrived Saturday and weighed 11 pounds.—Jacksonville Metropolis.

OUR NATION RESPONDING TO THE CALL

Red Cross Week National Campaign For Funds

All over the nation this week has been observed as Red Cross Week and the same campaign carried out as was observed here. The nation asks for one hundred million dollars and it is the belief of those who know that the fund will be oversubscribed.

The nation wide Red Cross financial campaign neared the end of the week with more than half of the \$100,000,000 fund already pledged. Reports to national headquarters in Washington this morning showed a total of \$43,500,000. Red Cross officials warned against relaxation of efforts at this period of the campaign. Much preliminary work before the campaign opened, resulted during the first three days in a flow of pledges which may not continue, it was said.

The critical period of the campaign has arrived, said Henry P. Davison, head of the Red Cross war council. "We must not let up now; rather we should over subscribe the fund. The Red Cross cannot fail in this effort."

More than 100 cities have already exceeded their allotment. The leading cities however still have more than half of their allotments to gather. Headquarters reports at the opening of today's work showed the proportion of the southern cities had raised of their allotment:

Richmond, 158 per cent, New Orleans, 67; Chattanooga, 48; Louisville, 46; Birmingham, 46; Nashville, 34; Charleston, S. C., 31; Dallas, 29; Norfolk, 24; Jacksonville, 5.

Officials explained that some cities have raised more than these figures indicate but have failed to report in full.

Virginia continues to lead the southern states in the amount collected in the Red Cross war fund campaign. She has raised \$4,182,213 of her \$1,000,000 allotment. Kentucky has taken in \$226,563 of her \$500,000 she is striving for.

Louisiana is well on toward the \$400,000 mark and Tennessee is about \$200,000; next comes Alabama with \$124,825 and Georgia with \$111,213. South Carolina has raised only \$50,820 of her \$300,000 and North Carolina has \$49,019 of her expected \$500,000. Florida has \$51,086 of her \$400,000 and Mississippi brings up the rear with \$2,490 out of \$150,000.

Proclamation by the President

I hereby designate the period June 23rd to June 30th, next, as recruiting week for the Regular Army and call upon unmarried men between the ages of 18 and 40 years, who have no dependents and who are not engaged in pursuits virtually necessary to the prosecution of the war, to present themselves for enlistment during the week herein designated to the number of 70,000.

WOODROW WILSON.

Orlando's Band Again

Nearly every newspaper in the state has had some remark, facetious or otherwise, in regard to the fact that the music furnished by the Orlando band killed a mule. All we have to say is that the Orlando band will have to be a liver body than the Arcadia Merchant Band has been for the past four months or more if it kills anything. Maybe the mule, like the old Liberty Bellman of Revolutionary fame, died of joy. There now!—Arcadia News.

SUBMARINES ARE ACTIVE THIS WEEK

Big Tonnage of Vessels Reported Sunk By Subs

Some heavy fighting is progressing on the Aisne front in northern France where the French are safely entrenched in their new positions after their notable spring campaign. The Germans apparently have reinforced their troops in this sector with men brought from the Russian front and one such division entered the fighting immediately after its arrival, making the attack yesterday on the Aisne river and the Laury mill. The assault was a work of extremely violent character. The French stopped the German rush, suffering only a slight penetration of their first line at two points aggregating between 600 and 700 yards, Paris reports.

Even this slight gain was aptly nullified the morning when a French counter attack resulted in the capture of a portion of the lost ground. The crown prince's troops lost heavily in the fighting and the French captured fifty prisoners.

Paris, France, June 21. Jules Cambon of the ministry of foreign affairs declared that the entrance of America into the war has caused a great unrest in Germany in the course of an interview with a correspondent of the Associated Press today he said.

In the hearts of the French people who welcomed General Pershing there was first of all the desire to reply to the enthusiastic reception which the American people gave the French delegates but there was also something else equally important. A feeling of righteousness was caused in Germany by the entry into the struggle of a country which brings to the allies a counter strength of troops and arms which were not being furnished by these allies of war. Germany felt that the American were engaged in the struggle will not give up. It is to prevent this cementing of close ties that it is multiplying its efforts to spread dissension among the allies.

"The incident of the Swiss Socialist's Grimm's intrigue in Russia reveals Germany's handiwork and is one of the strands showing how uneasy and troubled Berlin is because of America. In France everyone realizes that this uneasiness and fear are justified."

Paris, Wednesday, June 21.—German submarine which torpedoed a British steamer turned its guns on the life boats and killed eight of the occupants, the admiralty announced tonight.

"One of our patrol boats of the British flotilla," the statement says, "picked up fifty men belonging to a submarine-British steamer and drove off with its guns two submarines which were still close to the boats in which the British crew had taken refuge the night before. A patrol boat of the same flotilla saved 40 men from a British steamer. The submarine which torpedoed her turned its guns on the life boats, killing eight of the occupants."

London, June 20.—Twenty-seven British ships of more than 1,600 tons have been sunk, according to the weekly British summary given out today. Five British vessels under 1,600 tons were sent to the bottom. No fishing vessels were destroyed.

The summary follows: Arrivals, 2,897; sailings, 2,993. British merchant ships over 1,600 tons sunk by mine or submarine, including 3 previously, 27; under 1,600 tons, including 1 previously, 5. British merchant ships unsuccessfully attacked, including 2 previously 31.

The foregoing figures of British shipping losses as the result of Ger-

RED CROSS CAMPAIGN SHOWS GREAT RESULTS BIG RALLY LAST NIGHT

many's submarine warfare show a larger number of vessels of 1,600 tons or over sunk than in any of the six preceding weeks. Not since the seventh day period ending April 28, has a greater number of ships of 1,600 tons or over been sunk. During that week 51 vessels, 38 over and 13 under 1,600 tons were sunk. The heaviest total since the Teuton submarine campaign was opened in February last was registered in the week ending April 21, when forty steamers of more than 1,600 tons were sunk, and 15 of the smaller tonnage were sent to the bottom.

Since the middle of April, when the undersea boat activity recorded its highest toll, 403 British vessels, of which 220 measured more than 1,600 tons, were sunk, the weekly total being as follows:

Week ending	Over 1600 tons	Under 1600 tons
April 21	40	15
April 28	51	13
May 5	41	11
May 12	48	9
May 19	48	9
May 26	40	1
June 3	45	1
June 10	22	10
June 20	27	5

Another Year of War

Washington, June 20.—Reports received from officers of the army and navy, who have arrived in Europe and have had time to get a view of the situation at close range indicate that the war will last another year at least. If these surmises are correct, another season in war prices may be expected. With greatly deficient crops in Europe owing to the reduced acreage and unfavorable weather throughout the winter and spring the requirements of winter will be much larger. These facts, it is emphasized, make it imperative that the people of this country economize in every way possible.

Over One Thousand Dollars Raised in Sanford in Four Days

With their customary whole heartedness and capacity to do anything that is asked of them the people of this city and county put on a campaign for the Red Cross this week that was a whirlwind campaign and while there is some money to come in before Saturday night the real campaign really ended last night with a big rally at the band stand in Central Park where the amounts raised during the first four days of the campaign were announced and great cheering and enthusiasm. We are far from the sound of actual warfare but our people are realizing more and more what this war will mean to us unless the needs of the armies already in the field and the allied armies in Europe are well supplied with all that they need in order to stem the tide of German invaders and thrust them back upon their own territory before another winter. We are awakening and the great Red Cross campaign has done more to awaken the people than any other move since the war started. For four days the different committees appointed for the work of raising a great amount for the first Red Cross contribution have been working unceasingly and yesterday the Tag Day brought a great outpouring of money in nickels and dimes and pennies and some larger amounts and the pots boiling at the First National Bank and other corners were well filled with the streams of coins, the little girls and the boys also covered the town and tagged every one on the streets and last night the announcement of the result was most encouraging.

Dr. T. A. Neal, the chairman of the Seminoles branch acted as chairman of the meeting and together with Dr. Hyman F. P. Foster and many others gave addresses that were full of the fires of patriotism and true Americanism and brought their hearers to a full realization of the needs and the sacrifices of this war.

There is another day remaining of the campaign and while the amount raised is very satisfactory there are many who have not given to this cause that is most worthy and if they will contribute tomorrow the Sanford part of the fund can be raised to the sum of \$2,000. It is expected now that the county will raise \$300,000, making Seminoles county's contribution the grand total of \$5,000.

The final report and many details of the great campaign will be given in another issue of the Herald and those who have worked unceasingly for this fund will be given due credit and the names of the contributors will be given also and the world should know who is who and why in this great crisis. The following report of Dr. Hyman gives the amount as read from the band stand at the rally last night:

Report of Red Cross contributions to Thursday night:	
Group 1, Mr. Maitnes, Captain	\$ 329.85
Group 2, Mr. Parrish Captain	53.30
Group 3, Mr. O'Riordan, Captain	66.87
Group 4, Mr. Brady, Captain	\$32.91
Group 5, Mr. Hagan, Captain	74.09
Children—Mrs. Terheun	80.44
First National Bank—Pot	73.55

\$1,014.01
Wanted by Saturday night—this fund to reach \$2,000.00 if Sanford and \$3,000.00 for county as a whole.
George Hyman,
Sanford Manager.

Among The Theatres

Star of "Woman's Fight," can fight Geraldine O'Brien, the Broadway favorite who stars in "A Woman's Fight," the Pathe Gold Rooster Play at the Lyric Theatre tonight has stamina, nerve and a punch. The picture proves it.

Except in the prize fight films that the law forbids nowadays, there is nowhere on the screen such an exhibition of fistic prowess as Miss O'Brien displays in a certain scene in "A Woman's Fight." Admirers who know Miss O'Brien as a gentle stage favorite, cannot have suspected that she was so "handy with her fists." Beyond a doubt this usually passive young woman went into special training for the picture.

Miss O'Brien plays a factory worker who decides to take the part of another factory girl, very young and very slight, who is much picked upon by a third factory girl. The latter is brawny and a friend of the boss. That makes no difference to Miss O'Brien who won't have her little friend eternally abused. She lands on the boss's friend. The friend launches a counter offensive. Miss O'Brien meets it. Right here you guess that the young woman has been in special training.

Herbert Blache, who produced this Gold Rooster Play, stopped directing in the excitement—and for fear that the police would stop the bout and arrest the "manager."

Rumor even hath it that as the fight waxed hot, bets were placed on the outcome by studios—from a safe distance—who thought the scrap was real. Lyric Tonight.

The feature at the Lyric Theatre is "A Modern Monte Cristo," a Pathe Gold Rooster Play produced by Thanhouser with Vincent Serrano, famous as Maude Adams' leading man as the star. Serrano is also particularly identified with Augustus Thomas' "Arizona," since he created the role of Lieutenant Denton and played it more than a thousand times. He is one of the best-known actors on Broadway and gives to his role in "A Modern Monte Cristo" the same finish that made him famous on the legitimate stage.

"A Modern Monte Cristo" is as the name suggests a story somewhat similar to Dumas' "Count of Monte Cristo" in a modern setting. It was written by Lloyd Lonergan and the production has been made in Jacksonville, Fla., Block Island, N. Y., and New Rochelle, N. Y., under the direction of Eugene Moore with a splendid cast.

The showing of "A Modern Monte Cristo" marks the rise of Gladys Dore, the beautiful little Thanhouser actress, to important parts. She recently made her motion picture debut and her beautiful face and charming manner came immediately to the attention of her manager.

"A Modern Monte Cristo" is also lucky in having as its companion little Helen Badgley, the celebrated Thanhouser child actress.

Dumas, the "Count of Monte Cristo," is one of the most famous books in literature and everyone has read it or wanted to. "A Modern Monte Cristo" is a picture that gives one the same scene in a modern setting. It is a tale of a young doctor betrayed by a false friend who nurses a secret hate because he has been rejected by the girl the doctor is to marry. How the rival throws suspicion on the latter as the wilful murderer of a man who had died in undergoing an operation at his hand, how he marries the girl to whom the other was engaged and how he is brought to final justice makes a powerful and absorbing story.

"A Modern Monte Cristo" is a strong photoplay of today. The characters are all convincing and in capable hands. Among the remarkable scenes are a rescue from a desert island by an aviator during a trans-Atlantic trip, and scenes aboard a sinking ship that lend true atmosphere to the sea. Lyric Wednesday.

"A Modern Monte Cristo" is nearly everyone has read Dumas' "Count of Monte Cristo." Now the story has been placed in a modern setting, and produced as a photoplay by the Thanhouser Company. "A Modern Monte Cristo" stars Vincent Serrano, who gives to the photodrama the same element of finish shown in his characterization of Lieutenant Denton, in Augustus Thomas' "Arizona."

"A Modern Monte Cristo" was written by Lloyd Lonergan and directed by Eugene Moore. Mr. Lonergan and Mr. Moore contrived to keep Mr. Serrano very busy in the play. In the limited space of five reels he holds a bachelors' banquet, performs a surgical operation which results fatally, answers an accusation of his supposed best friend by escaping from the police with a high dive from a bridge over the river, ships as a sailor, vows an oath of vengeance and saves by chance the daughter of his enemy from shipwreck, after which the two are marooned on an island, until rescued by an aeroplane. He returns to the island to engage in secret pearl fishing with the aid of a diving helmet and then appears before his foe as an immensely rich Brazilian and accomplishes his revenge in a spectacular, satisfying manner.

Vincent Serrano is supported in a "Modern Monte Cristo" by Thomas A. Curran, Boyd Marshall, Gladys Dore and Helen Badgley, the famous Thanhouser child actress. The play was filmed at Jacksonville, Fla., and Block Island, N. Y., and New Rochelle, N. Y.

It will be shown at the Lyric Theatre on the Pathe Program Wednesday.

A TOURING EPISODE

By PAULINE D. EDWARDS

My dear Belle, I have had an adventure, and I must tell you all about it. As soon as the spring opened I became wild to go on an auto tour with our new machine, that is admirably fitted for long trips, having a rack in the rear large enough to carry a Saratoga trunk. Of course I couldn't tour alone with a girl friend. Mamma would not hear of that, and there was nothing for it but she must go with me herself.

We started when the leaves on the trees were well grown, with excellent road maps, and by supplementing the information they gave us at every fork in the road we got on very well. One evening we were nearing a place called Huntingdale, which seemed to be rather a collection of summer cottages than anything else, and we did not have the name of any hotel at which to stop. Passing an autoist who had alighted to examine his engine, I asked him if he could direct us to a public house where we could spend the night. He looked up at me, and our eyes met.

Did you ever look into the eyes of a man for the first time and recognize through them a soul that was in harmony with yours? This I did when I met the gaze of this man. Not only that, I knew he saw in me what I had found in him.

"I am sorry to say," he replied to my question, "that there is no hotel in Huntingdale. You'll not find one that you could care to stop at till you reach Asheville, twelve miles beyond."

I looked disappointed. Mamma was getting tired, and before we could make the twelve miles it would be dark, and we made it a rule to travel only by daylight.

"I can direct you," continued the young man, "to a private family hotel, but they are not taking boarders there this year except myself. However, if you care to try I think you can get in for one night."

We said we would certainly care to try, and the young man, pulling down the hood of his auto and cranking it, got into his machine and led the way to an attractive looking house on an eminence. When we reached it he asked us to remain in our car till he stated our case for us. We thanked him, and he went inside. In a few minutes he returned and said that he had fixed the matter for us satisfactorily. The landlady was coming to her room, but he was very much at home there himself and would see that we were made comfortable. He handed us out of our car, and after our trunk had been removed and our machine started for the garage we went up into the house.

I wondered that so luxurious an abode should be used for boarders. Ho-

tels and boarding houses be they ever so well furnished are bound to show some wear.

Mamma thought she was too tired to dress for dinner, but I told her in such a place it would not be safe to dine in travelling costume, so we both put on evening dress. On entering the dining room we saw that places had been set for three, and the only person in the room besides ourselves was the young man who had been our conductor. Seeing that he was in evening dress I was very thankful that mamma and I had decided to change our costumes.

"Our landlady," he said, "has commissioned me to take her place at table and do the honors in her stead. I presume I shall have to introduce myself, having no one to introduce me. I am Edgar Sterling, at your service." Mamma introduced herself and then introduced me, after which a waiter who seemed rather a butler than a waiter served us, and we had a delicious dinner. Wine was opened without our having ordered it. Both mamma and I declined it when the waiter was about to pour it into our glasses, whereupon Mr. Sterling said:

"The terms of this house include wine, so you are not under any obligation to me."

We permitted the waiter to fill our glasses, but since the wine served was champagne we concluded that the bill for our one night's stay would be something frightful. But I had fallen under a spell indeedly the devotion of Mr. Sterling, expressed in his eyes, a pleasing smile he had and his constant attention to my every wish.

After dinner mamma remained below but half an hour, when she went upstairs to bed. I passed the most delightful evening of my life, and mamma was obliged to call me several times before I could tear myself away from my entertainer.

The next morning we breakfasted alone, the waiter having informed us that Mr. Sterling had gone out early in his car. We asked for our bill, but were told that the landlady was not in a condition to make it up and if we would leave our address a statement would be sent us when she recovered.

Upon our return home we expected to find our hotel bill. We were still expecting to find it when one evening Mr. Sterling called and put a new face on the matter. He confessed that he had taken us to his own residence, that the landlady was a myth and that the waiter was his butler. He apologized for his deception by saying that it had occurred to him to take this course rather than attempt to force before us the hospitality of a stranger.

Now, wasn't that just too delightful an episode to keep?

From Mr. Sterling's attention to me I expect soon to tell you of another episode.

Something in Your Eye.

Foreign bodies in the eye, if they have not penetrated any part of the eyeball, are best removed by pulling the lid away from the eyeball with

the fingers, so that the tears will flow and wash the particle away. Never rub the eye. When the eyeball is penetrated you cannot see an oculist too quickly.

The Practical Girl.

He—You are the prettiest girl I ever saw. She—That sounds all right, but I don't know how much the compliment is worth until you tell me how many pretty girls you have seen.

Sad Fate.

"I hear Adele has gone into comic opera."
"There was always something supremely sad about the girl."—Life.

Outfielder Will Go Into Automobile Business In Los Angeles.
Fred C. Snodgrass, outfielder of the Boston National league club, has been given his unconditional release, it was announced at the club's offices.

Snodgrass came to the Braves from the New York National league team in 1915. His contract, which called for \$6,000 a year, it is said, expired this year, and rather than sign at a lower figure he decided to go into the automobile business in Los Angeles.

Nick Allen Goes Back.

Catcher Nick Allen, one of the Federals taken on by the Cincinnati Reds, has been released to Providence of the International league. Wingo, Hugh and Clark will do the catching for Manager Matty, with Wingo on his present showing getting the bulk of the work.

PRACTICAL HEALTH HINT.

"Rules For Long Life."
There is no panacea that will bring long life to every user. "What is one man's meat is another man's poison." But a few rules are applicable to every one: Be moderate in everything. Excess in eating, in drinking, in anything, tends to bring on old age.

Be faithful in your exercise and be sure to choose an exercise that is helpful to you.

Stand and sit erect and use your lungs.

Keep your teeth and gums and throat clean. The mouth is the principal port of entry for undesirable immigrant micro-organisms.

Be careful to maintain the bowel functions. The digestive tract is a favorite abiding place for hordes of marauding bacteria.

Have your body occasionally examined.—Hawthorne Daniel in World's Work.

Use for Soy Beans.

All mills on the Pacific coast have been operating for several years with soy beans imported from Manchuria, and have found a ready sale in that region for the oil, cake and other products.

It Has Not.

Not everything is genuine. You may spread your mouth in a dentist's shop, but the smile has no teeth in it.

CLASSIFIED ADVERTISEMENTS

(Too Late to Classify)

Just the Thing for Children

You can use Indian Head instead of linen for a dozen different purposes--middies, skirts, suits, etc., because it wears and wears, does not wrinkle or muss easily and may be worn many times before it needs to go to the laundry.

The firm round thread of Indian Head in the new Belfast Linen finish makes this a splendid white fabric for embroidery. Have you tried it?

Let us show you the different widths.

ANTOINETTE TAKES TONY'S PLACE

Photo by American Press Association. Conscript takes bootblack and banker alike. But when Tony goes to war his sister will take his place. Here is one sister already on the job.

person should have such complete control of himself, should be so self-reliant and self-poised, that he can get up in any audience, no matter how large or formidable, and express his thoughts clearly and distinctly. In all ages oratory has been regarded as the highest expression of human achievement. Young people, no matter what they intend to be, whether blacksmith or farmer, merchant or physician, should make it a study. Nothing else will call out what is in a man more quickly and more effectively than the constant effort to do his best in speaking before an audience. When one undertakes to think on one's feet and speak extemporaneously before the public the power and the skill of the entire man are put to the severest test.

Worrying Happiness.

The bishop of Manchester, speaking at a meeting at Church House, Westminster, said the secret of happiness was to have a sufficient multitude of worries.

The man who had only one worry, a blind that would not be pulled up straight by the servant or a coal scuttle the bottom of which was always coming out, found his way to the lunatic asylum, but the man who had no time to dwell upon his worries because he had to go from one to another and back again and round and round like a squirrel in a cage could be a perfectly happy man.—London Mail.

Saobab Trees.

The thickened tree trunk is said to be that of Adansonia digitata, called the baobab tree, a native of Africa. The trunks are sometimes more than thirty feet in diameter and the tree never more than sixty feet high. The tree is strictly tropical, but grows in the extreme south of Florida.

His Mission.

"The convict who was engineering an escape for his companions was really performing a public service." "How do you make that out?" "Wasn't he trying to bring about a free delivery of the mail?"—Baltimore American.

A Soft Job.

First Hobbs—I have at last thought of a job I think I would like. Second Hobbs—And what is it? First Hobbs—Lineham in a wireless telegraph company.—New York Times.

His Discovery.

She: Do you believe in phonology? He: No. As an experiment I once went and had my head read, and I found there was nothing in it.—Exchange.

Hunger is sharper than the sword.—Beaumont and Fletcher.

Grown as Edible Nut.

The Indian peanut originally was grown as an edible nut, but the great importance of the crop in South India now is due entirely to the growth of the seed-cashew industry both locally and abroad, and efforts are being made to improve the stock with the view of increasing its oil-yielding value.

Figured Out by Science.

An Italian scientist has figured that a square mile of the surface of the earth in six hours of sunshine receives light equivalent to the combustion of more than 2,000 tons of coal.

And Pays Interest.

Heath is a deposit in the bank of nature.

LEGAL ADVERTISING

In Circuit Court, Seventh Judicial Circuit, Seminole County, Florida. In Chancery Benjamin Drew, Complainant. Thatcher Realty Company, a Florida corporation, Frank A. Best, Walter S. Adams, J. B. Brown and Mary Brown, his wife, M. H. Thatcher, George W. Hestwright, W. J. Thigpen and Francis W. Thigpen, his wife, L. J. Chisholm, Louise T. Roster, her husband, D. H. Roster, her husband, W. S. Price, V. C. Collier, W. R. Charlton, Charles W. Young, Lizzie Lewis, G. V. Johnson, William Clark and Laura Clark, his wife, Mervyn Monroe, as administrators of the estate of D. G. Monroe, deceased, Hester A. Fellows, widow, Fred Clark, August Schneider, Charles Neely and Lillie Neely, his wife, Gilbert D. Leach, Rafael Montenegro, Daily Little and Estelle Little, his wife, G. W. Spencer, Carrie W. Abernathy and U. G. Staton and Viola Staton, his wife, Defendants.

It appearing from the affidavit of Benjamin Drew, complainant in the above entitled cause filed therein that the residence of Charles Neely and Lillie Neely and M. H. Thatcher are in this county, and that each of said defendants is the holder of this cause over the age of twenty-one years, and that there is no person in the state of Florida, the service of subpoena upon whom would bind either or all of said defendants, and that service by publication is prayed upon the defendants herein named.

It is therefore ordered that you, Charles Neely and Lillie Neely and M. H. Thatcher appear to this bill of complaint on or before the 6th day of August, 1917, it being a rule day of this court, or bill of complaint in said cause will be taken as confessed, against you, and complainant be allowed to proceed ex parte.

It is further ordered that this order be published in the Sanford Herald once a week for eight consecutive weeks.

Witness my hand and official seal at Sanford, Florida, the 4th day of June, 1917. (seal) E. A. DOUGLASS, Clerk. Robinson & Boardell, Solicitors for Complainant. 85-Tues-9tc

Notice of Application for Tax Deed Under Section 8 of Chapter 489, Laws of Florida. Notice is hereby given that James S. Foster, purchaser of Tax Certificate No. 21, dated 21st day of June, A. D. 1916, has filed said certificate in my office, and has made application for tax deed to be issued in accordance with law. Said certificate embraces the following described property situated in Seminole county, Florida, to-wit: S 1/2 of NE 1/4 of SW 1/4 of SW 1/4 Sec. 22, T. 21, Range 29 East, S. 16 N. The said land being assessed at the date of the issuance of such certificate in the name of W. L. Cook unless said certificate shall be released according to law tax deed will issue thereon on the 7th day of July, A. D. 1917.

In Circuit Court, Seventh Judicial Circuit, Seminole County, Florida. In Chancery Benjamin Drew, Complainant. Thatcher Realty Company, a Florida corporation, Frank A. Best, Walter S. Adams, J. B. Brown and Mary Brown, his wife, M. H. Thatcher, George W. Hestwright, W. J. Thigpen and Francis W. Thigpen, his wife, L. J. Chisholm, Louise T. Roster, her husband, D. H. Roster, her husband, W. S. Price, V. C. Collier, W. R. Charlton, Charles W. Young, Lizzie Lewis, G. V. Johnson, William Clark and Laura Clark, his wife, Mervyn Monroe, as administrators of the estate of D. G. Monroe, deceased, Hester A. Fellows, widow, Fred Clark, August Schneider, Charles Neely and Lillie Neely, his wife, Gilbert D. Leach, Rafael Montenegro, Daily Little and Estelle Little, his wife, G. W. Spencer, Carrie W. Abernathy and U. G. Staton and Viola Staton, his wife, Defendants.

It appearing from the affidavit of complainant herein filed that subpoena has been issued in said cause and returned not served because no agent of defendant Thatcher Realty Company, a Florida Corporation, could be found, and it further appearing that the affidavit of complainant that process against the said defendant corporation Thatcher Realty Company, cannot be served owing to the failure of said corporation to elect officers or appoint agent and because the agents and officers of said corporation are unable to appear in person at the court that said bill of complaint in the above entitled cause, in the above entitled court for the purpose of enforcing a mortgage against said properties mentioned in the bill of complaint.

It is therefore ordered that you, Charles Neely and Lillie Neely and M. H. Thatcher appear to this bill of complaint on or before the 6th day of August, 1917, it being a rule day of this court to defend the said suit, and that in default thereof a default judgment be entered against the said Thatcher Realty Company and the said cause proceed ex parte against the said Thatcher Realty Company. It is further ordered that this order be published once a week for the space of two weeks in the Sanford Herald, a newspaper published in Seminole county, Florida, and that the same being the rule day of said court.

In Circuit Court, Seventh Judicial Circuit, Seminole County, Florida. In Chancery Benjamin Drew, Complainant. Thatcher Realty Company, a Florida corporation, Frank A. Best, Walter S. Adams, J. B. Brown and Mary Brown, his wife, M. H. Thatcher, George W. Hestwright, W. J. Thigpen and Francis W. Thigpen, his wife, L. J. Chisholm, Louise T. Roster, her husband, D. H. Roster, her husband, W. S. Price, V. C. Collier, W. R. Charlton, Charles W. Young, Lizzie Lewis, G. V. Johnson, William Clark and Laura Clark, his wife, Mervyn Monroe, as administrators of the estate of D. G. Monroe, deceased, Hester A. Fellows, widow, Fred Clark, August Schneider, Charles Neely and Lillie Neely, his wife, Gilbert D. Leach, Rafael Montenegro, Daily Little and Estelle Little, his wife, G. W. Spencer, Carrie W. Abernathy and U. G. Staton and Viola Staton, his wife, Defendants.

To Frank A. Best and Mary Best, his wife and J. O. Best, Walter S. Adams and Charles W. Young and Rafael Montenegro: It appears from the affidavit of William Hestwright, attorney and agent for complainant in the above styled cause, herein filed that he believes that Frank A. Best and Mary Best, his wife, and J. O. Best, Walter S. Adams and Charles W. Young and Rafael Montenegro are residents of the state of Florida, that their residence and postoffice addresses are in this county and agent unknown, and that there is no person in the state of Florida, the service of subpoena upon whom would bind said defendants, and that said defendants are over the age of twenty-one years.

It is therefore ordered that you do appear to the complainant's bill herein filed on or before the 2nd day of July, A. D. 1917, the same being the rule day of said court. It is further ordered that this notice be published in the Sanford Herald, a newspaper published in Sanford, Seminole county, Florida, once a week for nine consecutive weeks.

Witness E. A. Douglass, the clerk of said court at the seal of said court at the court house in Sanford this 1st day of May, A. D. 1917. (seal) E. A. DOUGLASS, Clerk of Circuit Court. Robinson & Boardell, Complainant's Solicitor. 73-Tues-9tc

THE HOME GUARD

A movement has been started and is rather well advanced to organize a company of home guards. It is timely that steps have been taken in this direction. The local military company, which is under federal direction will leave not later than August 5th. They will take with them all the arms and ammunition in the town. It is urgent that haste be made in organizing the home guards and that the organization be perfected as soon as possible and be accepted by the state authorities, so that arms and ammunition may be issued to the company. While it may be difficult for us to realize that this country is at war with a foreign enemy, a ruthless, unscrupulous and insidious foe, the fact exists just the same, and there is no telling when the presence or influence of that enemy will be felt, or in what quarter it will break out. Every community should be prepared to cope with the problems deserving of summary treatment which may arise in that particular locality. With the departure of Company C the town will be without any organization or means of defense, for quelling riot, or dealing with any sort of organized trouble that might come up. It is not prudent to scoff at the idea of local troubles. When nations are at war the unexpected happens.

Even if all speed is used in organizing the home guards and making application for equipment, the likelihood is that many weeks, maybe months will pass before the equipment is received. Hence all possible haste should be made at this end, because of the sluggish machinery at the other.—Reporter-Star.

YOUR DOLLARS AND MY BOY

I want to thank you friend. You must know the heartfelt gratitude of a father with an only boy. He went with the troops and I was proud. But I've had many a headache since. They say he'll pull through now all right—because they found him just in time. Did your dollar bring my boy back from No Man's Land?

YOU ARE INTERESTED IN RING BOOKS!

They are used in every line of business by Salesmen, Office Men, Doctors, Lawyers, Ministers, Students—by everyone who must have a book that combines UTILITY, DURABILITY AND APPEARANCE. Sheets can be obtained anytime, ruled in eight styles. Bound in best quality Flexible Black Levant Grain Cowhide, with Black Linings. HERALD PRINTING CO. Phone 148 Sanford, Florida

Did your dollar take the stretcher so close to the thick of the firing? Did your dollar give him the water he pleaded for in his delirium? Did your dollar bring him back to the base hospital where they gave him almost a mother's care? I want to thank you if it did—for your dollar has given me back my boy—it has brought him back to me out of No Man's Land, where many sons are going, where many will remain.

Can I say this to you, my friend? Surely I can if you are a member of the Red Cross—or if you send in your personal subscription to the Red Cross now—for many a father's son will come out of No Man's Land by the aid of the dollars that go to swell the subscription lists of that great enterprise of humanity. Join today—make this YOUR Red Cross day. No field service is required. Count this the chance to do your bit—for this country must have two million members of the Red Cross—\$100,000,000 in subscriptions.

President Wilson himself is president of the Red Cross and asks that one million men and women enroll their names as subscribers to the Red Cross at \$1, \$2, \$5, \$10, \$100, \$10,000 or \$100,000.

He does not ask that you do anything else but pay your subscription, and then if you wish to secure 10, 25 or 100 new subscribers, do so if you wish. No further service on the field or elsewhere will be required.

In this hour of the nation's and all the world's need every American who loves his country and his fellow-men asks, "What can I do? Where can I help?"

For stalwart youth the path of duty is plain. Our country and humanity need Men to fight and die for them. Yet of our 100,000,000 only a small fraction now and but a tithe at most, or worst can thus serve. For all who cannot enlist to seek "the great prize of death in battle," or who are not needed in those ranks, as yet, there is another enlistment. It is under the banner of the Red Cross. Enlisting there—old or young, man, woman or tender child can proudly say: "I too am serving humanity and my country."

"I too am deserving well of the Republic." Fight or Give" is our Battle Cry!

This is Red Cross week and we ask that you do this by becoming a supporter of the Red Cross. Send your cash or your check today—\$5, \$10, \$100, \$1,000, \$10,000 or \$100,000—give to your very utmost.

THE RED CROSS

Beginning Monday the American Red Cross is expecting to put in an active week of campaigning for money. The Red Cross in America has been working for humanity at large for years. Its far reaching influence has been felt everywhere that man has penetrated, and the softening touch has been laid upon the brow of sufferers in every clime and under many conditions. Since the great war began in Europe, now nearly three years ago, the Red Cross has labored as never before, to alleviate pain, to succor the wounded and assist the despairing. Mohey and supplies have been sent across the great waters in an almost endless stream. The Red Cross, with workers in many lands and members speaking every tongue have joined to relieve the suffering, to do their best to reduce the horrors of war. All this has been going on, and more for the Red Cross does not ask how or why people are hurt or made destitute or driven to despair. There have been earthquakes, and great fires and floods and hurricanes and tidal waves and pestilence and famine to contend with—and no truthful appeal has ever been made without avail when addressed to the Red Cross. The American branch of this great organization has responded, nobly and well, to all calls, and cheerfully taken a share in the sorrows and burdens of those afflicted. But now there is a change in conditions. In war conditions, it is meant, of course. For two and a half years we have been doing our best to help the friends across the seas. America's part has been to give from our abundance to those in trouble whom we knew and were interested in. That they were not entitled to our help and sympathy is not even suggested. The scope of the Red Cross is as broad as humanity. We were glad to be able to help. The change came, however, when America entered the war and now the cry is for help for our own people as well as those of Great Britain and France and Belgium. Our soldiers are already in France. They are going in detachments and battalions and divisions; it may be that some are already near the "firing line," where they will do their best for their country and its high principles. The American Red Cross is doubly interested now and the needs are increasing. It has been said that at the front some-

times newspapers are used as first aid bandages, because of the shortage of another kind. A great honor truly for a newspaper to be read and "red" by men fighting for liberty and the right, but nature and sentiment do not always coincide, and so it would be better that the bandage should be of soft cotton cloth, and it is for bandages and tents and oils and ointments and blankets and a thousand other things necessary and desirable for wounded men in a far country that a great fund is to be raised. The American Red Cross proposes to raise one hundred million dollars for the war relief and to help in caring for American soldiers in France. The amount seems huge; or would seem so, if we had not become accustomed to talking in big figures these past few years. The amount is large—but it is needed, and the record of the Red Cross is such as to insure that not a penny will be wasted. So it will be raised. Some will be privileged to help in this undertaking, personally—others will only be able to give their mite, and a blessing should be added to each dollar contributed next week to the Red Cross, for who knows, a dollar may save the life of one of Uncle Sam's boys; and is there anyone who would say he was not worth it?—Times-Union.

Keeping Sweet Potatoes

By J. W. Hesson, President Meridian College, Meridian, Miss. One of the best crops for the southern states to raise is that of sweet potatoes. It can be planted after a crop of oats or early corn and will make before frost. It can be made with less labor, than most crops and will produce a large yield per acre. Land that will yield 30 bushels of corn or half a bale of cotton per acre will produce from 100 to 250 bushels of sweet potatoes to the acre. They stand a drought well and can stand a rainy season with good results. If the land is broken deep and smoothed off with harrow and drag and rows marked off with marker, slips or vines can be set out without bedding the land and cultivated flat. They will make more than when set on beds or ridges.

The greatest problem has always been to keep sweet potatoes through the winter. Over 50 per cent of the crop is lost each year by rotting. This is why they are not more largely raised for the market. The Meridian College of Meridian, Mississippi has been making experiments for many years in order to discover a plan by which sweet potatoes can be kept with reasonable certainty to be marketed when prices are higher. We now have solved this problem. After several years testing the plan, we have never been able to keep about 95 per cent of our sweet potatoes, including cut and bruised ones, till used up or until our new ones come in the next year. Our plan briefly stated is this: Build a tight house, storm sheet it, cover with builders' paper and weatherboard it, storm sheet and coil walls and overhead with builders paper between storm sheeting and ceiling, leave door in south end, window in north end. We use two door shutters and double windows in same opening, one opening outside and one inside. This leaves a dead air space to keep even temperature. Make air shaft through ceiling and center of roof, extend it above roof, cover and box it in and open it south with transom above the roof. Make slatted shelving on each side of the room, beginning about 24 inches from the floor, shelves 2 feet apart made of 1x3 or 4 lumber placed 1 inch apart, so the air can circulate freely through the shelves. Have an aisle in the center 4 feet wide, shelving extending to the aisle. Have slats back of shelves so an air space will be between potatoes and wall. If preferred one can build small boxes or bins of slats to put potatoes in and set them on the shelves or racks to facilitate handling but this is extra expense and not needed.

Build house 12 feet wide and as long as wanted. It takes one 10 ft. high and 30 ft. long to hold 2,000 bushels. The ground can be seen W. bushels. The ground can be the floor but it must be in a high dry place, well drained. The rats will soon destroy enough potatoes to pay for a cement floor that will keep them out. If built 3 feet from the ground tin tubs could be inverted over the pillars before sills are put on to keep out rats. Dig potatoes in as dry a time as possible. Handle them carefully, so as not to bruise them. Put cut ones to themselves and smallest potatoes on the bottom shelf and the largest on the top shelf as it takes them longer to dry on bottom. Place a large stove in the middle of the room. If the building is large put two stoves or as many as needed to heat well. Coal or wood stoves keep heat well and are cheap. Heat up the room to 100 degrees temperature by shutting doors and windows. Open transom in ventilating shaft. Make a small vent hole 4 inches by 12 to 16 inches under

the door for intake air to cause circulation by air. The stoves should be heated as soon as the first potatoes are put in so as to begin drying at once before they rot.

The idea is to kiln dry the potatoes. The moisture cultivates the rot germ. It cannot live in dry potatoes. Get excess moisture out of potatoes as quickly as possible. It takes about ten days to two weeks of heat with the thermometer registering about 100 degrees to dry the potatoes. Fire until bed time and then begin early in the morning.

After they are all dry, stop the heat, open the windows and doors and keep potatoes as cool as possible without freezing. Forty to sixty degrees will be right or as nearly that as possible. No more heat will be needed in southern climate, unless the extremely damp atmosphere of a long rainy spell condenses moisture enough to start the rot. If so, heat again for two or three days till dry again. If they start to rot, they were not well cured or got moist again. In freezing weather shut all doors and windows to keep potatoes from freezing, but do not fail to ventilate when the weather moderates.

We have followed this plan for many years and have never failed to keep potatoes in a house like this dried out in this way, and kept dry and cool without freezing. We have bought potatoes that were rotting and never dried them out and they stopped rotting although we do not advise any one to take that risk. A few will be lost of dry rot, but very few. It stops the mushy rot that usually destroys the whole crop when it starts. This house can be made cheaply of lumber. No floor is needed but select a high dry place. A dry house is what is wanted. It can be made of cheap rough lumber or stone or brick. A farmer could build one of pine poles and daub it with mud to make it air tight.

The college makes and keeps from 1500 to 2000 bushels each year. It is an easy crop to make and an easy crop for us to keep in these dry houses or kilns. If any further instructions or suggestions are wanted, write Meridian College, sending us stamps for reply. Many people have come to see our potato house to learn how to build one and others have written for it. A large number have now been built. We take this time of passing it on to others and shall be glad to send further instructions to any interested. One can build large warehouses like this and buy and keep for high prices. Large houses should be partitioned into several sections, so the whole house need not be heated at one time. Steam heat is fine if it is con-

venient and cheap enough. Each section must have a ventilator, of course.

The United States Government expert says the sweet potato has 50 per cent more food value than Irish potatoes. It is more nearly a balanced food for men and beasts than anything that can be grown in America. It can be raised at much less expense than the Irish potato. It is bound to play an important part in feeding the increasing population of the earth.

Besides the small houses farmers have built, large potato dry houses are being built in towns by merchants who buy potatoes cheap at digging time, or take them on accounts and dry and keep them by thousands of bushels to ship to northern or European markets when prices are good. The house can be built and potatoes kept the first year for 10 cents per bushel and the second year, when the house is built they can be kept for from two to three cents per bushel.

The curing does not affect their germination. They are just as good for planting, and as good or better for eating. They are much lighter than when cured in any other way.

Important Amendment.

He was a new member of the harbor board in a northern seaside town and was attending his first meeting. The board was discussing a proposal to place two buoys at the entrance to the harbor for the guidance of mariners. "I beg to propose an amendment," said the new member, "that one man should be placed there instead of two boys, as the latter are too young for such a responsible position."—London Times.

Slightly Mixed.

There is a good anecdote of an Irishman giving the password at the battle of Fontenoy, at the time the great Saxe was marshal. "The password is Saxe; now, don't forget it," said the colonel. "Saxe; Saxe, I won't. Wasn't my father a miller?" "Who goes there?" cried the sentry, after he had arrived at the pass. The Irishman looked as confidential as possible and whispered in a sort of low: "Bags, yer honor."

Harmony Above All.

A garden should not be considered as a piece of wild nature, nor plants regarded as architectural ornaments, for one must not do violence to the other. Above all must there be harmony. Otherwise the builder has labored in vain, for he has not made a picture that artists care to reproduce.

Some Resemblance.

Those who think a dog has rabies because he bites, should see a tobacco chewer take a snuff at a borrowed plug.

Iron Ore Under the Ocean. Vast iron-ore deposits extending far under the ocean have been found in Newfoundland. On Belle Isle one operating company has driven out under the water to a distance of fully four miles, and a thousand feet from the ocean's floor has been rewarded by securing a superior grade of iron.

Foundation of Happiness.

Conscious virtue is the only foundation of all happiness; for riches, power, rank or whatever, in common acceptance of the world, is supposed to constitute happiness, will never quiet, much less cure, the inward pangs of guilt.—Lord Chesterfield.

Variable Tides.

On the West Australian coast the tides are so variable that it is not an uncommon sight to see vessels high and dry at their piers. In the Bay of Fundy the spring tides reach a height of 60 or 70 feet.

Notice of Application for Tax Deed Under Chapter 4888, Laws of Florida

Notice is hereby given that W. H. Hasty, purchaser of Tax Certificate No. 453, dated the 6th day of June A. D. 1916 has filed said certificate in my office, and made application for tax deed to issue in accordance with law. Said certificate embraces the following described property situated in Seminole county, Florida, to-wit: SW 1/4 of SW 1/4 of SW 1/4 (Less beg. 95 yds N of SW cor. run E 40 yds, N 30 yds, W 40 yds, S 30 yds for cemetery). Sec. 4, Tp 20, S, R 31 East, 9 1/2 acres. The said land being assessed at the date of the issuance of such certificate in the name of A. J. Thompson.

Also: Tax Certificate No. 554, dated the 3rd day of June A. D. 1907, has filed said certificate in my office and made application for tax deed to issue in accordance with law. Said certificate embraces the following described property, situated in Seminole county, Florida, to-wit: Beg. SE cor of Sec 5, Tp 20, South, Range 31 East; Run N. 220 yds, W 44 yds, S 220 yds, E 44 yds, 2 acres. The said land being assessed at the date of the issuance of such certificate in the name of A. J. Thompson.

Unless said certificates shall be redeemed according to law tax deeds will issue thereon on the 21st day of July A. D. 1917.

Witness my official signature and seal this the 19th day of June A. D. 1917.

(seal) E. A. DOUGLASS, Clerk Circuit Court Seminole County, Florida. By V. M. Douglass, D. C. 87-Tues-Ste

FERTILIZE WITH "SOFOSCO"
FINELY GROUND SOFT PHOSPHATE
SAFE--- SOFOSCO is a purely natural product dried and pulverized. It contains no Sulphuric Acid or other chemical and cannot injure the soil or the tenderest plant.
SOFT--- SOFOSCO is made from the softer bone phosphates and phosphatic marls found in the rich Phosphate deposits of Hernando County. It is pulverized to a fine powder.
SOLUBLE--- SOFOSCO is in the proper chemical and mechanical condition to be easily acted upon by the waters and organic acids in the soil. Turned under with legumes or mixed with stable manure or muck it is an efficient and economical source of Phosphoric Acid.
We advise ordering now to insure prompt delivery. Better get in ahead of the threatened car shortage which is sure to hit us before long. Write us for prices delivered at your point. We can deliver now.

Little Happenings—Mention of Matters in Brief—Personal Items of Interest

Summary of the Floating Small Talks Succinctly Arranged for Hurried Herald Readers

T. I. Hawkins and Miss Annie Hawkins left in their car this morning to spend a while at their summer home in Commerce, Georgia.

The latest political rumor is to the effect that Fred M. Hudson will run for congress from this district next time. If Mr. Hudson would try for governor again he would stand a better chance of success.

Until further notice, Musson's pool will be open every afternoon at 2 o'clock except Tuesdays and Fridays.

Mr. and Mrs. R. J. Holly and family returned yesterday from Tampa where Mrs. Holly and children have been spending several weeks the guests of relatives. The trip was made in their car and was greatly enjoyed as the road is in good shape the greater part of the way.

Woodland Park is the only place with amusements and taken proper care of. Open Sundays only. Leased privately on week days. Large clean pool, hot water jets, shower, toboggans. Picnic conveniences.

Mr. and Mrs. R. J. Holly and children, after a visit in Tampa to Mrs. Carrie S. Jackson, Lafayette street left this morning for an overland trip to their home in Sanford. Mr. Holly is editor of the Sanford Herald.—Tampa Times.

Mr. and Mrs. Forrest Lake and children have returned from a delightful trip to Washington and other points, making the trip in their car. Robert Deane accompanied them.

No. 666 will cure Chills and Fever. It is the most speedy remedy we know.

Fred Fort of The Herald force spent Sunday in Plant City where Mrs. Fort is visiting home folks for a few weeks.

Ayers' New Daytona Beach Hotel, Daytona Beach, Fla.—Special summer rates now in effect. Week end parties solicited. Dance every Saturday night. W. F. & E. R. Ayres, managers and owners.

Billy Fudger of the firm of Turne, & Fudger of Jacksonville is in the city today calling on the local trade.

Rub-My-Tism—Antiseptic, Anodyne Kills pain, stops putrefaction.

S. J. Carnes of the Hotel Carnes spent Saturday and Sunday in Tampa looking after his hotel interests in that city.

No. 666 will cure Malaria or Bilious Fever. It kills the germs.

Miss Mabel Overstreet, the 18-year old daughter of Mr. and Mrs. George Overstreet of Kissimmee died early this morning at her home in that city from typhoid fever.

Mrs. C. R. Walker, Mrs. E. T. Woodruff and Miss Emma Woodruff accompanied Mr. Walker and Mr. Woodruff when the latter drove over to the Central Florida Highway Association Annual in Kissimmee. The ladies were entertained with the delegates at the Graystone and had a pleasant time.

WANT FOOD LEGISLATION

Organized Labor to Get Behind The Campaign

Washington, June 16.—Organized labor was called upon formally by the American Federation of Labor today to get behind the campaign for enactment of the Administration food legislation by July 1. All unions were urged, in a letter by President Gompers, to press their congressmen for prompt action.

Mr. Gompers said: "After July 1 the new crop will be moving to the markets, food speculators will have cornered crops, prices will be forced up and the people will feel actual want."

"Since the war wages have not kept pace with the increasing cost of living. They have remained practically stationary, while prices have more than doubled. The only practical way to increase the spending incomes of all is to decrease the cost of living."

"A grave danger confronts the American people; the danger of hunger, which, unless our government takes immediate and effective action to prevent, will portend greater injury than the threat of the foreign foe."

"Abnormal conditions exist—the ordinary checks of competition have disappeared. Food speculators are gambling on the people's necessities. We must devise new machinery to

meet tremendous vital needs. We will have to establish economic agencies to control food, so that the people may be insured subsistence. The problem strikes at the very root of the life.

"This is a problem that has a strong appeal to the whole nation. Legislation cannot be accomplished without persistent, intelligently directed efforts of all.

"The proposed legislation does not set up a food dictatorship. It does not purpose to ration the people, but attempts to protect the people against speculation by rational, practical means.

Must Be Effective By July 1
"In order to secure the fullest benefits from the Leaver bill, it must be made law before July 1. Every worker, who wishes to lower prices of the necessities of life can be helpful in securing the immediate enactment of the Leaver bill. The following suggestions are made to those who wish to help:
"Let every trade union, every central body, every State Federation of Labor, every international organization, take official action upon this matter and communicate that to your respective congressmen in the house of representatives, your senators and to the President of the United States.

"In addition to this formal official action, let every individual member of the organized labor movement write a personal letter or send some communication to his or her representative and senator. Ask your friends to take similar action. Ask all organized bodies within your locality to express to their representatives at the national Capitol their desire of the immediate passage of legislation that will reduce the cost of the necessities of life.

"The need of immediate effective action is demonstrated by the fact that the world's grain crop is seriously below normal. The wheat crop in this country is even smaller than that of last year, and we are confronted with the gigantic task of feeding our allies and maintaining our own army and civilian population.

War Cannot Be Fought by Hungry Men

"The war cannot be fought by hungry men. The work necessary to maintain the continuity of this nation cannot be done by starving people. Food administration effective, and is demonstrated by the fact that bread is cheaper in Belgium, France and Italy than it is in this country, and this even when we ship the grain to Belgium from which their lower priced bread is made.

"You are urged to act immediately to make known your need and your desire to those who are charged with the responsibility of creating agencies by which sufficient food will be assured to this nation and to those fighting the world's war for human freedom.

"Press home upon all the necessity that the Leaver bill should be on the statute books before July 1."

Having installed a first class vulcanizing plant at Geneva can take orders for all repair work. Tires left with Geneva buss will be returned promptly. Satisfaction guaranteed. L. M. Rheinder, Geneva.

Summer School

Will take a few pupils for the second, third and fourth grades that wish to make grades or make up their work in present grades. Mrs. Arrington, phone 360-J. 84-tf

To The Public

Notice is hereby given that I am in charge of the property interests of Mrs. H. L. DeForest.

H. C. DuBose, Agent.

Stop, Look and Listen!

Did you know that you can get a china cabinet, bookcase, rattan lounge and other furniture for half price at 906 Myrtle avenue?

Must be sold in ten days. 86-tf

Sweden Neutral

Stockholm (via London), June 16. Foreign Minister Lindman made a statement to Parliament today in which he declared the Swedish Government intended to continue to observe unequivocal, loyal neutrality. "The war will not end soon," said the foreign minister, "and we must be prepared for greater sufferings than we have previously borne, all the more so as the Swedish harvest this year will unquestionably be a poor one."

Makes Hard Tools

Using steel alloyed with a new mineral recently discovered in Colorado, a resident of that state has made tools with which he cuts the hardest woods and shaves himself without sharpening the tools between operations.

Japanese Superstition

There are no 4's nor 4's in Japanese telephone directories, because the name of the figure four, "Shi," is the term for death.

ABOUT PEOPLE AND EVENTS...

A RESUME OF SANFORD HAPPENINGS UP TO DATE

Address all Communications for this Column to "Society Editor," of These Mrs. R. A. Terheun, Phone No. 203

Navy League

A call is being made upon the women of Sanford to furnish for the boys of Uncle Sam's Navy the outfits which include, sweaters, mufflers and wristlets and Mrs. A. E. Hill, who has voluntarily taken up the work here is anxious to enroll members. There are no dues or fees except to furnish the materials and make one of these outfits. A number of ladies have signified their willingness to teach others how to knit these articles, while still others will give their time and labor to some one who will furnish the materials. An order has been placed for the needles and yarn which will be in the city within a few days. Five banks of yarn, five celluloid and two fine needles are required for one outfit. Full information can be obtained of Mrs. A. E. Hill, Mrs. Allan Jones and Mrs. R. A. Terheun.

Every Week Bridge

The Every Week Bridge Club were delightfully entertained by Mrs. Norma King McLaughlin on Wednesday afternoon with Mrs. S. E. Barrett again winning the prize. Substitutes for the pleasant occasion were Mrs. S. Puleston and her guests, Miss Cornelia Puleston, Mrs. Geo. D. Bishop and Miss Katherine Wilkie. Mrs. S. E. Barrett will entertain next Wednesday.

Priscilla Entertained

Mrs. C. C. Woodruff pleasantly entertained the Priscillas last Thursday afternoon and the usual happy time was enjoyed by this congenial group of friends. Much interest was manifested in the knitting of sweaters, etc., for the Navy, every Priscilla present voting to knit, knit, knit all summer for this splendid cause. Mrs. Ed. Higgins was added to the list of members and busy workers.

Theatre Party

In honor of the attractive guests of Miss Ruth Roberts Miss Esther Davidson and Miss Gladys Gardener, a delightful theatre party was given at the Lyric on Thursday evening. After the play the young people returned to the home of Mrs. Roberts for music and refreshments. Others included in the party were Misses Katherine Bell, Margaret Davis, Marian Gove and Messrs. Ulrich, Pierce, Wynn, Geo. McLaughlin and Kenneth Murrell.

Swimming Party

Chaperoned by Mrs. Tom Davis a delightful swimming party and picnic supper were given at Palm Springs on Monday evening in honor of visiting girls which included a large party from Sanford and another from Longwood the two parties meeting at Longwood. Miss Quentin Parker, the guest of Miss Maude Entzinger of Longwood and Misses Gladys Gardener and Esther Davidson were guests of honor.

Personal Mention

Mrs. M. C. Tolar left Saturday to spend a few days with her brother at Hawthorne, after which she will spend a couple of months with her son and wife, Dr. and Mrs. Nolley Tolar at Springdale, probably visiting in South Carolina before returning home.

Mr. Robt. Cobb accompanied Mr. and Mrs. C. C. Cobb to Daytona Beach, returning to Sanford Sunday night.

Mrs. Lynn Kilburn and two youngest children of Carrabelle are visiting her mother, Mrs. J. H. Ferguson.

Miss Esther Davidson of Fort Myers and Miss Gladys Gardener of St. Petersburg, two attractive college girls visiting Miss Ruth Roberts left for their respective homes on Saturday.

Mrs. J. H. Ferguson is spending several days in Jacksonville this week.

Mr. and Mrs. Forrest Lake and two daughters have returned from Washington and other points of interest.

Miss Quentin Parker of New Smyrna spent the week end in Sanford the guest of Miss Ruth Roberts.

Mr. and Mrs. T. J. Siphon of Commerce, Ga., who have been the guests of Mr. T. I. Hawkins and Miss Annie Hawkins left this morning with a party of friends for their home town.

Mr. and Mrs. R. R. Deas spent the week end at Daytona Beach.

Mr. and Mrs. Doyle of San Antonio, Texas and Mrs. W. B. Clay of Arcadia are expected this week to visit their mother, Mrs. M. C. Doyle.

Mr. and Mrs. L. P. McCuller returned Friday from a visit to the home folks at Marianna.

Miss Vera Terheun was the week end guest of Miss Marian Dieterich on Beardall avenue.

Mr. T. R. Gilmore came down from Waycross to spend Sunday with Mrs. Gilmore at the home of Mrs. J. D. Roberts.

Miss Cornelia Puleston is the guest of Dr. and Mrs. Puleston and Mrs. Stella Arrington.

Mrs. E. W. Rowland left on Friday for Orlando after a pleasant visit to Mrs. W. H. Peters.

Mrs. A. F. Bell returned Sunday from a delightful trip which included the Confederate Reunion at Washington, D. C., Virginia and Georgia.

Mr. and Mrs. W. A. Fitts, Sr., are expected today from Washington, D. C., where they were guests of Attorney General Gregory and Assistant Attorney General Fitts.

Dr. Thomas A. Neal returned Friday from Jacksonville and Atlantic Beach. Mrs. Neal will return later.

Mrs. Cecile Wallace spent several days in Orlando last week in response to a call to organize a class in voice culture. She will go over again tomorrow for two days' teaching.

Misses Louise and Eugenia Muller left Saturday for Jacksonville and the beach for a month's vacation.

Mr. and Mrs. Ed. Hill and family have taken the apartment recently vacated by Mrs. Anna Walker on Magnolia avenue.

Mrs. Cary Landis accompanied Mr. Landis from DeLand on Sunday for the A. C. L. flag raising, where Mr. Landis made the principal address of the afternoon.

Sanford folks attending the Vaughn-Cobb wedding in Orlando on Saturday were Mrs. P. D. Cobb, Miss Lizzie McDaniell, Misses Laura and Annie Lee, Rev. F. E. Steinmeyer and Messrs. Harry, Robt. and Otis Cobb, C. F. Brannan and E. E. Brady.

Cecilian Music Club

The Cecilian Music Club will meet next Saturday afternoon at 3 o'clock at the Munson studio.

Red Cross Announcement

An enthusiastic special meeting was called yesterday morning by Dr. T. A. Neal, chairman of the Seminole Branch of N. Fla. Chap., A. R. C., to take measures to provide for securing the money to be immediately raised by this branch of the War Relief Fund.

Splendid team work will undoubtedly be done under the twelve captains appointed: Messrs. L. P. Hagan, C. R. Walker, A. D. Parrish, Jhn. Bell, F. C. W. Brown, Chas. Entzinger, Howard Lyman, Claude Raulerson, M. S. Everette, Geo. Chamberlain, Dr. Hyman and Father O'Riordan, with Mr. F. P. Forster, special "officer at large."

A committee on Children's Red Cross Work, consisting of Mrs. Ernest Housholder, Miss Beale Zachary and Miss Charlotte Hand had been appointed at a previous meeting. In addition special work will be done for the War Relief Fund by Mrs. R. A. Terheun and Mrs. W. P. Carter who will organize the children for the purpose this week. Mrs. Terheun has called a meeting of the children for Wednesday morning at the Woman's Club rooms at ten o'clock. See notice elsewhere.

The regular meeting of the local Red Cross will be held at the Woman's Club rooms at 4:00 p. m. Thursday next, and a rally will be held Thursday night at the Park to which the public is invited.

The fish fry at Woodland Park last Thursday and the triple bill at the Lyric, presented by Mr. D'Oize and local talent were successes both as to enjoyment and the goodly fund raised.

Riley M. Fletcher Berry, Press Reporter Seminole Branch, N. Fla. Chap. A. R. C.

Revising War Bill

Washington, June 18.—The senate finance committee today resumed its work of revising the war revenue bill with a motion by Senator Pease for reconsideration of its action

in voting to adopt a new levy of five per cent on net profits of newspapers and magazine publishers awaiting final disposition. Indications were that the committee would reconsider its action and vote to change the proposed tax.

Florida Melons

Florida cantaloupes are rapidly moving to market, according to the report of the United States Department of Agriculture for the week of June 5-11, inclusive, the total shipment from this state, for the period being eighteen cars. During the same period California shipped 29 cars and Georgia 2.

Watermelons from this state also are moving at a satisfactory rate, 572 car lots having rolled to market June 5 to 11, against 180 for the same period last year. In the same week California shipped 3 cars and Georgia 10 cars.

Florida's crop of cantaloupes is bringing better prices than last year, owing to the fact that the market is not burdened as it was early in the previous season. During the same week last year California shipped 1,063 cars to market and Florida sent one car. The Florida crop is coming in earlier and the California crop later this season, giving Florida growers the advantage of the Pacific coast specialists.

Big Peanut Acreage

Washington, June 18.—Almost 61 per cent increase in the peanut acreage this year is indicated in the preliminary report of the Department of Agriculture. The total acreage is 2,001,000 acres. All southern states except North Carolina and Tennessee show greater increases this year than last. Georgia with 130,000 acres shows an increase of 121 per cent; Texas with 600,000 acres shows an increase of 118 per cent, and Alabama with 268,000 acres, shows an increase of 97 per cent.

Florida Phosphate the Most Valuable Fertilizer

For a decade preceding the European war, the Germans imported annually thousands of tons of phosphate rock from Florida. These shipments have been practically cut off for the past three years and as a result it is authoritatively stated that the production of their farms has been decreased by at least 30 per cent.

The German people practice a very intensive system of agriculture. They have the richest deposits of soluble potash salts in the world and are getting all the nitrogen they need from the atmosphere. It is the lack of this essential element, Phosphorus alone that is playing such havoc with their crops. Some experts even go so far as to state that their inability to get our Phosphate will be one of the winning factors in starving out the Central Powers and winning the war for the allies.

The Florida farmer is indeed fortunate in having near at hand an

inexhaustible supply of this valuable element which is the basis of all systems of fertilizing and soil building and without which no plant or tree can attain its maximum growth and production. At Hastings and other points it has been demonstrated beyond a doubt that we can still make bumper crops in Florida without the high priced German potash and other chemicals which were deemed so all important a few years ago.

Will Kill Distilleries

Washington, June 16.—A prohibitory tax on foodstuffs used in making distilled beverages, tentatively agreed to last week by the senate finance committee was still further increased today and then was formally written into the war tax bill. The new rate is \$60 per hundred pounds instead of \$20 per bushel, and representatives of the distilleries declare it unquestionably would be effective in forcing the suspension of the distilling industry. The section approved also prohibits importation of distilled beverages.

Other liquor tax increases were approved by the committee today virtually without change from the house schedules. The manufacturers' tax of 5 per cent on athletic goods, cameras, patent medicines, perfumeries and cosmetics was reduced to 2 per cent, and a substitute tax on scalpers' sales of tickets was adopted, making the rate from 5 to 50 per cent, instead of 50 per cent flat.

Tomorrow the double-income excess profits and publishers' taxes will be taken up.

PETERS SAYS:
"A Man is not Happy All Over Until His Feet Agree to Vote in the Affirmative"
and what Peters Says is So

WHEN a man's disposition wears the happy smile that won't come off you can feel pretty sure that his feet are comfortable and that his pocketbook was not unduly taxed at the shoe store where he purchased his stylish footwear. The chances are he bought 'em here.

CURBSTONE GLEANINGS

BUDGET OF OPINION "JUST BETWEEN YOU AND ME."

EVEN THE GATE POST NOT IN IT

A CHIEF IS AMONG YE TAKING NOTES AND FAITH, — "HE'LL PRENT 'EM"—SO SAYS SAUNTERER.

A Southern Volunteer
 Yes, sir, I fought with Stonewall,
 And faced the fight with Lee;
 But if this here Union goes to war,
 Make one more gun for me!
 I didn't skrink from Sherman
 As he galloped to the sea;
 But if this here Union goes to war,
 Make one more gun for me!

I was with 'em at Manassas—
 The bully boys in gray;
 I heard the thunders roarin'
 Round Stonewall Jackson's way,
 And many a time this sword of mine
 Has blazed the way for Lee;
 But if this old nation goes to war,
 Make one more gun for me!

I'm not so full of fightin'
 Nor half so full of fun,
 As I was back in the sixties
 When I shouldered my old gun;
 It may be that my hair is white—
 Such things you know must be,
 But if this old Union goes to war,
 Make one more gun for me!

I hain't forgot my raisin'—
 Nor how in sixty-two,
 Or thereabouts, with battle shouts,
 I charged the Boys in Blue;
 And I say: I fought with Stonewall,
 And blazed the way for Lee;
 If this old Union's in for war,
 Make one more gun for me!
 —Atlanta Constitution.

His Northern Brother
 Just make it two, old fellow,
 I want to stand once more
 Beneath the old flag with you
 As in the days of yore.
 Our fathers stood together,
 And fought on land and sea.

The battles fierce that made us
 A nation of the free.

I whipped you down at Vicksburg,
 You licked me at Bull Run;
 On many a field we struggled
 When neither victory won,
 You wore the Gray of Southland,
 I wore the Northern Blue,
 Like men we did our duty
 When screaming bullets flew.

Four years we fought like devils,
 But when the war was done
 Your hand in mine in friendly clasp
 Our two hearts beat as one;
 And now when dangers threaten,
 No North, no South we know,
 Once more we stand together
 To fight the common foe.

My head, like yours, is frosty—
 Old age is creeping on;
 Life's sun is lower sinking,
 My day will soon be done,
 But if our country's honor
 Needs once again her son,
 I'm ready, too, old fellow—
 So get another gun.
 —Minneapolis Journal.

Long before the advent of the
 United States into the big war the
 food question was a serious one in
 this country and prices of food prod-
 ucts had reached a point where
 many items were virtually out of
 the reach of thousands of our people.
 Undoubtedly, the shipments of
 great quantities of food to the Allies
 and unfortunate Belgians had much
 to do with this condition. It is also
 certain that the greed of dealers in
 supplies has been responsible for a
 large share of the excessive prices.
 Now that our country is one of the

Allies and must help them gain a
 complete victory in every way possi-
 ble, which means not only with
 men and munitions as far as neces-
 sary, but also in the furnishing of
 food, the situation in the United
 States becomes far more critical
 than in the past, and famine is
 more threatening than the invasion
 of hostile armies.

Every effort is being made to
 awaken the American people to a
 realization of the situation. An ap-
 peal has gone forth for the planting
 of every available foot of ground,
 not only by farmers, but by city
 dwellers as well. This is just as im-
 portant at the present time as the
 raising of a great army and navy.

And with the fine rains that are
 now falling everyone can plant some-
 thing, especially later in the season.
 Be sure and plant a few sweet pota-
 toes for they are easily raised and
 will bring good prices.

Mr. Albert Williamson, in the
 last issue of his paper, the Jackson
 ville Floridaian, prints entire the re-
 cent lecture of Mr. Alexander Gram-
 ham Bell, inventor of the telephone,
 before the graduating class of the
 McKinley Training School.

It is a wonderful production, and
 should be read by very scholar in-
 terested in physics and chemistry,
 and, indeed, by all persons interested
 in the problems awaiting solution,
 and which must be solved by those
 who are to take our places.

This great inventor tells in a most
 interesting manner of our progress
 from candles to electricity; from the
 hobby horse to the motorcycle; from
 the open water pail to the thermos
 bottle; from the ox to the auto.

And yet inventions are still in
 their infancy. In the revelations of
 nature's hidden mysteries we are yet
 not beyond the vestibule.

It is very certain that in the no
 distant future we shall utilize the
 rays for heat and power and shall
 cool our houses in the summer time
 with frozen air, as we now heat them
 in the winter time with hot air.
 Indeed, the great inventor seems to
 think that our cities will be artifi-
 cially heated and cooled. This will
 add to the comfort as well as the
 health of the population.

It is safe to say that the world
 will become a paradise regained.

This paper believes that we shall
 have universal peace. That instead
 of depending on wood, coal and oil
 for purposes of heat, power and il-
 lumination, we shall utilize the waves
 of the sea and the rays of the sun.

As cities are now artificially light-
 ed, in the future they will be arti-
 ficially heated and cooled. Good
 roads will become universal all over
 the world, and travel on sea and
 land, in the air and, under the sea
 will be cheap and comfortable, and
 all forms of labor in shop, kitchen
 and field will be done by electrical
 machinery, and living will be almost
 like it is in heaven.

The sinfulness of sin will be largely
 blotted out; pensions will be granted
 to the aged of both sexes and there
 will be a greater and more even dis-
 tribution of wealth and happiness.
 What has already been accomplish-
 ed is only the beginning of pre-
 paredness for the greater blessings
 of the future.

Increase Poultry Products

E. E. Richards, President of the
 American Poultry Association says:
 "For fear that there may be a
 cry for bread in this blessed United
 States let each of us do our bit.
 Every citizen with a flock of poultry
 in the back yard, every farmer with
 his flock of turkeys, ducks, geese or
 chickens should continue his hatch-
 ing during the months of May and
 June.

We must produce more poultry
 meat than ever before to help sup-
 ply the great shortage of food that
 seems inevitable. With poultry we
 have a means of supplying the most
 desirable—the cheapest and quick-
 est meat product of any other source
 of meat supply.

The wonderful agricultural re-
 sources of the United States, in
 these war times are going to be
 taxed to the uttermost, for in addi-
 tion to supplying our home demands
 we shall be called upon to aid in
 supplying food to millions of suf-
 fering humanity in the world's tor-
 n and stricken war zone. Remember
 our friends in the trenches. Let us
 each do our bit."

It is a well known fact that the
 meat supply of the United States is
 lower per capita than ever before
 in the history of this country. We
 have been urged from a patriotic
 standpoint to put forth every effort
 to increase food production along
 every line.

The American Poultry Associa-
 tion hopes to increase the nation's
 supply 100,000,000 pounds. Even
 this is less than one pound addi-
 tional for every man, woman and
 child in the United States.

Florida consumes annually \$10,-
 000,000 worth of poultry products—
 she produces only \$4,000,000. Let
 us be patriotic enough to produce
 at least the products for home con-

sumption. Unless we increase the
 production of meat for home con-
 sumption, meatless days are ahead
 of us. This is of necessity true, not
 only because of the shortage of the
 meat supply in this country, but be-
 cause of the prevailing high prices of
 meat and of the fact that as high as
 their prices are now, they have not
 yet reached the maximum. As an
 example of what we may expect,
 experts tell us that the solution of
 the mathematical problem: Present
 prices, plus cost of storage and
 handling will be egg: 12 1.00 per
 dozen during the coming winter.

Poultry offers the quickest meth-
 od of meat production. At this date
 it is necessary to produce poultry
 for meat only, as the lateness of the
 season precludes the possibility of
 hatching stock for early laying.
 Keep up the hatching during every
 month for the meat supply; but in
 case hatching is discontinued mar-
 ket all surplus males, as they be-
 come only additional expense.

Do Not Kill a Laying Hen

Recently there has been a great
 cry of costly poultry feed. On
 farms the production of poultry is
 largely a by-product. Every farmer
 should produce feeds now for next
 winter's consumption. At this sea-
 son of the year, poultry consumes
 bugs and insects which usually
 menace the farmer's crops. These
 bugs and insects furnish one of the
 most valuable and expensive ele-
 ments of the feed supply, viz pro-
 tein, which is so necessary in their
 ration. Poultry will eat all seeds
 weeds, grass, scattered and wasted
 grains after harvest, and under farm
 conditions produce the cheapest of
 all products.

Economical production in city,
 suburban or town lots, utilize the
 food waste ordinarily unavoidable in
 the family kitchens. Town folks
 are urged to keep a dozen hens in
 the back yard. Feed them the
 table scraps, lawn clippings and gar-
 den waste.

Extra precautions should be
 waged against all poultry pests.
 Curtail the big loss that each year
 takes many of the chicks hatched.

Special bulletins on poultry issued
 by the Division of Animal Industry,
 U. S. Department of Agriculture,
 may be had free by writing the
 Home Economics Department of
 the Florida State College for Wom-
 en.

More food this year is patriotism.
 President Wilson, in a recent pro-
 clamations declares that one of the
 three necessities for the successful
 conduct of our war is food, and as-
 serts that those who aid in increas-
 ing the food supply of whatever kind
 are responding to the vital needs of
 the nation.

If you are not included among the
 number for enlistment, do your bit
 in the poultry yard.

The Satisfaction of Saving.

Among all material pleasures there is
 none so great as that which springs
 from a store laid by for future wants,
 especially for the needs of those for
 whose well being you have become re-
 sponsible. And when you have gath-
 ered that store by steadfastly refusing
 thriftless self-indulgence you have a
 satisfaction that outweighs and out-
 lasts all fleeting joys. I speak from
 my own experience, and I can call to
 witness the thousands of others who
 have traveled the same road.

Strictly speaking, all mere luxury is
 waste. But there may be and often is
 wanton wastefulness in luxury when
 a reasonable indulgence in it might be
 justifiable. That is certain to react
 most harmfully on soul, mind and body.
 It is not the accumulation, but the
 waste and misuse of wealth, that
 makes men decay.—Judson Harmon in
 Youth's Companion.

Poisons in the Stomach.

A most curious fact is that all food
 contains the elements of poison, and
 in our body poisons are manufactured
 from these. For instance, meat, fish,
 cheese and milk are composed of hy-
 drogen, carbon, nitrogen and oxygen.
 Take away the last and you have prus-
 sic acid. We do not manufacture
 prussic acid, it is true. But in every
 stomach in the world fermentation
 goes on just as in a brewery, and the
 poisonous carbonic acid is made in
 large quantities. If you breathed a
 few days' output of carbonic acid gas
 you would inevitably die. Sulfureted
 hydrogen is one of the most deadly
 gases known, yet in every stomach it
 is made at one time or another. In the
 stomach all food is converted into
 what we call "peptone," and if a very
 small quantity of this found its way
 into the blood it would kill as surely
 as prussic acid.—Pearson's Weekly.

To Waterproof Tents.

Here is the way to waterproof cloth:
 Dissolve ten pounds of rosin in four
 gallons of hot linsed oil. Pour into
 a tub to which a wringer is attached.
 Pass the cloth through the hot oil and,
 as soon as well soaked, through the
 wringer. Spread on fence or ground
 immediately until thoroughly dry. Dry-
 ing may take a week or more. This
 solution will treat about fifty yards of
 cloth.

For waterproofing a tent Nessuk in
 his "Woodcraft" gives this recipe,
 which he says is excellent: To ten
 quarts of water add ten ounces of lime
 and four ounces of alum. Let it stand
 until clear. Fold the cloth or tent snugly
 and put it into another vessel, pour

the solution in and let it soak for
 twelve hours, then rinse in lukewarm
 rain water. Stretch and dry in the sun.

Sleep and Dreams.

The brain is more active while en-
 gaged in dreaming than when not thus
 engaged. The only perfect sleep is
 that which is dreamless. The moment
 the sleeper begins to dream he begins
 to work, and the more vivid and pro-
 tracted the dream the more intense,
 naturally, becomes the work. It is
 possible that at no time during the
 waking hours of life is the brain ac-
 tive as it is in the strange business
 of dreaming.

He Is That.

The man who never did anything is
 always Johnny-on-the-spot when it
 comes to telling others how things
 should be done.

Inventor Hanson Cab.
 The inventor of the "Hanson cab"
 was Joseph Aloyisus Hanson, who was
 born in New York in 1803 and died
 in London in 1882. He registered his
 "patent safety cab" in 1834 and his
 name received only \$1,500 for his in-
 vention.

The Way of It.

"A waitress, like a poet, is born to
 her work." "How do you make that
 out?" "Because she is one mind to
 order."

Migrate Long Distances.

The Arctic tern holds all records for
 length of migration. When the young
 are full grown the entire family leaves
 the Arctic regions and several months
 later is found skirting the edge of the
 Antarctic continent.

It Spurs Men to Energetic Efforts

"I use the Long Distance Telephone constantly. It speeds up my business and spurs the other men to action because they are brought face to face with me.

"The cost is nothing as compared to the effective results. One telephone message accomplishes more than five letters for me and both customers and salesmen feel as though they have paid a personal visit to the office.

"We have adopted the practice of calling delinquent customers on the Long Distance Telephone. It's more effective than a letter or visit from a salesman. We have improved our collections wonderfully by a judicious use of the Long Distance Bell Telephone."

Every Bell Telephone is a Long Distance Station.

Make A Fireless Cooker

A homemade fireless cooker may be very successfully used provided it is well made; that is, the packing thoroughly done. The fact that the cooking done with the fireless cooker is accomplished entirely by heat retention is well known by all. The principal feature, then, in their construction is the packing of the box, holding the pocket in which the vessel containing the boiling food is placed, with something which is a nonconductor of heat, and to take great pains that the packing may be carefully and well done.

There are many different materials which may be used for the packing, says Miss Agness Ellen Harris of the University of Florida extension division. Hay, excelsior, paper, cork such as is used around shipping grapes, and asbestos, are some of them. A wooden candy pail, lined with asbestos or several layers of newspapers, an empty lard can with close fitting cover of such size as to allow a space of three inches for packing at side, bottom and top, and a solid packing in the space will make a very satisfactory cooker.

There should also be a cushion made of muslin filled with paper to place over the top of the pocket between it and the wooden cover to the pail. With such a cooker the long, slow cooking required by cereals and tough meats may be accomplished with much less fuel than without its aid.

It is a little more difficult to make a fireless cooker in which bread or pastry can be baked, for the insulation must be better and the use of a radiator or hot plate must be provided for. But the cooker as described will do much toward keeping the kitchen at a living temperature during the hot weather.

What's the Price of Eggs?

The price of eggs fluctuates, it is going up along with feed prices. Flocks are being reduced, which will react to send eggs higher. Some people predict egg prices at a dollar or more a dozen. Prices reported from Europe are almost unbelievable. No one can tell what the prices of eggs and poultry will be next fall and winter.

Whenever eggs have reached sixty cents a dozen in the United States, the last few years, egg boycotts have started. If eggs should go to predicted high prices it is not possible to say what the demand would be, but at such prices it is likely to be limited. However, it is not likely that eggs will become a drug on the market at any price.

This trend of eggs prices would indicate that it is well for Florida farmers to raise good flocks of layers regardless of present high feed prices. Grass and greens are plentiful and can be used liberally in reducing the cost of production. It is a little difficult to carry late hatched chicks through the rainy season without some losses, but Florida's mild climate should encourage the hatching of chicks the year round. Prices for them this year will offset some of the losses.

A new bulletin, Poultry in Florida has just been issued by the University of Florida extension division setting forth the principles of successful poultry production in this state. The bulletin will be sent free to any address.

Take care of your farm machinery. Implements are going up too. Don't try to raise hogs on an all-grain ration, nor on an all-forage ration. Neither is profitable. Mix them up. Your county agent will tell you how.

Get Some Bees to Help

Everyone is being urged to plant ground to some crop to increase the food supply. In keeping with that general plan do not overlook bees. Each colony of bees, if properly handled will give you one hundred pounds of comb honey. Honey is a valuable food. It can be used as a spread for bread, taking the place of butter. In cooking many things, such as cakes and muffins it can be used in place of sugar.

Get some bees to help increase the food supply. Wilton Newell, State Plant Commissioner, with headquarters at the University of Florida will help you solve your bee problems.

Florida teachers realize the need of preparedness. A goodly number of them are in attendance at the University of Florida summer school for teachers.

There is more profit in the well bred hog that matures quickly at a

medium weight than there is in one that matures slowly or is fed for a year to make a heavy weight.

If you can't eat it, can it. That is the slogan of the University of Florida extension division, and it should be adopted by every family in the state.

There is absolutely no danger of an over production of food this year. Grow what you can, the market is waiting.

WATERWAYS IMPORTANT AS FLORIDA GOOD ROADS SAYS SANFORD COMMITTEE

Continued From Page One

of Florida, with connections via Salt Lake and Titusville, via St. Johns and Ocklawaha and via Lake Okeechobee and the East Coast, and desirable tributaries.

Resolved, further, that a committee of seven be appointed, with full power to execute the will of this meeting and with power to add special members for technical consultation and to appoint representatives for each county in the district, who shall act on the instructions of the committee as chairman of local committee. The committee shall have power to fill any vacancies in its membership.

This central committee shall act under the following specific instructions:

A. To secure the official endorsement and support of Boards of Trade and other organized civic bodies and of the legislative representatives of the counties to be embraced within the district, for the furtherance of necessary legislative action and for securing the influence of public opinion favorable to the establishment of a Navigation District.

B. To solicit and collect funds for necessary expenses.

C. To collect and obtain engineering data and financial and commercial statistics.

D. To engage such engineering and legal services as may be necessary.

E. To present a bill to the legislature at its next regular session providing for the creation under a special act of said Navigation District.

These resolutions being enthusiastically adopted, the meeting adjourned to Hotel Carnes where your committee, under the auspices of Sanford Board of Trade had arranged for a banquet in honor of the visiting delegates. At close of the feast, a further business session was held, and a Central Committee elected, with C. R. Walker of Sanford chairman, the other members being B. H. Wilson of New Smyrna, E. F. Keel of Winter Park, A. L. White of Ft. Myers, C. G. Ware of Leesburg, M. A. Kilvert of Kenansville and P. A. Vans Agnew of Jacksonville.

This Central Committee met in Orlando on March 26 last and named the several county committee chairmen as follows:

Duval County, W. A. Bours, Jacksonville.
St. Johns county, F. M. Holmes, St. Augustine.
Seminole county, E. T. Woodruff, Sanford.

St. Lucie county, P. C. Eldred, Ft. Pierce.

Orange county, M. O. Overstreet, Orlando.

Osceola county, John M. Lee, Kissimmee.

Dade county, Williams Jennings Bryan, Miami.

DeSoto county, Ed. Scott, Arcadia.

Clay county, J. S. Smith, Green Cove Springs.

Putnam county, H. M. deMontmollin, Palatka.

Volusia county, David Sholtz, Daytona.

Marion county, E. C. Chambliss, Ocala.

Lake county, Gilbert A. Leach, Leesburg.

Brevard county, B. C. Edwards, Titusville.

Palm Beach county, J. M. Burguires.

Broward, Will J. Reed, Ft. Lauderdale.

At this meeting, Mr. Vans Agnew was authorized to draft a bill for consideration of the committee and subsequently to be introduced if approved, for legislative action. Mr. Vans Agnew, accordingly drew a bill, but instead of submitting it to the committee as expected, at once introduced, or rather had it introduced in both the senate and the house. The measure did not pass, and in its present form your com-

mittee is glad it did not. Mr. Vans Agnew explains that he was well aware that THIS legislature would not give the bill the consideration due such provision and that he knew it would not pass, and as time was short he thought it best to get it introduced and on record "so as to afford some substantial basis for the educational campaign and the co-operative organization which we propose to undertake during the next two years, preparatory to submitting a final bill properly supported by the people and completely presented by the committee to the legislature of 1919. In the meantime we can be guided by the course of the war and other events necessarily bearing upon the practical and financial features of a great constructive project of this kind." Your committee greatly regrets, however, the waste of time that a two years' wait involves, although as gigantic improvements come slowly, this may not in the long run prove as serious a hindrance as it would now appear. At all events the committee will now have ample opportunity to consider, discuss and carefully prepare a wise and judiciously worded bill for the hoped for enactment of 1919.

It may be pointed out that one of the changes which our friend, Mr. Vans Agnew took upon himself to make in the bill presented but not acted upon was the omission of the Kissimmee river and Osceola county, also the Ocklawaha river and Polk county, for the reason that the representatives of these counties were understood to not favor the measure. Your committee doubts whether the residents of these counties will want it that way, and the two years before us will afford time to ascertain public opinion and wish in the matter.

As an item of information, we will state that from the Tax Commission report of 1916 we learn that the assessed value of real estate in Florida is \$207,105,741, and of personal \$52,419,248. While, leaving out the counties of Osceola and Polk, the assessed value of the real estate in the proposed Navigation District is \$100,562,722, and of the personal \$16,959,692, from which it will be seen that the value of the district real estate is nearly one-half of that of the entire state, and the value of the personal in the district is nearly one third of the entire state. Mention of this is merely made to show how insignificant the tax or burden would be even supposing a considerable amount of money had to be raised, which, however, is not supposable, the Federal Government undoubtedly assuming and carrying forward the work when once it was zealously inaugurated, and the whole people behind it.

Unqualified, it is the work of your committee that instigated the appeal to Attorney General West to use his official prerogative of compelling decision as to whether a company could enter into contract with the state, collect payment from the state, never properly complete their work and thereafter not even attempt to fulfill their contract in respect to maintaining a navigable canal, and adding insult to injury as it were, seek to sell for good money to the Government, that for which they have already been well paid, thus double collecting and disgracefully shirking. As we all know, the Supreme Court last month rendered decision that the State of Florida having conveyed to the East Coast Line Canal and Transportation Company more than 1,000,000 acres of land upon agreement of the Company to maintain a canal not less than five feet deep and thirty feet wide, there is no alternative short of legal recourse that can relieve the Company from performing its stipulated obligation. The suit instituted by Attorney West, resulting as above is the outcome of the personal agitation of the chairman and secretary of your committee, bestirring petitions and appeals such as the Attorney General could not do otherwise than take cognizance of and act upon. It now remains to be seen how strictly to account the Canal Company will be held, but at all events the point has been gained. General West says, "With the principles contended for settled in our favor, we ought to be able to secure substantial results without much further delay and the canal should be put in condition for general use within the next few months."

At the last meeting of this association held in Orlando, March 22nd, Mr. President and Brother Good Road Boosters, Member of the State Highway Association, Mr. F. O. Miller spoke eloquently of the utility of good land roads in military preparedness, and, if you recollect, President of Valley Good Roads Association, C. H. Cook of Massachusetts, most forcibly set forth the importance of water roads right along with our improving land roads, showing the cost of transportation and hauling over poor roads so greatly reduced by good roadways, and the vastly least cost of all over water roads. All of us who heard those addresses, and as we read and think

daily are impressed with the prime importance of improved water roads, as President Cook says, "Right along with improved land roads, and we wish to express our gratification that this association recognizes and with all of its splendid force fosters both."

The most formidable obstacle to progress that immediately confronts us, is the attitude of certain members of the legislature, gentlemen by the way whom we should confidently expect to find and did they truly represent their districts we certainly should find foremost in enthusiasm for and efficient in aid of this public need and manifest state and national asset. Standing for progress and land and water road improvement as this influential and executive association does, your committee calls attention to this unfortunate representation, or rather misrepresentation, and requests that the membership of this honorable body use every effort to see that in future nominations and elections to our legislative halls shall be confined to men absolutely and unquestionably committed to development and progress, men who are capable of looking beyond the present time into the far future and can and do measure up to the requirements that Florida's magnificent up-building in the years to come imperatively demands of today's foundation laying. Waterways and driveway improvement and sentiment are manifest on every hand, and the Central Florida Highway Association in its officers and membership is a most potent power in stimulating enthusiasm and accomplishment.

Respectfully,
W. C. R. Walker, Chairman.
E. T. Woodruff, Secretary.

You Must Cure Yourself.
I do not care how many licensed physicians there are in the world; I do not care how many drugs and how many drug stores there may be in the town; I care not how many schools of medicine there may be. I say unto all you persons who are sick and ill that you will never be cured by licensed medicine. The doctors never will and never can cure you. Drugs never cure. You must cure yourself. And if you have not the will power and the courage to reform the conduct that made you ill you are already a goner. Nothing can aid you, not even nature. "Medicinis sanatur, natura curat." This is the Latin of the medical schools. The doctor sanitates, but nature alone can cure. And nothing in nature can cure you but your own conduct—by reformation, by resorting to the right food and the right drink.
It is up to you whether you are to be an invalid all your life or a well man—a well woman.
It is a question of personal morals, individual ethics—C. F. in Los Angeles Times.

War and Human Nature.
Referring to the oft repeated claim that there can be no such thing as universal peace, because war is a phase of human nature—that men always have and always will fight, Dr. Frank Crane thus speaks: "War, human nature! Yes, as leprosy is human nature, or tuberculosis, or epilepsy, or homicidal

madness! As Gemons in hell, in human shape, are human beings." The idea that men of sense will justify war because it is human nature would fit them for the lunatic asylum. And then the doctor goes on to say: "Give human nature a chance. Let the people manage their governments and war will speedily cease forever."

And that's true too. It is deplorable the way some people will blame human nature for war. By that argument every crime could be justified. — Ohio State Journal.

Try It, if You Have Time.
If multiplied by two, three, four or any other integer less than nine, the number 1,174,170,588,235,294 will produce the same digits in the same order, simply beginning at a different place in the set.

Gone Up In Smoke.
We hereby leave a sigh for the young fellow of the future who fondly refers to "the cigarettes like mother used to roll."

Obey Nature's Laws.
Illness and sickness come through neglect or refusal to obey Nature's laws of health. It is the penalty she imposes for disobedience. The wise will learn and observe her laws. Then drugs and cures will not be needed.

Why Ammonia Cleans Clothes.
Ammonia, the great spot remover of the American people, is really a gas dissolved in water. It belongs to the alkali family, and on account of its mineral origin is the foe of all oils and grease, which explains the easy way it disposes of spots that soap and water cannot affect. Bath ammonia is a fine cleanser.

To Be Remembered.
We sometimes need to remember that it takes some shadows to bring out the richness and beauty, and humanness of life, as well as of pictures.

No Doubt of It.
When a bachelor declares that he is wedded to his profession it's doughnuts to fudge the right woman can make him commit bigamy.

The Wise Man.
"He is a wise man who does not grieve for the thing he has not, but rejoices for those which he has." — Epictetus.

These Are Necessary.
It doesn't require much common sense to steer an automobile, but a great deal of faith, hope and charity is necessary.

Coronado Beach

1-2 Hours Drive From Sanford, Over New Lead Via Osteen

MUST SELL IMMEDIATELY

FIVE ROOM HOUSE
With out buildings and chicken coops. 2 lots 50x100. Good well of water. Shade trees. Ideal place to raise chickens, children and garden. Good view of Ocean. Central location. Have a home of your own. Free and clear of all incumbrances.
PRICE \$500
